The Standard was established in 1825.
The first division of profits took place in 1835; and subsequent divisions have been made in 1840, 1845, 1850, and 1855.
The profits to be divided in 1860 will be those which have arisen since 1855.
Accumulated fund £1,634,598 2 10
Annual revenue 289,231 13 5
Annual average of new assurances effected during the last ten years, upwards of half a million sterling.
WILL. THOS. THOMSON, Manager.
H. JONES WILLIAMS, Resident Secretary.
The Company's Medical Officer attends at the office daily, at half-past one.
LONDON, 82, King William Street, E.C.
EDINBURGH, 3, George Street (Head Office).
DUBLIN, 66, Upper Sackville Street.

UNDER THE ESPECIAL PATRONAGE OF
HER MOST GRACIOUS MAJESTY THE QUEEN,
AND
FIELD-MARSHAL
HIS ROYAL HIGHNESS THE PRINCE CONSORT,
K.G., K.T., K.P., G.C.B., & G.C.M.G.

THE ROYAL NAVAL, MILITARY, AND EAST INDIA LIFE ASSURANCE SOCIETY,
Established A.D. 1837, for General Assurance on Lives,
13, WATERLOO PLACE, LONDON, S.W.

DIRECTORS.
Lieut.-General Sir Frederic Smith, K.H., M.P., F.R.S., Chairman.
James Frederick Nugent Daniell, Esq., Deputy-Chairman.
Gen. Edw. Wynyard, C.B.
Archibald Hair, Esq., M.D., late Royal Horse Guards.
Wm. Chard, Esq., Navy Agent.
Maj. William Lancey, R.E.
Gen. H. G. A. Taylor, C.B.
Wilbraham Taylor, Esq.
Lt.-Col. F. S. Sotheby, C.B.
Gen. Sir George Pollock, G.C.B.
Rear-Adm. Michael Quin.
Vice-Adm. Sir G. R. Lambert, K.C.B.

ASSURANCES are granted upon the lives of persons in every profession and station in life, and are extended to Tropical and other Climates, on conditions more favourable (especially to the NAVY and ARMY) than heretofore have been deemed practicable.
WILLIAM M. JAMES, Secretary.
13, Waterloo Place, London, S.W.

ST. GEORGE ASSURANCE COMPANY,
118, PALL MALL, LONDON, S.W.
CAPITAL, 100,000*l.*, in Shares of 5*l.* each.
Chairman—Henry Pownall, Esq.
Deputy Chairman—Henry Haines, Esq.
The leading features of this office are—Every description of Life Assurance on the most favourable terms.
The Assurance of Defective Titles, thereby restoring the property to its full value.
Endowments for Husbands, Wives, or Nominees.
Endowments for Children on attaining a certain age.
Annuities of every description granted on terms peculiarly favourable.
Notices of Assignments of Policies Registered.
Medical Referees paid by the Company.
Age of the Life Assured admitted on all Policies, on reasonable proof being given.
Stamp Duties on Life Policies paid by the Company.
Loans on Real or Personal Security, repayable by monthly or quarterly instalments, from one to five years.
For further particulars, Forms of Proposal and Prospectuses, apply to F. H. GILBART, Secretary.

THE PECULIAR ARRANGEMENTS of the LIFE ASSOCIATION OF SCOTLAND confer facilities and privileges on the Policy-holders which, it is believed, CANNOT be obtained from any other Assurance Office.
FREEDOM FROM RESTRICTIONS.—The Policies now being issued are unusually free from Restrictions (as commonly imposed by other Companies), and confer important privileges. These relate to Non-payment of Premiums—Indisputability—Limits of Residence and Occupation—Military and Naval Service, &c.; and afford, in most cases, almost complete protection against forfeiture.
SAFETY AND PERMANENCE.—The Association, now of Twenty-One Years' standing, is one of the most extensive and successful Life Offices, and thus possesses an element of safety and permanence not contained in smaller institutions. The Annual Income is now 160,000*l.*
RISKS OF PARTNERSHIP.—The Policy-holders are wholly exempt from the Liabilities of Partnership, and the Sums Assured are guaranteed.
PROFIT SCHEME.—A Share of Profits is allocated yearly to every Policy-holder of five years' standing at the preceding annual balance, and is applied so as to reduce the present outlay for his Policy.
HALF-CREDIT SYSTEM.—Policies of 500*l.* and upwards may be effected and kept up by payment of only one-half the Premiums for the first six years, with Interest on the other half. THOS. FRASER, Res. Sec.
London, 20, King William Street, City, E.C.

INDIA.—OFFICERS IN THE ARMY AND CIVILIANS PROCEEDING TO INDIA, may insure their lives on most favourable terms in the MEDICAL, INVALID, AND GENERAL LIFE ASSURANCE SOCIETY. The rates of this Company, which transacts the business of the Indian Banks, are lower than those of any other Office, while the Agencies at Calcutta, Madras, Bombay, Ceylon, and about 50 up-country stations in India, afford every possible facility for the transaction of business.
Prospectuses, Forms of Proposals, and every other information, may be obtained of the Secretary, at the Chief Office, 25, Pall Mall, S.W.
C. DOUGLAS SINGER, Secretary.

OFFICERS PROCEEDING ABROAD can effect Assurances with THE COLONIAL LIFE ASSURANCE COMPANY on favourable terms.
LOANS GRANTED.
LONDON { 81, Lombard Street, E.C.; and at Messrs. Paris & Co., 10, St. James' Street, S.W.
EDINBURGH, 5, George Street.
DUBLIN, 65, Upper Sackville Street.

THE MUTUAL LIFE ASSURANCE SOCIETY, 39, King Street, Cheapside, E.C.—A.D. 1834.—The TWENTY-SIXTH ANNUAL REPORT, Cash Account, Balance Sheet, &c., are now ready, and may be had on written or personal application. CHARLES INGALL, Actuary.

THE OPERA COLONNADE HOTEL (LATE FEUILLADE'S),
Charles Street, St. James's, London, S.W.
IMPORTANT CHANGES having been made in the Direction, visitors to London are respectfully informed that they will find every comfort, cleanliness, and convenience, at this magnificent Establishment, which is conveniently situated to all parts of town, and is in close proximity to the Court, Houses of Parliament, Clubs, Theatres, &c.
Particular attention is given to the Cuisine, and the Wines and Spirits are of the highest class.
The charges are extremely moderate, a tariff of which will be forwarded on application.

CAFE RESTAURANT DU QUADRANT (AND HOTEL), 62, REGENT STREET, W.
Private Rooms for Parties. Wedding Dinners, Soirées, and Hampers for the Races provided.

C. SPIKINS & Co., Sole Agents for London, 9, Duke Street, Portland Place, W.

CYDER AND PERRY IN THE GREATEST PERFECTION.—Devonshire Cyder, 3*s.* qrts., 4*s.* 6*d.* pts.; Cockagee Somerset Cyder, 14*s.* qrts.; Old Field Perry, 18*s.* qrts., 10*s.* pts.; the real Taynton Squash Perry, 25*s.* qrts., 15*s.* pts. Hampers and bottles, 3*s.* per dozen extra, or can be returned at 2*s.* BENJAMIN VICKERS'S Stores, Hay's Lane, Tooley Street, S.E., and 8, Spring Terrace, Wandsworth Road, S.—Post Office Orders, 196, Tooley Street, S.E.

COVENT-GARDEN MARKET.—To Clubs, Hotels, and large Establishments.—PULLEY & SON are confident the above would effect a great saving by having their supply of FRUIT and VEGETABLES fresh every morning from their Wholesale and Retail Warehouse, Centre Avenue, Covent Garden and Farringdon Markets. Wedding Bouquets provided. Country orders punctually attended to. A list of prices forwarded on application. Carriage free to any part of town.

ICE, and REFRIGERATORS for preserving Ice and cooling Wine, Butter, Cream, Water, Jellies, and provisions of all kinds, manufactured by the WENHAM LAKE ICE COMPANY, now removed to 140, Strand, W.C., of the best make and at the lowest cash prices. No agents are appointed in London for the sale of the Company's Ice or Refrigerators. Pure spring-water Ice, in blocks, delivered to most parts of town daily, and packages of 2*s.* 6*d.*, 5*s.* 9*s.*, and upwards, forwarded any distance into the country by "goods" train, without perceptible waste. Wine-coolers, Ice-cream Machines, Ice Planes for shavings, freezers, moulds, &c. Detailed printed particulars may be had, by post, on application to the WENHAM LAKE ICE COMPANY, 140, Strand, London, W.C.

SEQUELIN'S OIL.—This Vegetable Preparation is most successful as an instantaneous restorative, strengthening weak hair, opening pores of the skin, most effectual in the growth of hair, eyebrows, whiskers, moustaches, &c., preventing its falling off, curing the scurvy, giving also brightness, softness, and keeping its natural colour, and checking the most obstinate baldness in two months. One bottle is sufficient. Price One Guinea; the money returned if not effectual. Sold by the Inventor, SEQUELIN, 9, Wharton St., Lloyd Sq., W.C., London. The most successful factory testimonials and references on application.

VOLUNTEER RIFLE CORPS.—NOTICE. In consequence of the heat and fatigue experienced by gentlemen after exercising and review, many have been induced to try OLDRIDGE'S BALM OF COLOMBIA, which invariably has produced such a peculiar refreshing coolness to the head, that it has become a most valuable toilette requisite. It also nourishes and strengthens the roots and body of the hair, prevents it falling off or turning grey, and causes a beautiful appearance, with wave or curl, at the same time cleansing it and removing the scurf. 30 years' celebrity has proved there is no wash equal to it for improving and producing new hair, whiskers, and moustache. Price 3*s.* 6*d.*, 6*s.*, and 11*s.* per bottle. Wholesale at C. & A. OLDRIDGE'S, 22, Wellington Street, Strand, W.C.

THE RIFLE VOLUNTEER'S COMPANION, specially adapted to the probable Requirements (Medical and Surgical) of Her Majesty's Volunteer Forces, on the Field, the Practice Ground, or the March. Designed and arranged by SAVORY & MOORE, Chemists to H.M. Army, &c., No. 143, New Bond Street, London, W.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Gloves and Belts*),
172, NEW BOND STREET, LONDON, W.,
And Sold by all respectable Chemists throughout the Empire.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

BY HER MAJESTY'S ROYAL LETTERS PATENT. (GRANTED 1860.)

MR. A. ESKELL, SURGEON DENTIST, 8, Lower Grosvenor Street, W., Sole Inventor and Patentee of an Invention which has for its object the Perfect and Painless Adaptation of ARTIFICIAL TEETH upon a novel principle, whereby one set of teeth lasts a lifetime, and a second, or reserve set, is unnecessary. Changes take place in the mouth from absorption of gums, removal of stumps, teeth, &c., and ordinary sets would, under these circumstances, be comparatively useless, or only rendered available at some cost, but upon Mr. Eskell's patented process they are not impaired in the slightest degree. Residents abroad or in the country have it in their power to adjust their artificial teeth at all times without the aid of a dentist. Mr. Eskell does not grant licences to use his patent, which can only be obtained at his residence, 8, Lower Grosvenor Street, where the medical profession, the nobility, gentry, and the public may see specimens, and obtain every information. Teeth stopped, &c. All consultations free.—8, Lower Grosvenor Street, S.W.; and Bennett's Hill, Birmingham.

SAVARESSE'S PATENT FLEXIBLE CAPSULES, by which Castor Oil and nauseous Balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with Gelatine. These Capsules may be obtained of BELL, 338, Oxford Street, W.; SANGER, 150, Oxford Street, W.; HOOPER, Pall-Mall East, S.W.; KEATING, St. Paul's Church Yard, E.C.; and medicine vendors throughout the kingdom.

EVANS & LESCHER, London, Patentees.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

Avoid counterfeits and base imitations.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

THOMAS WILSON'S BREECH-LOADING RIFLE.

Mr. Thomas Wilson begs to call the attention of the public to his new BREECH-LOADING RIFLE, and to state that he has committed the working of the patent to Messrs. Rabone, Brothers, & Co., of 47, Broad Street, Birmingham, to whom all inquiries or other communications may be addressed.

This Rifle is well adapted for all branches of Her Majesty's Service, and is pronounced by the highest authorities to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—

1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.

2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.

3rd. It is easy to manufacture, and can be made entirely by machinery.

4th. It is so constructed that accident from careless loading, or otherwise, is impossible.

5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly, for firing, without the aid of tools. This facility would be occasionally valuable in rendering the Gun useless to an enemy, or to mutinous troops.

6th. The action is always in good order, requiring no adjustment in use.

7th. The action is equally applicable to single and double-barrel Guns, and may be used for sporting as well as military purposes.

8th. The principle can be applied to all ready-made Enfield guns, at an immense saving to the country.

Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.

A pattern may now be seen at Mr. Lancaster's, No. 151, New Bond Street, W.; and at Mr. Pritchett's, No. 86, St. James's Street, London, S.W.; as well as at Messrs. Rabone, Brothers, & Co.'s, 47, Broad Street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 568 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60s. per 1000; blank, 33s. per 1000.

Manufactured by THOMAS H. ANTHONY, 37, Broad Street, Birmingham.

ELEY'S AMMUNITION, comprising WIRE CARTRIDGES for killing game at long distances, WATERPROOF PERCUSSION CAPS, GUN-WADDINGS, BREECH-LOADING CARTRIDGES, and every description of Sporting and Military Ammunition.—ELEY BROTHERS, Sole Contractors to the War Department for Jacob's Rifle Shell Tubes, Cartridges and Caps for Colt's, Adams', and other Revolvers; Enfield Ammunition, &c.; Gray's Inn Road, London, W.C. Wholesale only.

☞ *The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included. Post-office orders to be made payable to* ARCHIBALD GRAHAM.

WE heartily congratulate the officers of the Navy upon the modification which has been made in the new scheme of Naval Retirement. Mate's time (which we mentioned last week was probable) is to be allowed to count after the first two years. We do not know whether this time is to be allowed to all officers, whatever their other services may be; but at any rate, whatever may be the details, mate's time is not to go for nothing; and we trust, therefore, that our correspondents "who have served with Nelson," "Blue Jacket," and others, will now be satisfied, and admit the wisdom of the advice we ventured to give upon this subject some time ago, namely, to accept what was then offered, as an instalment at least, and not go on rejecting everything. It should also be borne in mind, that neither the present nor any recent Board of Admiralty is answerable for the state of things as regards the numerous officers necessarily left unemployed since Trafalgar. The question is, What prospects does the scheme hold out for the future retirement of officers! and how does it affect the Active List now? We shall have three immediate promotions to the rank of Captain, R.N., (equal to Colonel in the Army), and 18 to the rank of Commander; while hereafter "the state of the Lists of Captains, Commanders, and Lieutenants will admit of a promotion in every vacancy, instead of only one in three as at present."

We find that the Board of Admiralty, by a recent Circular, have also conferred another boon upon naval officers, in allowing them, after 1st October next, to be paid a portion of their full-pay every month, in order to meet their mess expenses and other current expenditure, and thus prevent their running into debt. This privilege will give great satisfaction, especially to the junior officers.

By the same Circular an addition is made to the amounts paid monthly to the seamen and marines on account of their wages, and the privilege of remitting to their families or for deposit in savings' banks is extended to ships at home as well as to those abroad; while in future they are to be allowed to allot portions of their wages to their wives and others, not merely at one uniform rate, as now, but at various rates, as they may judge proper. In consideration of these increased privileges, the system of "paying down" or settling the wages of the seamen in ships at home every six months, is to be discontinued; but, to prevent a complication of accounts, a regular yearly balance and adjustment of wages is to take place on the 31st of March, throughout the whole fleet; when the sailor is to be encouraged by his officers to send part of his money home to his family, if wanted, or to deposit it in the savings' banks at the ports. Only when men are discharged, or when the ship is paid-off, and the men go on long leave to visit their homes, is the balance of their wages to be paid to them. This arrangement, we presume, is intended to secure for the seamen, what some of our correspondents have stated they like, a "good pay-day." It gets rid also of the periodical unsettling of the men's minds, by paying them their wages every six months at home; and we trust we shall hear no more of disturbances about leave and anxiety to get ashore, such as occurred after these periodical payments in the *Princess Royal* and *Edgar*.

It will thus be seen that the Board of Admiralty is not idle or averse to improvement, as regards the *personnel* of the fleet. We only wish we had to record that they had also found a solution of the difficulties relating to the Discipline of the Navy, and an adequate Reserve of seamen. But it is not surprising if they are sorely puzzled what to do. Besides what is to be found in several Blue Books bearing upon the subject of Manning the Navy and Naval Reserves, every week almost brings out some new pamphlet on the subject—all more or less complicated and contradictory. We have had one recently sent to us by a "Rear-Admiral," printed for private circulation, entitled "Suggestions for the Establishment of a Permanent Reserve of Seamen," but of which by far the most important part—like the postscript of a lady's letter—is contained in the last three pages, upon Discipline. His plan for a reserve is simply a system of "half-pay" for seamen after 10 years' service, allowing the men to enter the merchant service (which short-service pensioners can do already), and to allow such service to count for pension. The difference between this plan and the present Admiralty scheme for a naval reserve is chiefly—that the "Rear-Admiral" would place on "half-pay" regularly trained men-of-war's-men, paying them their short-service pension of 6*d.* a day as a retainer, or 9*l.* 5*s.* a-year; whereas, under the present system, untrained men are paid a retainer of 6*l.* a-year, and a further cost of 6*l.* each is incurred, in providing them "with a course of drill of 22 days (not necessarily consecutive) in the year." The "Rear-Admiral's" plan professes to be based partly on the existing continuous service and short-service pension system, originated by Mr. Pennell of the Admiralty, and the plan of Vice-Admiral Martin, propounded in his recently published "Memorandum on Naval Reserves." The latter was bold enough,—namely, to give the short-service pensioners the 6*l.* retainer, *in addition* to their pension of 9*l.* a year, and as a condition, to keep them employed in the coasting trade, always ready to rejoin the Navy when required. This is intelligible, but appears to be one of those expensive schemes that never emanate from men while in office, but only when their responsibility ceases. As regards the "Rear-Admiral's" cheaper mode of securing the same men, he altogether omits to state how you are to make compulsory, without any *quid pro quo*, the service of these short-service pensioners when merely placed on his "half-pay and mercantile marine list." They would doubtless prefer remaining as they are; and we cannot now break faith with those already pensioned, or even with the 10 years' men who have entered under similar expectations. These men, too, he would allow to go upon voyages of 18 months, and not keep them at home available to man the Navy, as Admiral Martin would. The whole scheme, when you try to close your fingers upon it, vanishes and eludes your grasp, like the dreamy hand that appear under the auspices of Mr. Home, at his so-called "spiritual *scéances*."

We have now some 80,000 seamen and boys afloat. To carry out the "Rear-Admiral's" scheme we should have to begin by weeding out of these all men of 10 years' service, and "encourage" them to leave the Navy and enter the merchant service for three years, replacing them with fresh men. We doubt if naval officers generally would recommend this to be tried, especially at the present moment. We do not know—if it could be done and were done—what amount of "Reserve" it would then give us; as if many of the men went off upon "18 months' voyages," how "would they come to us from the vasty deep," when necessity required us to "call for them?"

But let us ask, if this plan were practicable, and not by far too complicated and expensive, What effect would be produced upon the discipline of the Navy by this systematic weeding out of our best men-of-war's men from the fleet, to replace them with such as we can now get? Should we not have inevitably a large influx of gaol-birds and increase of the convict element into the Navy, which a "Rear-Admiral" so properly deprecates? To fill the merchant navy to a great extent with men-of-war's men would doubtless secure to us the best Reserve; but could not this be done, without short-service pensions or "half-pay," by simply raising the pay of the Navy till we have the command of the market, and the choice of the best men, out of the 350,000 that compose our Navy and mercantile marine? Secure this, and we can then afford to clear out of the service the "blackguards," "gaol-birds," and "convict element," which are at present ruining the discipline of the fleet; and we could then gradually pass our good men into the merchant service, putting good men in their places, to be trained in turn, and afterwards transferred into merchant ships;—thus accomplishing, in our own way, all that the French accomplish, imperially, by their much-lauded *Inscription Maritime*.

An important alteration is about to take place in the police arrangements of our naval arsenals and dockyards. The whole of these national establishments will, it is expected, soon be placed under the supervision of the Metropolitan force. The necessary steps to produce this change are now being taken by Parliament, and by the end of the present session the new plan may come into operation. It may appear to a casual observer that the substitution of one set of policemen for another in our dockyards is a matter of no consequence; but, in reality, that is not the case. For the duties required from the dockyard policeman are special, and sometimes very difficult to perform. Any new set of men, unaccustomed to the task of watching the ingress and egress of thousands of workmen entrusted with the manipulation of the valuable materials scattered about these great establishments, will find their labours neither light nor easy of performance. As an instance of what will be expected from them, it is only necessary to mention that at Portsmouth five thousand workmen of all sorts, from labourers to first-class artisans and mechanics, enter the dock-gates every morning at six o'clock, and it is the duty of the police to see that none but workmen belonging to the establishment do enter. This immense throng leaves again at twelve o'clock for dinner, returning at half-past one, and finally leaves the yard at a fixed hour, varying with the season, in winter and summer. Now, it is the business of the police stationed at the gates to have a facial knowledge at least of every man of this vast host of labourers, and the necessity for their being able to detect a stranger is evident when we remember the interests that are at stake in such an establishment as that at Portsmouth. Only imagine the havoc that would arise if another "Jack the Painter"* managed to elude the vigilance of the "new arrangements," and secrete himself in some of the enormous sheds belonging to the ropery. What might not be the consequence of a single lucifer-match in such felonious hands? Of course we do not anticipate any such calamity to occur, for doubtless the old hands will not be discharged until the new ones are well up in their duty. Still, it is difficult to understand what advantages are likely to result from the proposed alterations, and at Portsmouth they are considered very problematical. It is also further asserted that if the Government had granted similar powers to the present police force of the dockyards as those given to the intended force, there would have been no necessity for any change at all. A contemplated change will fling a considerable amount of patronage into certain hands, and will extend the power of the metropolitan police very materially. Whether any national advantage will arise from that circumstance remains to be seen. Portsmouth dockyard, alone, is vigilantly watched and guarded by a police force under a lieutenant of the Navy, with the style of director of police, and he has about 100 men under his command. A third part of this number is constantly on duty by night and by day. This force is altogether exclusive of the military guard, which consists of one captain, three sergeants, five corporals, two drummers, and sixty-three privates, of which twenty-one sentinels are constantly on duty.

The *Moniteur de la Flotte* informs us that an extraordinary activity prevails at Toulon in getting ready for sea the ships that are intended to proceed to the coast of Syria. It mentions that the Vauban, L'Aube, Le Finisterre, L'Yonne, Le Mogador, and L'Asmodée, are nearly ready to receive artillery horses, horses for the 1st Regiment of Hussars, the 3rd and 13th regiments of infantry of the line, and the 16th battalion of *Chasseurs à pied*. Le Fontenoy is also preparing for service.

---

* This incendiary was hung for setting fire to and destroying greater part of Portsmouth Dockyard in 1777.

THE ARMY.

Royal Horse Guards. The regiment marched on Wednesday from Aldershot to Windsor to be stationed.

3rd Dragoon Guards. Captain Neave is attached to the depôt at Canterbury.

5th Dragoon Guards. The regiment has moved this week from Aldershot to Brighton and Shorncliffe. One squadron left camp for Brighton on Wednesday, one for Shorncliffe and one for Brighton on Thursday, and the remaining squadron for Brighton yesterday.

2nd Dragoons. This fine regiment was inspected at the Curragh last week by Major-General Lawrenson, the Inspector-General of Cavalry, who expressed great pleasure at its condition.

3rd Light Dragoons. On Saturday last Major-General Lawrenson, Inspector-General of Cavalry, made his first inspection of this regiment under the command of Lieut.-Colonel the Hon. H. M. Monckton, at the Curragh, and expressed his high satisfaction at the discipline and appearance of the corps.

5th Lancers. Lieutenant Edgeworth and Cornet Ewing have been before a board of field-officers at Aldershot this week, for examination as to their fitness for promotion.

12th Lancers. Colonel Balders, the Commandant of the cavalry depôt at Maidstone, who has just exchanged from this regiment to the 17th Lancers, will shortly vacate that command on promotion to the rank of Major-General.

14th Light Dragoons. Colonel Ainslie has been placed upon half-pay in consequence of the reduction of the Second Lieut.-Colonel upon the return of the regiment from India.

Royal Artillery. The substitution of the Armstrong guns throughout the brigade of Royal Horse Artillery is at present complete, Major G. Le M. Tupper's A battery having been supplied with a full complement of six new guns and appliances from Woolwich on Saturday. The exchange was effected at Kingston, to which place the new guns were conveyed, and handed over to Major Tupper by Quartermaster Marvin. The two trains, consisting of 150 horses, conveying the old and new guns, &c., returned, the one to the stores at Woolwich, and the other to the camp at Aldershot.

The Commandant, Major-General Sir Richard Dacres, K.C.B., inspected the field-batteries of the Horse and 4th brigades on Saturday morning, in marching order, on the review ground at Woolwich. They were supplied with ammunition, and went through several evolutions incident to a field day.

The following lieutenants of Royal Artillery, who received their commissions as the result of the last Midsummer examination, by the Duke of Cambridge, at the Royal Military Academy, have been appointed to batteries at foreign stations, as under, and joined the regiment at Woolwich on Thursday, to be in readiness for embarkation, viz.: Lieutenants H. W. L. Hime, J. W. Bernard, T. M. Crutwell, and F. C. Nicolas—Bengal; R. Walkey and R. D. Lockhart—Bombay; E. A. Fitzroy and T. Wood—Madras; and C. Jones—Halifax. The under-mentioned joined their respective batteries during the present week at the following stations: A. B. Brown, H. A. Barker, C. D. E. Smith, T. M. Hitchins, and J. F. Jenkin—Woolwich; L. Downes and B. R. Greig—Aldershot; J. B. Ormsby and G. A. French—Alderney; F. A. Hand—Curragh; J. W. Inge, W. A. Cook, and M. M. Lane—Dover; A. E. England—Shorncliffe; H. W. Brown and J. A. Campbell—Cahir; E. H. Holley and R. J. Hazlett—Plymouth; F. H. Milner—Cork; F. Galloway—Portsmouth; and P. E. Blackwood—Ballincollig.

Captain Mackenzie has removed from Eastbourne to Manchester, on his appointment to the command of No. 1 Division of the Coast Brigade, which will be composed of the non-commissioned officers and men of the force stationed in the northern and midland districts. The south-eastern and Medway districts will form No. 2. Division of the force, under the command of Captain Sweeny.

Many non-commissioned officers and men belonging to the Royal Artillery at Woolwich have been granted three months' leave of absence for the purpose of seeking and providing themselves with suitable occupations on obtaining their discharge from the service, having nearly completed the full term of 21 years in the regiment. The majority of the men are of exemplary character, and some of them possess medals for long and good conduct, and, with but few exceptions, they are stated to be men of good education, and capable of holding situations of trust and responsibility.

The following sergeant-majors of Royal Artillery, stationed at Woolwich, are to be appointed as adjutants in Artillery Volunteer corps—viz., Sergeant-Majors Bailey, Woolwich Dockyard; Nelson, Dover; and Osborn, Glasgow. These officers will receive 10*s.* per diem.

Military Train. Ensign Benthall, of the 3rd battalion, has been examined for promotion this week at Aldershot.

Coldstream Guards. On Monday Lord Clyde for the first time met his new regiment as their Colonel, when there was a review of the 1st battalion in Hyde Park. Although no public notice was given that the review was intended, several thousands of persons assembled at an early hour, most of whom were animated by a desire to catch a glimpse of Lord Clyde. Shortly before ten o'clock the men belonging to the battalion left the Wellington Barracks in St. James's Park, and marched up Constitution Hill. As soon as they had taken up their position on the large open space at the north-western corner of the park, His Royal Highness the Duke of Cambridge, Lord Clyde, Lord Frederick Paulet, Lord Rokeby, and other officers rode up. Lord Clyde was loudly cheered as he proceeded through the park, and he frequently acknowledged the compliments paid to him by touching his hat. The men were put through various evolutions, which they performed with rapidity and skill, and the firing, which was kept up with great vigour, was marked with the greatest possible precision. At twenty minutes before twelve the National Anthem was played by the band, and the Duke of Cambridge and Lord Clyde left the ground. They were followed by an immense crowd who cheered them until they arrived in Piccadilly, and rode rapidly away. The Guards having fallen into marching order, proceeded to Wellington Barracks. The morning was beautifully fine for such a display, and although an immense number of persons were present, there was no confusion, the ground having been most admirably kept. It is understood that the other battalion will be reviewed by Lord Clyde at Windsor in the course of a few days.

8th Regiment. The depôt of the 1st battalion, in consequence of the regiment's arrival from India, after 16 years service in Bengal, left Chatham on Thursday, for Chichester. The depôt consists of 370 of all ranks, under command of Major William Bayley, Major C. Edward Baynes, Captain F. W. J. Dugmore, Lieutenant C. N. Fry, Ensign Robert Handcock, and Ensign William A. Bridge.

10th Regiment. The 1st battalion leaves Plymouth next week for Aldershot.

12th Regiment left Aldershot on Wednesday morning, and embarked on board the Himalaya, 6, screw, Captain John Seccombe, from the Portsmouth dockyard jetty, for Plymouth.

36th Regiment embarked yesterday at Plymouth on board the Himalaya for Dublin. They will be stationed at the Curragh.

Royal Marine Light Infantry. Lieutenant-Colonel S. N. Lowder has been appointed to the Chatham division of Royal Marines, having been permitted by the Admiralty to exchange divisions with Lieut.-Colonel H. Marriott, who has been appointed to Woolwich. Major-General Sir Richard Dacres, Royal Artillery, Commanding at Woolwich, and Colonel Stransham, Commandant of the local division of Royal Marines, with the principal officers of the garrison, and their families in large numbers, on Wednesday assembled in the Plumstead Marshes to witness a scientific shooting match, between officers and men belonging to the division of Roya, Marines. The match was proposed by Captain Sutherl musketry instructor to the corps, and was carried out under his direction and superintendence. The competitors, 200 in number, repaired to the Marshes at 7 a.m., and the proceedings commenced shortly after, and continued, with slight intermission, until 6 p.m. The place was crowded with spectators throughout the day. The band of the division was in attendance, and the necessary provisions were copiously supplied and comfortably served under a number of tents erected for the accommodation of the competitors and their friends. The prizes, contributed by the officers of the corps, ranged from 7*l.* to 15*s.*, the highest of which was closely contested, having been twice won by ties, or an equal number of points, and was consequently shot for a third time, and eventually awarded to Private Keenan. The second prize of 5*l.* was taken by Sergeant Banks, as well as the third, of 2*l.*, and the fourth, of 30*s.*, was obtained by Sergeant Urquhart. The distance was 900 yards, and the firing was of the first order, Private Keenan having made nine points in five rounds over the extreme range of 900 yards. Colonel Stransham, the Commandant, competed for various minor prizes with several of his officers, by firing at Aunt Sally over a range of 100 yards; and, as a remarkable instance of his own proficiency, he carried off three prizes of 15*s.* each, which he handed over to Captain Suther, to be fired for by non-commissioned officers, as an additional prize, and which was subsequently won by Corporal Westall. On returning to quarters the successful competitors were granted leave of absence to visit their friends.

53rd Regiment. The removal of the 53rd depôt from Chatham is in consequence of the regiment arriving in England, it having been in Bengal 16 years. A detachment of 320, all ranks, under command of Captain Sidney G. Quicke, with Ensigns George B. Deare, Charles H. Bonney, and Herbert B. Osborne, left Chatham on Tuesday for Plymouth, to relieve the 10th, which goes to Aldershot. The depôt of the 53rd, 200 strong, under command of Captains John H. Lothian and William F. Coleman, and Ensigns Samuel J. Nicholls, Henry D. Rooke, and W. E. S. Battiscombe, leaves for Chichester.

58th Regiment. Brevet-Lieut.-Colonel Thompson is on leave to the 16th inst., and Captain Townley to the 11th. Ensign Webb is about to exchange into the Military Train.

73rd Regiment. Orders have been received at Chatham for the following officers to proceed to Bengal, with a draft of 260, all ranks, in command of Captain George Renny, Lieutenant W. Clarke, and Ensigns Bolton J. Monsell, C. W. Richardson, and Henry Synge. They are to embark immediately a vessel has been chartered. The route for the 73rd is very unexpected, as the regiment was under orders to return to England.

Rifle Brigade. The Tyburnia has the following for Calcutta:—2nd battalion, Ensigns Reid, Hon. A. Hood, Harington, 1 drummer, and 145 rank and file. 3rd battalion, Lieut.-Colonel Hardinge in military command, Captain Ruthven, and Ensigns Caulfield and Innis, 2 drummers, and 32 rank and file.

St. Helena Regiment. A rifle match, which has excited great interest in the island, has been fired by the officers composing it, Royal Artillery, Royal Engineers, and St. Helena Regiment. There were sixteen competitors. The first prize, a rifle, was won by Lieutenant Haughton, Royal Artillery, who took the lead at the commencement, and kept it throughout; he made 52 points in 60 rounds of independent firing from 150 to 900 yards. The second prize consisted of a revolver, and was won by Lieutenant Nash, St. Helena Regiment; the third prize, a field glass, was won by Lieutenant and Adjutant M'Namee, St. Helena Regiment.

In the House of Commons on Thursday evening Mr. Freeland asked the Secretary of State for War whether the death rates in the different regiments of the Army and the causes of death could not in future be given in the Registrar-General's quarterly reports. Mr. S. Herbert said that the death-rates of the Army would now be put into an annual report which he intended to lay upon the table of the House. The report would soon be ready. He attached great value to the publicity of those rates, believing that they would have the effect of keeping the different bodies up to their duty. It would be in the power of the Registrar-General to adopt those death rates and consolidate them in his general quarterly reports.

The whole of the available garrison troops, with the Horse Artillery from Hilsea, were had out on Southsea Common on Saturday last, and went through several field manœuvres in presence of the Lieut.-Governor, Lord Paulet.

A parliamentary return states that 93 non-commissioned officers and 233 privates of the late East India Company's armies, took their discharge with pensions as time expired men, subsequently to the order whereby they had granted to them the benefit of two years' service on account of their not having already taken their discharge under the above-mentioned order of the Governor-General. Without pensions 59 non-commissioned officers and 292 privates took their discharge.

The Under-Secretary of State for War, Sir Benjamin Hawes, has issued the following Circular Memorandum, dated the 23rd ult.:—"Mr. Secretary Herbert having had under his consideration the subject of the payment of fees by the troops attending army schools, has, with a view of further encouraging the general education of the non-commissioned officers and privates of the Army, been pleased to remit the payment of fees for all students who may be included in the third-class of adult schools, hitherto required under Circular 146, dated War Office, September 28, 1857."

The Adjutant-General, Sir James Y. Scarlett has issued a Circular Memorandum, wherein the General Commanding in-Chief "desires when regiments or detachments leave barracks which are not to be reoccupied, that the sick soldiers who are unable to accompany their corps may not be sent into billets, but that a suitable lodging be hired for their accommodation."

The annexed General Order has been issued:—"Horse Guards, July 24.—With a view to prevent the unnecessary correspondence and labour of discharging soldiers who claim their release from the Service on the termination of their limited engagement, with the intention of re-enlisting at some future time, His Royal Highness will allow such as may be willing, and are considered fit to be retained, to receive a furlough—not exceeding three months—on their renewing their engagement for a further period of service."

THE LAST OF THE GERMAN LEGION.—The German Legion has at last been disbanded, and permission is granted to any able-bodied men to enlist into any of Her Majesty's regiments, but it does not seem that many have accepted this offer. A large proportion of the Legion is spreading over the country, and obtaining employment in the several towns and amongst the rural population. An attempt has been made to draw them towards Cape Town by offering 300 men employment on the Cape Town and Wellington Railway. Thus the original object of the scheme is defeated. They were sent to Kaffraria as a means of defence to the colony; portions of land were allotted to them, but very few succeeded. The whole scheme is, therefore, little better than a failure.—*Cape and Natal News.*

SHORNCLIFFE CAMP.

The 5th and 7th batteries of the 4th Brigade, under the command of Lieut.-Colonel the Hon. G. T. Devereux, marched from camp on Thursday the 2nd instant, to relieve the 8th and 7th batteries at the camp near New Romney, for the purpose of going through a course of shot and shell practice with the Armstrong 12-pounder batteries. The following was the detail of the batteries: 12 officers, 32 non-commissioned officers, 248 gunners, drivers, and artificers, 120 horses, 12 Armstrong guns, 12 *ammunition waggons*, hospital waggons, and store carts. The 8th and 9th batteries, in addition to two batteries of 9-pounders, work with four 18-pound field-battery guns, with which some exceedingly good practice has been made at 1000 yards' range. During the time the batteries have been under canvas the health of the men has been exceedingly good, and the officers have endeavoured to relieve the tedium of life under canvas, by giving two very ageeable picnics to the ladies of the surrounding neighbourhood, including Hythe, Sandgate, &c., the last having occurred on Tuesday last.

Lieutenant A. E. England has joined the 5th battery, 4th Brigade, Royal Artillery, from the Royal Academy, Woolwich, vice Lieutenant J. Tucker, promoted.

A party consisting of 1 non-commissioned officer and 8 privates of the 5th Dragoon Guards marched into camp on Thursday last, for the purpose of taking up quarters for a squadron expected from Aldershot in the course of the week.

Lieutenant Bridger of the 4th Battalion, Military Train, has left Shorncliffe and joined the squadron of that battalion at Aldershot.

Lieutenant E. Horrocks joined the 90th Stirlingshire or Highland Borderers on the 1st inst., on appointment.

The officers of the 2nd Royal Cheshire gave a farewell ball to a large party, upwards of 100, in the mess-room, on Friday the 27th ult, in anticipation of the regiment leaving Shorncliffe, but the order is countermanded.

COLCHESTER CAMP.

The heavy drafts, numbering in the aggregate nearly 900 men, which have left the camp within the past fortnight, have so reduced the strength of the garrison as to remedy the much complained of crowded state of the huts. According to the last return the strength of the depôt battalions was 68 officers, 1948 rank and file, 185 women, and about 300 children, irrespective of upwards of 100 men in hospital.

It is generally believed that the depôt of the 5th Fusiliers, nearly 600 in strength, will send out a considerably augmented draft in the course of a few weeks, and the 54th are likely to dispatch 100 men on foreign service, in addition to those who have just sailed.

Private Jones, of the 56th Regiment, whose savage attack upon the brigade-major, and his subsequent escape from the railway-train, we noticed last week, has been brought to trial before a garrison court-martial for general insubordination and striking at a superior officer. He, together with a comrade named Burns, who took part in the fray, has been found guilty, and when their sentence has been confirmed by the Commander-in-Chief it will be promulgated before their depôt battalion. A drummer of the 66th, named Lawler, has been convicted before a court-martial of an attempted atrocious offence, and he also awaits the confirmation of his sentence.

On Tuesday, through the kindness of the officers and men of the camp, the children of the garrison schools had quite a gala fête upon the site of the old barracks, the whole concluding with a display of fireworks.

It is understood that the Right Hon. Sidney Herbert, Secretary of State for the War Department, will shortly

Digitized by Google

visit a resident gentleman of considerable influence, to attend a grand Volunteer inspection, when it is expected he will officially visit this camp.

We last week drew attention to the contemplated new camp, and expressed an opinion that no works of any magnitude would be commenced at present. We are now, however, in a position to state, upon the authority of the Secretary for War, that although the greater portion of the money originally granted has been spent in the purchase of land, the buildings will be commenced at the beginning of the financial year; and in the course of eighteen months from the commencement they will be completed, and in a habitable state. That this will be the locality for a corps of observation appears to be strengthened by the fact, that the only money intended to be spent in the fortification of the Essex coast will be for the defence of Harwich harbour, the several martello towers which skirt the shore being allowed to remain in their present useless condition.

The Army Gazette.

WAR OFFICE, PALL MALL, JULY, 31.

2nd Regiment of Life Guards—Assistant-Surgeon Frederick George Kerin, from the Royal Regiment of Horse Guards, to be Surgeon, vice Tardrew, deceased.

Royal Regiment of Horse Guards—Cornet Cecil Edward Martyn to be Lieutenant, by purchase, vice Bolton, who retires.

4th Dragoon Guards—James Alexander Tait, Gent., to be Cornet, by purchase, vice Lord Seymour, who has retired.

5th Dragoon Guards—Richard Francis Chaplin, Gent., to be Cornet, by purchase, vice Scarlett, promoted.

4th Light Dragoons—William Langton Coke, Gent., to be Cornet, by purchase, vice Kennedy, promoted; Samuel Charles Newton, Gent., to be Cornet, by purchase, vice Bradshaw, promoted.

5th Light Dragoons—Lieutenant John Henry Waterfall, from the 95th Foot, to be Lieutenant, vice Malcolmson, who exchanges.

7th Light Dragoons—George Ernest Paget, Gent., to be Cornet, by purchase, vice Viscount Royston, promoted.

8th Light Dragoons—Henry Philips, Gent., to be Cornet, by purchase, vice Palliser, promoted.

11th Light Dragoons—Lionel Beauchamp Cole, Gent., to be Cornet, by purchase, vice the Hon. J. D. Drummond, promoted.

15th Light Dragoons—James Le Messurier, Gent., to be Cornet, by purchase, vice Pearson, promoted.

Royal Artillery—Major-General Henry Alexander Scott, to be Colonel-Commandant, vice Dyneley, deceased; Brevet-Colonel Charles Vansittart Cockburn to be Colonel, vice Gostling, retired upon full pay; Brevet-Lieut.-Colonel William Alexander Middleton, C.B., to be Lieut.-Colonel, vice Cockburn; Brevet-Major Lewis William Penn to be Captain, vice Middleton; Lieutenant Oswald Carr to be Second Captain, vice Penn.

TO BE ADJUTANTS.

Second Captain John Wheler Collington, vice Woolsey, promoted.

Second Captain Charles Paulet Rotton, vice Forbes, promoted.

Second Captain Robert James Cairnes, vice Hay, promoted.

Second Captain William Carey, vice Harrison, who resigns the Adjutancy only.

Second Captain James Meredith Collingwood Vibart, vice Lukin, who resigns the Adjutancy only.

Second Captain Major Francis Downes, vice Le Mesurier, who resigns the Adjutancy only.

Second Captain Edward Keate, vice Penn, who resigns the Adjutancy only.

Second Captain Maurice Henry Fitzmaurice, vice Campbell, who resigns the Adjutancy only.

Second Captain Ernest Courtney Vaughan, by augmentation.

Second Captain Joseph Hanwell, vice Byrne, who resigns the Adjutancy only.

Lieutenant Henry Brackenbury, by augmentation.

Second Captain James Barton, vice Close, promoted.

Second Captain Frederick George Ravenhill, vice Taylor, who resigns the Adjutancy only.

Second Captain Henry Plantagenet Prescott Phelips, vice Simpson, promoted.

Acting Veterinary-Surgeon Greatrex Naden to be Veterinary Surgeon.

Royal Engineers—Brevet-Colonel George Burgmann to be Colonel, vice Sandham, removed as a General Officer; Brevet-Major James William Gosset to be Lieut.-Colonel, vice Burgmann; Second Captain William Hatt Noble to be Captain, vice Gossett; Second Captain Hugh Williams, from half-pay, to be Second Captain, vice Noble.

Military Train—Lieutenant George Faulkner Wilkinson, from the 68th Foot, to be Lieutenant, vice Burke, who exchanges.

5th Regiment of Foot—Arthur Manley Hill, Gent., to be Ensign, by purchase, vice Mackinlay, promoted.

8th Foot—The Christian names of Gentleman Cadet Crawley, appointed to an Ensigncy, without purchase, in the *Gazette*, of the 10th of July, 1860, are Thomas Georges, and not Thomas George, as there stated.

9th Foot—Farquhar Glennie, Gent., to be Ensign, by purchase, vice Elmhirst, promoted.

12th Foot—Charles Isham Strong, Gent., to be Ensign, by purchase, vice Magee, promoted.

18th Foot—Lieutenant Jacob Francis Bryant to be Captain, without purchase, vice Cannyan, deceased.

22nd Foot—Ensign William Farley, from the 48th Foot, to be Ensign, vice Hatton, who exchanges.

23rd Foot—Lieutenant John Tilly to be Captain, by purchase, vice the Hon. Nathaniel Fiennes, who retires; Ensign Robert Cæsar Bacon to be Lieutenant, by purchase, vice Tilly.

25th Foot—Lieutenant Charles Edward Gore Browne, from the 82nd Foot, to be Lieutenant, vice Ellis, who exchanges.

The promotion of Ensign Henry James Harvey to a Lieutenancy, without purchase, to bear date the 1st of April, 1860, instead of the 4th of May, 1860, as hitherto stated.

26th Foot—Major and Brevet-Lieut.-Colonel Francis Carey to be Lieut.-Colonel, without purchase, vice Brevet-Colonel Andrew T. Hemphill, appointed to the Staff as a Brigadier-General; Captain William Thomas Betts to be Major, without purchase, vice Carey; Captain James Young, from half-pay Unattached, to be Captain, vice Betts.

29th Foot—Lieutenant Edward Gorton to be Captain, by purchase, vice Colyill, who retires; Ensign Alfred Fawcett to be Lieutenant, by purchase, vice Gorton.

THE NAVY.

ADMIRALTY, July 28.

APPOINTMENTS.

Master—T. A. Hull to be additional to the Firefly.
Clerk—H. E. W. Roberts to the Firebrand.
Third-Class Assistant-Engineer—H. Duncan to the Indus as supernumerary.

July 30.

Master's Assistant—F. Seaton to the Gorgon.
Clerk—L. L. Needham to the Hawke.

July 31.

Commander—J. H. Cave to the Styx, vice Vesey, promoted.

Lieutenants—Archibald C. S. Blackett, to the Neptune; Edward Pilkington, to the Diadem; Henry J. Carr, to the Trafalgar; Francis Durrant, to the Centurion; the Hon. Richard Hare, to the Hornet; William St. J. Hornby, to the Algiers; Alfred Luckraft (additional), to the Pembroke, for service in the coast-guard.

Chaplain—The Rev. Nathaniel Procter, 1840, to the Indus, 78, ordinary steam-reserve ship, Devonport.

Second Masters—John Riches to the Asia; Ramsey Cooke, to the Dee.

Assistant-Surgeons—Croft G. Symons to the Cumberland; Robert Hogue to the Emerald; and Bradley Gregory confirmed in the Amphion.

Third-Class Assistant-Engineer—William Miller to the Industry.

August 2.

Lieutenant—Richard H. D. King to the Orion.
Paymaster—Edwin Harris to the Impregnable.
Assistant-Paymasters—J. Moore to the Wellington; John Harvey to the Royal Adelaide.
Clerk—J. K. Bell to the Diadem.

COAST-GUARD OFFICE, August 2.

APPOINTMENT.

Chief Officer—Mr. William C. Buck, Master, to command 36 Tower Station.

REMOVALS.

Chief Officers—Lieutenants the Hon. Henry W. Chetwynd from Uzon to Westhaven; James A. Hodgskin from Garrison Point to Southampton, as Inspecting Lieutenant, vice Geary.

Ariadne, 26, screw-corvette, Captain E. W. Vansittart, arrived in company with the Hero at St. John's, Newfoundland, on the 23rd ult., and was to leave for Canada on the 26th.

Assistance, Commander Balfour, was lost about the 7th of June; but, as was anticipated in this journal a fortnight since, the catastrophe was unattended with any loss of life.

Barracouta, 6, paddle steam-sloop, Commander W. Wood, sailed from Plymouth Sound on Saturday last for Halifax.

Coquette, 4, screw dispatch-vessel. This craft has been opened up more in her midship section, and has been found even more defective than was expected. As she appears at present, it seems a waste of sound materials to use them in patching her up; indeed, we understand that although a small draft of moulded timber is now placed under her shed to be used in her repairs, yet all further "cutting" is suspended until further orders. It is the outer face of her timbers (in the wake of her boilers), next to the inner face of the planking, that has now been found defective.

Cuba, schooner, tender to Imaum, was in Port Royal harbour on the 9th of July.

Emerald, 51, screw frigate, Captain A. Cumming, has been removed from the dock at Keyham steam-yard, and is rapidly progressing in her refitting.

Fire Queen, iron paddle steam-vessel, Master-Commander F. W. Paul. Lord Palmerston, accompanied by Lady Palmerston, left Osborne on Monday morning at ten, and embarked on board this vessel for conveyance to Portsmouth. On arrival the commander-in-chief's barge and carriage were in attendance, and Flag-Lieutenant Loftus C. H. Robinson escorted the noble lord to the terminus at Landport. His lordship proceeded by the direct line to London by the 11 a.m. train. This vessel also embarked Her Majesty's Ministers at Portsmouth on Wednesday, and steamed over with them to Osborne, where they attended a Privy Council; she then returned with them to Portsmouth, where they were landed in time to reach London the same evening.

Gladiator, 6, paddle steam-sloop, Commander Henry D. Hickley, was at Greytown on the 9th of July.

Griper, old coast-guard hulk, has been cut down in No. 6 Dock at Portsmouth to about the dimensions of a mooring lighter, for the purpose of having affixed on her deck Jones's angular steel and iron-plated target, representing the section of a ship or "ram's side," at an angle of nearly 45 degrees, from the water line, and upon which practice will be made from the Stork gun-boat, in Porchester Lake, under the superintendence of Captain R. S. Hewlett, C.B., commanding Her Majesty's ship Excellent. The practice will, take place to-day.

Hero, 91, screw-liner, Commodore G. H. Seymour, C.B., arrived with His Royal Highness the Prince of Wales on board at St. John's, Newfoundland, on the 23rd of July, and was to leave again for Canada on the 26th.

Himalaya, screw steam-ship, Captain John Seccombe, arrived at Spithead on Saturday last, after a fine passage of 46 hours, from Santander, having on board the Astronomer-Royal and the gentlemen composing the expedition which has visited Spain for the purpose of observing the recent solar eclipse. Shortly after the Himlaya's arrival the steam-tender Pigmy, Master-Commander Johnston, was dispatched to her at Spithead, and, having received the distinguished party, with their luggage, on board, returned with them into the harbour, where they were immediately landed, and proceeded by the evening up-train to London. On landing from the Himalaya several of the members of the expedition expressed in the strongest terms their gratification at the accommodation and the attention they had received while on board that vessel. She embarked on Wednesday at Portsmouth 36 officers and 920 men of the 2nd battalion 12th Foot, and 6 officers and 321 men of the 53rd Foot, with the usual number of women and children. The Himalaya sailed from Portsmouth on Thursday for Plymouth, where she will disembark the troops she has now on board, and convey thence to Dublin the 36th Regiment, returning from Dublin to Spithead with the 10th regiment.

Hornet, 17, screw, Commander Elphinstone, got up steam to prove machinery in the steam-basin at Portsmouth on Monday. She will test her speed at the measured mile in Stokes Bay early next week.

Hydra, 6, paddle steam-sloop, Commander Richard V. Hamilton, was at Antigua on the 13th July.

Icarus, 11, screw-sloop, Commander Nowell Salmon, V.C., was in Port Royal Harbour on the 9th of July.

Imaum, 72, receiving ship, Commander Henry J. Grant, was in Port Royal Harbour on the 9th of July.

Immortalité, 51, screw, 600 horse power, in the steam basin at Portsmouth, has shipped her lower masts and bowsprit, and has been taken in hand by the riggers of the yard to complete for the first-class steam reserve.

Kingston, schooner, tender to Imaum, was at Santa Martha on the 29th of June.

Megæra, 6, iron screw steam-sloop, Commander S. H. Henderson, from Portsmouth, which arrived in Plymouth Sound on Thursday week, with some soldiers, supernumerary seamen, and Marines, left again on Saturday last for the Mediterranean. She will, after discharging stores, troops, and supernumeraries at the various ports for which they are destined, return to England, and may be expected in about a month from this time.

Melpomene, 51, screw-frigate, Captain C. Ewart, sailed from Spithead on Wednesday for Tangier, with his Excellency the Moorish Ambassador and suite on board. At 11·30 a.m., Vice-Admiral Bruce's private carriage, with Flag-Lieutenant Robinson in attendance, was in waiting to receive His Excellency at his hotel, where a guard of honour from the 1st battalion of the 11th Foot, under the command of Major Roe, with the band and colours of the regiment, was drawn up to do honour to the distinguished visitors. His Excellency and suite having entered the carriages in attendance, were conveyed to the dockyard, where they were received, in the absence of Admiral Bruce, at Spithead, by Rear-Admiral Superintendent Grey, Lord W. Paulet, C.B., and other military and naval authorities of the port. The Sprightly, steam-tender, Master-Commander Allen, was lying in readiness alongside the King's stairs, and on board of it the Ambassador and his suite immediately embarked and left the harbour for Spithead, under salutes from the ships and garrison. On nearing the Melpomene, which had steam up and was hove short, the frigate hoisted the Moorish ensign, and fired a salute of 19 guns. Vice-Admiral H. W. Bruce, who was returning to the harbour in a gun-boat from inspecting the Tribune, boarded the Sprightly on her passage out, and accompanied His Excellency on board the Melpomene.

Nimble, at Pembroke, sister ship to the Espoir, is in an advanced state, and will be ready for launching in a short time.

Pelican, 17, which was launched on the 19th ult., left Pembroke for Portsmouth on Thursday, the 2nd, under the command of Master-Commander Paul.

Prince Regent, 90. This ship is progressing slowly. Her stern-post is in position, and a gang of workmen are about to raise her body-post. The whole of her cant frame has been removed.

Queen, 86, screw-liner, Captain Charles F. Hillyar, arrived at Malta on the 21st of July from Zante, where she left Admiral Martin on the point of leaving for the coast of Syria. The Queen was ordered to rejoin the Admiral with as much dispatch as possible after taking on board stores and supplies for the fleet.

Racer, 11, screw-sloop, Commander A. M'L. Lyons, sailed from Jamaica for Carthagena on the 7th of July.

Racoon, 22, screw-corvette, Captain W. C. Chamberlain, sailed from Malta on the 24th of July to join Admiral Martin.

Southampton, 50, sailing-ship, was on Saturday last taken into dock at Sheerness, to be fitted for the pendant of Captain Charles Wise (Superintendent of Sheerness dockyard), and as guardship of the ordinary.

Torch, 5, screw gun-vessel, Commander F. H. Smith, steamed into Portsmouth Harbour on Tuesday from Spithead to make good some slight defects. This vessel only left Chatham and Sheerness last week. She had an experimental trial before she was declared ready for sea; yet she could not run down Channel as far as Portsmouth without calling for assistance.

Tribune, 31, screw-frigate, Captain G. T. P. Hornby, arrived at Spithead on Monday from the Pacific. She hove in sight at an early hour in the morning off the roadstead under canvas, with wind and tide against her. The wind fell light, and she drifted away to the eastward. Steam was afterwards got up on board, and she anchored at Spithead late in the afternoon. She has since gone into Portsmouth harbour for the purpose of being paid off. The following is a short account of some performances of the Tribune during the time she has last been in commission. She sailed from England July 26, 1856, went to Rio, thence to Valparaiso and Callao, then to China, which she left December, 1858, and arrived at Vancouver's Island February, 1859, from which place she sailed for England Jan. 31, 1860. Distance made good from Hong-Kong to Vancouver's Island 8014 miles, 62 days at sea. Distance made good from Vancouver's Island to Valparaiso 8293 miles, 58 days at sea. Distance made good from Valparaiso to Rio 4029 miles, 33 days at sea and a week in the Straits of Magellan, during which time repairs were made in the stern, which was found to be in a defective state. Sailed from Rio de Janeiro June 9. July 20 passed a French screw-frigate under sail and steam, with a commodore's pendant, standing to the southward. Saluted with eleven guns, which was instantly returned. July 6, 7, and 8, about seven p.m., observed a comet in lat. 25 N., long 37 W. Passed the coast-guard fleet on Sunday at five a.m. off the Eddystone. The Tribune brings home some invalids from Vancouver's Island and Rio.

Undaunted, 51, screw-frigate, 600 horse-power, building at Chatham, is ordered to be completed at that dockyard with all dispatch, in order that she may be launched and fitted for the steam reserve. When completed she will be one of the finest frigates in the British navy.

Valorous, 16, paddle steam-frigate, Captain William C. Aldham, C.B., was at Vera Cruz on the 2nd of July.

Wanderer, 4, screw steam-sloop, 200 horse-power, has been taken into No. 4 dock at Sheerness, to undergo repairs.

THE COAST-GUARD SQUADRON.—The Coast-Guard squadron, under the command of Commodore Yelverton, was spoken by H.M.S. Tribune on Sunday; and at 8 o'clock on Tuesday morning was observed from Plymouth, steering a mid-channel course to the eastward.

ANNIVERSARY OF THE BATTLE OF THE NILE,—Wednesday last, the 1st inst., was the sixty-second anniversary of that proud achievement of Nelson, the battle of the Nile. Time has made sad havoc among the officers who fought there, and we believe that the following are about the only survivors: Admirals—Sir George Mundy, K.C.B.; Sir James Alexander Gordon, G.C.B.; and the Hon. Sir George Elliot, C.B. Rear-Admirals—Rowland Mainwaring and Sir John Hindmarsh, Knt., K.H. Captains—John Pearse and John George Philipps. Commander—Richard L. Conolly. Lieutenant—William Parker. Medical officers—Sir William Burnett, M.D., K.C.B., K.C.H., F.R.S. (retired), Director-General of the Medical Department. Surgeon (retired)—George Bellamy. Royal Marines: First Lieutenant—John Scobell.

THE OFFICIAL NAVY LIST.—The compilers of the "Official Navy List" may or may not be obliged to us for the trouble we have taken in endeavouring to ensure to the public something like a correct return of naval and marine officers, as well as of the strength of the ships, &c., we possess; but we have satisfied ourselves in rendering their task during the current quarter a comparatively easy one, and therefore we should be deserving of their thanks. Before, however, quitting the subject we would again call the attention of the editor, to the absurdity of giving under the "list of the effective ships of the Royal Navy, with their present stations," a number of old hulks and store ships, which it would be impossible to move from their moorings without danger to all involved in the operation.

Mr. John Way, who recently passed his examination for lieutenant, at Portsmouth, was immediately rewarded with his well-earned commission by the Lords of the Admiralty. Lieutenant Way served in the Naval Brigade under the late Captain Sir William Peel, and was present at the capture of Lucknow, and at other scenes of operation during the Indian Mutiny, in which the seamen proved by their gallantry and discipline that they were not to be despised by an enemy, whether they were serving afloat or ashore.

Lieutenant Edward Pilkington's name has been omitted in the seniority list of officers of the Royal Navy for the July quarter of the "Navy List."

The ships of the Channel fleet are still distributed in the manner mentioned by us last week, one portion with Sir Charles Fremantle, at Holyhead, and the other, under Rear-Admiral Erskine, at Queenstown.

The Navy Gazette.

ADMIRALTY, JULY 31.

NAVAL PRIZE MONEY.

It is intimated in this *Gazette* that the distribution of the proceeds received and tonnage bounty awarded for the schooner Kingston, late Cortes, captured on the 14th of April, 1858, by Her Majesty's steam gun-boat Forward, will commence on Monday next, the 6th of August, Somerset House.

The following are the shares due to an individual in the several classes:—

	£	s.	d.		£	s.	d.
Flag share	54	15	5	Sixth class	37	1	9
Lieutenant-Commanding	130	1	11	Seventh class	24	14	6
Fourth class	74	3	6	Eighth class	12	7	3
Fifth class	41	4	2	Ninth class	8	4	10
				Tenth class	4	2	5

It is also stated that preparations are being made for the intended distribution of proceeds received and tonnage bounty awarded for the slave bark, name unknown, captured on the 9th of April, 1859, by Her Majesty's ship Heron, and for the schooner Angeline, of Prospect, captured on the 13th of June, 1858, by Her Majesty's ship Conflict.

LIGHTHOUSE ON THE COAST OF SPAIN.

A notice from the Hydrographic-office, Admiralty, is published in this *Gazette* announcing that from and after this day (the 1st of August) a light will be exhibited from the lighthouse recently erected on Punta Negra, the western point of Port Aguilas, in the province of Murcia, on the south coast of Spain. The light will be a fixed white light, placed at an elevation of 48 feet above the mean level of the sea, and should be visible in ordinary weather at a distance of five miles.

This notice affects the following Admiralty charts:—Mediterranean Sea, No. 2158; and Spain, South Coast, Sheet 1, No. 1186; also Mediterranean Lights List, No. 15.

ADMIRALTY, AUGUST 1, 1860.

Corps of Royal Marines—First Lieutenant John Michael de Courcy Meade to be Captain, vice J. B. Butcher to half-pay; Second Lieutenant John Dudley Fosbroke to be First Lieutenant, vice Meade, promoted.

Sharpshooter, 8, sc., Lieut.-Com. C. Gibbons, 1848, Coast of Africa.
Sidon, 22, st.-ves., Capt. R. B. Crawford, 1856, Cape of Good Hope.
Simoom, 8, sc., Com. J. M. Cooke, 1852, East Indies.
Skipjack, 2, sc. gunboat, Lieut.-Com. J. Murray, 1848, West Indies.
Slaney, 2, sc. gunboat, Lieut.-Com. H. K. Leet, 1855, East Indies.
Snake, 4, sc., Com. H. Harvey, 1857, East Indies.
Snap, 2, sc. gunboat, Lieut.-Com. W. O. Butler, 1855, East Indies.
Sparrowhawk, 4, sc., Com. J. C. Byng, 1856, East Indies.
Sphinx, 6, st.-ves., Com. G. F. Day, V.C., 1855, East Indies.
Spitfire, 5, st.-ves., Lieut.-Com. C. O' D. Allingham, 1856, Coast of Africa.
Spy, 3, Lieut.-Com. J. Hanmer, 1848, S. E. Coast of America.
Starling, sc. gunboat, Lieut.-Com. J. A. Whitshed, 1854, East Indies.
Staunch, 2, sc. gunboat, Lieut.-Com. E. J. Pollard, 1855, East Indies.
Styx, 6, st.-ves., Com. J. H. Cave, 1855, North America and W. Indies.
Supply, store-ship, Mast.-Com. W. H. Balliston, 1845, particular serv.
Termagant, 25, sc., Capt. R. Hall, 1855, Pacific.
Terrible, 21, st.-ves., Capt. F. H. H. Glasse, C.B., 1846, Mediterranean.
Terror, 16, Capt. F. Hutton, 1844, Bermuda.
Topaze, 51, sc., Capt. the Hon. J. W. S. Spencer, 1854, Pacific.
Torch, 5, Com. F. H. Smith, 1858, Coast of Africa.
Trafalgar, 91, sc., Capt. E. G. Fanshawe, 1845, Channel Squadron.
Tribune, 30, sc., Capt. G. T. P. Hornby, 1846, paying off at Portsmouth.
Triton, 3, st.-ves., Lieut.-Com. R. H. Burton, 1849, Coast of Africa.
Urgent, sc. tr.-ship, Com. H. W. Hire, 1854, East Indies.
Valorous, 16, st.-ves., Capt. W. C. Aldham, C.B., 1853, West Indies.
Victor Emmanuel, 91, sc., Capt. W. J. C. Clifford, C.B., 1847, Mediterr.
Victoria and Albert, 2, st.-yacht, Capt. the Hon J. Denman, 1841, Portsmouth.
Victory, 101, Vice-Admiral H. W. Bruce; Capt. R. Coote, 1854, Portsmouth.
Vixen, 6, st.-ves., Com. F. W. Richards, 1860, Pacific, ordered home.
Vulcan, 6, sc. tr.-sp., Com. A. C. Strode, 1856, East Indies.
Wasp, 3, sc., Com. C. Stirling, 1856, Cape of Good Hope.
Watchful, 2, sc., Lieut.-Com. F. W. Inglefield, 1857, East Indies.
Weazel, 2, sc. gunboat, Lieut.-Com. W. Howorth, 1856, East Indies.
Wellesley, 72, Capt.-Sup. G. Goldsmith, C.B., 1842, Chatham.
Woodcock, 2, sc. gunboat, Lieut.-Com. G. S. Bosanquet, 1855, East Indies.
Wrangler, 4, sc., Com. H. H. Beamish, 1858, Coast of Africa.

THE MILITIA.

The Militia Gazette.

WAR OFFICE, PALL MALL, JULY 31.

3d or Royal Westminster Light Infantry Regiment of Middlesex Militia.—The Hon. George Henry Cadogan to be Lieutenant, vice Willcocks, promoted.

Resignation.—2d Regiment of the Royal Surrey Militia.—The Queen has been graciously pleased to accept the resignation of Captain William Richard Barnes.

Royal East Kent Regiment of Mounted Rifles Yeomanry Cavalry—Cornet Edmund Pepys, to be Lieutenant, vice Mackay, resigned; Cornet Sir Edmund Filmer, Bart., to be Lieutenant; Augustus Saville Lumley, Gent., late 2nd Life Guards, to be Cornet, vice Burra, resigned; William Hall Willats, Gent., to be Cornet, vice Pepys, promoted.

WAR OFFICE, AUGUST 3, 1860.

4th or Duke of Lancaster's Own (Light Infantry) Regiment of Royal Lancashire Militia—Captain William Knott to be Quartermaster, from the 17th of April, 1860.

Prince of Wales's Royal Regiment of Renfrew Militia—Henriquez Melhado, Gent., to be Lieutenant, vice Abraham Thompson, struck off the strength of the Regiment.

This notice of Lieutenant Melhado's appointment supersedes the one which appeared in the *Gazette* of 12th June last.

3rd or Royal Westminster Light Infantry Regiment of Middlesex Militia—George Horatio Brand, Gent., to be Lieutenant, vice Bulkeley, resigned.

MEMORANDUM.

1st or Royal East Middlesex Regiment of Militia—The Queen has been graciously pleased to approve the Commission held by Captain John Annah Ambrose in this Regiment being cancelled.

King's Own Light Infantry Regiment of Militia — Llewellyn Edmund Traherne, late of the 60th Rifles, to be Captain, vice Lowry, who retires.

Fife Artillery Militia—David Balfour Ogilvy to be Second Lieutenant.

5th Regiment of Royal Lancashire Militia—Lieutenant Henry Drury, having absented himself, without leave, from the training in the years 1859 and 1860, to be removed from the strength of the Regiment.

Leicestershire Regiment of Militia—The Queen has been pleased to accept of the resignation of Surgeon William Unwin of the Commission he holds in the above Regiment.

The full quota of the Militia for the United Kingdom is 82,634; the number of men enrolled is 44,986, namely:—in England, 29,473; in Scotland, 4372; in Ireland, 11,141. The number of men present at the training this year has been 38,872, namely:—in England, 25,455; in Scotland, 3783; in Ireland, 9634. After making a deduction for men whose absence is accounted for by illness, the number absent has been:—in England, 3652; in Scotland, 541; in Ireland, 1418. But three English and 13 Welsh regiments have not yet assembled for training.

VOLUNTEERS.

METROPOLITAN.

22ND MIDDLESEX (QUEEN'S WESTMINSTERS).—This corps met at Carlton Ride on Saturday last, for the purpose of a march to Battersea Park for battalion drill and firing blank cartridge; to each member was served out ten rounds, but the weather being unfavourable, the members were only put through battalion drill in the Ride by the Adjutant (Major Mayne), and afterwards marched out, headed by their band, up Regent Street, and back to the Carlton Ride. Lord Grosvenor announced to the corps that the official inspection, by Colonel M'Murdo was to take place on the 11th of August, and that it would be their last battalion drill of the season, and would be either in London or at Bushy Park, as the members wished. The corps unanimously decided upon Bushy, and the arrangement so stands. Lord Grosvenor added that they should make a jollification day of it, and every member would therefore provide himself with the refreshments he would require for the occasion. After the inspection, racing, jumping, and other amusements will follow. On Tuesday last the St. John's division partook of the hospitality of the chairman and treasurer to the committee, Joseph Carter Wood, Esq., at his seat, Marden Park, Surrey, and passed a day of great enjoyment, the weather being delightful. The company mustered about sixty men, and under the command of their esteemed captain (the son of the chairman) some very interesting manœuvres were performed, ending with the taking of a castellated house, which had been as gallantly defended by the host, and a few of the visitors and men of the division, but who were eventually compelled to succumb to the fierce attack of the company. The undulating and wooded character of the park, and the extremely steep ascent to the defensive post, interposed real obstacles and difficulties, which were overcome in a determined manner by the Volunteers. This company is probably one of the best drilled of the "Queens, and reflects great credit on Drill-Sergeant Reynolds and Sergeant Herod of the Coldstream Guards, who, in the first instance, drilled the division.

28TH MIDDLESEX (LONDON IRISH).—This body assembled in large numbers on Saturday evening, at Hungerford Hall, but owing to the inclemency of the weather they were drilled there instead of marching to some of the parks, according to custom. The Marquis of Donegal, one of the most constant attendants, was present, watching with deep interest every manœuvre, correcting defects, and encouraging in the blandest manner the members of the corps. The drill being over, the noble marquis announced that he would present four Whitworth rifles, of the value of twenty-five guineas each, to be shot for at Hythe on the 24th December next; also five silver medals, being one for each company, and a sixth (gilt) to be competed for by the whole corps, but to be the subject of competition on three successive Easter Mondays. The first company then adjourned to Mr. Pullen's tavern, Duke Street, Adelphi, at the request of Captain Jones, who had previously intimated his intention of presenting a ten-guinea prize to be shot for by the company, and he left it to themselves to decide the nature of the prize, the time of contending for it, and the range. After some conversation it was decided that the prize should be a medal, bearing the likeness of the gallant captain, the range 100, 200, and 300 yards, five shots each, and the time about the end of September.

15TH MIDDLESEX (LONDON SCOTTISH).—On Saturday last this corps assembled at their head-quarters, Adelphi Terrace, for marching out. The words of command "Fours right, march," having been given, the regiment, headed by their band, and preceded by the kilt company, marched through the Strand, *vid* Waterloo Place, Regent Street, &c., to Regent's Park, with the intention of practising skirmishing drill. A violent storm of thunder and heavy rain, however, precluded all such manœuvres properly taking place. The excellent playing of the band and the steady marching of the men attracted some attention. The muster was about 250 rank and file, commanded by Captain and Adjutant Arbuckle.

EAST AND WEST INDIA DOCK COMPANY.—On Saturday the directors of this company officially announced their intention of inaugurating a rifle corps consisting of the men in the employ of the company.

9TH (WEST) MIDDLESEX RIFLES (MARYLEBONE).—On Saturday the members of this corps, who have been told off for ball practice, under the system adopted at Hythe, went to Wormwood Scrubs to practice at their newly-erected butt. There will be a grand field-day with this corps on Saturday (to-day), on Hampstead Heath, Major Compton, acting in the absence of the colonel, Lord Radstock, having very kindly invited the 29th (North Middlesex), and the 14th (Highgate), Hampstead, and Hornsey Rifles to join them on the occasion.

29TH (NORTH) MIDDLESEX RIFLES (ST. PANCRAS).—On Saturday afternoon the corps marched to the Great Northern station, and proceeded in company with several other companies, to perform battalion drill. Battalion and general drills are to take place at the Regent's Park Barracks, Albany Street, every evening, at seven o'clock, during the present week, except Saturday, when there will be a muster on Hampstead Heath, to have a field day and fire blank cartridge.

INSPECTION OF VOLUNTEERS AT BARNET.—On Saturday afternoon the 20th (Euston Square), 26th (Custom House), and 29th (St. Pancras) Middlesex Volunteer Corps assembled at their respective head-quarters, and marched to the North-Western Railway Station. Thence they proceeded to Barnet, where a general inspection and field-day took place.

VOLUNTEER CORPS OF OLD BLUES.—This corps musters in considerable numbers for drill in the grounds of Christ's Hospital. The uniforms are finished, and wait only for the buttons to be cast. The uniform is dark grey with blue facings, and a narrow edging (around collar and cuff) of red. The cap is the same as worn by the South Middlesex Rifles, with the addition of a narrow band of blue, much resembling those of the Eton Volunteers.

WORKMEN'S VOLUNTEER BRIGADE.—We understand that a corps bearing this name, on the plan recommended by Alfred B. Richards, Esq., hon. sec., is now being enrolled at 86, Great Tower Street, by Lieutenant Hyland, Queen's Own Light Infantry. It is to be under the command of a distinguished general, well known for his services in India and the Crimea, and is to consist of industrial and labouring men of good character, testified by their employers residing in and near the metropolis. The brigade will be supported by voluntary subscriptions. It has already met with warm approval in various influential quarters, and we have no reason to doubt that it will be one of the most popular features of the Volunteer movement. It is proposed to adopt a cheap uniform, something in the Garibaldi style, and is intended to comprise riflemen, engineers, sappers and miners, and artillery in its ranks.

BERKSHIRE.

A few days since Colonel Loyd Lindsay, commanding the Berkshire Volunteer Rifle Corps, submitted to the lord-lieutenant of the county (the Earl of Abingdon) the expediency of encouraging, for several reasons which he named, a county gathering of the rifle corps in the autumn, when, in addition to such prizes being shot for as may be offered by the liberality of the county, athletic games and exercises may be held, and the amusements of the day be concluded by a ball and distribution of the prizes won during the morning. The gallant colonel concluded his communication to the Earl of Abingdon by a request that his lordship would preside at a county meeting which would be called to consider the whole subject, and intimating that Her Majesty's leave had been obtained that the first county gathering, if determined upon, might be held in Windsor Great Park, where the beauty of the scenery and the excellence of the shooting ranges, gave every reason to anticipate the success of the meeting. His lordship expressed, in reply, his willingness to preside at a meeting at Reading, for the purpose named, on Saturday last, the 28th inst., provided he could leave London on that day, and accordingly a meeting was held in the Council Chamber, Reading, on Saturday afternoon last, when there was a numerous and influential attendance. The High Sheriff (Sir Paul Hunter, Bart.) presided, in the absence of the lord lieutenant, and amongst those present were Major-General Seymour, Colonel Loyd Lindsay, Mr. J. Walter, M.P., Mr. R. Benyon, M.P., Colonel Fraser, Mr. M. G. Thoyse, Mr. H. M. Bunbury, Mr. J. Matthews, &c. Several resolutions were passed, and a committee was appointed to carry out the necessary arrangements for the meeting, which will be held in Windsor Great Park in September next.

CAMBRIDGESHIRE.

The proposed review of the Cambridgeshire corps on Monday, has been postponed, and there appears to be a desire that it should not take place until the close of the long vacation, as the University Corps would form a valuable addition to the assembled force. A subdivision of Cambridgeshire Volunteers has been formed at Upwell. The Wisbeach and March Companies continue sedulously at drill, and the movement is making satisfactory progress in the county generally.

CUMBERLAND.

THE 5TH CUMBERLAND RIFLE VOLUNTEERS were inspected on Friday week by Major and Adjutant James Fairclough, at the ancient seat of Lord Brougham. Among the healths that were drunk with much enthusiasm were those of the commandant of the corps (Mr. Brougham) and of Lord Brougham, whose name was cordially greeted as a zealous promoter of the Volunteer movement, and especially as a volunteer himself of 1804. The exhibition of the sword he then wore was received with shouts of applause.

DURHAM.

SUNDERLAND VOLUNTEER RIFLE CORPS. — On Monday evening there was a general parade of the 3rd Durham Rifle Corps, to meet Lord Adolphus Vane Tempest, the newly appointed Major. On the arrival of his lordship, who wore the uniform of the Rifles, and had the Crimean medal on his breast, the corps was drawn up in line and they saluted, the band playing the National Anthem. They were then formed into companies and marched past his lordship, headed by the band, each company saluting as they passed his lordship. The corps then went through various evolutions, under the command of Captain Chapman, and afterwards under his lordship's command. They were then drawn up in a square, when his lordship, addressing them, said he had taken the earliest opportunity of coming amongst them to express to them his appreciation of the high honour which they had done him by electing him Major of the Third Durham Rifle Corps, and his thanks for the distinguished position in which they had placed him. He might announce (as he had no doubt many of them had already heard) that the application to attend the review at Edinburgh had met with acceptance from the Secretary for War; and he proposed to do himself the honour of commanding the corps. He should deem it an honour to ride at the head of a corps which would do honour to their country at that second exhibition of Volunteer loyalty and patriotism.

ESSEX.

CHIPPING-ONGAR.—On Saturday last a meeting held at Chipping-Ongar, Essex, determined on the formation of a volunteer company in that neighbourhood. The members for Colchester, Mr. T. J. Miller and Mr. P. O. Papillon, have signified their intention of offering prizes for the best shots among the Volunteers of that town; and Mr. Watson, of Thorpe-le-Soken, has offered a prize of 10*l.* for the best shot in the Tendring Hundred company. This latter prize will not, however, be available until next year.

The absorbing topic during the week with the Volunteers of this county has been the grand assemblage of men under arms, which is to take place this (Saturday) morning, in Hyland's Park, near Chelmsford, for review and a sham fight. Lieut.-Colonel Palmer commands the oldest Volunteer force in this county, embracing cavalry and artillery, with six field-pieces, which will be supplemented on this occasion by the Uxbridge Yeomanry, and nearly 4000 Volunteers from the various corps in and around the county. It is understood that his grace the Duke of Wellington will take the command for the day. The brigading of all branches of the service in this manner in review, cannot fail to have a beneficial effect upon those young men whose acquaintance with arms has been confined to the drill-field or the rifle practice-ground.

HAMPSHIRE.

THE WINCHESTER VOLUNTEERS.—The non-commissioned officers of the corps raised in Winchester met on the 25th July, at the Government butts near that city for the purpose, of having their first bout of prize shooting with their short Enfields, the prizes being given by the sergeant-major, Mr. W. Budden, who at the conclusion of the affair gave the competitors a supper at the Black Swan Hotel. The prizes were won by Corporal Brown and Armour-Sergeant Cox, and a sweepstakes was gained by Sergeant Morris, Corporals C. O. La Croix, Flight, and J. S. Parmiter. The following are the names of those who shot, and the points they gained: Corporal Brown, 12; Sergeant Cox, 11; Sergeant Morris, 10; Corporal La Croix, 9; Corporal Parmiter, 9; Lance-Corporal Flight, 9; Colour-Sergeant Mason, 8; Lance-Corporal Blanchard, 7; Bandmaster Condent, 6; Sergeant Tanner, 5; Sergeant Taylor, 5; Colour-Sergeant Rawlinson, 4; Corporal W. H. Jacob, 4; Corporal Runnacles, 4; Corporal Fleet, 2; Corporal Turner, 2; Quartermaster Sherry and Corporal Huggins, *nil.*

PORTSMOUTH (CIVIL SERVICE) VOLUNTEER ARTILLERY.—A meeting of the members of the above corps was held on Thursday, to enable the Captain-Commandant to communicate the Lord-Lieutenant's approval of the formation of the corps, and to arrange other important business. At a recent meeting to elect a commandant, a severe contest took place between Mr. Sturdee, the commandant-elect, and Mr. Edwards, who was the popular but, as it turned out, the unsuccessful candidate for the honour of commanding the corps. Mr. Sturdee is the master-assistant-shipwright of the Dockyard, and the votes of the members being equal, and the master-shipwright being in the chair, he gave his casting vote in favour of his own department. Since then another meeting has taken place to elect a permanent committee, in lieu of the temporary committee, which is now dissolved; and the establishment of the nucleus of a powerful Volunteer Artillery force of the workmen of this great national dockyard may now be considered as accomplished.

KENT.

WOOLWICH ARSENAL.—The several Artillery and Rifle companies, comprising the force at the Royal Arsenal, under the command of Colonel Tulloh, have, from constant application to drill and other practice, obtained a state of efficiency which has been highly commended by various experienced military officers.

PLUMSTEAD ARTILLERY.—This corps has now commenced practice with the guns comprising the battery recently erected for the use of the Volunteers on Plumstead Common, and which commands an extensive range, both for the defence of the Thames and the Royal Arsenal.

WOOLWICH DOCKYARD ARTILLERY. — The whole of the officers of this newly-formed corps having received their commissions, the use of the battery on the wharf, at the dockyard facing the river, has been granted for exercise.

THE FOLKESTONE OR 1ST CINQUE PORTS ARTILLERY VOLUNTEERS continue to practice at Nos. 1, 2, and 3 martello towers every Thursday evening with solid shot. Next week the company will be exercised in shell practice. Considerable efficiency has been attained, and the range and elevation very creditable, and such as would not disgrace well-drilled artillerymen. The rifle corps are vigorously pursuing their drill, under the superintendence of a qualified drill instructor trained at Hythe, a sergeant in the 47th Regiment, now quartered in Dover. Captain Perceval spares neither time nor trouble in his endeavours to perfect the corps, and has succeeded in improving both the appearance and drill of the men.

HERTFORDSHIRE.

GREAT BERKHAMPSTEAD.—The members of the Ashridge, Berkhampstead, Hemel-Hempstead, and Tring companies dined together in the picturesque grounds of the old castle, at Berkhampstead, on Tuesday last. The chair was ably filled by Lieut.-Colonel Smith Dorrien, supported by Earl Brownlow, General the Hon. J. Finch, the Rector of Berkhampstead, Captain P Cust, Brice Pearse, Esq., the Rev. Arthur P. Cust, the officers of the respective companies, and the gentry and clergy of the neighbourhood. The usual loyal and patriotic toasts were most enthusiastically received. Captain Cust made the gratifying announcement that the companies present, with those of St. Albans and Watford, were about to be formed into the 1st Hertfordshire battalion, and an arrangement was made for a battalion drill, to take place in Ashridge Park, under the command of Lieut.-Colonel Smith Dorrien, on Wednesday next. The meeting was most successful, and forms another step in the quick march of the West Herts Volunteers.

LANCASHIRE.

LIVERPOOL.—The 1st Company Lancashire Volunteer Rifles are now bivouacked in the Sandhills, at Crosby, near Liverpool, where they perform the usual duties of camp life. Other corps will pass their evenings at Crosby as soon as the tents, &c., can be procured.

THE 21ST LANCASHIRE RIFLE VOLUNTEERS, as an incentive to their becoming skilful marksmen, have just been offered by their Captain-Commandant Eckersley, the sum of 250*l.* to such member of the corps as shall succeed in winning the Queen's prize of the National Rifle Association, at their meeting next year. This munificent offer is well calculated to promote its object.

The Earl of Derby has already received acceptances of his invitation to the review at Knowsley from 4000 Volunteers. His lordship is making very liberal arrangements for their reception, and is giving the public every facility for witnessing the proceedings without cost.

LEICESTERSHIRE.

LEICESTER.—The three town companies of the Leicestershire Volunteers (1st, 4th, and 5th Leicestershire) were reviewed on Leicester racecourse on Thursday week by Earl Howe. The whole strength of the regiment is about 600 members, and the town companies number 200. The attendance at the review was pretty good. On arriving at the ground the men were put through a variety of evolutions, which they accomplished with a readiness and precision most creditable to them.

LINCOLNSHIRE.

STAMFORD VOLUNTEER RIFLE CORPS.—A few days ago colours were presented by the ladies of Stamford to the corps of this town. The men were reviewed on the occasion by Lord Burghley, in Burghley Park, in the presence of a large concourse of spectators. After a series of evolutions had been performed, the colours (which are elegantly worked

Digitized by Google

in silk) were presented by Lady Burghley. The corps has already been presented with a silver bugle by the ladies of the town, and after defraying the cost of the colours a considerable balance remains in hand, with which it is intended to offer prizes for target-shooting.

NORTHUMBERLAND.

3RD NORTHUMBERLAND ARTILLERY VOLUNTEERS. — A corps of Artillery Volunteers has been formed at Blyth, Northumberland, under this name. The first drill of the company took place on Saturday evening last, in the central hall at Blyth, a drill-sergeant having been temporarily engaged until the arrival of the officer appointed by the war authorities; and on Monday evening a meeting was to be held for the election of officers. The ground chosen for the practice with great guns is the Sands, which are three miles in length, and have been approved by the War Office.

NOTTINGHAMSHIRE.

THE NOTTINGHAM ROBIN HOOD RIFLES are progressing satisfactorily towards efficiency. The corps now numbers upwards of 750 effectives, and the companies regularly assemble for drill on several evenings during the week. A silver bugle to each company (nine), and a charger for the use of the adjutant, will shortly be presented to the corps by the ladies of Nottingham.

SOMERSETSHIRE.

1ST SOMERSET OR CLEVEDON VOLUNTEER ARTILLERY.—The first parade of the Clevedon Artillery Corps took place on Wednesday last, when the Volunteers assembled for the first time in uniform. The appearance of the corps was very steady and soldierlike, more especially when we bear in mind that at this busy season of the year attendance at drill has necessarily been somewhat irregular. Captain Sir Arthur Elton addressed the corps at the Public Hall, urging the Volunteers to remember that it was not enough to wear a handsome uniform; an honest, loyal, and courageous heart must beat beneath that uniform to insure the efficiency of the corps. Clevedon was a small place, the corps comparatively few in number, but let every man remember that it was in his power to do somewhat towards rendering his native land secure against invasion. Sir A. Elton added that he had not been idle during the last few weeks. Their drill shed and parade ground had been begun; an engineer non-commissioned officer had that day arrived in Clevedon, to superintend the construction of the battery on Wain's Hill. Sir A. Elton had every confidence that the Clevedon Volunteers would zealously endeavour to learn their duties, and would never be ashamed to obey Her Majesty's summons, whether to attend a parade or to encounter any enemy who might venture to put foot on these shores. The corps then issued from the hall under Sir Arthur's command, and, preceded by the band playing inspiriting tunes, marched through the principal streets of the town to the great gratification of the inhabitants. The Volunteers were dismissed by Sir A. Elton in front of the Public Hall, and after giving several hearty cheers for Her Majesty Queen Victoria, departed for their homes, much encouraged by the success of their first parade, and accompanied by the good wishes and warm approval of the people of Clevedon. The corps will dine with Sir A. Elton next week at Clevedon Court.

SUFFOLK.

The movement continues to find great favour in this county. On Saturday evening a meeting was held at Ipswich to promote the formation of a Scotch company in that town. The Sudbury Corps, which was formed rather late, is increasing in number, and has now upwards of 70 members. The gentlemen composing a company just formed at Hadleigh have been sworn in during the past week, the circumstance being commemorated by a public dinner at the Town Hall. The services of a duly qualified musketry instructor from Hythe have been engaged for the Halesworth Company.

SURREY.

1ST SURREY.—The annual meeting of this corps took place on Saturday evening last at the head-quarters, Hanover Park, Peckham—Lieut.-Colonel Macdonald presiding. The members having gone through battalion drill, assembled to receive the report of the financial position of the corps. The gallant colonel congratulated the corps upon the successful manner in which the difficulties incidental to its formation had been overcome, and upon the general efficiency it had attained. The report showed a very favourable comparison with any other Volunteer corps, the expenditure having been kept within very moderate limits. The corps now numbers 800 members, according to the Government return. The regiment is under the command of Lieut.-Colonel Macdonald, late Bengal Artillery, the second in command being Major Jones, late 5th Fusiliers, and the adjutant being Captain Freeman, late 16th Foot. The battalion possesses head-quarters, club-house, and drill-ground, admirably adapted for the purpose. The corps comprises nine companies, meeting for drill at Clapham, Wandsworth, Brixton, Kennington, Newington, Dulwich, and Camberwell. A cadet class has been commenced in connection with the corps, the expense being only 10*s.* for entrance, and 1*l.* 10*s.* 1*d.* for clothing.

7TH SURREY RIFLES.—The annual meeting of the members of this corps was held on Saturday last at the Sessions House, Newington Causeway, Mr. Johnson in the chair. The chairman, in opening the proceedings, congratulated the members upon the strength of the corps, and said that the corps this time last year consisted of only a few members, and one officer, Major Beresford, and in consequence of that gentleman's energy and perseverance, the corps had attained its present position. Major Beresford then read the report, which stated that the income for the first year, arising from donations and subscriptions, amounted to 1105*l.* 16*s.* 4*d.*, and, after providing for all expenses, such as rent of office, payment of drill-sergeant, printing, advertising, &c., a balance of 364*l.* 11*s.* was left in hand. He proceeded to state that the corps now numbered 360 effective members, and that during the present month no less than 50 members had joined the corps. He would impress upon the officers the necessity of using every exertion to increase the number of effective members, as he was most anxious to increase the numerical strength of the corps, and the amount of subscriptions. The report having been adopted, Mr. John Locke, M.P., and Mr. W. Williams, M.P., were re-elected members of the committee. The meeting separated with a cordial vote of thanks to Major Beresford and his officers, and to the chairman.

19TH SURREY RIFLES.—On Saturday evening the inauguration dinner of the Borough of Lambeth or 19th Surrey Rifles was held in the great hall of the Surrey Gardens. Mr. Roupell, M.P., the Major-Commandant, presided, and among the guests on the platform were Mr. Craufurd, M.P., Colonel French, M.P., Captain Esmonde, M.P., Captain Greene, M.P., Mr. H. Ingram, M.P., Dr. Brady, M.P., Mr. Frederick Doulton, Captain Stackpoole, M.P., Messrs. H. and F. Chester, &c. The hall was gaily decorated with flags, and the galleries were filled with ladies. The riflemen made their appearance, shortly after 7 o'clock, drenched to the skin from a long march in the rain. The chairman, in proposing the toast of "the Volunteers of Great Britain," said he had from the very first been impressed with the necessity of avoiding all invidious distinctions between class and class, and of rendering the movement, in the strict sense of the term, a national one. The toast was responded to by Cornet Frederick Doulton, Surrey Mounted Rifles. The health of the "Ladies" having been proposed and honoured, Miss Roupell stepped forward, and presented the corps with a silver bugle from the ladies of East Surrey. The chairman returned thanks for the gift, and then, in the name af the corps, presented Captain Truman, the acting adjutant, with a handsome silver salver and a purse containing 100 guineas. On separating, the Volunteers, led by Toastmaster Toole, gave nine hearty cheers for Major Roupell. The 19th Surrey now musters 500 strong, four of the eight companies of which it consists having been equipped by the Major at his own cost. The dinner and wines were provided by Messrs. Bishop and Caldwell.

SUSSEX.

Mr. James White, the newly-elected member for Brighton, has enrolled himself an honorary member of the 1st Sussex Volunteer Artillery Corps.

WARWICKSHIRE.

BIRMINGHAM RIFLE CORPS.—The rifle corps in Warwickshire have progressed rapidly during the last few months, and the impetus may in some degree be attributed to the patriotic energy of Captain Ratcliff, of Birmingham, who was the first in England to raise and equip 100 men at his own cost. On Thursday, Captain Ratcliff assembled his company of Rifle Volunteers at the residence of his brother, Sir John Ratcliff, Wyddrington, for the purpose of awarding prizes to those who should prove the most efficient in manual, platoon, position, and company drill. The Volunteers were commanded by Adjutant M'Innes, and after a severe and lengthened drill, which lasted upwards of two hours, the following prizes, given by Captain Ratcliff, were adjudged by the adjutant: To the most efficient sergeant, 2*l.* 10*s.*, to Sergeant O'Neill; for the best drill of the whole company, 10*l.*, to Corporal Graves; for the second best, 7*l.*, to Sergeant O'Niell; third best, 5*l.*, to Corporal W. Jones; for regular attendance at drill, 2*l.*, to Private Rodway. The prizes were handed to the successful parties by Lady Ratcliff.

YORKSHIRE.

LEEDS.—An excellent movement has been commenced in Leeds to increase the strength of the Volunteer Rifle Corps belonging to that town, namely the formation of artisan companies. Already two large firms, namely, Messrs. Kitson & Co, of the Monk Bridge Iron Works, and Sir Peter Fairbairn & Co., of the Wellington Foundry, have each furnished a sufficient number of men to constitute one company. The mayor and other gentlemen in the town have subscribed for the purchase of a number of rifles to be offered as prizes for competition among the members of the corps.

BRADFORD.—The West Riding of Yorkshire Artillery Volunteers (Bradford) assembled for the first time a few evenings ago for drill. The muster was very good, and it is expected the corps, which at present meets in a schoolroom, will soon be in a fit state to be drilled in the Bradford Peel Park, the use of which has been promised for that purpose. The formation of a corps of Rifle Volunteers at Low Moor, near Bradford, is contemplated, and preliminary steps have already been taken for carrying out that object.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, JULY 31.

London Scottish Rifle Volunteer Corps.—George Benjamin Vaughan Arbuckle, Esq., to be Adjutant, from the 24th of April, 1860.

3d Company of Dorsetshire Artillery Volunteers.—The Rev. Henry Rawlinson to be Hon. Chaplain.

City of Edinburgh Rifle Volunteer Corps—Mr. Alexander Nicolson to be Ensign, vice Stuart Robertson, resigned.

Mid-Lothian Coast Artillery Volunteer Corps—Kenmure Maitland, Gent., to be Second Lieutenant.

1st Middlesex Artillery Volunteer Corps—John McGrigor Augustus Thomas Croft, Esq., to be Captain.

Kent Rifle Volunteers—1st Battalion—George Walkup Congdon, late Captain 28th Corps, to be Major; William Carr, Gent., late Honorary Assistant-Surgeon 3rd Corps, to be Surgeon; William Scott, Gent., late Honorary Assistant-Surgeon 13th Corps, to be Assistant-Surgeon.

28th Corps (1st Battalion)—Stephen Hudson, Gent., to be Ensign, vice Caryl, resigned; William Caryl, Gent., late Ensign 28th Corps, to be Honorary Assistant-Surgeon.

3rd Battalion—The 1st, 9th, 12th, 15th, 19th, 20th, 22nd, 31st and 38th Corps, have been formed into a Battalion, and which has been numbered as the 3rd Battalion in the county of Kent. The several Corps composing such Battalion will retain their present numbers and designations.

Her Majesty has been pleased to accept the resignations of the following Commissions:—

3rd Corps.—Honorary Assistant-Surgeon William Carr.

13th Corps.—Honorary Assistant-Surgeon William Scott.

28th Corps.—Captain George Walkup Congdon; Ensign William Caryl.

The following Commissions should have been Gazetted as follows:—

33rd Corps—2nd Battalion—The Honourable John Charles Pratt (commonly called the Earl of Brecknock), to be Ensign.

25th Corps—1st Battalion—John Anthony Rucker, Gent., to be Captain, vice Blaxland, resigned.

12th Surrey Rifle Volunteers—Captain William Marshall Cochrane to be Captain Commandant; Lieutenant Frederick Montague Arnold to be Captain; Ensign Edward William Browne to be Lieutenant, vice Arnold, promoted; George Thompson Pressly, Gent., to be Lieutenant; Charles Morris Gent., to be Ensign, vice Browne, promoted; Samuel Ranyard, Gent., to be Ensign.

7th Argyllshire Rifle Volunteers—George Stirling, Gent., to be Ensign.

6th Lanarkshire Artillery Volunteers—William Hay, jun., Gent., to be Second Lieutenant, vice Frederick David Rait, promoted.

2nd Lanarkshire Rifle Volunteers—Thomas Anderson, Esq., to be Captain, vice William John Macquorn Rankine, promoted.

6th Administrative Battalion of Lanarkshire Rifle Volunteers (consisting of the 25th, 26th, 27th, 40th, 68th, 69th, 70th, and 71st Corps)—Captain William Rigby to be Major; the Reverend Alexander McEwen, to be Honorary Chaplain.

7th Administrative Battalion of Lanarkshire Rifle Volunteers—(Consisting of the 5th, 21st, 34th, 58th, 59th, 64th, 65th, 66th, and 90th Corps)—William Stirling, jun., Esq., to be Lieutenant-Colonel; Captain John Boag to be Major.

16th Lanarkshire Rifle Volunteers—Lieutenant John Austine to be Captain, vice Samuel Simpson, promoted; Ensign Henry Donaldson Muirhead to be Lieutenant, vice Austine, promoted; John Martin, Gent., to be Ensign, vice Muirhead, promoted.

17th Lanarkshire Rifle Volunteers—Alexander James Watson, Gent., to be Ensign, vice George Cunninghame Monteath, resigned.

37th Lanarkshire Rifle Volunteers—James Lindsay, Esq., M.D., to be Honorary Assistant-Surgeon; the Reverend James Laing to be Honorary Chaplain.

85th Lanarkshire Rifle Volunteers—Alexander Ewing, jun., Gent., to be Ensign.

86th Lanarkshire Rifle Volunteers—Thomas Darwin Humphreys, Gent., to be Ensign, vice David Boyd, resigned.

Dundee Rifle Volunteer Corps—Sir John Ogilvy, Bart., M.P., to be Lieutenant-Colonel.

1st Company Stirlingshire Volunteer Rifle Corps—Patrick Graham Morison, Gent., to be Ensign, vice Wilson, resigned on promotion.

Weston-super-Mare or 2nd Somerset Company of Volunteer Artillery Corps—Major-General Henry Chambers Murray Cox to be Captain-Commandant; Hugh Rockett, Esq., to be Captain; Edward Bisdee, Gent., to be First Lieutenant; John Hugh Wadham Pigott Smith-Pigott, Esq., to be First Lieutenant; Anthony Hammond, Esq, to be Second Lieutenant; William Henry Davies, Gent., to be Second Lieutenant: Joseph Stringfield, Gent., to be Honorary Assistant-Surgeon; the Reverend Edward Henry Powell, Clerk, M.A., to be Honorary Chaplain.

6th Fife Rifle Volunteers—Thomas Lawson, jun., to be Ensign.

8th Fife Artillery Volunteers—James Hay Erskine Wemyss, M.P., to be Captain-Commandant; John Haig, to be Captain; Robert Balfour and George Johnston to be First Lieutenants; Andrew Wilkie and Peter Kininmouth to be Second Lieutenants; Neil Alexander Kennedy to be Assistant-Surgeon.

9th Fife Rifle Volunteers—Peter Hay Paterson to be Lieutenant; A. Walker Russell to be Ensign.

19th Cornwall Rifle Volunteers—William Sloggatt Rosevear to be Lieutenant; William Sloggatt Hawker to be Ensign.

11th Subdivision of Dorsetshire Rifle Volunteers — Edwin Josiah Miles, Esq., to be Honorary Assistant-Surgeon.

The following Appointment is substituted for that which appeared in the *Gazette* of the 31st July last.

56th Lancashire Rifle Volunteers—Thomas Frederick Brownbill, Esq., to be Surgeon.

A CATHEDRAL AUTHORITY AND THE VOLUNTEERS.—The precentor of the Lincoln cathedral (the Rev. R. Pretyman) has forbidden the attendance of the lay vicars at drill on Saturday afternoon since he came into residence. There are four of them members of the rifle corps, and they used to attend drill two and two alternately, having permission so to do; but the precentor's disapproval has effectually stopped their soldiering for the present.—*Stamford Mercury.*

Army & Navy Gazette.

LONDON, SATURDAY, AUGUST 4, 1860.

All sound military reformers will have learned with satisfaction that the Commander-in-Chief has proposed, and the Secretary of State for War in the main approved of, a plan, by which in future all first appointments to commissions in the Cavalry, Guards, and Infantry, will be made from a Military College. The details we have not yet before us; but, if the regulations of the new college be of a practical character, not aiming at too much, we are convinced that a more wholesome step could not be taken to secure to the country a supply of officers qualified to do their duty. There is no shutting one's eyes to the fact, that the present system of examination does not work as satisfactorily as could be wished, either as regards the interests of individuals, or the efficiency of the Service. In saying this we do not desire to speak otherwise than in terms of high respect of the Council of Military Education; but we cannot help thinking that what is required as a preliminary entry into the Service is a good sound practical probation, instead of an examination. In the latter it is difficult to avoid undue severity on the one hand, and, on the other, a system which makes success attainable by mere cramming. We insert a letter to-day from a gentleman connected with an establishment devoted to the preparation of young gentlemen for the military professsion, complaining that his pupils are warned to go up for their examination next Monday upon a week's notice, and he appears to consider it as unfair a proceeding as if a trainer were called upon to run his horse for a stake a month before the time stipulated in the articles. We do not admit the justice of his comparison, or the ground of his complaint. The object of the trainer is to have the animal in the best condition for running upon a certain day, and if that day be suddenly anticipated, he has every reason to protest against the change, inasmuch as all his efforts and calculations have pointed to the day first announced. Not so with the candidate for a commission, who can go up whenever he reports himself ready for examination, and whose business is not to be ready to accomplish a particular feat at a particular moment, but to show that he possesses an amount of education which permanently benefits him, and exercises a lasting influence upon his conduct and capability as an officer. The reason that candidates are so suddenly called upon is, that at the last examination at Chelsea, out of about 140 candidates who came up, only 60 passed the ordeal of the Military Council, the remainder being sent back to study for three months, and make up the deficiencies which caused their rejection on this occasion. The 60 candidates who passed not being sufficient to supply the vacancies in Her Majesty's regiments, the young gentlemen following them on the list have been warned for examination next Monday, but we believe that about one-half of them decline, stating their inability to pass without a further period of study. This is certainly not a satisfactory state of things, and we believe that the cure which would be most useful to the candidates and the most beneficial to the Service would be a probation such as the Duke of Cambridge has suggested.

The aim and end of all these tests should be the competency of the candidate for the duties he is likely to be called upon to perform. It appears to us that the College through which entry into the Service must lie should be especially devoted to this purpose, leaving any higher intellectual attainments to work their way—as superior brains and knowledge will generally work their way—to the higher prizes of the Service. The examination to secure entrance to the college should be as simple as possible, merely comprising such subjects as are really necessary to show that the education of the candidates has been fairly attended to. Writing well from dictation, expressing ideas on paper with tolerable clearness, the rules of arithmetic as applied to accounts, and a general idea of the leading points of history and geography, would form quite an adequate programme; and the examiners should particularly seek to ascertain that the candidate's knowledge was general upon these subjects, and not the result of cramming for the occasion. Once admitted to the college the cadet should be for one year instructed in the practical duties of a soldier, and in an advanced educational course bearing directly upon a knowledge of the theory of his profession. At the end of a year with ordinary attention he should be fit to discharge the duties of a company officer and proceed to join his regiment, not for the purpose of learning his business as at present, but fit to take his place among his brother subalterns, and if necessary to assume the charge of a company. This is what should be aimed at and no more. With the inducements to education of a higher class now held out to the officers of the Army by the Staff Regulations, there would be no deficiency of that more accomplished element which is necessary in some, though not in all members of the military profession. An institution such as we describe might be made self-supporting, and with a well-chosen staff to direct the drills and studies, it would be a more effective means of giving us competent officers for the Army, more than any other plan that we have heard put forward.

Some recent remarks of ours respecting the large prices beyond regulation, which we have reason to know are still generally given for promotion in cavalry regiments, have evidently been misunderstood by some of our readers, judging by communications addressed to us upon the subject. We by no means advocated that men who had invested large sums of money in the purchase of their steps, should be made to lose it in selling. Although large proportions of these payments were, strictly speaking, illegal, yet the Government were notoriously aware of the practice—connived at it, we may say—and consideration ought to be shown to those who made the investments, in accordance with what was the universal custom of the Service. One of the greatest authorities upon military administration, Lord Grey, is a decided supporter of this theory. Before the Purchase Commission in 1857 Lord Grey contended that, in any change that might be made in the existing system, the vested interests of officers should be considered, even with respect to sums paid beyond regulation prices. "You have," he said, "tacitly sanctioned, by repealing the former declaration, the system of selling commissions for prices far beyond the regulation price; and that system having been sanctioned, and having gone on without any effort being made to check it for many years, I cannot conceive anything more unjust to the officers who have given these prices than that you were suddenly to make a change that would reduce the value of the commissions, without giving them some compensation." This was sound and honest doctrine, and we are sure that the present Secretary of State would not be likely to make any sudden change without acting up to it. Still less should we be inclined to counsel any such step on his part. But we would wish to impress upon those interested, that the authorities have publicly declared their intention of taking measures to bring about a decrease in the large extra prices paid, especially in the cavalry regiments,—that they are at present indirectly taking these steps,—and though their progress may be purposely gradual, their object will most certainly be accomplished. We disclose no secret when we say this. Mr. Sidney Herbert has openly declared it, and his acts give abundant indication that he is in earnest. The lowering of the regulation prices in the cavalry to the amount prevalent in the infantry was avowedly for the purpose of bringing into the former branch of the Service officers, of about the same means as infantry officers. For the last three or four years a number of the cornets appointed have not the means of giving the large extra prices hitherto prevalent, and when these officers as well as the cornets now purchasing their commissions at infantry rates, come to stand next for their troops, the retiring captain will find great difficulty in obtaining anything like the sums formerly paid, and we fear still paid, for that step of promotion. We firmly believe that in five or six years from this the cases in which over 3000*l*. will be made up for a troop will be rare exceptions, and that those who now purchase in the expectation that any higher price will be maintained, are shutting their eyes to facts which will come upon them in a disagreeable shape when they dispose of their commissions. At present, an officer who cannot obtain the price he wants in his own regiment, exchanges, and retires from another regiment, where it is made up for him. But we have every reason to believe that in future the military authorities are determined to exercise a more strict supervision upon exchanges, with a view to prevent transactions of this kind; and that where an officer exchanges and sells out in a suspiciously short time afterwards, the step will not be given in his new regiment. Thus, instead of getting the perhaps moderate and fair sum offered in his old corps, he finds himself credited with only the regulation price. We are not much inclined to sympathise with people who take a course like this for the purpose of forcing purchasers up to their price, and we would witness a rule of the kind without regret, because it would not be likely to interfere with ordinary exchanges, than which we do not know any transactions more legitimate or more wholesome to the Service. If exchanges can be accomplished without expense to the public, we think they are useful, because they enable officers to go into the kind of regiment which suits their means or inclinations, and they are always voluntary acts on the part of both parties. A rich man may not like to serve in India, and he accommodates a poor man, who relishes the Indian pay and allowances, and finds the sum which he obtains for the exchange useful, perhaps to the extent of enabling him to remain in the Service. We cannot see any harm in this kind of traffic, while there is a great deal of what is useful both to individuals and to the Service. We should be sorry, then, to see any active interference with it on the part of the authorities, as long as it is not turned into a means of morally compelling junior officers to pay extra sums for promotion, larger than they can reasonably hope to get back on their own retirement.

We have expressed our anticipation that after the new changes begin really to work, the price obtainable for a troop will seldom be more than 3000*l*. Of course captains who purchased their steps under the old scale of prices have, in round numbers, 1500*l*. additional to receive out of the reserve fund, making 4500*l*. altogether. This is several hundreds under the conventional price hitherto prevalent; and we would counsel officers to treat the next few years as a transition period, during which there must be a gradual lowering of the market value of their commissions, and that each one retiring should make some moderate reduction to his successor, thus spreading and making less serious the loss which must inevitably take place in time.

Inclination or necessity will always lead a certain number of either enthusiastic or poor men to devote themselves to the education of the young, and it would be cruel indeed if this step on their part should be visited as a sin, instead of being rewarded as a merit. It is true that on shore we make Bishops and Deans of the head-masters of a few of our public schools, but the men who are thus distinguished have, in the majority of cases, to thank their friends, and not their profession, for the prize which falls to their lot. But how different is the position of the Naval Instructor, that useful individual, to whom we entrust the rearing of the future commanders of our fleets and defenders of our coasts? There is no bishopric in store for him; there is no snug comfortable deanery

Digitized by Google

in the distance, to welcome him within its inviting walls after a manhood spent in foreign and health-destroying climates. We give him plenty of work, and a very moderate amount of pay. We can scarcely believe that the Lords of the Admiralty will allow the coming recess to pass away without passing some regulations by which a better scale of remuneration and a more dignified position be awarded to a set of gentlemen whose value is admitted by the duties imposed upon them. The present rates of pay of a Naval Instructor are as follows: Above 10 years' service at sea, 10*s.* per diem; above 7 years, 8*s.* 6*d.*; above 3 years, 7*s.* 6*d.*; and, under 3 years, 7*s.* In addition, the munificent sum of 3*d.* is allowed him for every pupil that he may daily have under his tuition, and these three pences are to be paid by the pupil, whose allowance of pocket-money is curtailed to meet the demand. The natural consequence is that he looks upon his preceptor as an ogre, who weekly devours some eighteen pennyworth of the little luxuries which midshipmen delight in. Sir John Pakington has distinctly stated that it was his intention, if allowed to remain in office, to have dealt with the pay allotted to the civil branches of the Navy; and it is to be hoped that party jealousy will not interfere to prevent his successors from following out his scheme, or somethiug of a similar character. It may be asked, what do the Naval Instructors require? We would say that their public pay should be substantially increased, in accordance with their standing as educated gentlemen; that the capitation money should be abolished, a becoming regulation uniform substituted for the anomaly alluded to in the Circular of the 3rd of last month, and a retirement, after fifteen years' service, on full-pay, be permitted to them. We have only about eighty Naval Instructors on the Active List, forty of these are chaplains, and these should have enough to do in that good-sized parish a line-of-battle ship, without having their minds tortured by the numerous vexations always attendant upon a school-room. We have made the examination of a midshipman for the rank of lieutenant more difficult than ever; we have reduced the period for his acquiring the necessary knowledge from six years to five, yet we treat with indignity and reward like a menial the gentleman who is expected to prepare him for an ordeal which, if successfully gone through, would stand a fair comparison with that to which men are exposed who take high rank at Cambridge. We cannot understand how the Admiralty can expect highly fitted individuals (for such they must be) to be sufficiently patriotic to serve their country on the terms which are laid down for the treatment of Naval Instructors.

An Order in Council has been issued, sanctioning some new and very important regulations for paying the Navy, which are to be brought into operation on and after the 1st day of October next, or in ships abroad as soon thereafter as they are received on board. It is resolved that the system of paying down ships at home every six months be discontinued, and there be established a rule of striking an annual balance, or an adjustment of wages, at the end of each financial year, viz., 31st March. On these occasions the commanding-officers of Her Majesty's ships are to take care that the crews are fully satisfied as to the state of their accounts, and that they fully understand they have that special opportunity of remitting, or investing their money, or of leaving it undrawn till the ships are paid off. It is further to be explained to the seamen, that as payment of monthly advance will be made as it becomes due in ships newly commissioned the payment of two months' advance immediately before proceeding to sea will be discontinued; but in every case, when men have recently joined and not been paid any monthly advance, each man, before sailing, may receive one month's advance, although it be not then due. By these regulations the paymaster of every ship will be authorised to make monthly advances to officers and men, according to their different grades. It has been decided that all officers in the Navy, who are at present entitled to be paid their full pay quarterly under existing regulations, may in future be paid a proportion thereof every month, out of which it is to be clearly understood that all mess debts are to be defrayed on board. These monthly advances on account of pay are be paid to such officers as may desire it, as soon after the expiration of each month as may be convenient. They are to be paid by the paymaster of the ship upon a simple list, showing the officers' names and rank, with their signatures against the sums received by them. The lists to be signed by the paymaster and approved by the captain. Upon any officer's first appointment to a ship at home, from half-pay or harbour service, the amount of three such advances may be paid to him together, if he wishes it, at his first joining, under the captain's authority, and may be paid whether such officer has been three months on half-pay or not. When officers are so appointed to ships abroad a similar advance will be paid to them, upon application to the Accountant-General of the Navy, as at present. The three months' advance on first appointment from half-pay must be adjusted on the full-pay account of the succeeding quarter. The regulations are not to interfere with existing rules as to advances to flag officers at home and abroad on their first appointment; but they may afterwards be paid monthly. The advances to be made to officers vary from 160*l.* to 10*s.* monthly, and to men from 1*l.* 4*s.* to 5*s.* when they do not allot, and from 18*s.* to 5*s.* to men who have an allotment in force.

The Lords of the Admiralty have decided upon establishing a superior class of persons to perform the duties of master-at-arms and ships' corporal on board Her Majesty's ships, and have directed all captains and other commanding officers to report to them the names of men who may be properly qualified. The object in view is to gradually introduce into the Navy a better system of police than now prevails. Masters-at-arms must be from 30 to 40 years of age, and ships' corporals from 25 to 35. They must write well, and be able to keep accounts correctly. They will be subjected to an examination by a naval instructor, and will also be subjected to a strict medical examination. They must be men of good character, and have served either in the Army, Navy, Royal Marines, or some police establishment. The pay of a master-at-arms is to vary from 4*s.* a day to 6*s.*, and that of a ship's corporal from 2*s.* to 3*s.* 8*d.*, according to servitude. The number of these useful men appropriated to each ship will range from 7 in a first-rate down to 1 in a sloop. Every troop-ship is to have 2 allotted to her. This plan is at first to be tried experimentally, and, if successful, will be generally adopted; and then, in order to carry it out effectually, a small reserve will be kept at each of the home ports. The present police instructions for ships in commission appear to be simple and sufficient, and will not therefore be disturbed.

Some experiments which have been tried against certain iron plates supplied by the Thames Iron Ship Building Company, have just terminated at Portsmouth. It appears that the Lords of the Admiralty were not satisfied with the iron coating with which it was at first intended to clothe the Warrior, and intimated the fact to the above-named company. This led to the manufacture of some highly-tempered plates, a number of which were attached to the sides of the Sirius in Porchester Creek, and Captain Hewlett, of the Excellent, was ordered to fire at them. The result, we understand, has been so far satisfactory, that at the ordinary ranges used for trials of the kind the shot failed to penetrate the plates, which were arranged on the "dove-tail" principle. It has, therefore, been recommended that the Warrior should at once be fitted with them, and that the "dove-tail" plan should be used.

We regret to hear that dissensions have sprung up among the members of the Royal Commission appointed to inquire into the state of the Dockyards, &c., and that Mr. Ricardo, M.P., the chairman, has resigned. He will be succeeded by Mr. F. Peel, M.P. The remaining members of the Commission are for the present pursuing their labours, which promise to be of a lengthened character.

All the accounts from the North justify us in anticipating that the Volunteer Review at Edinburgh on Tuesday next, will be signalised by an attendance almost, if not completely, as numerous as the great gathering of the 23rd of June in Hyde Park. Not only from the neighbouring Scotch counties, but from Cumberland, Northumberland, and Durham, applications have been received for permission to be present; and so numerous have they been that the War Office has been obliged to notify that no more will be received, looking to the limited space available. We understand the general arrangements will be under the direction of Lieut.-General Sir George Wetherall, K.C.B., Commanding the Northern District, and that the Volunteers will be in two divisions, respectively commanded by Major-Generals Lord Rokeby and Cameron.

By the death of General Sir Henry Murray, K.C.B., Lieut.-General Sir John Aitchison, K.C.B., Colonel of the 72nd Highlanders, becomes a General; Major-General E. W. Bouverie, Colonel of the 15th Hussars, a Lieut.-General; and Colonel J. T. Hill, a Major-General in the Army. The promotions gazetted on Tuesday last are at variance with the Royal Warrant, according to which Lieut.-Colonels Deacon, 46th, Kelly, 47th, and Holcombe, 1st Royals, should have been previously promoted to the rank of Colonel, they having each completed five years' service as regimental Lieut.-Colonels, at different periods, in the months of May and June last. Nevertheless, Lieut.-Colonels Kelly and Holcombe were promoted in the Tuesday's *Gazette*, in succession to deceased general officers, while Lieut.-Colonel Deacon, their senior, got his step last night. As we read the Warrant —and its language is clear enough—the three officers we have named should be made Colonels, with their commissions antedated to the day upon which they had completed their five years' qualifying service; while Lieut.-Colonels James Ramsay, Unattached; Thomas Donovan, Cape Mounted Rifles; Henry F. Ponsonby, Grenadier Guards; and Charles Sillery, half-pay, 30th Regiment, should be appointed Colonels, in succession to Generals Mundy, Lord Sandys, Wemyss, and Murray.

The vacant cavalry regiment, as we anticipated in our impression of the 21st ult., has been conferred on Major-General William Beckwith, whose service and seniority very fairly entitle him to the preferment. Lieut.-General Clark Kennedy is transferred from the Carabineers to the Scots Greys; Sir James Jackson gives up the colonelcy of the Inniskilling Dragoons for that of his old corps, the Carabineers; and the Inniskillings will be filled by Major-General Beckwith. The death of Sir Henry Murray renders vacant the colonelcy of the 14th Light Dragoons, to which in all probability Major-General Maclean will succeed. His services are more distinguished than those of any other cavalry general not yet appointed to a regiment. The 17th Regiment, vacant by the death of Lieut.-General Wemyss, remains unfilled.

The command of the Cavalry Depôt at Maidstone may be expected to become vacant very soon, as Colonel Balders stands second on the list for promotion to the rank of Major-General. Although the Canterbury Depôt comprises the depôt troops of six cavalry regiments, and the Maidstone but three, the commandant of the latter receives double pay, while the former is simply remunerated as a lieut.-colonel of cavalry. Clearly the officer who has the larger work and responsibility ought to receive the larger remuneration; and we trust that upon Colonel Balders' vacation of Maidstone, either Colonel Gibsone, the present excellent commandant at Canterbury, will be appointed to it, or that the pecuniary advantage may be associated with the more onerous appointment which he now holds.

The command of the force at Colchester Camp will shortly be vacant, in consequence of the promotion of Major-General R. Blucher Wood, C.B., to his present rank.

Captain E. M. Jones, 20th Regiment, who has recently passed through the Staff College, has been appointed Brigade-Major to Major-General Craufurd's Brigade at Dover, in succession to Lieut.-Colonel Barnard, Grenadier Guards, resigned on promotion.

Captain W. Palliser, 18th Hussars, has been appointed Brigade-Major to the Cavalry Brigade at Dublin, in succession to Major A. J H. Elliot.

Captain Eteson, 3rd Buffs, and Captain E. N. Hill, 30th Regiment, have been appointed Aides-de-Camp to Lieut.-General Sir George Wetherall, K.C.B., commanding the Northern District.

Captain R. H. Graham, of the 4th battalion Rifle Brigade, has been appointed Aide-de-camp to Sir Gaspard Le Marchant, Governor of Malta; Captain Sir William Fairfax, of the 2nd battalion, 15th Regiment, is acting as extra Aide-de-camp to Sir Gaspard.

Brevet-Major S. P. Jarvis, of the 82nd Regiment, has been provisionally appointed Adjutant of the Staff College.

Captain W. Congreve, 4th Regiment, has been appointed Major of Brigade at Chatham.

His Royal Highness the General Commanding-in-Chief will hold a levee on Wednesday next, the 8th inst.

The decoration of the Victoria Cross has been conferred on Captain John Augustus Wood, 20th Bombay Native Infantry, for an act of valour at Bushire; and on Lieutenants Arthur Thomas Moore and John Grant Malcolmson, of the 3rd Bombay Light Cavalry, for distinguishing themselves during the Indian mutiny; also on William Odgers, leading seaman of H.M.S. Niger, for gallantry during the recent operations in New Zealand.

According to the *Moniteur de la Flotte* we find that the Emperor Napoleon intends to take a sea cruize in his yacht L'Aigle; and the screw-steamers La Sèvre and L'Isère are, it is stated, to be prepared to attend on His Imperial Majesty.

Some of our daily contemporaries have stated that the Orion, 91, Captain Frere, has been ordered to join the Channel fleet. We have reason to believe that this is not the fact, but that the Orion has proceeded to the Mediterranean to strengthen Vice-Admiral Martin's squadron.

In another column will be found, extracted from our leading contemporary, an account of a series of interesting electrical experiments which have been carried out at Portsmouth during the last few days, under the direction of Professor Way, preparatory to those which the Government proposes to extend under the supervision of the Scientific Committee at Woolwich for lighthouse and other maritime purposes.

We read in *L'Océan de Brest* that the dispatch-vessel Souffleur has left Brest with 364 officers and seamen for Bordeaux, from which port they will be forwarded by railway to Toulon. We are also told that the steamer Le Tage was ordered to leave Brest immediately for the Mediterranean.

THE MILITARY AIDE-MEMOIRE.*

We are glad to see that the latest volume of the Aide-Memoire is likely to sustain the character of its predecessors; and we congratulate Captain Binney on the able manner in which he is conducting a revised second edition of this very useful work to a successful termination.

The volume now before us contains a number of interesting articles; we have one by the late Colonel Williams of the Engineers on "Military Mining;" one on "Muskets and Musketry" by the editor; and one on the "Construction of Ordnance," of which the portion referring to brass guns is written by the gentleman to whom we are indebted for some of the most beautiful and ingenious machines in Woolwich Arsenal,—Mr. John Anderson. We are sorry to observe, however, that all reference to the manufacture of the Armstrong guns has been omitted.

There are several other articles, generally by authors as well qualified to treat the subjects on which they have respectively undertaken to write as those whom we have named; perhaps the remarks on "Mountain Artillery" are a little antiquated, their author, Colonel Colquhoun, having been dead several years. We presume that Captain Binney will plead in reply the difficulty of procuring any more modern information on the subject, or of finding any one qualified to treat of it, owing to the length of time which has elapsed since artillery has been employed to any great extent in this form. Nevertheless, we think that he might advantageously have got a hint or two from some of our Indian officers, as mountain batteries are still employed in some parts of India, particularly toward the Punjaub and Affghanistan.

This volume, like its predecessors, is embellished with a number of excellent plates and drawings; and the work, when completed, will be a valuable addition to our military and scientific libraries, recent improvements in military science and *matériel* having rendered the older edition of the "Aide-Memoire" somewhat obsolete.

Mr. Thomas Carter, who has already made some excellent and interesting additions to our military literature, has commenced a series of essays called the "Medals of the British Army, and How they were Won," published by the Messrs. Groombridge. The first section now before us contains the Crimean Campaign. It is embellished with a fac-simile of the medal, ribbon, and clasps, awarded for the campaign, and contains a very well arranged collection of some of the leading incidents of that great and prolonged contest.

BANQUET TO LORD CLYDE.

The members of the United Service Club paid a handsome tribute of respect on Tuesday evening to General Lord Clyde, the "Pacificator of India," on his return home. A more enthusiastic appreciation of his gallant labours could not have been displayed by both Services, military and naval. The spacious coffee-room of the noble club-house in Pall Mall, the largest and most eligible apartment in the house, was selected for the entertainment. The tables were so arranged that the one at which Lord Clyde sat formed the principal one. All were sumptuously adorned by a profusion of plateaux and ornamental plate. The chief groups in silver were selected from English history. That before the president's chair represented the figure of Victory upon a pedestal, holding a wreath of trophies with emblematical figures, with inscriptions in commemoration of the battles in the Crimea. A great variety of beautiful specimens of art in silver and gilt cups, vases, tazzas, &c., filled with the choicest flowers, relieved the tables. The delicious fruits, clusters of grapes, &c., were interspersed with the flowers, which gave a beautiful effect to the *ensemble*. The banquet was of a princely character.

By half-past seven o'clock the company began to assemble, the "dinner committee" being in attendance rather earlier. The Secretaries of State for India and War (Sir Charles Wood and the Hon. Sidney Herbert), who came together, arrived early. General Lord Clyde, accompanied by his late military secretary (Colonel Sir A. Sterling), arrived punctually at eight o'clock. His Royal Highness the Duke of Cambridge, attended by his aide-de-camp, Colonel Tyrwhitt, came shortly afterwards.

As the Duke of Cambridge and the other gallant members of the party, who had congregated in one of the upper saloons of the club house, descended down the staircase to pass into the banqueting room, the military band played the familiar air of "The Roast Beef of Old England."

His Royal Highness the Duke of Cambridge presided on the occasion, having seated on his right hand General Lord Clyde, G.C.B., the Right Hon. Sir Charles Wood, Bart, M.P., and Admiral Sir Thomas Cochrane, G.C.B.; and on his left the Right Hon. Sidney Herbert, M.P.; General Sir William Gomm, G.C.B., and General Sir John Burgoyne, G.C.B.

Major-General Stanhope, Lieut.-General Sir James Jackson, K.C.B., Major-General Sir W. Brereton, C.B., Colonel Gilpin, M.P., Colonel Blois, and Colonel De Bathe, officiated as vice-presidents at the different tables.

Lieut.-Colonel Norman, Colonel Metcalfe, and Major Alison, recently on the staff of Lord Clyde in India, were the only strangers present at the banquet, and were invited expressly in compliment to Lord Clyde.

Covers were laid for 160 persons, and the annexed were the members of the club present: Major-General Sir Richard Airey, K.C.B., Lieut.-General Sir John Aitchison, K.C.B., Lieut.-Colonel Thomas St. Leger Alcock, Colonel Allix, Major-General Philip Anstruther, C.B., Colonel H. Armytage, Captain William Armytage, R.N., Colonel H. D. Baillie, Lieut.-General C. A. F. Bentinck, Lieut.-General Sir H. J. W. Bentinck, K.C.B., Right Hon. W. Beresford, Hon. Thomas Bert, R.A., Colonel William Blois, Sir E. Borough, Bart., Major-General Sir W. Brereton, C.B., General Sir T. W. Brotherton, K.C.B., Lieut.-General E. P. Buckley, Vice-Admiral Ryder Burton, K.H., Major Henry Calley, Colonel Patrick FitzRoy Campbell, Major-General the Earl of Cardigan, K.C.B., Lieut.-Colonel James D. Carmichael, C.B., Vice-Admiral S. H. D. Chads, K.C.B., Lieut.-General Sir James C. Chatterton, K.H., Admiral Sir T. J. Cochrane, G.C.B., Vice-Admiral H. T. Browne Collier, Colonel Corbet Cotton, Colonel Charles Crutchley, Lieut.-Colonel Hon. P. Cust, Major-General Sir R. J. Dacres, K.C.B., Lieut.-Colonel Sir W. Davison, K.H., Colonel H. P. De Bathe, Lieut.-General Peter de la Motte, C.B., Captain S. H. Derriman, R.N., Colonel R. De Salis, General Sir Howard Douglas, Bart., G.C.B., Major-General R. P. Douglas, Colonel C. H. Doyle, Captain the Hon. J. R. Drummond, R.N., Vice-Admiral the Hon. Sir R. S. Dundas, K.C.B., Colonel Philip Dundas, Captain Hugh Dunlop, R.N., Major-General G. M. Eden, Captain C. Eden, R.N., C.B., Major-General P. Edwards, Major-General W. H. Elliott, K.H., Major-General Eyre, Vice-Admiral George Ferguson, Captain E. G. Fishbourne, C.B., R.N., Lieut.-Colonel Lord Charles Fitzroy, Captain John Forbes, R.N., Major-General W. F. Forster, K.H., Lieut.-General C. R. Fox, Major-General Sir T. H. Harte, K.C.B., Colonel Lawrence Tyler, Colonel John Garvock, Major G. O. Gavin, Colonel R. T. Gilpin, Colonel T. Gloster, General Sir W. Maynard Gomm, G.C.B., Captain G. T. Gordon, R.N., Colonel the Honourable Alexander Gordon, C.B., Colonel Henry Hope Graham, C.B., Captain W. H. Hall, R.N., C.B., Lieut.-Colonel Henry Hammer, Colonel Hon. Percy Herbert, C.B., Rear-Admiral W. A. Herringham, Colonel Charles Hind, Colonel Sir Alfred H. Horsford, K.C.B., Colonel Hon. H. H. Hutchinson, Major-General E. H. Hutchinson, Lieut.-General Sir James Jackson, K.C.B., Major-General John N. Jackson, Major W. F. D. Jervoise, Major-General Sir H. D. Jones, K.C.B., Colonel H. Richmond Jones, C.B., Colonel Sir John Jones, K.C.B., General Thomas Kenah, Colonel J. C. Kennedy, Captain W. H. Kennedy, R.N., Captain G. St. Vincent King, C.B., Lieut.-Colonel C. H. Knox, Vice-Admiral Sir G. R. Lambert, K.C.B., Colonel John A. Lambert, Major F. R. Hastings Lawrie, Colonel the Earl of Longford, C.B., General Sir L. B. Lovell, K.C.B., Lieutenant-Colonel John Luard, Lieutenant-General the Earl of Lucan, K.C.B., Major-General Edward M'Arthur, C.B., Captain G. G. M'Donald, R.N., Lieutenant-General Sir A. F. Macintosh, K.H., Major-General M'Leod, Lieut.-General R. M'Neil, Lieut.-General Henry Viscount Melville, K.C.B., Colonel Herbert Mends, Lieut.-Colonel Montgomerie, Captain M. S. Nolleth, R.N., Lieut.-Colonel J. S. D. North, Lieut.-General John Oldfield, K.H., Lieut.-Colonel G. F. Paschal, Lieut.-General Sir C. W. Pasley, K.C.B., Colonel Lord F. Paulet, C.B., Major-General J. Peel, Major-General Sir J. L. Pennefather, K.C.B., Major-General Sir. B. Travell, Captain T. Porter, R.N., Sir W. Pym, K. C. H., Colonel E. H. Greathead, C.B., Rear-Admiral Michael Quin, Commissary-General A. Ramsay, Captain John Reeve, R.N., Captain J. R. Rodd, R.N., Major-General Lord Rokeby, K.C.B., General Sir H. D. Ross, G.C.B., Colonel David Russell, Colonel John St. George, C.B., Major-General the Hon. Sir James Yorke Scarlett, K.C.B., Rear-Admiral Sir Michael Seymour, G.C.B., Colonel Richard Shulrick, Lieut.-General Sir Harry G. W. Smith, G.C.B., Lieutenant-General Sir Frederick Smith, K.H., Lieut.-Colonel F. S. Sotheby, C.B., Lieut.-General John Spink, K.H., Major P. S. Stanhope, Lieut.-Colonel S. Cowell Stepney, K.H., Colonel Sir A. C. Sterling, K.C.B., General Sir Frederick Stovin, G.C.B., General W. J. Sutherland, Colonel Thomas Tapp, C.B., Major-General H. D. Townshend, Colonel Thomas Tulloch, Colonel Alexander Tulloh, Major-General H. N. Vigors, Major-General Sir Robert J. H. Vivian, K.C.B., Rear-Admiral Sir Baldwin W. Walker, K.C.B., Major James Waller, K.H., Colonel Richard Westmore, Colonel F. A. Whimper, Captain Sir William S. Wiseman, Bart., R.N., Major-General Thomas Wood, Colonel Sir David Wood, K.C.B., Lieut.-Colonel Charles Wyndham, Colonel E. G. Wynward, &c.

The dinner having been removed, and dessert commenced, His Royal Highness the Duke of Cambridge rose and proposed "The Health of the Queen." Band, the National Anthem.

His Royal Highness then proposed "The Prince Consort, the Prince of Wales, and the other members of the Royal family," and, in doing so, referred to the trip of the Prince of Wales to Canada and America, which he believed would be productive of satisfactory results.

The noble duke, in giving "The Army and Navy," testified to the efficiency of those Services, and expressed his belief in the propriety of keeping them so, for the more prepared we were the more distant would be danger.

Sir T. Cochrane returned thanks for the Navy, and took occasion to pay a high tribute to the distinguished qualities of their noble guest.

Sir W. Gomm acknowledged the compliment paid to the Army.

The noble chairman now rose to submit the toast of the evening, and in the course of a soldierly and characteristic speech of some length graphically depicted the leading events or landmarks in the career of Lord Clyde. After adverting to the incidents in the Crimean war, His Royal Highness described with much power that striking episode in the recent struggle in India—the relief of Lucknow by his lordship, in the face of a powerful enemy, when, with a comparatively small force, he rescued the women and others who had almost failed to hope for succour. The noble chairman bore evidence to Lord Clyde's subsequent conduct in India, and the satisfactory manner in which difficulties, at first apparently insurmountable, had become gradually lessened, thus contrasting the state of affairs upon the arrival and departure of his lordship. The duke also, in the heartiest terms, declared his unqualified admiration of the private worth of Lord Clyde, and again testifying to the eminent services which their gallant guest had rendered to his Queen and country, he concluded by proposing "The health of Lord Clyde."

The toast of the evening was rapturously applauded by the assembled friends of the gallant general, the ovation paid to his honourable professional exertions being most enthusiastically repeated on the band striking up the well-known "See the conquering hero comes."

General Lord Clyde, who for some moments appeared to be overcome by his feelings, replied to the toast in what was evidently the language of his heart. He seemed modestly to aim at setting aside all the compliments which the noble chairman had passed upon him; and in doing so, spoke most eulogistically of Lord Canning. Before resuming his seat he solicited the privilege of proposing "The health of His Royal Highness the General Commanding-in-Chief, their gallant chairman."

The duke replied, complimented Mr. Sidney Herbert upon his efficiency as the Secretary at War, and, having proposed his health,

Mr. Sidney Herbert replied, and referred to the great interest which His Royal Highness invariably takes in everything that appertains to the welfare of the Army.

In giving the toast of "Sir Charles Wood" the illustrious chairman remarked upon the importance of the affairs under the guidance of Sir Charles, and declared his belief that those duties would be ably performed.

The party adjourned to the drawing-room at about half-past eleven.

On leaving, Lord Clyde was cordially cheered by the numerous persons assembled outside the club house.

The proceedings passed off with the greatest *éclat*, and all the toasts were given upstanding and with cheers.

The Prime Warden and Worshipful Company of Fishmongers celebrated the return of Lord Clyde to England by a magnificent banquet in their hall at London Bridge on Wednesday night. In returning thanks for the Army, Lord Clyde, who appeared to be deeply moved by the enthusiasm with which his health had been received, said: "Mr. Prime Warden, my Lords, and Gentlemen—I rise to return to you and to the members of the Fishmongers' Company my sincere thanks for the great honour you have done me in proposing my health, and for the kind manner in which the toast has been received. Being totally unaccustomed to the making of speeches, I trust you will pardon me for any omission or any deficiency that may occur on my part. It appears to me, and I feel it to be of great value, that entertainments like the present form an important part of the reward which public servants receive from their fellow-countrymen when they return from their services abroad. They are proud of such distinctions, and no one more proud of them than myself. I have received many honours, conferred in the most gracious manner by Her Majesty—honours which were far beyond my merits, and far beyond anything which I ever dreamt of receiving. The kind reception I have met with to-day from my countrymen in this hall—men holding a high position in the metropolis—convinces me that they do not think me altogether unworthy of the honours which Her Majesty has bestowed. You speak of soldiers, Mr. Prime Warden. I have been fifty years a soldier, and I can tell you that the men of England, Ireland, and Scotland, have not deteriorated; I say it boldly, that they are as obedient soldiers, when properly officered, as ever served in the British Army. The Prime Warden has been pleased to pay me some handsome compliments respecting the late war in India, but I must say that to one man above all does England owe a great debt of gratitude, and that man is the present Governor-General. Lord Canning, throughout the whole trying period of the war, was brave, cool, and self-possessed, exhibing all the qualities of a great administrator. I had the honour of maintaining intimate relations with his lordship during the whole of the three years I remained in India, and I believe that it was the support which his firmness of character gave me that enabled me to fulfil the expectations which my countrymen had entertained of my mission. Therefore, whilst receiving with gratitude the compliment which is now paid me, I think it only right that England should know the merits of the great, and, I may say, gifted man, whose prudence and calmness in difficulty, whose never disturbed self-possession, exercised so powerful an influence on the suppression of the mutiny." The noble and gallant lord, in conclusion, again thanked the company for the toast.

CAPTAIN BLAKELY'S RIFLED CANNON.—Captain Blakely last week tried some of his cannon near Liverpool, where they were made by Messrs. Fawcett, Preston, and Co. One cannon, a breech-loader on a French system, 6 inches in diameter of bore and 8 feet long, gave results very similar to those obtained by Captain Blakely on a former occasion with a muzzle-loading gun of the same size, the advantage in facility of loading being decidedly in favour of the muzzle-loader in these large guns. With another gun 6¾ inches in bore and 11 feet long, the firing was better still—better, in fact, than any which had before been accomplished. At 5 deg. elevation the enormous range of 2740 yards was attained, with a hollow shell weighing only 65 pounds. Mr. Whitworth's solid 80-pound shot only ranges 2600 yards with this elevation, and Sir William Armstrong's only 2400. In lowness of trajectory, therefore, Captain Blakely stands now unrivalled. Captain the Hon. F. Egerton, of the St. George, and Captain Luckraft, of the Hastings, were present at the trials, as well as several distinguished foreigners—Russians, Austrians, French, and Piedmontese. The shells fired were those invented by Mr. Bashley Britten, which Captain Blakely declares to be in his opinion the only ones really applicable to muzzle-loading rifled cannon which have yet been brought out.—*Mechanics' Magazine.*

Some experiments are shortly to be made upon the Whitworth and Armstrong breech-loading artillery guns, some officers and others qualified to give an opinion being doubtful whether the Whitworth and Armstrong breech-loaders will be found equal to the actual contingencies of war. In order to test this question by the only practicable method, it is intended to make some trials of both kinds of guns by firing some shots at the breech-loaders, for the purpose of ascertaining the effects produced upon them when struck by shot.

THE NEW SCHEME OF NAVAL RETIREMENT.

ADMIRALTY, AUGUST 3, 1860.

CAPTAINS.

All captains who have attained, or shall hereafter attain, the age of sixty, without having served in their present rank, to be placed on a retired list, and receive retired pay as follows :—

If on 10*s.* 6*d.* half-pay list when retired	18*s.* per diem.
If on 12*s.* 6*d.*	20*s.* ,,
If on 14*s.* 6*d.*	

Such officers to assume the rank and title of Rear-Admiral at the time they would have obtained their flag by seniority, had they remained on the active list.

Captains who may arrive at the head of the list without having served in that rank, to be placed on the list of reserved flag officers, with the pay of 20*s.* per diem.

Captains now on the 14*s.* 6*d.* half-pay list not to be affected by these arrangements unless by their own desire.

COMMANDERS.

All Commanders on the active list who have attained the age of sixty, or who may hereafter attain that age, to be placed on a retired list with the rank and title of retired captain, and to receive half pay according to their length of sea-service, on the scale hereinafter mentioned.

Commanders, on the active list, who have not been employed either afloat, in command of revenue vessels, in the Coast-Guard, or as mail or transport agents, within a period of fifteen years, to be placed on a retired list, and to receive retired pay according to their amount of sea-service, also on the same scale as hereinafter mentioned ; such officers to be permitted to assume the rank and title of retired captain on reaching the age of sixty, but without further addition to their retired pay.

SCALE OF RETIRED PAY.

Total sea-service in the rank of— Commander and Lieutenant	Pay per Diem.
Under 9 years	Half-pay they may be receiving at the time when Retired
Above 9 years and less than 12 years' service...	10*s.* 6*d.*
Above 12 years, and less than 15 years' service...	12*s.* 6*d.*
Above 15 years, and less than 20 years' service...	14*s.* 6*d.*
Above 20 years' service...	16*s.* 6*d.*

Officers, after twenty years' service in these ranks, or who are physically incapable of service, to be eligible for this retirement, with the rank and title of retired captain, irrespective of age, at the discretion of the Board of Admiralty.

Time served in command of revenue vessels to count as sea-time.

Time served in the Coast-Guard on shore, or in transport service on shore, to count as sea-time in the scale of retired pay, in the proportion of three years in the Coast-Guard or transport service as one of sea-service.

Time served as mail or transport agents afloat or abroad to count for the above purpose as sea-time for the first three years, and after that, in the proportion of three years' agent's time as two of sea-service.

For every year's service as acting lieutenant, mate, or passed midshipman, after the completion of two years' service or combined service in those ranks, an officer to be allowed 3*d.* per diem additional.

Commanders who have been promoted to the reserved list of captains under the Orders in Council of 25th June, 1851, and 30th January, 1856, will be entitled to increase of pay, on the above scale, according to their length of service.

LIEUTENANTS.

Lieutenants on the active list, who have attained or who may hereafter attain the age of sixty, to be placed on a retired list with the rank of retired commander, and to receive pay according to their sea-service on the hereinaftermentioned scale.

Lieutenants on the active list, who have not been employed, either afloat, in the Coast-Guard, in command of revenue vessels, or as mail or transport agents, within a period of fifteen years, to be placed on a retired list, and to receive pay also on the same scale as hereinafter mentioned. These officers to be permitted to assume the rank and title of retired commander on attaining the age of sixty, but without further addition to their retired pay.

SCALE OF RETIRED PAY.

Total sea-service in the rank of— Lieutenant.	Pay per diem.
Under 6 years	Half-pay they may be receiving at the time when retired.
Above 6 years and less than 9 years' service	7*s.* 0*d.*
Above 9 years and less than 12 years' service	8*s.* 6*d.*
Above 12 years, and less than 15 years' service	10*s.* 0*d.*
About 15 years	11*s.* 6*d.*

Officers, after twenty years' service in this rank, or who are physically incapable of service, to be eligible for retirement with the rank and title of Retired Commander, irrespective of age, at the discretion of the Board of Admiralty.

No further additions from the active list to be made to the present retired and reserved lists for commanders and lieutenants.

Time served in command of revenue vessels to count as sea-time.

Time served in the Coast-Guard on shore, or in the transport service on shore, to count as sea-time in the scale of retired pay, in the proportion of three years in the Coast-Guard, or transport service, as one of sea-service.

Time served as mail or transport agents afloat, or abroad, to count for the same purpose as sea-time for the first three years: and after then in the proportion of three years' agent's time as two of sea-service.

For every year's service as acting-lieutenant, mate, or passed midshipman, after the completion of two years service or combined service in those ranks, an officer to be allowed three pence per diem additional.

Officers who may in future be recommended for the annual promotions on account of good service in the Coast-Guard or revenue cruisers, or as mail agents, whom it may not be considered desirable to promote to the active list, to be promoted to the retired list, and be paid according to sea-service on the above scale.

Lieutenants who have been promoted to the reserved list of commanders, under the Orders in Council of 25th June, 1851, and 30th January, 1856, will be entitled to increase of pay on the above scale, according to their length of service.

HALF-PAY OF LIEUTENANTS ON THE ACTIVE LIST.

The half-pay of lieutenants to be in future fixed according to sea-service in that rank, on the following scale :

Under 3 years' sea-time ...	4*s.* per diem.
Above 3 ,, ,, ...	5*s.* ,,
,, 6 ,, ,, ...	6*s.* ,,
,, 9 ,, ,, ...	7*s.* ,,
,, 12 ,, ,, ...	8*s.* 6*d.*

Time served in command of revenue vessels in the Coast-Guard, and as mail and transport agents, to reckon as sea-service, in the same proportion as regulates increase of retired pay to officers on the retired lists.

The present rates of half-pay to be abolished for the future ; but no officer, now in the receipt of 6*s.* and 7*s.* a day, to receive less than his present amount of half-pay. Lieutenants, however, may be allowed half-pay, at the rates of 5*s.* a day ; if, through illness contracted in the Service, they shall have been unable to serve three years at sea in that rank.

GREENWICH OUT-PENSIONERS.

All officers on the active list who accept the out-pension of Greenwich Hospital to be placed on the retired list of the rank which they may then hold ; and to be permitted to assume a step in rank on reaching the age of 60, but without further increase of pay.

1. All officers retired under this scheme to be eligible for the out-pension of Greenwich Hospital for the rank that they held on the active list, provided that they shall have served the following periods of commissioned time afloat :—
   Captains, 15 years, including time as commanders and lieutenants.
   Commanders, 12 years, including time as lieutenants.
   Lieutenants, 9 years in that rank.
2. Officers who have received, or who may hereafter receive, severe wounds in action, or disabling hurts on actual service, are to be exempt from the above rule respecting time of service.
3. Officers on the existing reserved and retired lists of captains or commanders to be eligible for the out-pension of Greenwich Hospital, on the conditions stated in Articles 1 and 2 of this section.
4. The regulations laid down in the scheme of retirement respecting time served in the coast guard, transport, or mail service, to apply to the time required to be served for Greenwich outpension.

WIDOW'S PENSIONS.

The following pensions will be allowed to the widows of officers retired under this scheme, viz. :

	£
1. Captains of three years' standing and upwards	90 a-year
2. Captains under three years' standing ...	80 ,,
3. Commanders retired with the rank of captain	75 ,,
4. Lieutenants retired with the rank of commander	60 ,,

THE WHITWORTH GUN.

We subjoin a complete list of the ranges attained with Mr. Whitworth's rifled guns last week at Southport.

12-POUNDER GUN.

July 26	2°	1	948	¾ left	Half charges of powder were used to show the effect of ricochet.
,,	,,	2	960	On the line	
,,	,,	3	919	1½ left	

A correspondent who witnessed the experiments writes, "Considering that the guns were for the first time worked by Royal Artillerymen, and naval gunners, new to the gun, new to the practice-ground, and naturally unsteadied by the excitement of the whole affair and the presence of the great officials, the results are on the whole very good. Both soldiers and sailors took to the guns most kindly, and seemed to work them without any difficulty whatever. They only had to use their eyes, and required little or no special instruction ; and though men so well trained of course would perform their part well, it I think said much for the guns, that they were able at first sight to load and fire them in the style they did.

"The ranges of the 12-pounder are on the average greater than those we witnessed at Southport last February. This is partly owing to the excellent practice of the Whitworth guns with shells, which of course at low elevation beat the heavier shot in range, and lastly to the superior quality of the powder now used. It is the 'A 4 powder' manufactured at Waltham Abbey Mills for the Armstrong guns, and which has been used in the official experiments with those guns. It is very good. The *Morning Post*, through its correspondent, contends that it is a mistake to expect better things from improvement in powder ; but this is an error—it is precisely in the chemicals (as I think you observed in a former article) that improvement is now wanting. In the mechanics it would seem that all has been done that could be done. Mr. Whitworth has for the last five years been labouring to reduce his system to the simplest elements that are practically admissible, and certainly the guns are as simple in their working arrangements as they are efficient in practice. The use of the breech-loading 80-pounder as a muzzle-loading gun was perfectly successful, and the conversion was an impromptu arrangement, no sooner said than done. In fact, the guns may be fired alternately, or at will, as breech-loaders or as muzzle-loaders."

NEW ELECTRIC LIGHT.

(*From the Times.*)

Some exceedingly interesting experiments took place on Tuesday evening off Osborne House, the beautiful marine residence of Her Majesty, in the Isle of Wight, and also in Cowes Roads, with Professor Way's electric light, and which we believe are preliminary to more important experiments about to be carried out by the Government. The principle of the light is simply the application of electricity to a column or running stream of quicksilver—in this instance as fine as the point of a lady's needle. So long as the voltaic battery retains power to act with its wires upon this column so long must the light burn—the strongest and purest light in the known world, and the nearest approach to sunlight that the skill of the chemist and man of science have yet produced, and this without actual combustion taking place or the quanity of the mercury being reduced, the supply of acids to the battery being its sole expense after its first cost, excepting wear and tear. The professor with his apparatus left Portsmouth harbour in a steamer shortly before dark on Tuesday evening, and steered direct for Cowes. On the sponson of the steamer was placed the battery. Abaft the foremast hung one of the professor's simple apparatuses as a masthead light. On a moveable circular platform, placed on the vessel's after-hatch, a similar apparatus to the one hung up aloft stood, to which was attached a lens, but both of them as yet unlit. The apparatus is of the simplest possible form, consisting merely of an oval-shaped pair of tubes connected at each end, a round hollow globe about the size of an orange, in which is placed the mercury. The mercury runs from a point to a cup in the centre, enclosed within a glass tube, and here the subtle liquid is heated to a white heat as it flows in a fine stream from the upper ball into the cup, and thence into the lower one, thus producing an indestructible wick. The wires which connect the battery with the apparatus were made by Messrs. Silver, and are, perhaps, the most perfect of their kind yet constructed. These wires are coated with silver enclosed in India-rubber, and have an outside coating of braided hemp, the whole pliable as common packthread. To look at the light, with a view to a close inspection of the cup, with the naked eye, would be about as useless as to look at the sun at noonday. A pair of coloured glasses, however, show that this light, which can only be compared to the sun for its brilliancy and power, is only of the same circumference

Digitized by Google

as the cup itself—the size of a threepenny silver piece, and of little more diameter. Midway between the aftermost light and the voltaic battery is a brass standard a few inches high, with which the wires are connected, and by pressing a button on the top of this, simple as the key of a piano, the light can be given in flashes of as long or as short a duration as the operator pleases. This is, however, more beautifully and correctly carried out by a small instrument of Mr. Way's. It consists of a piece of clock-work, having in front a revolving disc, the face of which is covered with numerous holes with pins to fit in as may be required. In front of the disc are two small cylinders with pistons and arms attached. As the disc revolves the pins in its face lift the pistons in the cylinders and cut off the connection between the battery and the lighting apparatus, producing flashes of light of any duration that may be required, with their accompanying intervals of darkness, and admirably adapted for a revolving light, or as a code of signals for night service. In fact, there would appear to be no limit to the uses to which this discovery may be applied, and so simple is it in its manipulation that the choicest music of the great masters may be henceforth accompanied by expressive flashes of electric light. When the steamer arrived off the Mother-bank the light aloft was lit by attaching to it the ends of the wires from the voltaic battery. So soon as the glass tube became sufficiently heated to throw off the mercury from its surface the light exhibited its power and beauty, the steamer's usual masthead light, which was hoisted in its usual position, appearing but a dull red speck alongside it. Its effect upon the human countenance was, however, by no means favourable, casting on all on board the steamer a strange unearthly hue. Mauve colour, as it has become fashionable to term it on the ladies' dresses or bonnets, was brought out by the light with astonishing brilliancy. On reaching Cowes Roads, crowded with yachts, and all displaying lights, the contrast between the electric light and those shown by the yachts was something wonderful. The electric light was shining in its pale pure brilliancy aloft, while the hundreds of lights displayed by the yachts and by the town of Cowes, its club-house and hotels, dwindled down to dull red specks. The lens applied to the after light threw broad pathways of light to and fro as the lens might be directed, bathing the low black hulls of the craft that were in the line of light with a flood of sunshine, as also the delicate tracery of their spars and rigging. A boat which left the steamer here for one of the yachts was lighted on its way by the lens. On the steamer's return Norris Castle was passed, and the light thrown on its picturesque front. Ivy-covered towers, walls, and parapets, were illuminated as with a stroke from an enchanter's wand. Off Osborne House the steamer was stopped for some time, and the light must have shown itself with good effect on the still waters of the Solent, in front of the beautiful marine residence of Her Majesty. The experiments, which, as already stated, are only preliminary to more important ones, were considered to have been fully satisfactory. With a light on this principle under her bows the Great Eastern herself might have lighted her path across the waters of the Atlantic.

RIFLE-SHOOTING AT PRESTON.

The Committee of the Lytham regatta and sports having kindly placed a sum of money at the disposal of Captain Lennock and the officers of the 29th Lancashire Rifle Volunteers, to be distributed in prizes for rifle-shooting, they made the following arrangements for carrying out their wishes.

On the first day of the regatta, Wednesday, the 1st of August, 34 competitors appeared for the first match, viz., 400 yards—5 rounds: 1st prize, 5*l.*; 2nd, 2*l.* 10*s.* Confined to Lancashire Rifle Volunteers.

The following scores were made:—

Lieutenant Yates, 2nd Lancashire... ...	6
Adjutant Heaton, 3rd Manchester... ...	6
Private W. Dagger, 29th Lancashire ...	6

In shooting off the tie—

Lieutenant Yates, 2nd Lancashire, Blackburn, 1st

Private W. Dagger, 29th Lancashire, Lytham, 2nd

The weather was unfavourable—the wind being strong and squally from the left front with showers of rain, which eventually prevented the second match being fired on the first day as intended. Taking the state of the weather into consideration the shooting was good, and the following average was made by the different corps engaged:—

Blackburn	4·50
Southport...	3·80
Lytham	3·60
Manchester	3·50
Bury	3·50
Liverpool	3·00
Preston	2·33
Waterfoot	2·00
Stackstead	2·00
Wigan	1·33

It should however be added that the winner, Lieutenant Yates, Blackburn R.V., passed 10 weeks at the School of Musketry, Hythe; whilst the second, Private W. Dagger, Lytham R.V., has been only instructed in the company to which he belongs. Some of the corps also, as for instance, the Wigan, had never practised beyond 300 yards.

On the second day the weather was also very unfavourable and threatening; and, it being doubtful whether it would permit the three remaining prizes to be shot for, the Visitors' Prize of 5*l.* 5*s.* was amalgamated with the first prize, which then appeared as follows:—600 yards—5 rounds: 1st prize, 15*l.*; 2nd, 7*l.* 10*s.*; 3rd, 3*l.* 3*s.*; 4th, 2*l.* 2*s.* There were 33 competitors, and the following scores were made, viz.:—

Sergeant Brown, Southport R.V.	5
Lieutenant Yates, Blackburn R.V.	4
Sergeant-Major Greaves, 5th Lancashire R.V.	4
Corporal W. Fisher, Lytham R.V.	4

This prize also was confined to Lancashire Volunteers.

In shooting off the ties, the following was the final result:—

Sergeant Brown, Southport	1st
Corporal Fisher, Lytham	2nd
Sergeant-Major Greaves, Liverpool ...	3rd
Lieutenant Yates, Blackburn	4th

The wind was very strong right ahead, and the shooting altogether very fair.

The third prize was open to all comers, with any description of rifle, and was, 500 yards—5 rounds: prize, 5*l.* 5*s.*; won by Adjutant Heaton, 3rd Manchester, 7 points, who shot with a Whitworth rifle; Sergeant Ratcliffe and Lieutenant Yates, both of the Blackburn Rifle Volunteers, made 5 each with the Enfield. The Whitworth missed fire several times, but, when it did shoot, shot well.

The committee for shooting consisted of Captain Lennock and the officers of the Lytham Rifle Volunteers, assisted by Captain Lake, Adjutant, 3rd Royal Lancashire Militia. The marking was performed to the satisfaction of all parties by sergeants from the permanent staff 3rd Royal Lancashire Militia. The Volunteer prizes were shot for with the Enfield rifle, and the Hythe rules adhered to.

EXAMINATIONS FOR COMMISSIONS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I beg to call your attention to the fact that the examinations of candidates for direct commissions in the Army are entering upon a new phase. They are becoming extempore.

On Saturday last, 28th July, notice was given that an examination would be held at the Royal Hospital, Chelsea, commencing on Monday, 6th August. Thus only a week was allowed to finish preparing for the examination. On previous occasions, at least a month's notice has always been given. As it was generally understood that the examination took place every two or three months, the time thus allowed was sufficient to put the finishing touches to the studies of the candidates. If an examination is not a farce, at least a month's notice is required to prepare for it. No tutor nor trainer can keep his charge for weeks in such condition that he shall be able to run in his best form at a week's notice. There is no standing still in the education or training, whether of mind or body. The individual trained must go off or on. In either case he does not do nearly so well as he ought.

Perhaps it is objected that these military examinations must not be likened to a race, as they are not competitive. True; but they are races against time, for the candidate has to get 1800 marks in a given time.

Or, it may be said the examination is so easy that any one can pass with a week's notice. However easy a thing may be, there are always plenty who find a difficulty in doing it. Many candidates barely pass. It is no easy matter for them. Why throw extra difficulties in their way? If they are not wanted, let the number of marks required be raised.

I conclude with a petition to the military authorities at the Horse Guards, that, as they themselves may hope for more than a week's notice as to when a certain mighty letter-writer may try to provide for a few thousands of his ill-fed and overcrowded people by landing them on our fat shores, so they will in mercy grant the like to the painstaking though slower candidates and their hard-worked tutors.—I am, &c.,

CANTAB.

ADJUTANTS OF VOLUNTEERS.

The following Royal Warrant has been promulgated, having reference to the appointment of Adjutants to the Volunteer Artillery and Rifle corps:

"VICTORIA, R.

"Whereas we have adjudged it expedient to grant commissions under our sign manual to officers who may be appointed adjutants in the Artillery and Rifle Volunteer forces, raised under the Act 44th of George III., chap. 54, and to make provision for the grant of retired pay to such officers; our will and pleasure is, that this our Royal warrant, to be administered and interpreted by our Secretary of State for War, shall be the sole authority for the issue of such retired pay, which shall be governed by the following rules and regulations:—

"1. Retired pay shall be granted to adiutants of Artillery and Rifle Volunteer corps after they shall have completed the undermentioned periods of service in our regular or Indian forces, our Marines, embodied Militia, or the army of the East India Company, and in a Volunteer corps, viz.:—15 years, 5 years of which as adjutant of Volunteers, 3*s.* per diem; 20 years, 7 years of which as adjutant of Volunteers, 4*s.* per diem; 25 years, 10 years of which as adjutant of Volunteers, 5*s.* per diem; 30 years, 15 years of which as adjutant of Volunteers, 6*s.* per diem.

"2. Such pay shall be granted to those adjutants who may through age or infirmity become unfit for the performance of the duties of their commissions, or whose services may cease to be required by reason of the reduction of their corps by our order; but no adjutant of a Volunteer corps whose corps may dissolve of its own accord, or otherwise fall below the establishment entitling it to an officer of that description, shall have any title to retired pay.

"3. And no adjutant on the retired list who shall accept any military office or employment of profit under Government shall be entitled for the period during which he holds such office to claim any portion of the said retired pay.

"4. Every adjutant who shall claim the retired pay to which he may become entitled under the provisions of this our Warrant shall, previous to receiving the same, produce to the Paymaster-General of our Forces a declaration, taken and subscribed before a justice of the peace or some other person authorised by law to administer such declaration, in the words or to the effect following:

"'I, A. B., do solemnly and sincerely declare that I was serving as adjutant in ——— Volunteer Corps from the ——— to the ———, and that I now claim to receive retired pay at the rate of ——— a-day from the ——— to the ———, during which period I did not hold or enjoy any office or employment of profit, civil or military, under the Crown, or any other Government, besides the retired pay of —— a-day now claimed, except my half-pay as ———.'

"Given at our Court at St. James's this 19th day of June, 1860, in the 23rd year of our reign. S. HERBERT."

An Order has been issued that soldiers are to salute chaplains, paying them the compliment due to their relative rank.

HOUSE OF LORDS.—FRIDAY.

The Navy Discipline Bill passed through committee and was ordered to be read a third time.

HOUSE OF COMMONS.—FRIDAY.

INDIAN PRIZE MONEY.

Sir Minto Farquhar wished to know what progress had been made towards the settlement and distribution of the Delhi and Lucknow prize money, and of Indian prize money generally.

Sir C. Wood said that the question had been referred to Commissioners, and he expected their report in a day or two. Some hesitation had prevailed as to which system of distribution should be adopted—the old Indian system or that which had been followed after the Crimean war. The latter was of the two more favourable to the soldier, and the Indian council had expressed their concurrence in it.

NAVAL RETIREMENT.

Mr. Dunn asked the Secretary to the Admiralty whether, in the contemplated scheme of naval retirement, time served in a revenue schooner for the suppression of smuggling, and therefore in Her Majesty's service, was to count as sea time?

Lord Clarence Paget replied in the affirmative, and took the opportunity of directing the attention of naval officers to an order respecting retirement which he had published in that day's *Gazette*.

DOCKYARD INQUIRY.

Lord Clarence Paget stated, in answer to a question from Sir J. Packington, that Mr. Ricardo had resigned the chairmanship of the Royal Commission to inquire into the management of Her Majesty's dockyards, and that he would be succeeded by Mr. Frederick Peel.

MILITARY ORGANISATION.

Sir Frederick Smith asked the Secretary of State for War whether Her Majesty's Government contemplated taking any proceedings on the report of the Select Committee on Military Organisation.

Mr. Sidney Herbert said that it would be his duty to submit to his colleagues in the Government the changes which he might think it desirable to make in the composition of the War Office. When examined before the Committee he expressed an opinion that there should be a greater infusion of the military element in that department, for the Army was naturally jealous of being managed exclusively by civilians. It would be impossible to propose any alteration during the present session.

ENFIELD RIFLES.

Colonel Dickson, after referring to the efficient manner in which the Enfield manufactory was conducted, asked for an explanation of the circumstance that the stocks of the rifles at present being manufactured there were shortened by one inch.

Mr. Sidney Herbert explained that it had been determined to have stocks of two lengths, in order to suit men of different sizes. Eighty-seven regiments had been consulted, and the great preponderance of opinion among the men was in favour of two lengths.

PROMOTION OF COLONELS.

Colonel Lindsay asked the Secretary of State for War whether any decision had been arrived at with respect to the Colonels promoted to that rank for distinguished service in the Crimea, who were, upon the revision of the lists by the Commissioners of 1858 unfortunately omitted from consideration in the report of that Commission.

Mr. Sidney Herbert said that he had submitted a proposal on the subject to the Commander-in-Chief, under whose consideration it was.

The report of the Committee on Fortifications was brought up and agreed to.

Obituary.

The colonelcy of the 14th Light Dragoons has become vacant by the death of General the Hon. Sir Henry Murray, K.C.B., which gallant officer died on Sunday last at his residence at Wimbledon. He was one of the few surviving Waterloo officers, and had been sixty years in the Army, his commission as Cornet dating as far back as May, 1800. In 1806-7 the gallant deceased served in Naples, Sicily, and Calabria; and in March in the last-mentioned year he accompanied the expedition to Egypt as Aide-de-camp, and was present at the attack on Alexandria, siege and storming of Rosetta, and on every other occasion when our troops were engaged. He was also in the Walcheren expedition in 1809, and was at the siege and surrender of Flushing. In January, 1813, he went as Lieut.-Colonel with his regiment, the 18th Hussars, to the Peninsula, and was present at the crossing of the Eslar, and commanded the regiment in support of the 10th Hussars at the action of the Morales de Toro. The deceased served in the campaign of 1815, in command of his regiment, which was in the 6th brigade of cavalry, under the command of Major-General Sir Hussey Vivian. He commanded the rear regiment of the column in the retreat the day after the battle of Quatre Bras, and at Waterloo took part in the brilliant charge of his brigade at the conclusion of the action. For his services at Waterloo he was made a Companion of the Order of the Bath, and on the 18th of May last was made a Knight Commander of that most honourable order of knighthood. On the 18th of March, 1853, he was appointed Colonel of the 14th (the King's) Regiment of Light Dragoons. The late General's commissions were dated as follows:—Cornet, May 16, 1800; Lieutenant, June 11, 1801; Captain, August 24, 1802; Major, March 26, 1807; Lieut.-Colonel, January 2, 1812; Colonel, July 22, 1830; Major-General, June 28, 1838; Lieutenant-General, November 11, 1851; and General, February 6, 1855. The late Hon. Sir Henry Murray was a Commissioner of both the Royal Military College and the Royal Military Asylum, and had held for the usual term the military command of the western district. The deceased was the youngest son of David, second Earl of Mansfield, and the Hon. Louisa Catheart, Countess of Mansfield, and was born August 6, 1784. His youngest son, Captain Arthur Stormont Murray, of the Rifle Brigade, died in August, 1848, from wounds received in leading an attack against the Kaffirs.

TOLKIEN'S PIANOFORTES.—THE PATENT IRRESISTIBLE BOUDOIR PIANOFORTE is now acknowledged, by competent judges, to be an instrument of the finest tone yet manufactured in Europe. TOLKIEN'S COTTAGE AND PICCOLO PIANOFORTES, of elegant design, in walnut-tree and rose-wood, from 25*l.* to 60*l.* Illustrated Catalogues sent post free to any part of the kingdom.
H. TOLKIEN, 27, 28, and 29, King William Street, London Bridge, E.C.

MILITARY BAND INSTRUMENTS.

J. KOHLER begs respectfully to call the attention of Commanding Officers and Presidents of Band Committees to his IMPROVED MODELS OF BAND INSTRUMENTS, possessing a most powerful and sonorous tone, and combining elegance with durability in their workmanship.

J. KOHLER also takes this opportunity to state that his newly-invented PATENT HARMONIC CORNOPEAN is universally approved of by the musical world, and he can with confidence strongly recommend it to the notice of all amateurs of the Cornopean.

Drawings and Price Lists sent on application to J. KOHLER, Military Musical Instrument Maker to H.M. Army and Navy and the Indian Army, 35, Henrietta Street, Coven Garden, London, W.C.

FARMS, ESTATES, &c.

MESSRS. HEARLE & CO., LAND AGENTS AND SURVEYORS, 5, Crescent Place, Blackfriars, E.C., direct attention to the very great facility for Letting and Selling Farms and Estates, afforded by the extensive circulation of their printed Lists, containing upwards of 200 farms and estates, which are published twice per month, and distributed to some hundreds of applicants, free. These Lists contain estates throughout England to be let or sold, especially suitable to the requirements of noblemen and gentlemen of the Naval and Military profession.

CHELTENHAM.—To be SOLD, considerably under value, on account of the owner being obliged to reside elsewhere, the Capital FREEHOLD HOUSE, No. 20, Lansdown Terrace, with or without the furniture, situated in the most healthy and fashionable part of Cheltenham, and ready for immediate occupation. Every information to be obtained on personal or written application to the owner, No. 20, Lansdown Terrace, Cheltenham. House and furniture, 1900*l.*; house without furniture, 1400*l.* Let at 200*l.* per annum for the last three years.

MONEY.—MONEY ADVANCED at a few hours' notice, on the most advantageous terms, to Noblemen, Officers in the Army, Heirs to entailed estates, and Gentlemen of property, on their personal security, also on security of reversions to landed estates, at 5 per cent., payment of which may be deferred until possession, on application to Mr. DICKER, 10, Craig's Court, Charing Cross, S.W.

MONEY.—Noblemen, Officers in the Army, Persons holding Government Appointments, Clergymen, and other Gentlemen, can have ADVANCES upon their notes from a private channel without life insurance or delay, and with secrecy.—Apply to Mr. HUDSON, 28, Regent Street, Piccadilly, W.

RIFLE CORPS TENT.—FREDERICK EDGINGTON, Inventor and Sole Manufacturer of this celebrated Tent, without a pole in the centre, from 4*l.* Marquees and Flags lent on hire. Address, THOMAS ST., OLD KENT ROAD, LONDON, S.E.

No connection with any other house.

CAMP AND CABIN FURNITURE.—Illustrated Priced Catalogues of the Newest Description of Portable Furniture, Portmanteaus, Despatch and Dressing Cases forwarded on application to Messrs. WOOLF & SON, 59, Piccadilly, opposite St. James's Street. Estimates for Uniform for any branch of Her Majesty's Service, post free from their Army and Navy Contracting Establishment, 45, Old Bond Street, W., one door from Piccadilly.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, HILL & MILLARD, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

THE INCOMPARABLE BEDS, FOR AIR OR HOT OR COLD WATER (AYCKBOURN'S PATENT).—These Beds may be filled with air or hot or cold water, they require no tossing about (or making as it is termed), are easily washed, are light and portable, may be packed in a carpet bag, and therefore invaluable to EMIGRANTS, YACHTSMEN, NAVAL AND MILITARY OFFICERS AND TRAVELLERS. They form in an instant Six or more Swimming Belts, and will stand any climate. No Emigrant should leave this country without one or more of these Beds.

Beds, 6 feet long by 3 feet wide, price 3*l.*, and 7*s.* 6*d.* extra for every 6 inches additional width. Pillows, 20*s.* Inflating Apparatus, 2*s.* 6*d.* Will be forwarded on receipt of Money Order by BENJAMIN GEORGE, corner of Ware Street, near the Canal Bridge, Kingsland Road, N.E.

MECHI AND BAZIN'S DESPATCH-BOX WRITING CASES, in russia and morocco leather, are made in twenty different forms and sizes, fitted with real Bramah and Chubb locks; also others of a cheaper description; prices vary from 1*l.* to 50*l.* Portable Writing and Dressing Cases, Brush Cases, Courier Bags, Pic-Nic Cases, Wicker Luncheon Baskets, Sporting Knives, Wine and Spirit Flasks, &c.
112, Regent Street, W., and 4, Leadenhall Street, E.C.

SKAIFE'S PATENT PISTOLGRAPH (Price Ten Guineas), "The greatest photographic discovery of the age," with hundreds of its chromo-crystal productions, including Hyde Park equestrians, and jewellery guinea portraits of babies, "the most beautiful instantaneous pictures which photography has yet produced."—*Brighton Gazette.* Now on view at SKAIFE'S Pistolgraph Depôt, 47, Baker Street, Portman Square, London, W. Articled pupils received at a moderate premium.

GUSH & FERGUSON, Artists and Photographers, beg respectfully to invite the Nobility and Gentry to view their First-Class PORTRAITS, in Oil and Water-Colours.
GALLERY, 179, REGENT STREET, W.

A. DAVIS, 33, Strand, W.C.

H. PEAT,
SADDLER AND HARNESS MAKER,
14, OLD BOND STREET, LONDON, W.

SAUCES.—Connoisseurs have pronounced LEA & PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea & Perrins' name on Bottle, Label, and Stopper.

Sold by CROSSE & BLACKWELL, London, and all respectable Oilmen and Grocers.

Sole Manufacturers—LEA & PERRINS, Worcester.

CROSSE AND BLACKWELL, Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. & B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg, and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, Relish, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable Oilmen, Grocers, &c., and wholesale of

CROSSE & BLACKWELL, 21, Soho Square, London, W.

BEST AND CHEAPEST TEAS AND COFFEES IN ENGLAND
Are at all times to be obtained of
PHILLIPS AND COMPANY, TEA MERCHANTS,
8, King William Street, City, London, E.C.

Black or Green Tea, 2*s.* 8*d.*, 2*s.* 10*d.*, 3*s.*, 3*s.* 4*d.*, to 4*s.*

A General Price Current published every month, containing all the advantages of the LONDON MARKETS, and is sent free by post on application.

Sugars are supplied at Market Prices.

TEA.—The Newspapers and Price Currents daily report that COMMON Teas are dearer, and FINE are cheaper. What is the reason of this? Because common (and not fine) is sold to the Public. STRACHAN & Co. guarantee that their Black Teas, from 3*s.* 8*d.* to 4*s.* 2*d.*, consist only of the FINEST descriptions.

26, Cornhill, E.C.

OR,
THE IRRESISTIBLE.

The perfume of the day. Price 2*s.*, 3*s.* 6*d.*, 5*s.*, &c.
HENRY RIGGE, 35, New Bond Street, London, W.

VOLUNTEER RIFLE CORPS.—NOTICE. In consequence of the heat and fatigue experienced by gentlemen after exercising and review, many have been induced to try OLDRIDGE'S BALM OF COLOMBIA, which invariably has produced such a peculiar refreshing coolness to the head, that it has become a most valuable toilette requisite. It also nourishes and strengthens the roots and body of the hair, prevents it falling off or turning grey, and causes a beautiful appearance, with wave or curl, at the same time cleansing it and removing the scurf. 30 years' celebrity has proved there is no wash equal to it for improving and producing new hair, whiskers, and moustache. Price 3*s.* 6*d.*, 6*s.*, and 11*s.* per bottle. Wholesale at C. & A. OLDRIDGE'S, 22, Wellington Street, Strand, W.C.

SEQUELIN'S OIL.—This Vegetable Preparation is an infallible restorative of the hair, eyebrows, whiskers, and moustaches, &c., producing growth, checking its falling off almost instantly, and imparting to it unequalled softness and brilliancy. One bottle is sufficient. Price One Guinea. The money returned if not effectual. Sold by the Inventor, SEQUELIN, 40, Wharton St., Lloyd Sq., W.C., London.

SAVARESSE'S PATENT FLEXIBLE CAPSULES, by which Castor Oil and nauseous Balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with Gelatine. These Capsules may be obtained of BELL, 338, Oxford Street, W.; SANGER, 150, Oxford Street, W.; HOOPER, Pall-Mall East, S.W.; KEATING, St. Paul's Church Yard, E.C.; and medicine vendors throughout the kingdom.

EVANS & LESCHER, London, Patentees.

DINNEFORD'S PURE FLUID MAGNESIA
Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for
ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.
As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the
ACIDULATED LEMON SYRUP,
it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.
PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS,
(and General Agents for the *Improved Horse Hair Gloves and Belts*),
172, NEW BOND STREET, LONDON, W.,
And Sold by all respectable Chemists throughout the Empire.

NERVO-ARTERIAL ESSENCE, prepared only by Dr. WM. BATCHELOUR, M.R.C.S.E. 1835, and M.L.A.C. 1834. It strengthens the vitality of the whole system without reaction, and speedily removes nervous complaints. In bottles, at 2*s.* 9*d.*, 4*s.* 6*d.*, 11*s.*, and 33*s.*, at Goodyer's, 31, Regent Street, W.; Butler & Crispe's, 4, Cheapside, E.C.; Sutton & Co., Bow Churchyard, E.C.; Barclay & Sons, Farringdon Street, E.C.: 12, Finsbury Place South, City, E.C., and all Chemists.

RUPTURES.—HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—circumference two inches below the hips. Price single, 12*s.*; double, 18*s.*; postage 10*d.* and 16*d.* Illustrated circulars on application to Mr. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

1860.—Just published, post free, three stamps.
"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C. and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*

Liverpool, 134, Duke Street.

BY HER MAJESTY'S ROYAL LETTERS PATENT. (GRANTED 1860.)

MR. A. ESKELL, SURGEON DENTIST, 8, Lower Grosvenor Street, W., Sole Inventor and Patentee of an Invention which has for its object the Perfect and Painless Adaptation of ARTIFICIAL TEETH upon a novel principle, whereby one set of teeth lasts a lifetime, and a second, or reserve set, if unnecessary. Changes take place in the mouth from absorption of gums, removal of stumps, teeth, &c.; and ordinary sets would, under these circumstances, be comparatively useless, or only rendered available at some cost, but upon Mr. Eskell's patented process they are not impaired in the slightest degree. Residents abroad or in the country have it in their power to adjust their artificial teeth at all times without the aid of a dentist. Mr. Eskell does not grant licences to use his patent, which can only be obtained at his residence, 8, Lower Grosvenor Street, where the medical profession, the nobility, gentry, and the public may see specimens, and obtain every information. Teeth stopped, &c. All consultations free.—8, Lower Grosvenor Street, S.W.; and Bennett's Hill, Birmingham.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 9, Burton Crescent, Tavistock Square, London, W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE being the recorded experience of 30 years' specialpractice in Great Britain, France, and America—wild evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

PHARMACIE FRANÇAISE, 57, PRINCES STREET, LEICESTER SQUARE, W.C.—LE MAOUT, Chemist, from Paris.—Medicamens Spéciaux —Remèdes Raspail—Capsules Le Maout—Ricord's Medicines, Plants, and all French Medical Articles. —Prescriptions accurately prepared. Chloroform Capsules for Sea-sickness.

KEATING'S PERSIAN INSECT DESTROYING POWDER.—FLEAS IN DOGS, POULTRY, &c., are instantly destroyed, as also Fleas, Beetles, and every other insect, by this Powder, which is perfectly harmless to animal life; sportsmen particularly will, therefore, find it invaluable. Sold in Packets, 1*s.*, 2*s.* 6*d.*, and 4*s.* 6*d.* each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79, St. Paul's Churchyard, London, E.C. Take notice, each genuine packet bears the above name and address. Sold by all druggists.

BLIGHTS, MILDEW, BED-BUGS.—GISHURST COMPOUND, patented for preventing and destroying these and other pests. See *Gardeners' Chronicle, Cottage Gardener*, and *Field*. In boxes 1*s.*, 3*s.*, 10*s.* 6*d.*, retail of all Nursery and Seedsmen. Wholesale of PRICE'S Patent Candle Company, Limited.

NOTICES OF THE PRESS.

"In this Work of 'British Sea-Weeds' is to be found all that could be wished for, and more than could be expected, in reference to the tribe in question. The specimens you gather from the beach, wash and carefully display before admiring eyes, are not more fresh and perfect than are these illustrations now before us. Drawings, however highly finished in coloured plates, and however faithfully they represent what they are intended to place before you, are not to be compared with these prints. You touch them with your finger to ascertain whether they lie upon the surface of the paper or are a part of it."—*Morning Chronicle.*

"This volume is well qualified to receive popular approval, but it has, beyond this, other recommendations. It is a first-class book, and it is a first-class scientific book as regards its execution. . . . As a scientific book, the authors have well done their part too; for they have given us a clear, correct, and comprehensive scientific account of the plants they have treated on, adding such popular information as the subject admitted of; and they have given us in addition, well-executed magnified dissections of the parts essential for scientific study."—*Illustrated London News.*

"For this kind of work Nature-Printing is exactly adapted. Every delicate and inimitable ramification is most attractively and accurately represented. The fifty-six plates in this volume can scarcely be surpassed, and have not, as far as we know, been equalled. . . . We have found them pleasing, and still pleasing during several inspections. The volume is handsomely got up, and will make a very attractive drawing-room table-book at home or at the sea-side."—*Athenæum.*

"The process by which it is produced is that delightful one which has been a labour of love to Mr. Henry Bradbury in bringing to perfection, and which was first applied to the Ferns. To speak of the accuracy of the plates is of course a misnomer. They are of the nature of photographs; and the only possible drawback to the work is, that its extreme beauty will banish to the drawing-room table, as a mere example of pretty drawing, what, as a scientific manual, has not been equalled."—*Saturday Review.*

BRADBURY & EVANS, 11, Bouverie St., Fleet St., E.C.

In post 8vo. price 10*s.* 6*d.*

THE ARMIES OF THE GREAT POWERS. By LASCELLES WRAXALL.

The object of this work is to furnish a correct and detailed account of the amount and nature of the forces belonging to the Great Powers. At a glance may be perceived the strength of the respective armies, and characteristics of their troops, their drill, discipline, and uniform. Although Mr. Wraxall treats more especially of the armies of France, Austria, England, Russia, and Prussia, he has not omitted those of Sardinia, Turkey, and Anglo-India. The value of such a manual can hardly be over-estimated at the present moment.

GEOGRAPHY OF INDIA.

1 large 8vo. vol. 21*s.*

A GAZETTEER OF INDIA. By EDWARD THORNTON, Esq.

The chief objects in view in compiling this Gazetteer are—1. To fix the relative position of the various cities, towns, and villages with as much precision as possible, and to exhibit with the greatest practicable brevity all that is known respecting them; and 2ndly, to note the various countries, provinces, or territorial divisions, and to describe the physical characteristics of each, together with their statistical, social, and political circumstances. To these are added minute descriptions of the principal rivers and chains of mountains; thus presenting to the reader within a brief compass a mass of information which cannot otherwise be obtained except from a multiplicity of volumes and manuscript records. The volume, in short, may be regarded as an epitome of all that has yet been written and published respecting the territories under the government or political superintendence of the British power in India.

London: WM. H. ALLEN & Co., 7, Leadenhall St., E.C.

LONDON WELSH RIFLES.—It has been suggested that Welsh residents in London favourable to the Volunteer Movement might form themselves into a distinct company or corps; all Welshmen favourable to this plan are requested to have the goodness to communicate forthwith to G. HOWELS-DAVIES, Esq., 4, Trafalgar Square, W.C.

TO VOLUNTEER CORPS.—A LIEUTENANT AND INSTRUCTOR OF MUSKETRY of a Militia Regiment lately disembodied, holding a First-Class Certificate from the School of Musketry, Hythe, and likewise having superior testimonials, is anxious to give his services to any Volunteer Corps requiring an Adjutant or Musketry Instructor.—Address V. A. M. I., care of JOSEPH SMITH, Esq., 16, Wellington Street, Strand, London, W.C.

WANTED, a MESSMAN, for the Officers' Mess 78th Highlanders. Apply to Mess President, Edinburgh Castle, inclosing terms and testimonials.

WANTED IMMEDIATELY, for the Officers' Mess 1st and 2nd Depôt Battalions, Chatham, a MESSMAN. Testimonials, &c., to be sent to the President Mess Committee, Chatham Barracks.

NORTH AND EAST YORK MILITIA ARTILLERY.—To Non-commissioned Officers of the Royal Artillery and Royal Marine Artillery.—WANTED, for the Permanent Staff, several SERGEANTS. Applications to be sent to the Adjutant, Scarborough, Yorkshire.

ARMY EXAMINATIONS.—Candidates for the Artillery, Line, and Cavalry, are rapidly and efficiently prepared at an establishment, the pupils of which have, within the last two years, come out seven times first, five times second, and three times third on the list. Apply to Captain LENDY, Sunbury, S.W.

NAVAL CADETS.

OF THE 43 SUCCESSFUL CANDIDATES at R. N. College, 12th June, TEN were prepared at NORTH GROVE HOUSE, SOUTHSEA, viz., Messrs. Stewart, Gabbett, V. Orlebar, Henderson, Master, Fellowes, Sidney Smith, Blackett, Millett, Knollys. Mr. Mounsteven, who passed first at the Competitive Examination for Marine Cadetships, was also prepared at North Grove House.

W. BELL, Chaplain, R.N.;
A. BURROW, Chaplain and Naval Instructor;
W. JOHNSON, Naval Instructor.

NAVAL AND MARINE CADETS, ETC.

THE REV. THOS. KNIGHT, B.A. Hon. St. John's, Cam., receives PUPILS for the Royal Navy, Army, Woolwich, and Addiscombe. NINE out of ELEVEN of Mr. Knight's Pupils PASSED at the Royal Naval College, 12th June, 1860, taking 1st, 2nd, 3rd, 6th, 7th, 11th, 11th, 17th, 19th places in the respective divisions of 99 candidates, of whom 62 passed and 37 failed.—St. Mary's Hall, Southsea, Hants.

ROYAL MILITARY ACADEMY, WOOLWICH, S.E.

At the recent Competitive Examination for admission into the Royal Military Academy, Woolwich, commenced on the 30th ultimo, the following gentlemen passed directly and on first trial from Mr. R. B. DE BURGH'S MILITARY ESTABLISHMENT, Dublin:—

Mr. G. C. Bayley,	5th Place.	Mr. F. B. Knox.	
Mr. T. Fraser,	9th ,,	Mr. C. W. E. Murphy.	
Mr. H. M. Hayes,	13th ,,	Mr. C. F. B. Guy.	
Mr. R. G. Scott,	17th ,,	Mr. W. H. Rathborne.	

At the Examination held in January, 1860, the following gentlemen (the only candidates direct from Mr. De Burgh's) passed on first trial:—

Mr. W. J. Galway.	Mr. R. A. Livesay.
Mr. J. L. Morgan.	Mr. C. Greer.

Mr. Galway obtained 4432 Marks and the Tenth Place; and Mr. Morgan 4108 Marks and the Fourteenth Place. These high Marks were obtained without the aid of Classics, their Marks for Mathematics alone having been 2555 and 210 respectively.

ROYAL INDIAN MILITARY COLLEGE, ADDISCOMBE.—At the late Competitive Examinations for admission into the Royal Indian Military College, held in January, 1860, and May, 1860, the following gentlemen (the only candidates direct from Mr. De Burgh's) passed on first trial:—

Mr. H. Hardinge	...	...	... 2nd Place.
Mr. L. F. Boileau	...	...	... 12th ,,
Mr. T. R. Disney	...	...	... 25th ,,

At the above Examinations, the successful candidates direct from Trinity College, Dublin, had been under Mr. De Burgh's tuition.

Mr. De Burgh's references to the Parents of present and former pupils include the following:—The Right Hon. and Right Rev. the Lord Bishop of Meath, the Right Hon. Joseph Napier, Venerable the Archdeacon of Meath, Colonel Lake, C.B.; Colonel Knox, J.P.; Colonel Morgan, R.A., Swansea.

No. 6, Harcourt Street, Stephen's Green, Dublin.
July 30th, 1860.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to OSWALD HUNTER, Esq., The Cedars, Putney, S.W.

ROYAL NAVAL ESTABLISHMENT, EASTERN PARADE, SOUTHSEA.
(LATE MR. THOMAS EASTMAN'S, R.N.)
CONDUCTED BY MRS. EASTMAN.

The studies of the Pupils are under the direction of Mr. GEORGE E. SPICKERNELL, the Head Master, assisted by other Masters, for many years with the late Mr. EASTMAN.

The following gentlemen have recently passed from this Establishment as Naval Cadets—Messrs. Hough, Dugdale Coddington, Gissing, Lindeman, Bancroft, Campbell, Herbert, Kingscote, Wells, Baring, the Count F. Metaxa, Messrs. Massy, Watkins, and Joyce.

350 Gentlemen have passed from this Establishment as Naval Cadets, and more than 200 as Marine Cadets, &c. &c.

The highest references can be given. Applications to be addressed to Mr. SPICKERNELL.

STAFF EXAMINATIONS. — Twenty-four Officers have already joined the Military College of Sunbury this year, to read either for the Staff College, or for direct appointment on the Staff. Apply to Captain LENDY, Sunbury, S.W.

MILITARY EXAMINATIONS.—A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

ARTILLERY EXAMINATIONS. — Candidates for the Competitive Examinations are individually prepared at an establishment which receives six pupils only for that branch of the Service. Four resident professors. Apply to X., care of Messrs. PARKER, 445, Strand, W.C.

SPECIAL MILITARY TUITION, including Geometrical and Military Drawing, Hindustani, Fortification, Military Surveying and Reconnoitering. By Lieut.-Colonel MORLAND, who also continues the preparation of candidates for Addiscombe and the Military Competitive Examinations.—At 20, Norland Square, Notting Hill.

EDUCATION IN FRANCE.—TWO GENTLEMEN, one an English and the other a French Protestant, with the assistance of five highly-qualified Masters, PREPARE 14 YOUNG GENTLEMEN for the Competitive Examinations for Woolwich, Sandhurst, Addiscombe, the Indian Civil Service, and direct appointments in the Army. Terms, 50 to 60 guineas. Address, B.A., Post-Office, St. Pierre, Lés Calais.

ARMY EXAMINATIONS.—An OFFICER, the Author of "Army Reform," "Our Military System," "The Sandhurst Course," "Radetzki's Campaign in 1848," &c., &c., who has passed numerous gentlemen for the Guards, Line, and Artillery, and all without one failure, and who has now the sons of a Duke, a Marquis, and of a General Officer amongst his pupils, ATTENDS AT THE RESIDENCES OF CANDIDATES any distance in or out of Town. Reference to Officers and others. Address, H. A., ARMY AND NAVY GAZETTE Office, 16, Wellington Street, W.C.

ROYAL NAVAL ACADEMY. Of the many pupils prepared at the Academy conducted by MR. C. F. COOPER, R.N., not one has failed to pass, and eight have taken 1st, 2nd, and 3rd places at the Royal Naval College, Beresford Place, Southsea.

GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.
Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.
Gun Factory Established 1780.

THOMAS WILSON'S BREECH-LOADING RIFLE.

Mr. Thomas Wilson begs to call the attention of the public to his new BREECH-LOADING RIFLE, and to state that he has committed the working of the patent to Messrs. Rabone, Brothers, & Co., of 47, Broad Street, Birmingham, to whom all inquiries or other communications may be addressed.

This Rifle is well adapted for all branches of Her Majesty's Service, and is pronounced by the highest authorities to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—

1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.

2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.

3rd. It is easy to manufacture, and can be made entirely by machinery.

4th. It is so constructed that accident from careless loading, or otherwise, is impossible.

5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly, for firing, without the aid of tools. This facility would be occasionally valuable in rendering the Gun useless to an enemy, or to mutinous troops.

6th. The action is always in good order, requiring no adjustment in use.

7th. The action is equally applicable to single and double-barrel Guns, and may be used for sporting as well as military purposes.

8th. The principle can be applied to all ready-made Enfield guns, at an immense saving to the country.

Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.

A pattern may now be seen at Mr. Lancaster's, No. 151, New Bond Street, W.; and at Mr. Pritchett's, No. 86, St. James's Street, London, S.W.; as well as at Messrs. Rabone, Brothers, & Co.'s, 47, Broad Street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 568 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60s. per 1000; blank, 33s. per 1000.
Manufactured by THOMAS H. ANTHONY, 37, Broad Street, Birmingham.

ELEY'S AMMUNITION, comprising WIRE CARTRIDGES for killing game at long distances, WATERPROOF PERCUSSION CAPS, GUN-WADDINGS, BREECH-LOADING CARTRIDGES, and every description of Sporting and Military Ammunition.—ELEY BROTHERS, Sole Contractors to the War Department for Jacob's Rifle Shell Tubes, Cartridges and Caps for Colt's, Adams', and other Revolvers; Enfield Ammunition, &c.; Gray's Inn Road, London, W.C. Wholesale only.

CLOTHING FOR YOUTH.—The KNICKERBOCKER, the Highland Dress, Ladies' Travelling Mantles, Riding Habits, and Pantalons de Dames à Cheval, with much novelty and general excellence, H. J. & D. NICOLL have for the remainder of this season at WARWICK HOUSE, 142 and 144, Regent Street, W. In the autumn this branch will be removed to the rear of the old Establishment.

VISITORS TO THE SEASIDE AND TOURISTS will find much ease and comfort in the NEUTRAL-COLOURED LOOSE COAT, fastened by one or more buttons, with Trousers and Vest, all of one material, as originally introduced by Messrs. NICOLL, of Regent Street, W., and Cornhill, E.C.; they recommend also a Black Velvet Coat, and for gentlemen seeking a kind of half-dress morning coat a fine black cloth is specially prepared; this garment is edged with braid and cut somewhat as a riding-coat, and is getting into general use.

H. J. & D. NICOLL are prepared, at short notice, to produce Court Suits and Servants' Liveries, by applying to them in Regent Street, London, W.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. BRADBURY & EVANS, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 16, Wellington Street, Strand, in the county of Middlesex.—SATURDAY, August 4, 1860.

☞ *The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included. Post-office orders to be made payable to* ARCHIBALD GRAHAM.

A PARAGRAPH recently went the round of the newspapers on the subject of naval mismanagement in France, which seems to have afforded some people a strange satisfaction. It was facetiously headed, in some instances, "Nuts to Crack"—in others, "Consolation—for Sir Charles Napier;" as if two blacks could make white, or mismanagement across the Channel could change the character of the same thing in England. Perhaps we hear too much of "their doing things better in France," whenever any blunder occurs at home; the fact being, that we know all about our own shortcomings and very little about our neighbour's. And we have not here the faculty of painting everything so *couleur de rose* as they have in Paris, especially under the imperial *régime*. It is not only to the landscape that distance "lends enchantment." This is equally experienced in all comparative views of what is far off and what is near home. Even in our own affairs, nothing can exceed the beauty and substantial look of an air-built castle; and so it is always, whenever we draw upon our imagination for our facts, whether as regards the history of the past or present. Our readers were doubtless surprised at the recent account in this journal of the almost sleepy aspect of affairs at Cherbourg, where they doubtless imagined all was always bustle and preparation; and all Europe has been astonished to learn recently, from the very highest authority, not only that the French navy does not number now as many steamers as there were sailing-vessels under Louis Philippe, but that only 300,000 French soldiers are under arms, after abating nearly the 100,000 in Algeria, Rome, and China, and those who are sick. But Louis Napoleon does not wish us to believe he intends to keep either his army or his navy weak. He says, "I desire also to organise the forces of the country on the best possible footing; for, if foreigners have only seen the bright side of the last war, I myself, close at hand, have witnessed the defects, and I wish to remedy them."

Louis Napoleon is quite right. We have alluded to these several matters, not in order to console ourselves, that we have nothing to do, that we manage as well as our neighbours, and that we have nothing to fear from France; but quite the contrary. While we are anxious that our preparations should not be fitful and regulated by panic; we are also most anxious that, after the fit is over, and the panic discovered to be uncalled for, we may not fall asleep and leave things to muddle on anyhow as before. "Fas est et ab hoste doceri;" but that does not mean because France has steamers that cannot carry their engines and full cargo of coals, without sinking their lower ports within a foot of the water, that we should learn the same lesson. Some of our newest screw vessels, indeed, prove that already we have accomplished so much! We may depend upon it our rotten gun-boats will not be imitated across the water. We ought also to be able to rely upon our own Naval Department, for henceforward making due and timely preparation for ample supplies of timber for our ship-building requirements. The Dockyard Commission should have something to say on this subject. We shall see.

But France is not satisfied, it seems, even with its military organisation. And yet we know with what "marvellous rapidity," at a time too when "France was not armed," 150,000 men were thrown by land and by sea upon Lombardy. It is well, therefore, that our own War Department is now to be re-organised in accordance with the principles laid down by the late Select Committee, over which Sir James Graham so ably presided. Mr. Godley, in his evidence before that Committee, gave it as his opinion that in case of war the Department, as now organised, "would almost certainly break down." In France, on the contrary, a committee of the *corps législatif* has recently reported in favour of the war administration, which, incomparable as it is, does not yet satisfy its astute master. The Committee says, "Sûre de la force incomparable de notre armée, n'ayant que des éloges pour la bonne organisation de l'administration de la guerre, il est naturel qu'elle tourne ses regards vers la marine." Now, what her Army is to France, our Navy is to England. But we fear the revelations of this Session of Parliament will prevent any Committee or Commission reporting that "they have nothing but eulogy for the excellent organisation of our Admiralty administration." Indeed, we have something very positive, from those who can best judge, utterly condemnatory of it. In the Duke of Somerset's Memorandum on the late Committee on Dockyard Economy, we had a severe *exposé* of continued Admiralty mismanagement, culminating in the appointment of a Comptroller of Steam Machinery, "tending rather to impede than to advance the progress of the Steam Navy":—so wretched is the system of naval administration! In the last naval debate in the House of Commons, we had another specimen, first-hand from the Duke's predecessor, of what little knowledge and wisdom are thought requisite for the governing of our Navy. Sir John Pakington was twitted by Lord Clarence Paget, that in his plans for naval retirement he had only pleased the surgeons, and that his scheme for the chaplains was so absurd that he supposed he would not himself now attempt to defend it. Now, what answer did Sir John make to this? He confessed his utter ignorance of the class of persons for whom he attempted to legislate; and it was only after an intricate scheme had been drawn up, and the assent of Her Majesty in Council was obtained to what was set forth as a great boon to the chaplains of the Navy, that the First Lord of the Admiralty discovered the whole to be like a puff-ball—its supposed advantages all dust! Now, although Sir J. Pakington, as a civilian new in office, could not know much of naval affairs, still he had a Board of naval officers to assist him, but none probably well versed in what relates merely to "chaplains, R.N.," while the permanent officials who did know something about them, would not be consulted. Nor is this an unusual matter, as Sir J. Graham has informed us. In his able report on Army Organisation he would not hear of a Board for the War Department. Having been six years at the Admiralty, he knows what a "Board" is. He says, "The machinery of Boards is known to be cumbrous and uncertain in its operation. It only works well when the head of the Board acts as if he alone were responsible." (And not always that, as Sir John Pakington has informed us.) "A Board therefore would be a retrograde measure which your Committee cannot recommend." No, and nothing like a Board would he sanction. "A Council is a Board in a modified form, to which the same objections apply, though in a less degree."

In place, therefore, of a Board, which, "instead of concentrating responsibility, redistributes it,"—and distributes it, too, among members all equally inexperienced and uninformed about the business they profess to manage—the new organisation for the War Department, as proposed by Mr. Sidney Herbert, is to be a "responsible Secretary of State, who is to have around him as his professional advisers the permanent Heads of Departments, whom he may consult either collectively or separately, according to the exigencies of each case." He is also to have one parliamentary under-secretary, but with two permanent under-secretaries (one civil, one military), and an assistant under-secretary, also permanent.

If, then, we are to have this organisation for the management of the Army as the best that can be devised by the ablest of our administrators, aided by an able Committee, including the present and late Secretary for War, Mr. Walpole, and several other eminent military men and civilians, let us ask, Is the Navy still to be "managed" by a Board? Is "a cumbrous and uncertain machinery" to be considered good enough for the Navy, though not to be tolerated for the Army? Is a First Lord still to have as coadjutors men as inexperienced as himself, instead of being surrounded with permanent officers, whose opinions he might take collectively or separately to guide his decisions? Is the present, or is it not, to be the last year of Admiralty mismanagement? Is it still to be a proverb, "That inventors have no chance at the Admiralty," and that a series of Committees and Commissions and Opposition speeches are required, to secure or attempt an annual reform of naval affairs? We have all witnessed our naval defects, and we wish them to be remedied.

The accounts which we continue to receive of the China expedition, and its preparations for the rather up-hill task it is about to execute, are of a very satisfactory character. We hear of no defects of consequence in the organisation or administration of the expedition; the staff is thoroughly competent, the men thoroughly confident, and all in good case. At the end of May the number of our troops constituting the expedition was 18,230, and there were those to arrive who would make it up to 20,000, a force not very much inferior to that with which we first encountered our enemy in the Crimea in 1854. It was generally anticipated that the expedition, to the number of about 10,000 English, and a similar number of the French, would proceed to the north about the 30th of May, assemble at the mouth of the Peiho, and land mud-boats and all material calculated for the service being provided in abundance. The general opinion derived from reports about the country was, that the enemy would offer every resistance to the landing, and were prepared for at least one encounter in the open plain, on learning which probability considerable apprehension appears to have seized the expedition that Lord Elgin might arrive and spoil the game of war by some inopportune diplomatic arrangement. The wreck of the Malabar, and the delay of the Minister, however, must have quieted the fears of those who were alarmed lest peace might "break out;" and doubtless by this time the expedition has given a good account of its foes.

We are sorry to hear general accounts of instances of the most childish jealousy on the part of our allies. At one time a flagstaff of ours excites their envy, because it is two or three feet higher than their own; at another, the British flag is larger and more imposing than the French *drapeau* close to it, and a request is made that it be reduced in size. Indeed, the stories which we hear of these littlenesses are almost incredible when told of grown men; and but for the authority upon which they are related to us we should never think of making allusion to them. We have before made mention of the shortcomings of the French as regards their capacity for taking the field, and we may now state in addition that they are, notwithstanding the character of the climate and the rapidly changing temperature, no better supplied with clothing than if they were in garrison in Paris. We ought to add, however, that the north-easterly winds greatly impeded the progress of a number of store ships, and for the same cause we ourselves were beginning to suffer from the want of coals. We trust the next mail will bring us news that the first step has been taken to wipe away the stain of the Peiho disaster of last year.

Her Majesty the Queen and His Royal Highness the Prince Consort will, according to present arrangements, embark in the royal yacht, at Gravesend, on the 22nd of September, for Antwerp, *en route* to Berlin. Her Majesty will, as usual, be attended by the usual escort of steamers, and will remain absent about three weeks.

We understand that the Committee appointed by the House of Commons to inquire into the state of the gun-boats built for Government by private contract, met yesterday for the purpose of considering their report.

THE ARMY.

5th Dragoon Guards. The squadron detached to Shorncliffe is commanded by Captain Garrard, and Lieutenants Richardson, Balders, and Scarlett are attached to it. The remaining three squadrons are at Brighton.

6th Dragoons. Captain Renshaw has joined the regiment at Kirkee.

10th Hussars. Will move from Cove Common on Monday and occupy the lines in the North Camp, Aldershot, vacated by the Royal Horse Guards.

16th Lancers will move from Cove Common on Monday, and occupy the South Cavalry Barracks, Aldershot.

17th Lancers. Lieut.-Colonel White has obtained 18 months' leave to England; Major Knight is on 4 months' leave to Calcutta; and Cornet Bruce has sick leave to England.

Royal Artillery. Captain A. F. Connell is on sick leave to Simla to Nov. 15th; Lieut.-Colonel Middleton, C.B., has leave in extension to Nov. 2.

The Royal Artillery band gave an entertainment on Tuesday evening, at the Woolwich Theatre, for the benefit of the wife and children of Corporal Coombes, a member of the band recently deceased. The house was crowded by the military, and the performances were frequently encored.

Royal Engineers. The death of Major G. M. Stopford, which took place on the 7th, at his residence, Brompton Barracks, after a very short illness, has caused a vacancy in the adjutancy of the Royal Engineers. Although the deceased officer has only been comparatively a short time in the corps of Royal Engineers he has seen a great deal of service, having served during the whole of the Crimean campaign, including the battles of Alma, Balaklava, Inkerman, and Sebastopol.

Captain Murray is on leave from Aldershot to Sept. 6th, and Lieutenant Salmond to Sept. 14th.

Military Train. Lieutenant James is about to retire from the Service.

4th Regiment. The depôt of the 1st battalion has moved from Chichester to Chatham, to be stationed Captain Ansell is in command, and the depôt consists of 3 officers and 180 rank and file.

5th Regiment. A draft of 203 men embark for Calcutta on the 17th instant.

6th Regiment. Captain J. J. Kendall, is on leave to Neilgherry Hills, from June 1 to October 15; Ensign D. D. D. Cotter to the Doomree Hills, from June 1 to July 31.

10th Regiment. The 1st battalion arrived at Aldershot from Plymouth on Thursday, comprising Lieut.-Colonel H. E. Longden, C.B.; Majors H. R. Norman and S. F. C. Annesley; Captains J. V. H. Montagu, C. D. Patterson, W. K. Orme, R. C. Clifford, J. B. Lucas, J. Byron, W. J. Hales, A. C. Bogle, G. W. Graham; Lieutenants St. A. B. St. John, W. M'P. Battye, R. S. Bagge, C. W. Matthews, W. Betson, T. Scott, John Rudge, C. J. Barnett, J. B. Corballis, M. Coke; Ensigns T. H. Powell, F. Robertson, J. B. Marston, W. Whitla, E. A. H. Roe, H. E. Poole, N. E. Bleuett, C. C. Oldfields; Paymaster James Murphy; Adjutant Percy Beale; Quartermaster, James Darker; Surgeon H. B. Franklyn; Assistant-Surgeons, John Tulloch and T. J. Tucker; 789 non-commissioned officers, men, women, and children.

12th Regiment. A draft of 83 of the 1st battalion embarked for Sydney yesterday.

14th Regiment. The 2nd battalion 14th Foot will embark at Cork about the 20th inst., in the Robert Lowe and the Boanerges, for New Zealand. The 2nd battalion is to be augmented to 1200 men by volunteers from the 65th Regiment.

16th Regiment, 1st battalion. Paymaster Higginson is on leave to the 22nd inst.; Lieutenant Brabazon has joined at Aldershot from the depôt.

18th Regiment. Lieutenant Hall is on leave to the 14th of October.

19th Regiment. Lieut.-Colonel G. V. E. Mundy is on leave to Mussoorie, Landour, and Simla, from May 26 to Nov. 26; Brevet-Major F. M. Alison to England, under new rules, for 18 months, from June 4; Ensign F. H. Evans, from July 1 to August 1, in ext.

35th Regiment. Lieut.-Colonel J. M'N. Walter, C.B., is on leave to Mussoorie from May 12 to October 15. Lieutenant Ross is on leave to Nynee Tal to October 15.

37th Regiment. Major H. M. Sall is on leave to Neilgherries from May 18 to October 30; Captain J. D. Collum to Neilgherries, from June 1 to October 30; Captain W. J. Bazalgette is on leave to England on medical certificate; Lieutenant J. F. Reyne is on leave to Madras, from May 18 to October 31.

41st Regiment. Captain Haydock is on leave to the 30th instant, and Assistant-Surgeon Hinde to the 30th September.

45th Regiment. Lieutenant Pearson is on leave to Oct. 15.

48th Regiment. Captain W. H. Knight and Lieutenant E. Feneran are on leave to Simla from May 1 to October 31. A draft 89 strong has embarked for Melbourne, to join the Service Companies.

52nd Regiment. A very handsome mural monument has just been erected by the officers of the 52nd Foot, on the north aisle of the nave of Rochester cathedral, to the memory of Captain Moorsom, late of the 13th Light Infantry, who was killed by the mutineers during the capture of the city of Lucknow. The tablet, which is a very beautiful piece of sculpture, is composed of a base of black marble, on which a scroll of white marble is laid, containing the following inscription:—"To the memory of William Robert Moorsom (eldest son of Captain Moorsom, C.E., late of the 52 Light Infantry), who while a lieutenant in the 52nd Light Infantry, acting first as aide-de-camp, and afterwards as assistant-quartermaster-general to Sir Henry Havelock, and finally as quartermaster-general to the division of Sir James Outram, was engaged in nine pitched battles and numerous skirmishes; wounded twice, honourably mentioned in thirteen public despatches, including the thanks of the Government of India, and promoted to a company in the 13th Light Infantry for distinguished services. He was killed on the 11th of March, 1858, in the 24th year of his age, at the head of a column of attack on the rebel posts of the city of Lucknow. As a tribute of their affection and regard, the officers of the 52nd Light Infantry devote this tablet." The monument is surmounted by the arms of the 52nd Light Infantry, beneath which are the arms of the Moorsom family.

53rd Regiment. The remaining depôt companies of this regiment, numbering 200 non-commissioned officers and men, vacated Chatham garrison, where they have been quartered since 1844, and proceeded by special train to Chichester, to await the arrival of the head-quarters and service companies of the regiment, now on their passage home from India. The officers who proceeded with the depôt were Captain J. H. Lothian, Lieutenant J. Macneill, Lieutenant R. F. Stoney, Ensign H. D. Rooke, and Ensign W. E. S. Battiscombe. The 53rd Regiment, which is now on its passage home from Calcutta in the Lady Clarendon, in which vessel it embarked on the 17th of April last, has been 16 years in India, having left England in August, 1844. Owing to the hard fighting it has gone through and the number of volunteers—amounting to about 500—given by it to other regiments serving in India and China, including 200 to the 99th Regiment in China—the service companies have been much reduced, and now only number a little more than 300 men. The depôt, however, is about 500 strong, and as recruiting for the 53rd is proceeding at the rate of about 50 per month—the staff being open and recruits enlisted by every recruiting party in the kingdom—the regiment will shortly be raised to its required strength of 1000 bayonets.

55th Regiment is to be attached to the 1st brigade at Aldershot.

56th Regiment. William Jones, James Burns, and Thomas Ingham, privates of the 56th Regiment, have been convicted before a district court-martial of gross acts of insubordination while under orders to proceed with a draught from their regiment to India. Jones struck at Brigade-Major Cooch, who attempted to quell a disturbance, and, with a view to desert, he afterwards jumped from a train running at the rate of 30 miles an hour. The Commander-in-Chief has confirmed the sentence of 168 days' imprisonment and the infliction of 50 lashes upon each prisoner, which will be carried into execution on board the Istamboul, to which the men were yesterday removed, under a strong escort, for conveyance to India. Lieutenant A. W. Massy is on leave to England for 18 months, from date of embarkation.

57th Regiment. Captain F. S. Schomberg has leave to England, for 6 months, from June 1.

58th Regiment. Lieutenant Archibald is on leave to September 30; Paymaster Rundle to the 31st inst.

60th Rifles. The head-quarters and band of the 1st battalion of the 60th Royal Rifles arrived at Gravesend on Monday morning from India, in the troop-ship Aliquis. The battalion has been absent from England fifteen years, having sailed for India in July, 1845, and has seen considerable service. The number of troops who embarked at Calcutta was 400, together with the following officers:—Captain R. J. E. Robertson, Brevet-Major C. Jones, Captain G. B. Mac-Queen, Captain A. Carlisle, Lieutenant and Adjutant G. C. Kelly, Lieutenant W. F. Carleton, Lieutenant A. Morgan, Lieutenant C. H. Borrer, and Surgeon E. W. Young, M.D. Nineteen deaths and two births occurred on board during the voyage. On the disembarkation of the head-quarters the battalion proceeded to Dover, where it is to be stationed.

69th Regiment. Ensign G. E. Brace to England for six months, from date of departure from his regiment.

71st Regiment. Brevet-Major F. W. Lambton is on leave to England from June 1 to December 1; Captain W. F. Segrave is on leave to Simla, to October 15, in extension.

72nd Regiment. Brevet Lieut.-Colonel A. D. Thellusson is about to retire from the service.

73rd Regiment. The strong draft, under orders for India, will embark on the 18th inst. for Calcutta.

75th Regiment. Captain G. W. Muriel is on leave to Calcutta from April 26 to June 25, thence to England, under medical certificate; Captain Pym has passed an examination in Hindostanee.

79th Regiment. Lieutenant F. P. Campbell, has obtained an extension of leave from June 13 to December 12.

83rd Regiment. The depôt has moved from Chichester to Chatham, to be stationed. It consists of 7 officers and 200 rank and file.

88th Regiment. Lieutenant R. Miller is on leave to Mussoorie from May 9 to July 9, on medical certificate.

98th Regiment. Colonel H. Bates has leave to England on medical certificate.

Rifle Brigade, 3rd battalion. Captain S. S. Windham is on leave to Hills, north of Deyrah, from May 1 to August 31. Assistant-Surgeon J. Storey is on leave to Mussoorie, from June 1 to October 31, on medical certificate.

THE NEW K.C.B.—The honour which has just been conferred on a very old, worthy, and useful servant of the Crown, in the person of Colonel, now Sir George Lloyd Hodges, K.C.B., should not pass without a word of notice. In early life Sir George was in the Army, and served through the greater part of the Peninsular war, as well as the Waterloo campaign; and in 1830 and 1831 he commanded the British and Foreign Legion in Portugal under Don Pedro. Since 1837 he has been constantly employed in the diplomatic service. In that year he was appointed Consul, and subsequently Consul-General in Servia, and in 1839 became Political Agent and Consul-General in Egypt. In the following year he took part in the operations in Syria, for which he received honours from the Sultan. Colonel Hodges became in 1841 the British Chargé d'Affaires and Consul-General at Hamburg, which appointment he has since held to the great satisfaction of the Government as well as of the community among whom he dwelt, and whose good wishes were warmly expressed on his recent retirement from that office.

The Army Gazette.

WAR OFFICE, PALL MALL, AUGUST 7.

17th Regiment of Foot.—Major-General Sir Richard Airey, K.C.B., to be Colonel, vice Lieutenant-General Thomas J. Wemyss, C.B., deceased.

THE CIVIL OFFICERS OF THE ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The recent order of His Royal Highness the Commander-in-Chief, denying to civil officers the right to claim, or to be given through courtesy, the formal salute of a soldier—unless he holds a commission—has been pretty well discussed by all classes far and wide, and the published opinions of many of the civil staff go to show the extent of dissatisfaction that has been produced through that order, which, however, it is not my present purpose to complain of.

It is extremely unpleasant, however, to find that a spirit so ungenerous, and withal so devoid of feeling, should have been exhibited in the complaint of your correspondent "An Ex-Linesman," in your issue of the 21st ult., towards that branch of the Civil Service to which I have the honour to belong,—a branch which it has been admitted, from the onerous and responsible duties devolving on its members, is not less valuable in the services rendered to the public than either the barrack or store branches of the War Department. The distinction accorded to clerks of works of the Engineer Department, of comparative rank with military officers, in common with barrack-masters and store-keepers, is nothing new, as it has existed from their first establishment many years since. At present, under authority of Her Majesty's Warrant, dated April 28th, 1858, there are three classes, the first having the comparative rank of captain, the second that of lieutenant, and the third that of ensign.

The "rushing" of such officers into "gold striped trowsers," and to "clank about with a steel scabbard," which appears to have so much disgusted "An Ex-Linesman," has been the result of the gracious pleasure of Her Majesty, who, it cannot be doubted, was wisely counselled before the Warrant was signed and issued which, under date of 4th December, 1858, prescribed that uniform now so much sneered at and despised, as well as its wearers, by "An Ex-Linesman."

Notwithstanding the assertion to the contrary of your correspondent, there are few civil officers of the War Department, with the exception of barrack-masters, brought more "into contact with the troops" than the engineer clerk of works attached to districts, divisions, and sub-divisions, both at home and in the colonies, and sometimes in the field, as they were during the war in the Crimea. Acting under the orders of the commanding engineers they have, in conjunction with engineer officers, and very often alone, to make frequent inspections throughout the quarters of both officers and men, as "An Ex-Linesman" ought to know, if he has had any experience as a barrack-master; and they have not unfrequently in the discharge of those inspectional duties—under the civilian's garb—encountered obstructions or received gross insults, which they had not the power to remove or resent, nor even to complain of with the hope of obtaining satisfaction. Therefore it was that a befitting uniform according to their comparative ranks became essential, and was accorded in order to give those officers a status in effect calculated to protect them from the contumely to which they had been hitherto subjected.

The "Ex-Linesman" broadly hints that it was the "glorified carpenters," as he pleased in his military indignation to designate the civil officers of the Engineers' Department, or else *Messieurs les gratte-papiers*, meaning, no doubt, the "store-clerks," whom he appears to have an equal aversion to, that have been the cause, somehow, of the non-saluting order. Be that as it may, or whoever or whatever may have given rise to that order, the fact of a civil officer appearing in uniform and conducting himself by acts unbecoming a gentleman, ought of itself to be presumptive evidence that he was not fit for his position, and therefore as an example to others ought to be publicly degraded or dismissed altogether from the service; but to stigmatise a whole body on account of the reprehensible acts of a few unworthy members, and hold them up to public derision and consequent degradation, seems to be, to say the least of it, a very harsh measure.

As a constant subscriber, though indirectly, to your valuable journal, and in justice to that branch of the Civil Service to which I belong, I therefore beg a place for this in your next issue, in the hope that it will tend to move the prejudice sought to be raised against us, and that when it meets the eye of your correspondent and subscriber "An Ex-Linesman," he will be induced to take a more charitable and common-sense view of the question than he has done in attempting to fling dirt at his brethren in the common service of our Queen and country.—I am, &c.,

A FIRST-CLASS CLERK OF WORKS, R. E. D.

THE COMPANY'S TROOPS AT DELHI.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Mr. Vansittart, in a speech in the House of Commons recently, spoke about the "Queen's troops" having reconquered India, and especially referred to their having taken Delhi.

A correspondent of the *Times* has pointed out that at all events the whole of the Artillery at Delhi belonged to the Indian Army, and that the 1st and 2nd Bengal Fusiliers had a fair share in the dangers of that siege. He might have gone much further, but it is ungenerous and unsoldierlike to make comparisons with respect to troops, all of whom (Queen's and Company's) did their duty in a memorable and trying struggle.

As Mr. Vansittart, however, claimed that great exploit (the capture of Delhi) for the Queen's troops, it may not be out of place to give the relative casualties of the two Services during that siege, as taken from the official reports:—Out of 46 officers and 983 of other ranks who were killed, or died of their wounds at the siege of Delhi, 16 officers and 321 men belonged to the Royal, and 30 officers (European) and 662 men to the Company's Army. Of 140 officers and 2655 of the ranks wounded, 45 officers and 887 men were of the Royal Service, and 95 officers and 1818 men belonged to the Company's Army.

No comparison such as Mr. Vansittart thought proper to make was necessary to prove the propriety of amalgamation, but the above statement will I think clearly show that the Company's troops had a considerable share in the capture of Delhi.—I am, &c.

AN INDIAN OFFICER.

THE ARMIES OF THE CONTINENT.

AUSTRIA.

Unlike the Russian Empire,* which is compact, the Empire of Austria consists of a heterogeneous amalgamation of divers races, religions, and languages. Austria proper (*Oester-reich*, that is to say, eastern domain or power some translate *reich* empire) consists of two small districts extending along the Danube from the country of Salzburg to within two or three miles of Presburg, on the confines of Hungary. It is subdivided into two provinces divided by the river Ems. Linz is the capital of one; Vienna, of the other. The population of the two provinces does not exceed 2,400,000 inhabitants. The Austrian Empire comprises a territory of 12,000 square miles (in round numbers), and a population of 38,000,000.

Thus, in a military point of view, the very strength of Austria, as regards numbers, constitutes her weakness as soon as the love of liberty and the spirit of independence are aroused in her possessions. We have recently had an example of this in Lombardy; and Hungary is only biding her time. Garibaldi took a solemn oath on the dead body of Colonel Turkery that, as soon as Italy was free, he would make common cause with Hungary. He is a man to keep his word. The Italian portion of the Tyrol is also disaffected, and the contagion would soon spread to the other provinces of the empire.

The Austrian army is made up from draughts from her various provinces. These are:—

1, The so-called Archduchy of Austria; 2, Styria; 3, Tyrol and Voralberg; 4, Bohemia; 5, Moravia, and a portion of Silesia; 6, Illyria; 7, Galicia and Lodomeria; 8, Venetia (Lombardy was ceded to Sardinia at the peace of Villafranca); 9, Hungary, with Croatia, Sclavonia, and Dalmatia; and 10, Transylvania.

The races of the Austrian Empire are subdivided into Sclaves (16,870,000), Germans (6,750,000), Italians † (4,956,000), and Magyars (4,820,000). To this must be added also 1,820,000 Wallachians, Bulgarians, and 485,000 Jews, 11,000 gipsies, 14,000 Armenians, 4000 Greeks, &c.

Thus it will be seen that the Sclavonic element prevails. If we take a steady glance, retrospective as well as prospective, Austria has good cause to tremble for her future position. It is true she *is* a member of the German Confederation, which is her sheet anchor.

After these preliminary observations, which are indispensable to a correct idea of the strength of an army which contists not in its numerical force but in how much it may be relied upon in the field, we now come to the actual organisation, efficiency, and system of the Austrian army of the present day.

The actual strength of the Austrian army may be given in round numbers at 400,000 men on the peace footing, 800,000 on the war footing.‡

The Emperor is Commander-in-Chief. His authority, like that of the Czar, is supreme.§

In the recent war with Sardinia, the Emperor assumed the command for a short time.

THE STAFF.—The staff of the Austrian army consists of 4 field-marshals, 18 generals of cavalry (feld-zeugmeisters), 18 ditto reserve; 112 lieutenant field-marshals, 91 ditto reserve; 130 major-generals, 147 ditto reserve; 266 colonels, 262 ditto reserve.

In addition to the generals and superior officers attached to the different troops, the staff comprises:

A Corps of Adjutants.—4 generals, and 143 officers.

Quartermaster-General's Staff.—3 generals, and 130 officers.

Corps of Military Engineers.—1 general, and 38 officers.

Military Chancellory.—142 officers-commandants of towns and fortresses, 26 generals, and 250 officers.

Inspectors of Military Baths.—16 officers.

Inspectors of Hospitals.—40 officers.

Transport Department.—19 officers.

Clothing Department.—1 general, and 135 officers.

Inspectors of Buildings.—67 officers.

The expense of the staff is very considerable, and the organisation faulty. Since the recent lamentable occurrences connected with the suicide of General Eynatten and other high-placed personages, a reform has been decided upon. In his financial report, presented to the Emperor last month (July, 1860), M. de Plener, who has succeeded the unfortunate Baron de Bruck, as Minister of Finances, dwells especially upon the undue number of officers on the staff, which is out of proportion to the numerical strength of the army, and entreats his majesty to reduce the estimates from 91 millions to 75 millions. Whether this will be done or not has still to be seen.

THE GUARDS.—The Austrian guards are composed of the so-called German Guard,—which consists of 8 generals, and 84 officers; the Body-Guard (1 general and 72 men); the Gendarmerie of the Guard (6 officers, and 116 men); and the Palace Guard (5 officers, and 300 men).

INFANTRY.—The infantry consists of 62 regiments of the line. The strength of a regiment on the peace footing is 2830 men; on the war footing, 6886 men. This gives the strength of the Austrian infantry in time of peace at 175,460 men, and in time of war 426,932 men.

There are, moreover, 14 regiments so called, *Grenzer*, or frontier regiments, giving on the peace footing 40,000 men, which in time of war is increased to 54,254 men. Each of these regiments has two field-batteries, and a reserve battalion.*

To the above must be added 1 regiment of Jägers, 4883 strong, peace footing, 7563 war footing; 30 battalions, each of 4 companies; and 14 santary companies, 2728 men.

CAVALRY.—The Austrian cavalry consists of 8 regiments of cuirassiers of 6 squadrons, and 1 depôt squadron; 8 regiments of dragoons; 12 regiments of hussars (8 squadrons, and 1 depôt squadron); and 12 regiments of Uhlans: giving a total in men on the peace footing of 66,120 men, and 55,552 horses; and on the war footing 70,912 men, and 60,992 horses.

The Austrian cavalry is equal to any in the world. It is chiefly officered by men from the best families, and amongst them will be found many Englishmen and Irishmen. Some awful blunder took place during the late war in Italy; with one brilliant exception the Austrian cavalry retired without fighting.

ARTILLERY.—The Austrian artillery consists of 12 regiments (regulars), 1 regiment coast artillery, 1 regiment rocket batteries. The strength of an artillery regiment on the peace-footing is 2000 men (for the regulars), 1854 men for the coast artillery, 2099 men rocket batteries; on the war footing it is 3878 men (regulars), 3439 coast artillery, and 3850 rocket batteries. The total strength of the artillery is, on the peace footing, 27,953 men and 4864 horses; on the war footing, 54,503 men and 29,944 horses. The number of guns in time of war is 1344.

The ENGINEERS form a body of 6936 men on the peace footing, and 11,232 men on the war footing. The PIONEERS are 4373 strong, peace footing, 10,000 war footing, with 3636 horses. To these numbers must be added the military train, transport, baggage train, &c. &c.

For the internal safety of the country, Austria has 19 regiments of gendarmerie, together above 18,000 men; the military police counts more than 3000 men; the arsenals, military dockyards, &c., employ between 5000 and 6000 men. There are 6 military breeding studs (*haras*), where nearly 3000 men are employed, and 4500 horses taken care of; and, finally, there is a hospital staff, invalid staff, &c.

The Austrian army is officered chiefly from the so-called Cadetten-corps. They correspond to our Woolwich, Carshalton, and Addiscombe. The Austrian army is the most aristocratic army of the continent. The pay is bad, the discipline severe; but there is a high gentlemanly tone amongst the officers, and a great *esprit de corps* amongst the men. Led by a man like Radetzky, the Austrian soldiers will stand comparison with any troops in the world. Radetzky endeavoured, and in great part succeeded in making the soldier look upon the army as his country, his regiment as his home. At the same time the policy of having Hungarian troops and Croats in Italy, and Italian troops in Germany and Hungary, was as far as possible adhered to.

THE AUSTRIAN NAVY.

Austria is the only maritime power of Germany. Prussia has a few ships, but no navy. The Austrian navy comprises 135 vessels of all descriptions, 852 guns, and 8707 men. Of these there is 1 line-of-battle ship (screw of 800 horse-power and 91 guns), 3 screw-frigates (300 horse-power and 31 guns each), 4 sailing-frigates. The rest are schooners and small craft. There are 3 new screw-frigates on the stocks, the Francis-Joseph, Narenta, and Kerba.

Pola, in the Adriatic, is the great naval station of Austria. It belongs to the German confederation, which Venice does not.† The Arch-Duke Maximilian is lord high-admiral.

The question of army reform is now universal. Rifled cannon and the Minié rifle are being introduced into the Austrian army, and in the event of a great European war Austria will take the field better armed than she was at Solferino.

* *Vide* ARMY AND NAVY GAZETTE of 17 March, "Armies of the Continent—Russia."

† These statistical returns, which are official, were published before the peace of Villafranca.

‡ The Vienna *Militär-Zeitung* of the 7th July (1860) publishes the following figures:—"The numerical strength of the army is 384,555 men; 48,796 horses, and 1636 mules, &c., &c., the army and navy estimates are 91,000,000 florins, or 9,100,000*l*.

§ The Emperor's powers are thus defined:—The Emperor is holy and inviolable, and without any accountability before men. He is the source of all dignities, privileges, and immunities. He alone can call and dismiss an assembly of the provincial states. He decides in the administration of the public or state property, or on the amount or increase of the state expenditure, and of the imperial palaces and court. He has supreme command of the military forces and power (*militär macht*), declares war, and makes peace, has supreme direction and control over all the foreign affairs of the empire, &c. &c.

* The Austrian frontier line is very extended. The Austrian territory borders on Saxony, Prussia, Cracow, Russia, Moldavia and Wallachia, Servia, Turkey, the Adriatic, the Papal States, Modena, Parma, Piedmont, Switzerland, and Bavaria.

† The Austrian territory which forms part of the German confederation consists of the following provinces: Austria Proper; Styria, Carniola, Carinthia, Trieste, Tyrol, Bohemia, Moravia, a part of Silesia, and of Galicia=3588 square miles, and a population of 12,300,000.

OFFICIAL TRIAL OF ARMSTRONG GUNS.

A series of experiments was commenced on Tuesday with three of the Armstrong guns, with the view of testing their breaching powers at short ranges. The place selected for the trial was the watering-place of Eastbourne, on the Sussex coast, and the object of attack was one of the old martello towers with which this part of the south coast is studded.

There was a large muster of officers of all branches of the Service present, among the most prominent of whom were His Royal Highness the Duke of Cambridge, Commanding-in-chief, Colonel St. George, President, and Sir William Wise, Bart., Vice-President of the Ordnance Select Committee; General Sir Richard Dacres, Lieut.-Colonel Tulloh, of the Royal Carriage Department, Woolwich; General Mansell, Lieut.-Colonel Boxer, Captain Hayman, Commander Gough, R.N.; Lieut.-Colonel Coppage, P.G., Commandant of the district; Sir William Armstrong, General Bingham, &c., &c. The ground was kept with a strong line of sentries and constabulary.

As has already been stated, the object of attack was a martello tower, the one nearest the Eastbourne Redoubt, and about 500 yards from it. This tower is very old and solid. It is about 35 feet high, and of corresponding diameter. It is built of brick, set in grey lime. The sea face is nine feet thick, and the land side wall is about six and a-half on an average. This side was marked with three perpendicular lines, at equal distances, and one horizontal line, to make it a target. General Bloomfield, Inspector-General of Artillery, was the superior officer in command, but his subordinate officer was Colonel Cuppage, conducting the day's proceedings. Sir William Armstrong was also present to render any assistance that might have been requisite. The range decided on was 1,032 yards, and the experimenting ordnance consisted of a 100-pounder howitzer of 75 cwt.; an 80-pounder, of 65 cwt.; and a 40-pounder carriage gun, of 32 cwt. In the early part of the morning, before the general practice began, some six or seven shots were fired from all the guns, in order to ascertain the range, and most of the shots left their mark upon the tower. At length the guns having been laid, the battering commenced at 10·45 a.m., by the 40-pounder. The charge was 5 lbs. of powder, and the elevation 22 deg. The two first friction-tubes did not explode, and Sir William Armstrong examined the vent. A third was then tried, and the piece went off, the shots striking obliquely the upper right-hand side of the tower, facing the battery, and glancing into the sea. The next was the 100-pounder howitzer, which was placed between the two smaller ones. The charge was 9 lbs. of powder, and the elevation 3 deg. The shot struck the middle of the tower, on the place of a former shot, making a large indentation in the brickwork, and penetrating the wall. This was followed by the 80-pounder, with a charge of 10 lbs. of powder, and an elevation of 2·22 deg. The shot struck right above the centre line, and brought down a quantity of brickwork. A round out of each gun having been fired, the practice ceased for a short time, in order to enable a photograph of the damage to be taken, a Government apparatus being on the ground for that purpose. The time of flight of each shot was timed to be 3·1 sec. On the practice being resumed, the 40-pounder shot struck on the left side of the tower, near the centre, the 100-pounder below the horizontal line, about 5 feet from the ground, and the 80-pounder on the upper right side. By this time the wind had freshened considerably, and blew at right angles to the line of flight; of course a proportionate amount of lateral deflection had to be allowed for on this account. There was one thing that now became apparent, namely, the trouble which appeared necessary to clean the guns with the greatest care. Some military men to whom this was remarked said, in reply, that unless the grooves were very carefully sponged after each round was fired it would interfere materially with their working. The guns were again loaded and fired; the 40-pounder struck in the place of a former shot, and made sad havoc among the brickwork. This time it was with shell, stated to be some of a new construction by Colonel Boxer, R.A.; but that as they are extremely sensitive in handling they were merely being tried as an experiment for their destructive powers. The charge was the same as for the solid shot, namely, 100-pounder shell 9 lbs., the shell having a bursting charge of 8 lbs.; the 80-pounder, with a charge of 10 lbs., an 80-pound shell, and a bursting charge in the shell 6 lbs.; and the 40-pounder shell with a charge of 5 lbs., and a bursting charge of 2½ lbs. The first shot was from the 40-pounder, and flew straight to the mark, the trajectory being very low. It struck right in the centre of the tower, in the same place as a former shot. The 80-pounder was next fired, and it also struck a former indentation, and the 100-pounder went also direct to a former mark. These three shots were magnificent practice, and, striking as they did on former shot-marks, three large holes were now plainly visible. The shell-firing was continued, as the Duke of Cambridge was desirous of seeing the most that could be done in as short a space of time as was consistent with the safety of the large number of people who, do what the sentries could, still persisted in trying to stand dangerously within the line of fire. The same places were hit again and again, and the three holes began to get wider and more jagged looking. A report from the markers at the tower stated the shells were exploding inside, and the land face of the tower was literally split from the top to the bottom. Six more shots were fired, the 80-pounder this time striking a port-hole on the extreme right, and glancing inside. A breach was made by the last shot, and it was really admirable to see the precision with which the shells were thrown inside the building, exploding with a deep smothered noise. In the next round from the guns the 100-pounder did fearful execution; but the 80-pounder shell burst on leaving the muzzle, happily without any further damage than tearing up the earth about 200 yards ahead, and darkening the air with it. The large rent in the face of the tower looked perfectly ruinous. The three guns were now fired at once, and the bugle sounded a rest, in order that the exact amount of damage might be ascertained. The members of the committee and the staff proceeded to the spot to see what effect had resulted from the practice. Upon examination, it was found that all the hits, with the exception of five, had been planted in a space some 15 feet wide by 12 feet high. The top of the tower which the arched roof joins to the front wall, was cracked like an old plate, and a portion of the crest of the arch of the roof was also blown away.

In the practice up to this time some twenty-three shots had been fired in all, and everyone of them hit the mark, except the shell that burst when leaving the muzzle. The blows of the 100 lb. shot were frightful to look at, striking as they did the same place over and over again. It was positively terrific to see these fearful messengers of destruction speeding through the air to their object. A number of other officers came in during the day, amongst them Sir F. K. Abbott, Colonel Kennedy, Colonel Gordon, R.E., General Crauford, Colonel Walker, and Colonel Lennox. After a cessation of an hour and a-half the firing was resumed. The report of the guns was comparatively light, and the recoil was not more than ten feet. The two larger guns worked on slides. At the conclusion of the day's practice the land face of the tower was completely destroyed. The upper section presented a breach about 15 feet wide and 7 feet high, which gradually narrowed to some 4 feet across and 3 feet deep.

On Wednesday morning, despite the unfavourable weather, the thundering of the 100-pounder gun and the loud crack of the exploding shell on the fated tower announced the renewal of operations. The artillerymen and their officers were at their posts working away in the midst of the terrific rain and wind as if it was the finest morning imaginable. Sir William Armstrong was also on the battery.

The principal object of attack in the day's firing was the sea face of the tower, a mass of brickwork nine feet thick. As shot after shot and shell after shell were hurled against it, it was astonishing to see the firmness with which the old wall held together. After some time volley firing was tried, and the shells told with terrific effect upon the brickwork; the pillar supporting the roof was blown away, and gaps, like broken embrasures, made their appearance along the parapet line. A course of masonry, clamped with strong iron clamp ties, banded block to block and stone to stone of

Digitized by Google

the masonry, but the incessant bolts and shells thrown against this part of the wall ripped them up as if they were so many pieces of deal planking.

The firing ceased at six o'clock, when the photographic party took the appearance of the tower, and reported that, in addition to the parapet being blown away, the sea face was so damaged from several large rents running down from the top, that it was unsafe. Before leaving the ground Colonel Lefroy conveyed to Colonel Mackay, chief-constable of the county, the thanks of the Ordnance Select Committee for the admirable manner in which the police discharged the arduous and novel duty assigned to them.

In the course of the evening printed notices were circulated through the town, forbidding any person to enter the tower on any pretence whatever, as several unexploded shells were believed to be inside.

VOLUNTEER SHAM FIGHT AT HAMPSTEAD.

The Volunteer s of the northern and western portions of the metropolis met at Hampstead Heath, on Saturday last, for the purpose of having a field-day and sham fight. The military ardour of the Volunteers has been awakened to some effect by the sham fight which took place a short time since at Bromley; and as that affair went off with great *éclat*, the notion appears to have become general, that a field-day of this sort is a perfectly easy and manageable affair, and that nothing more is wanting to ensure success than to fix the hour and place of meeting for these rifle tournaments. The experience obtained on Saturday at Hampstead will not be thrown away, if it leads to a conviction of the absolute necessity of agreeing beforehand to some plan of action, and taking precautions which will ensure its being carried out. The plan of the campaign was supposed to be the following:—The 9th (West) and 3rd (Hampstead) Middlesex Rifles, under the command of Major Compton, were the defending force, and at the outset were to skirmish in the valley on the extreme northern side of the heath with the enemy, whose skirmishers were to be driven in. The defenders then appear in force in a commanding position on the brow of a hill facing to the northward, and supported by the road between the Spaniards and Jack Straw's Castle. The attacking force, consisting of the 7th (Islington) Middlesex, under Captains Hebbert and Dennis, and the 29th (North) Middlesex, commanded by Captains Ross and Cameron, marched on to the ground by a circuitous route leading from the Spaniards, sheltered by the trees and brushwood, and took up their position under a heavy fire from the skirmishers of the defending force at the bottom of the valley on the northern side, where, after some manœuvring, they formed into line, and were saluted by a well-directed volley from two companies of the 9th Middlesex on the ridge of the hill. The attacking force then sent out its skirmishers. The first company selected for this service was the 7th Middlesex. Their manœuvring amongst the furze and brushwood was exceedingly steady and soldierlike, but the well-directed fire of the 9th and 3rd Middlesex compelled them to retire, and their positions were then taken up by the 1st company of the 29th Middlesex, which had previously been acting as a covering force in case of necessity. This company now advanced in skirmishing order, whilst the 7th Middlesex acted as the covering battalion, and kept up a well-directed volley firing, some of the volleys being delivered with a precision that elicited great applause. The great point on the part of the commanders of the attacking force appeared to be to drive the defenders from their position on the hill, and, as the attacking force advanced, the gallant major who had the command of the defending force observed a movement of the reserve, consisting of two other companies of the 29th Middlesex, and acting upon the principle that "discretion is the better part of valour," shifted his quarters to the north-east side, whence he made a most determided defence, until at the end being overpowered and short of ammunition, he beat a rapid though steady retreat by the only loophole left for escape, namely, the opening into the Hendon Road, on the north-western side of the heath. Whatever might have been the original intentions of the commander-in-chief, the gallant major and those who acted with him must have been marvellously surprised if they were carried into effect. The crowds of spectators swarmed in thousands over the north-eastern portion of the heath, and crowded every part, so much so, that it was wholly impossible to distinguish the Volunteers from the spectators, to say nothing of friend or foe, in the desultory attack which took place. The 9th Middlesex occupied a position on one of the ridges of the heath, and took the best mode of defending the position by attacking the enemy, rather than wait for the delivery of the attack from the other side. How it came about no future Napier of the Volunteers can tell. But so it was. The gallant corps retired from their vantage ground, and formed up with the rear protected by a long, low paling, which formed the boundary of the heath on that side. Here they delivered several volleys, and made some rapid file-firing. On the extreme right they were, however, assailed by the 7th Middlesex (Islington), who fired several volleys in splendid style, each volley like a single shot, and for which they were loudly cheered by the spectators. There was one very novel and most effective movement by a company of the 29th Middlesex. These were supposed to be a portion of the defending party, in danger of an attack of cavalry. They accordingly threw themselves into square, and such was the vigorous resistance they offered that they fired volleys simultaneously from each of the four sides; one of which discharges would have mown down their comrades of the 7th Middlesex, already defeated by the attacking party. The gallant resistance of the square was rendered still more unnecessary by the fact that the only appearance of cavalry was two or three familiar and well-known Hampstead donkeys, who, disturbed by the unusual sound of firing, made a rush with empty saddles to what they considered to be a place of safety, which strangely enough happened to be in the exact direction of the line of fire from the 29th Middlesex. It is believed that upon no previous occasion has there ever been such a concourse of people on Hampstead Heath, the numbers being computed at from 50,000 to 60,000 persons, who, if they did not witness all the perfection they might have been led to expect in a military sense, must, nevertheless, have experienced a pleasant evening's amusement.

THE NAVY.

ADMIRALTY, August 7.

PROMOTIONS.

Commanders to be Captains—H. Trollope, 1852, from half-pay; J. A. P. Price, 1854, Commander of Cæsar, on the Mediterranean station; W. Armytage, 1855, from half-pay; R. H. Risk, 1855, Commander of Indus, ordinary steam-ship, Devonport; T. M. S. Pasley, 1855, from half-pay; the Hon. F. A. Foley, from half-pay.

Lieutenants to be Commanders—J. B. Field, 1846, now in command of H.M.S. Locust, although the Official Navy List, with its usual accuracy, has D.Y. against his name, which would show that he is serving in a dockyard; Loftus C. H. Robinson, 1847, Flag-Lieutenant to Vice-Admiral Bruce, Commander-in-Chief at Portsmouth; Philip Saumarez, 1847, First Lieutenant of Persian, on the Cape of Good Hope station; Stapleton J. Greville, 1847, now Senior Lieutenant of Melpomene, on particular service; Charles M. Buckle, 1847, commanding Caradoc dispatch steam-vessel, in the Mediterranean; Edwin C. Symons, 1848, now in command of the steam-tender Coromandel on the China station; Cortland H. Simpson, 1848, from half-pay; Lewis J. Moore, 1848, now serving as First Lieutenant of the Vixen, on her passage home from the Pacific; Edward Nares, 1848, First Lieutenant of Victor Emmanuel, on the Mediterranean station; Augustus J. Kingston, 1848, from half-pay; James E. Bickford, 1848, First Lieutenant of Majestic, coast-guard ship; Edward H. L. Ray, 1849, First Lieutenant of St. George; Charles T. Jago, 1849, from half-pay; Charles J. Wrey, 1850, First Lieutenant of St. Jean d'Acre, on the Mediterranean station; Charles Fairholme, 1851, commanding gun-boat Havock, on the China station; Francis R. Purvis, 1852, First Lieutenant of Highflyer, on the China station; William H. Edye, 1853, First Lieutenant of Conqueror, on the Channel station; Louis H. Versturme, 1853, First Lieutenant of Himalaya, screw storeship; the Hon. E. F. L. Cochrane, 1854, from half-pay; Charles R. F. Boxer, 1855, now Third Lieutenant of St. George; James S. Graham, 1855, commanding gun-boat Boxer on the Mediterranean station; James Simpson (b), 1845 (Commander Simpson's commission is dated back to the 31st of July).

Acting-Lieutenants to be Lieutenants—Henry John Carr, who was Flag-Lieutenant to Vice-Admiral Arthur Fanshawe, C.B., in the Marlborough, 131, in the Mediterranean, from February to April, 1860; and Richard Henry Duckworth King, Acting Mate of July, 1859, and Acting Lieutenant of February, 1860.

Mate to be Lieutenant—Mr. A. T. Powlett.

Assistant-Paymaster to be Paymaster—Edwin Harris (1851), who served in the Euryalus, 51, in the Baltic and on the North American and West India Station, from January, 1854, to April, 1857, and has been employed as secretary's clerk in the Impregnable, 104, flag-ship, at Devonport, of Vice-Admiral Sir Barrington Reynolds, K.C.B., and Sir Arthur Fanshawe, K.C.B., since May, 1857.

APPOINTMENTS.

Commanders—C. W. Bonham to the Victory; E. H. L. Ray to the St. George; John E. F. Risk to Indus, vice R. H. Risk, promoted.

Lieutenants—E. F. Lodder to command the Jackal, vice Simpson, promoted; Francis G. Suttie to be Flag-Lieutenant to the Victory; R. G. S. Pasley to the Cressy; C. Le Mesurier to the Orion; G. Powys to the Royal Albert; J. E. M. Wilson and H. T. Gammell to the Conqueror; J. A. Hodgskin to be additional to the Dauntless; James D. Curtis to the Majestic; Henry Golden to the St. Jean d'Acre; Grantham R. Y. Rattray to the Impregnable; William Spratt to the Blenheim; Henry L. C. Robinson to the Cumberland; Herbert R. Holmes to the Donegal; J. B. Scott to command the Caradoc, vice Buckle, promoted; Mervyn B. Medlycott to Royal Albert.

Masters—Thomas Bourchier and John G. Boulton, additional, to the Pelorus; H. W. C. Wise to the Gorgon; J. Waye to the Jason; and E. L. B. Williams to the Indus, for service in the Desperate.

Chief Engineers—W. G. Wootton to the Cumberland, for service in the Atlas; and E. Boulton to the Asia, for service in the Princess Royal.

Paymaster—Edwin Harris, 1860, to be additional to the Impregnable, 78, at Devonport.

Mate—R. B. Lambert to the Marlborough, for disposal.

First-Class Assistant-Engineer—Mr. Thomas Scott, for temporary service to Cumberland, for service in Myrtle.

Second-Class Assistant-Engineer. Edward Ingledew to the Emerald.

Third-Class Assistant-Engineer—James Ritchie to the Indus, for charge of the machinery of the Procris.

Assistant-Surgeon—R. Burrowes to the Royal Adelaide.

Acting Assistant-Surgeons—G. V. Hart, G. Muir, and C. L. Cunningham, to the Impregnable, for service at Plymouth Hospital; W. E. Dillon, C. P. Mulhany, and F. Egan, to the Victory, for service at Haslar Hospital.

Acting Third-Class Assistant-Engineers—William Jeffrey Grant, John Sleigh, and Edward Last to the Asia, as supernumeraries; George Frederick Gossage, to the Fisgard, additional, for service in the Monkey; Henry Swiss, to the Fisgard, additional, for service in the Bustler; W. H. Annesley, to the Melpomene.

Midshipmen—Henry Suddy and Charles Mason to the Hornet.

COAST-GUARD OFFICE, August 9.

APPOINTMENTS.

Inspecting Commander—Commander Montagu B. Dunn to Skibbereen Division, vice Jackson, appointed to the Formidable.

Chief Officer—Lieutenant Alfred Luckraft to command Clacton Wash Station.

REMOVAL.

The order for the removal of Lieutenant Chetwynd from Uzon to Westhaven has been cancelled.

Acorn, 12, sailing-sloop, Commander R. B. Pearse, was at Amoy, according to the latest accounts.

Acteon, 26, surveying-vessel, Commander J. Ward, was in the Gulf of Pecheli when the last mail was dispatched from China.

Adventure, screw store-ship, Commander Lacy, was on the north coast of China, according to the last advices.

Algerine, screw gun-vessel, Lieut.-Commander W. Arthur, was in the Gulf of Pecheli when the last mail left.

Ardent, 3, paddle steam-vessel, Commander J. E. Parish, was at Pernambuco on the 16th of July with certain commissioners, who had been appointed to inquire into some charges that had been brought against Her Britannic Majesty's consul at that port.

Ariadne, 26, screw frigate, Captain E. W. Vansittart, in company with the Hero, left St. John's, Newfoundland, on the 26th ult. for Halifax, Nova Scotia.

Banterer, screw gun-boat, Lieut.-Commander H. P. Knevitt, was on the north coast of China by the last accounts.

Beagle, 4, screw gun-vessel, Commander E. Hay, was in Hong Kong harbour on the 7th of June.

Blenheim, 60, screw coast-guard-ship, Captain Edward Tatham, arrived in Plymouth Sound from Portland on Wednesday. As soon as she has filled up her stores and coal, she will proceed to her station at Pembroke.

Bouncer, 2, screw gun-boat, Lieut.-Commander A. R. Owen, was at Hong Kong on the 7th of June.

Bustard, screw gun-boat, Lieut.-Commander F. W. Hallowes, was by the last advices at Chusan.

Buzzard, 6, paddle steam-vessel, Commander F. Peel, was at Rio de Janeiro on the 10th of July.

Cambrian, 40, sailing-frigate, Captain J. J. M'Cleverty, C.B., was on the north coast of China by the last dispatches.

Camilla, 16, sloop, Commander G. T. Colville, was at Shanghai according to the last advices.

Centaur, 6, paddle-steamer, Commander E. D'o D'a Aplin, was in Hong Kong harbour on the 7th of June.

Chesapeake, 51, screw-frigate, flag-ship of Vice-Admiral J. Hope, C.B., Captain G. O. Willis, was at Hong Kong on the 7th of June.

Childers, 12, one of the vessels attached to the reserve ordinary at Chatham, is being fitted for the reception of the engines and machinery of the various steam-vessels at that port as they arrive from the contractors.

Clown, 1, screw gun-boat, Lieut.-Commander William F. Lee, was on the north coast of China by the latest accounts.

Cockchafer, 2, screw gun-boat, Lieut.-Commander H. L. Holder, was in Hong Kong harbour on the 7th of June.

Coquette, 4. This vessel has been further opened up and the planking found pretty good. The timbers are also well squared and the scantling of the proper size, but there is more sap than was expected. The worst feature in the vessel is the bolting, as some of the fore wood butt bolts have been found short. One of these important bolts has been found as short as 5½ inches, its proper dimensions being a foot for a vessel of the Coquette class. An official report upon this vessel may be expected shortly.

Coromandel, steam-tender, was in Hong Kong harbour on the 7th of June.

Cruizer, 17, screw-sloop, Commander J. Bythesea, V.C., was in the gulf of Pecheli by the last accounts.

Curaçoa, 31, screw-frigate, Captain A. Phillimore, left Montevideo for Buenos Ayres on the 30th of June.

Cyclops, 6, paddle-steamer, Captain W. J. S. Pullen, left Trincomalee on the 22nd of June for the Great Basses, and was expected to be absent about a month, and would then return to port.

Drake, 1, screw gun-boat, Lieut.-Commander Arthur R. Blane, was on the north coast of China by the last advices.

Duncan, 101, screw, made several runs at the measured mile in Stokes Bay on Tuesday, and the trials were very satisfactory. She is the fastest screw line-of-battle ship afloat, having made 13¼ knots an hour.

Elk, 12, sloop, Commander Hubert Campion, from Australia, arrived in Plymouth Sound on Thursday afternoon. After landing invalids, she proceeded to Chatham, where her crew will be paid off.

Emerald, 51, screw, Captain A. Cumming, at Devonport, got up steam on Tuesday, and went outside to try her machinery. She subsequently returned to and anchored in the Sound.

Encounter, 14, screw, Captain Roderick Dew, left Chusan about the 25th of May, with an additional party of marines on board on some secret expedition.

Esk, 20, screw-corvette, Captain Sir R. J. Le McClare, was at Hong Kong on the 7th of June.

Euryalus, 51, screw, Captain J. W. Tarleton, sailed from Rio on the 7th July for the Cape of Good Hope with His Royal Highness Prince Alfred on board.

Firm, 2, screw gun-boat, Lieutenant-Commander William R. Boulton, was at Chusan by the last accounts.

Flamer, 2, screw gun-boat, Lieutenant-Commander Henry M. Bingham, was on the north coast of China by the latest advices.

Forester, 2, screw gun-boat, Lieutenant-Commander A. J. Innes, was on the north coast of China when the last mail left.

Furious, 16, paddle-frigate, Captain O. J. Jones, was at Shanghai when the last mail was dispatched.

Fury, 6, paddle-steamer, Commander J. C. Wilson (acting), was at Hong Kong on the 7th of June.

Grasshopper, screw gun-boat, Lieutenant-Commander J. C. Tucker, was at Hong Kong on the 7th of June.

Hannibal, 91, screw-liner, Captain Arthur Farquhar, with the flag of Rear-Admiral Mundy, C.B., was in the Bay of Naples on the 2nd inst.

Hardy, 2, screw gun-boat, Lieutenant-Commander A. G. Bogle, was at Hong Kong on the 7th of June.

Haughty, 2, screw gun-boat, Lieutenant-Commander G. D. Broad, was at Hong Kong on the 7th of June.

Havock, 2, screw gun-boat, Lieut.-Commander Charles Fairholme, was on the north coast of China by the last accounts.

Hero, 91, screw-liner, Commodore Seymour, C.B., with His Royal Highness the Prince of Wales on board, left St. John's, Newfoundland, for Halifax, on the morning of the 26th of July, and was expected to reach the latter port on the evening of the 29th.

Hesper, 2, screw store-ship, Master-Commander J. Loane, was at Chusan by the last accounts.

Highflyer, 21, screw-frigate, Captain W. A. Heath (acting), was in Canton River on the 7th of June.

Digitized by Google

Himalaya, screw store-ship, Captain Seccombe, returned to Devonport on Tuesday, and on Wednesday embarked the 10th Regiment for Aldershot, and arrived at Portsmouth on Thursday.

Hornet, 17, screw-sloop, Commander W. H. Elphinstone, steamed out of the steam basin at Portsmouth on Tuesday, and will also go out of harbour for trial of her engines when the weather permits.

Imperieuse, 51, screw-frigate, Captain Rochefort Maguire, carrying the flag of Rear-Admiral Jones, C.B., was at Chusan by the last advices.

Inflexible, 6, paddle-steamer, Commander G. A. C. Brooker, was in Hong-Kong Harbour on the 7th of June.

Janus, screw gun-boat, Lieut.-Commander D. G. Davidson, was at Hong Kong on the 7th of June.

Kestrel, 1, screw gun-boat, Lieut.-Commander C. D. Robinson, was at Chusan by the latest advices.

Leopard, 18, paddle steam-frigate, Captain F. B. Wainwright, bearing the flag of Rear-Admiral Sir S. Lushington, K.C.B., was at Rio de Janeiro on the 10th of July.

Leven, 1, screw gun-vessel, Lieut.-Commander J. S. Hudson, was at Chusan by the last accounts.

Madagascar, store-ship, Captain R. D. White, was lying in Rio harbour on the 1st of July.

Magicienne, 16, steam-paddle frigate, Captain John E. Commerell, V.C., was at Chusan by the latest accounts.

Majestic, 80, screw coast-guard-ship, Captain W. R. Mends, C.B., arrived in Plymouth Sound on Wednesday. She will complete stores and fuel, and return at once to her station in the Mersey.

Nimrod, 6, screw-sloop, Commander R. J. Wynniatt, was at Shanghai according to the latest accounts. This vessel has been ordered home for some time past.

Oberon, 3, paddle-steamer, Lieut.-Commander F. G. C. Paget, was lying off Montevideo on the 30th of June.

Odin, 16, steam-paddle frigate, Captain Lord John Hay, C.B., was at Chusan by the last advices.

Opossum, 2, screw gun-boat, Lieut.-Commander G. D. Bevan (acting), was at Shanghai by the latest advices.

Pearl, 21, screw-corvette, Captain John Borlase, C.B., was at Chusan when the last mail left.

Pelican, 17, screw-sloop, arrived at Portsmouth on Sunday from Plymouth, and came into harbour on Monday to be dismantled of her jury-rigging, to have her engines fitted, and to be brought forward for sea service.

Pioneer, 6, screw-steamer, Commander H. A. Reilly, was at Hong Kong on the 7th of June.

Renard, 4, screw steam-vessel, Commander J. G. Goodenough, was at Hong Kong on the 7th of June.

Retribution, 28, paddle steam-frigate, Commodore, H. E. Edgell, C.B., was at Trincomalee on the 2nd of July, refitting and preparing for her homeward passage. She should be looked for in all October.

Rhadamanthus, paddlewheel steam-vessel, Master-Commander Frederick R. Sturdee, having landed machinery and boilers for the screw steam-ship Gibraltar, was taken from Keyham basin on Wednesday to the Royal William Victualling-Yard, Plymouth, to receive stores for Woolwich. She sailed on Thursday afternoon, and may be expected at Woolwich to-day.

Rinaldo, 17, screw-sloop, was taken out of the steam basin at Portsmouth on Tuesday.

Ringdove, 4, screw-steamer, Commander R. G. Craigie, was at Hong Kong on the 7th of June.

Roebuck, 6, screw steam-vessel, Commander F. Marten, was at Shanghai by the last accounts.

Sampson, 6, paddle-steamer, Captain G. S. Hand, was at Chusan by the latest advices.

Scout, 21, screw-corvette, Captain John Corbett, C.B., was at Chusan when the last mail left.

Scylla, 21, screw-corvette, Captain Rowley Lambert, was at Messina on the 31st of July.

Simoom, 8, screw troop-ship, Commander J. M. Cooke, was at Hong Kong on the 7th of June.

Slaney, 1, screw gun-vessel, Lieut.-Commander Henry K. Leet, was at Chusan when the last mail left.

Snake, 4, screw-steamer, Commander H. Harvey, was at Hong Kong on the 7th of June.

Snap, 2, screw gun-boat, Lieut.-Commander William O. Butler, was on the north coast of China by the last advices.

Sphinx, 6, paddle-steamer, Commander G. F. Day, V.C., was at Hong Kong on the 7th of June.

Spy, 3, brigantine, Lieut.-Commander J. Hanmer, was at Rio de Janeiro on the 10th of July.

Starling, screw gun-boat, Lieut.-Commander J. A. Whitshed, was at Hong Kong on the 7th of June.

Staunch, 2, screw gun-boat, Lieut.-Commander E. J. Pollard, was in the Canton river on the 7th of June.

Sutlej, 51, is receiving her anchors in the steam basin, Portsmouth.

Torch, 5, screw, Commander F. H. Smith, went out of Portsmouth Harbour on Wednesday, and anchored at Spithead.

Tribune, 31, screw, Captain G. T. P. Hornby, paid off on Thursday morning, alongside the Portsmouth Dockyard jetty, in most creditable order, under the inspection of Captain Gordon, of the Asia, 84. A finer or more steady ship's company has never returned to England, and such was the confidence reposed in the men that they were allowed leave of absence on Sunday and Wednesday, and to a man they returned to their ship steady and sober.

Urgent, 6, screw troop-ship, Commander H. W. Hire, was at Hong Kong on the 7th of June.

Vulcan, 6, screw troop-ship, Commander A. C. Strode, was at Hong Kong on the 7th of June.

Watchful, 2, screw gun-boat, Lieut.-Commander F. W. Inglefield, was lying in the Canton river on the 7th of June.

Weazel, 2, screw gun-boat, Lieutenant-Commander W. Howorth, was in Hong Kong harbour on the 7th of June.

Woodcock, 1, screw gun-boat, Lieut.-Commander George S. Bosanquet, was at Chusan by the latest accounts.

The first complete set of lamps forming the numerical code of signals, invented by Mr. W. H. Ward, of Auburn, United States, and termed the "Ocean Telegraph" (one of which was tried six months ago), having been made according to Admiralty instructions for experiments on board the Channel fleet, was on Thursday received at Woolwich, and was tested last night at 9 o'clock at the mast-head of the flag-ship Fisgard, under the inspection of Commander Hawker, Mr. Thomas, Mr. Petley, and other officers of the yard, who directed the transmission of a course of signals, which were replied to from different points on shore. It was stated that the lights reflected as signals by this new and ingenious method were distinctly read at the distance of two miles. The improvement now effected in operating with the various red, white, and dark shades from the deck of the ship appeared to satisfy the committee as to the facility with which messages may be despatched from ship to ship and shore, as well as the brilliancy of the lights; and they stated that the invention was perfect, with one exception—namely, the weight of the lamps, each of which exceeded 30lbs., and it was their desire that this slight drawback should, if possible, be remedied. Further experiments are ordered to take place on a future occasion. But, before arriving at any decision in reference to Mr. Ward's invention, it is to be hoped that the Lords of the Admiralty will wait for the completion of certain experiments which are about officially to take place with Professor Way's beautiful electric signals. It will be in the recollection of our readers that Mr. Way, about ten days since, exhibited his marvellous light from the mast-head of a private yacht in the Solent; and on that occasion, it was admitted by distinguished seamen, to be perfect for the purpose of conveying instantaneous and intelligible night messages.

The Navy Gazette.

ADMIRALTY, August 7.

NAVAL PRIZE MONEY.

Notice is given in this *Gazette* that preparations are being made for the intended distribution of the proceeds received and tonnage bounty awarded for the brig, name unknown, captured on the 12th of January, 1859, by Her Majesty's ship Archer; also for the intended distribution of the proceeds received and tonnage bounty awarded for the brigantine, name unknown, captured on the 16th of January, 1859, by Her Majesty's ship Sharpshooter.

NOTICE TO MARINERS.

This *Gazette* contains a notice to mariners, the object of which is to enable captains of vessels calling at the Island of Ascension to find the error and rate of their chronometers, according to Greenwich time.

THE NAVAL DISCIPLINE BILL.

In the House of Lords on Tuesday evening, the third reading of the Naval Discipline Bill was moved, and the Earl of Hardwicke remarked, that although he admitted the bill was calculated to make some advantageous changes in the manner in which discipline had hitherto been enforced on board men-of-war, there were some of its provisions not altogether free from objection. The chief alteration now proposed to be introduced was to substitute imprisonment for corporal punishment, in accordance with the state of public feeling on the subject; but it was to be borne in mind that it would be impossible when a fleet was in sight of an enemy, or when the strict demands of the Service interfered to prevent the weakening of a ship's company, to carry out this system, and it would therefore be necessary to revert to the old plan of maintaining order. The noble earl objected to the formation of courts of inquiry, consisting of the officers of a particular ship for the trial of offences, and contended that the captain should be made responsible for the existence of discipline among those under his command. Moreover, that it would be difficult in some ships of a small class, such as gun-boats, &c., to obtain a sufficient number of officers of proper standing to constitute a court. He also objected to the Lords of the Admiralty being formed into a court of appeal, as they could not possibly understand a case so well at a distance, when all the evidence adduced before them must be in writing, as those officers who had the opportunity of investigating it in an oral form. He finally alluded to the clause by which it is empowered to punish seamen for flagrant misconduct on shore, in the same manner as if they had misconducted themselves on board ship, and expressed a hope that this and the measure generally would answer the expectations which the authors had in view.

The Duke of Somerset expressed a strong hope that, by the clause to which Lord Hardwicke had last alluded, a great improvement in our system of naval discipline would be effected. In reference to the clause by which a court of inquiry was to be formed before a man could be flogged, he was of opinion much good would result from it, from the fact that merchant seamen would look upon this as an additional inducement for them to enter the Royal Navy, while at the same time no relaxation of discipline would be the consequence. His Grace added that the clause would by no means take away in an important sense the authority which a captain exercised on board his ship, inasmuch as he might, whenever he pleased, set aside on his own responsibility the recommendations which might be proposed by the members of the contemplated courts of inquiry. The bill was then read a third time and passed.

It is undoubtedly gratifying to us to find a recommendation which we brought forward adopted by the framers of the Naval Discipline Bill; but our pleasurable feelings are much diminished when we discover that if the finding of a court of inquiry is distasteful to a captain, he may at once reject the sentence, and inflict one according to his own judgment. We hope we are mistaken in supposing this to be the case, but the words of the Duke of Somerset seem plain enough, and we must only hope that the Bill will be amended in the House of Commons for as it stands now it will be fruitful of innumerable disagreements between a captain and his officers—a state of affairs which all well-wishers to the welfare of the Navy would desire to see avoided.

In the House of Commons on Thursday evening, Sir M. Peto called attention to the expediency of discontinuing the Ordnance survey on the 25-inch scale till the survey on the one-inch scale shall have been completed.—Mr. Sidney Herbert explained that Government did not intend to prosecute either the 25-inch or the 6-inch survey this year, as the whole of the staff would be required for military purposes.

A letter has been received from Captain Allen Young from the Faroe Islands giving a good account (notwithstanding a tedious passage) of the beginning of the operations of the expedition for laying down the North Atlantic Telegraph.

THE MILITIA.

The Antrim Artillery, consisting of 350 men, in command of Lieut.-Colonel Viscount Massereene, having arrived at Woolwich to be quartered, the majority took possession of quarters in the Royal Artillery Barracks.

The Norfolk Artillery, quartered at the Royal Marine Barracks, Woolwich, during the last three months, on Wednesday left Woolwich in command of Lieut.-Colonel L'Estrange Astley, for Yarmouth, for the purpose of being disbanded. Preparatory to their departure they were paraded in the square, in order to give the men an opportunity of volunteering into the ranks of the regular Army, but a small number only displayed any inclination to that effect, from a desire, it was stated, to visit their friends before entering on permanent service. Seven, however, volunteered on the spot for the 7th Fusiliers, and four for the Royal Artillery; two of the latter, failing to pass the medical examination, were rejected. The head-quarters proceeded by train, and the remainder of the corps embarked by the Yarmouth packet from London.

On the 31st ult. the Kerry regiment was paraded in the Barrack Square, Tralee, and the order for disembodiment was read by Captain and Adjutant Spring. Lieut.-Colonel Hon. D. B. de Moleyns, Majors Crosbie and O'Connell, and the other officers, with very few exceptions, were present. Colonel de Moleyns addressed the assembled corps shortly, to the effect that it was not necessary for him to speak of their soldierly qualities, as a regiment; that was borne full testimony to by the General Orders of the several officers under whom they had served during their embodiment, and particularly on the occasion of their last inspection by Major-General Dalzell. But he wished to thank them for the good conduct which they had shown as a body; and more particularly since they returned to their own county, where so many temptations beset them. After some short formal proceedings were gone through, the men were dismissed, and thus was disembodied one of the most efficient militia regiments in the United Kingdom, numbering 700 bayonets.

The Militia Gazette.

WAR OFFICE, PALL MALL, August 7.

2d Devon Regiment of Militia—George Marker to be Lieutenant, vice Walston, resigned; George Edmund Allen to be Lieutenant, vice Rodd resigned; Edward Holberton to be Lieutenant, vice Farwell, resigned; John Carpenter to be Lieutenant, vice Burnett, resigned.

Artillery Regiment of Royal Lancashire Militia—James Chambers Ferguson, Esq., M.B., to be Surgeon, vice John Betham, resigned.

90th Regiment of British Militia (Highland Borderers)—Lieutenant Charles Brodie Macalister to be Captain, vice Graham resigned.

6th Regiment of West York Militia—Lieutenant Henry Fox Davis to be Captain, vice Rhys, struck off the strength of the Regiment.

Memorandum—West York Rifle Regiment of Militia—Her Majesty has been graciously pleased to accept the resignation of the commission held by Assistant-Surgeon William Fletcher Bowman in this regiment.

Westmoreland and Cumberland Regiment of Yeomanry Cavalry—Henry Spencer, Esq., to be Captain, vice Philip Musgrave, deceased; John Harris, Gent., to be Lieutenant, vice Spencer, promoted; Richard Courtenay Musgrave, Gent., to be Cornet, vice Harris, promoted.

WAR OFFICE, PALL MALL, August 10.

Royal South Gloucestershire Light Infantry Regiment of Militia—Francis William Fitzhardinge Berkeley, Esq., M.P., late Honorary Colonel of the said Regiment, to be Lieutenant-Colonel-Commandant, vice Newman, resigned (who retires with Her Majesty's permission to retain the rank and wear the uniform of Lieutenant-Colonel).

Royal East Kent Mounted Rifles Yeomanry Cavalry—The name of Cornet Willats (Commission dated 22nd July), should have been William *Hale* Willats instead of William *Hall* Willats.

Royal Ayrshire Rifles—Lieutenant Blair Fullarton to be Captain vice Wallace, resigned.

TERRIBLE ACCIDENT AT DOVER.

A fearful accident occurred at Dover on Thursday evening, by the bursting of a gun at Archcliffe Fort, at which the Dover Volunteer Artillery Corps were practising. Ten rounds had been fired safely, but at the 11th the cannon exploded, scattering its fragments in all directions.

When the excitement consequent on such an unlooked-for occurrence had abated, it was found that the lieutenant of the corps had been killed, and several others severely injured.

The following is a list, so far as can at present be ascertained, of the killed and wounded :—

KILLED.

Lieutenant G. T. Thompson, (solicitor, and coroner of the borough,) killed instantly, having been blown into the trench.

Gunner Monger (tobacconist), fatally injured, and expired after being conveyed to the military hospital.

WOUNDED.

A nephew of Captain Wollaston, not connected with the corps, conveyed to the military hospital, dangerously wounded.

Gunner Boulding, ankle dislocated.

Gunner Adlow, finger blown off.

Gunner Gilfillan, arm broken.

Trumpeter Tucker, blown into the trench, but not severely hurt.

The whole of the injured men, Gilfillan excepted, were blown into the trench, which is 30 feet deep, by the violence of the explosion.

Lieutenant Thompson was the coroner for the borough, and was held in the highest esteem by all classes of his fellow-townsmen. It is believed that the accident arose from a defect in the gun, and not from its being imperfectly loaded, as the ball discharged from it reached within a few yards of its proper range, which would not have been the case had there been any defect in the ramming of the charge.

No event has occurred in Dover for many years which has cast such profound sadness over the town.

Major-General Bloomfield, Inspector-General of Artillery, recently paid an official visit to Colchester Camp, and inspected the batteries of eight 26-pounders stationed there for the protection of the coast, with which he has expressed himself perfectly satisfied.

VOLUNTEERS.

METROPOLITAN.

LONDON RIFLE BRIGADE.—At a Court of Lieutenancy held at Guildhall on Wednesday, at which the Lord Mayor presided, commissions were signed promoting Major Close, late of the 9th Light Infantry, to be Lieut.-Colonel of the 2nd battalion of the London Rifle Brigade, and Captain Alderman Rose to be Major in his stead. Some dissatisfaction, it is said, exists out of doors at the tardy recognition of the merits and services of other officers of the corps who have been identified with it since its formation, and have been conspicuous for devotion to their regimental duties; and this is contrasted with the hot haste with which the appointment of field officers in the brigade is pushed on, while the proper complement of subaltern officers, on whom the really hard work of the service devolves, is still wanting.

1ST MIDDLESEX VOLUNTEER ENGINEERS.—Last week the 1st Middlesex Volunteer Engineers were experimentalising on the Serpentine with a new pontoon, the invention of Captain Fowke, R.E.; and on Saturday last the Commander-in-Chief attended, as also did General Sir J. Burgoyne, R.E., Major Keene, Colonel Gordon, Captain Donnelly, R.E., and numerous other officers. His Royal Highness arrived on the ground at four o'clock, when operations were at once commenced—the Volunteer Engineers being under the command of Captain Macleod of Macleod, and the detachment of Royal Engineers present being in charge of Lieutenant Micklem. The pontoon to be tested consists of an oblong framework of wood and iron, over which, when fixed for use, is drawn a surface of prepared canvas—each pontoon being portioned into eight compartments, all water-tight, so that while one of these divisions remain perfect the boat can never sink. When thus canvassed over it has the appearance of a large ship's boat, and can be at once launched. On its upper surface rafts are now fitted, and on those again are run the chesses or boards. Each pontoon being now complete, it will float with 80 men on its top, and then it only draws 16 inches of water; while the time requisite to build a bridge of 6 pontoons is 10 minutes, and to again dismantle the same 5 minutes. To each float of 6 pontoons is apportioned an extra one to serve as a boat, in which is accommodation for 12 oarsmen. After the proceedings were over the Commander-in-Chief expressed himself much pleased with the success of this invention. Perhaps one of the most commendable points of the exhibition was the soldierlike way in which the Volunteers handled the gear and tackle of the pontoons; whilst the rapidity evinced by them in launching, marching over, and then as suddenly dismantling the whole fabric, was something wonderful to behold. On marching back to their quarters they were met by a large number of recruits, workmen in the employ of Mr. Morsam, engineer, bringing with them also an organised band of 14 performers. The whole were at once sworn in and became effective members of this useful body.

13TH MIDDLESEX VOLUNTEERS.—On Saturday last the little village of Hornsey and its neighbourhood were enlivened by a muster of Volunteer riflemen, and a considerable gathering of people to witness a pleasing ceremony of the presentation of a handsome silver bugle to the Hornsey (13th Middlesex) Rifle Volunteers, by the ladies of the village, which took place in the extensive grounds of William Bird, Esq., Crouch Hall, in the presence of a large concourse of spectators. Between the hours of three and four, the various corps which took part in the proceedings made their appearance upon the ground, whereupon the Hornsey corps, commanded by Captain Warner, the commandant, between 80 and 100 strong, marched in review order in slow time, the other corps consisting of the 14th (Highgate) and 33rd (Tottenham) Middlesex Rifles, the former under Captain Wilkinson, and the latter under Captain Goss, forming a guard of honour, and were drawn up in line to receive the handsome testimonial. Mrs. Bird, of Crouch Hall, at the head of a brilliant assemblage of ladies, then presented the bugle to the 13th, with some appropriate remarks, for which the commandant of the corps (Captain Warner) returned thanks. After the interesting ceremony of presentation had terminated, the various corps were put through the manual and platoon exercises by Captain Wilkinson. The force was next marched off the ground to commence the sham fight. The principal feature of the engagement was an attack on the high ground, on which stand buildings usually called the Sheepcotes. The formation of squares to resist cavalry, and various other evolutions incident to the occasion, were executed with creditable military precision, and appeared to give general satisfaction to the large concourse of people assembled from London and the surrounding districts.

20TH MIDDLESEX RIFLE VOLUNTEERS.—About 350 members of the 20th Middlesex, assembled at head quarters on Monday evening, where they were joined by the 37th Middlesex, after which they marched to the King's Cross terminus of the Great Northern Railway, and, by Her Majesty's previous permission, performed the duties of guard of honour on the occasion of Her Majesty proceeding to Scotland. A similar duty was assigned to the 7th Middlesex (Islington) Volunteers at the Holloway station.

29TH NORTH MIDDLESEX RIFLES.—This corps attended Divine Service on Sunday afternoon at the church of St. Pancras, Euston Square. One particular feature on the march to and from church was that the whole of the music played by the band was of a sacred character, an example that might be more generally followed.

A WORKING MAN'S VOLUNTEER CORPS. — A company has been raised, under the direction of a committee of artisans, in connection with the 19th Middlesex. The secretary states that it has been found practicable to obtain a good uniform—grey, with red facings—for thirty shillings, payable by instalments, which, in addition to a small entrance-fee and monthly subscriptions, forms the entire charge to effectives. From the assistance liberally given towards the object in view, pouches and belts are provided free—returnable if a member leaves the corps. For the purpose of battalion drill the Working Man's Company is attached to the 19th Middlesex.

ESSEX.

THE 6TH (COLCHESTER) ESSEX VOLUNTEERS.—On Thursday afternoon the Colchester Volunteer Rifle Corps assembled at Alresford Hall, the seat of W. W. Hawkins, Esq., late M.P. for the borough of Colchester, when a handsome silver bugle, purchased by the ladies of the county, was presented by Lady de Crespigny, lady of the Lieutenant-Colonel of the Essex Brigade. The corps, about 100 in number, then went through a variety of military evolutions, and were subsequently officially inspected by Lieut.-Colonel Ibbertson, who has been appointed Inspector of Volunteer Corps in the Eastern District. There were several thousand spectators present, and a most distinguished company, including Lord Braybrooke, Vice-Lieutenant of the county, the High Sheriff, the members of the borough, and the northern division of the county, Colonel Dixon, C.B., Colonel Holland, R.E., a large staff of officers from Colchester camp, and nearly 200 of the neighbouring clergy and gentry. The proceedings concluded with a splendid luncheon, provided by Mr. Hawkins, which was attended by the chief members of the families within the district.

GLOUCESTERSHIRE.

GLOUCESTERSHIRE RIFLE VOLUNTEERS.—On Wednesday last the 2nd Battalion mustered for battalion drill to the number of 600, under the command of Colonel Purnell, C.B., assisted by Major Noel and Captain Marshall, the adjutant. The muster took place in the "Ham" field, Gloucester; and a more admirable place could not be found. It will be suitable in every way for the grand review to be held there on the 18th of September, of which the day's proceedings were, in a sort of way, a rehearsal. The Right Hon. Earl Ducie, was upon the ground on horseback in his uniform, as lord-lieutenant, and an immense number of visitors, who appeared thoroughly to enjoy this the first military turn out of Gloucestershire for a number of years. The men were formed into nine companies in the following order:—No. 1, the Gloucester Dock (Captain Guise); No. 2, the Gloucester City (Captain De Winton); No. 3, the Stroud (Captain Hunt); No. 4, the Stroud (Captain Hallewell); No. 5, the 7th and 13th Cheltenham (Captain Gibney); No. 6, the Cotswolds (Colonel Wood); No. 7, the Dursley and Tewkesbury (Captain Sargeaunt); No. 8, the Dean Forest (Captain Sir Martin B. Crawley); and No. 9, the 14th Cheltenham (Captain Morphy). The first movement was to march past in companies, as at the review in London, and this was executed in a very splendid manner by all the companies. Where all were so good it is almost impossible to select the best, but the palm must be given to the two Gloucester companies—more perfect marching it would be impossible to witness; next come the Cotswold and the Stroud companies; and indeed the marching of all was perfect. The companies having again and again marched past at half and half distances, Colonel Purnell formed square, and officers to the front. The general salute was given with great precision. The gallant colonel then said he was requested by the lord-lieutenant to compliment the whole body on the perfect manner in which they had acquitted themselves, and he was sure the Guards themselves could not march better. His lordship then left the ground, and the battalion was put through, for nearly two hours, a variety of light infantry movements, all of which, to use Colonel Purnell's words in dismissing them, they performed in a manner to reflect the highest praise upon the county, and he had no doubt that, at the forthcoming review, they would, if possible, acquit themselves still better. Previous to the dismissal, Major Noel, in a very kind and courteous manner, presented the Cotswold company with a very handsome silver bugle, made by Distin; it is of great beauty, and will be highly prized by the fortunate company. The different companies left the ground soon after six o'clock, each headed by their respective bands. On the whole line of the return a large concourse of people awaited them, and cheered and hurrah'd them in every direction. These battalion drills are likely to become very popular, and we hope Stroud and Cheltenham will each have one allotted to them previous to the review.

HAMPSHIRE.

NEWPORT RIFLE VOLUNTEERS.—On Thursday evening last, a meeting of the above company took place at the Queen's Rooms, for the purpose of filling up the vacancy occasioned by the promotion of Major Sir John Simeon, Bart. It was proposed, seconded, and unanimously carried, that Lieutenant Estcourt should fill the office of Captain; following which it was also proposed, seconded, and unanimously carried, that Ensign Tooke should fill the vacancy of Lieutenant. The ensigncy was then balloted for by the effectives, including the band. The honorary members as a general rule are excluded from voting on such occasions. Four candidates appeared in the field, and, after a long contest, it fell to the lot of Mr. Francis Pittis, jun. At the commencement of the evening it was proposed, seconded, and unanimously carried, that the Rev. Allen Wallace, M.A., be appointed Chaplain to the company.

KENT.

2ND KENT (SANDWICH) VOLUNTEER ARTILLERY COMPANY.—Another large gun has been received for this corps, the members of which are assiduous at drill, and promise ultimately to rank high amongst the Volunteer body.

14TH KENT (WOOLWICH DOCKYARD) ARTILLERY.—This corps, having now reached five companies or batteries, has been consolidated into a battalion, under the command of Major Thornton. Batteries Nos. 1 and 2, having completed a course of carbine drill, have commenced garrison gun exercise with the four 32-pounder guns mounted on the battery, or near the landing-stairs at the dockyard, and are making good progress under the direction of Sergeant-Major Osborne, Royal Artillery.

4TH KENT VOLUNTEERS (WOOLWICH DOCKYARD BATTALION), in command of Major Thornton, assembled last night on the parade, in a body exceeding 300 men, and were sworn in before the Commodore-Superintendent of the yard, the Hon. James R. Drummond. It is stated to be in contemplation to revert to the system recently abolished—namely, of re-establishing the Royal Dockyard Corps, in which case the commissions will be issued by the Queen, instead of by the Lord-Lieutenant, as at present.

24TH KENT VOLUNTEERS.—On Monday the village of Woodnesborough, about two miles from Sandwich, was the scene of an interesting ceremony, which was witnessed by a large number of ladies and gentlemen from the vicinity, viz., the presentation of two silver bugles, the gifts of Mrs. Godden, the wife of Captain Godden, and Mrs. Gillow, wife of Lieutenant W. Gillow. The ceremony took place in the grounds of Lieutenant Gillow, which were gaily decorated with flags, banners, &c., for the occasion. The corps being duly drawn up the two ladies referred to came forward, and the Rev. Mackarness, vicar of Ash, addressed the Volunteers on behalf of the fair donors, complimenting the corps warmly on their spirit and energy, as well as the progress they have made. His address was very cordially received, and, at the close, the two buglers were summoned to the front, and a bugle was placed round the neck of each by Mrs. Godden and Mrs. Gillow. Mr. Sladen acknowledged the gift on the part of the corps, and Captain Godden, in a brief speech, thanked the officers and Volunteers of the Sandwich Artillery for their attendance. Shortly after which the proceedings were brought to a close.

LANCASHIRE.

MANCHESTER VOLUNTEER CORPS.—On Saturday last the members of the 1st Regiment assembled at the Infirmary, and marched to their field for drilling, in Hullard Hall Lane, Stretford Road. The drill consisted chiefly of blank firing, and each member was supplied with five rounds of ammunition. There will also be blank firing practice on Monday, Wednesday, and Thursday this week. This will give every member of the regiment at least two drillings in firing blank cartridges before going to the review at Newton this week, where the 1st will form an independent battalion, and their evolutions will depend upon the movements of the brigades as directed by General Wetherall.

STAFFORDSHIRE.

THE RUGELEY RANGERS—21ST COMPANY.—This corps assembled with their brass band at the depôt at half-past 12 on Friday last, to take up arms previous to marching to Shugborough Park, the seat of their president, the Right Honourable the Earl of Lichfield, about four and a half miles from Rugeley, for the purpose of honouring an invitation given to them by him to be present at a cricket match played between the All England Eleven, and twenty-two of Shugborough. On arriving in the park his lordship met them, and directed them where to take up ground to pile arms; after which he expressed the pleasure he had in their presence, and bade them partake of a bountiful luncheon provided in a tent adjoining the cricket-ground. After luncheon the corps dispersed about the grounds, assembling again for departure at half-past 6, returning home by way of Great Haywood, highly gratified by the courtesy and liberality of their noble and esteemed president. The company was halted at Wolseley, both going and returning, and through the liberality of the officers, Lieutenant Landore and Ensign Gardner, were refreshed. The Captain, Josiah Spode, Esq., is still staying in the Isle of Wight, but is expected to join the company shortly.

15TH (SOUTH) STAFFORDSHIRE VOLUNTEER CORPS.—On Wednesday week the 15th (South) Staffordshire Volunteers were presented with a silver bugle, purchased by the ladies of the locality. The ceremony took place at Brierley Hill, and was considered an occasion for a gala or holiday, there being a great display of flags and decorations.

SURREY.

THE SURREY RIFLES.—On Saturday last, the 4th, 7th, and 10th Surrey Rifles, after mustering at their respective head-quarters, marched to London Bridge, whence they proceeded by special train to Streatham Common, for the purpose of being reviewed by Colonel Lysons, Deputy-Adjutant-General. Shortly before six o'clock, the 7th Surrey Rifles, under the command of Major Beresford and Major Parrott, arrived on the ground. They were followed by the 4th Surrey (Streatham) Rifles, under the command of Captain Eman, the 10th Rifles being already on the ground. A troop of the Surrey Mounted Rifles was also present. The Volunteers numbered in all 800. Everything being in readiness, the Volunteers went through various evolutions, such as marching past in open column to slow and quick time, marching past by fours, forming into line, preparing to receive cavalry, &c. The inspection having lasted about two hours, they were formed into a hollow square and addressed in flattering terms by Colonel Lysons, and were dismissed.

19TH SURREY RIFLES.—On Sunday morning this corps assembled at their head-quarters, South Place, Kennington, and under the command of Lieutenant-Colonel W. Roupell, M.P., with Captain and Adjutant Truman, Captain Roupell, &c., accompanied by their band, marched to the church of St. Mary, Lambeth, where Divine Service was performed, and a most eloquent and impressive sermon preached by the Rev. J. Lingham, the rector. The sacred edifice was filled to overflowing, and hundreds were unable to obtain admission. At the conclusion of the service the regiment was marched back to quarters and dismissed. The muster was about 250 rank and file.

SUSSEX.

The Duke of Richmond, Lord Lieutenant of Sussex, reviewed the Chichester, Westbourne, and Bognor Volunteer Rifle Corps on Monday last at Goodwood. The different companies having assembled on the lawn in front of the mansion, the Duke devoted a considerable period to an inspection of their evolutions. At the conclusion of the manœuvres His Grace congratulated them on the progress they had made in their drill and exercise. The Duchess of Richmond, the Countess of Bessborough, Lord and Lady Cecilia Bingham, and Dr. Hare were present. The Duke and Duchess received both officers and volunteers at a *déjeuner*, which was served up in the large ball-room of the mansion.

YORKSHIRE.

THE SKIPTON AND NORTH CRAVEN, with a detachment of the Ingleton Rifle Corps, forming part of the 2nd battalion of West Riding of Yorkshire Rifle Volunteers, assembled on the 2nd inst. at Malham Tarn, near Settle, to shoot for a silver bugle, to be held by the winning corps. The conditions of the match were that the five best shots of each corps should fire five rounds each man, at a regulation target of 6 feet by 4 feet, standing, at 200 yards, and five rounds at a target of 6 feet by 8 feet, kneeling, at 400 yards, the weapon to be the long Enfield rifle, with Government cartridge, the firing to be conducted according to the rules of the School of Musketry at Hythe. The shooting took place during a storm of wind and rain, which rendered it impossible to make good practice. The prize was won by

Digitized by Google

the North Craven Rifle Corps, whose representatives made 39 points—viz., 17 at 200 yards, and 22 at 400 yards; Skipton being second, and Ingleton third. Captain Thompson, of the Guiseley Rifle Corps, acted as umpire.

LEEDS.—Another artisan company, consisting of persons in the employment of Messrs. Greenwood and Batley, of the Albion Foundry, has been added to the Leeds Volunteer Rifle Corps, and the officers for it were selected on Saturday last. The formation of a Volunteer Artillery Corps is making considerable progress in Leeds. The corps is entitled the First West Volunteer Artillery, and already numbers nearly 150 members, about 80 of whom took the oath of allegiance to Her Majesty yesterday, in the presence of the Rev. J. A. Rhodes and Mr. F. Darwin, justices of the peace for the West Riding. Mr. Rhodes afterwards suitably addressed them. Captain R. D. Chamberlain, the captain of the corps (and formerly of the 4th West York Militia), spoke in high terms of the perseverance at the drill which the members manifested.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, AUGUST 7.

Kent Rifle Volunteers—26th Corps, 2d Battalion—William Henry Kebbel, Esq., to be Adjutant, from the 25th of June.

7th Company of Dumfriesshire Volunteer Rifle Corps—Hugh Dobie, Esq., to be Lieutenant, vice Church, resigned; William Johnstone Carlyle, Esq., to be Ensign, vice Dobie, promoted.

Memorandum—The Queen has been graciously pleased to accept of the resignation of the commission held by Lieutenant James Church in this corps.

4th Middlesex Rifle Volunteer Corps—Alfred Blackmore Camplin, Gent., to be Ensign.

12th Company of Cheshire Rifle Volunteers—James Watson, jun., Gent., to be Ensign, vice Robinson, resigned.

3d West Riding of Yorkshire Rifle Volunteers (Bradford)—The Rev. John Burnet, LL.D., Vicar of Bradford, to be Chaplain; John Little McMichan, Esq., to be Surgeon.

7th West Riding of Yorkshire Rifle Volunteers (Leeds)—Thomas Pridgin Teale, jun., Esq., to be Surgeon.

WAR OFFICE, PALL MALL, AUGUST 10.

45th Lancashire Rifle Volunteers—Ensign Thomas Henry Bowen to be Captain; Frederick William Promoli, Gent., to be Lieutenant, vice Bowen, promoted.

49th Lancashire Rifle Volunteers—John Webb Watkins, M.D., to be Honorary Assistant-Surgeon.

1st Battalion Cinque Ports Artillery Volunteers—G. M. Scholy, Second Lieutenant, to be First Lieutenant, vice Tyssen, resigned; John Clark, Esq., to be Second Lieutenant, vice Scholy, promoted.

London Rifle Volunteer Brigade—Major Vere Henry Close to be Lieutenant-Colonel; Captain William Anderson Rose to be Major, vice Vere Henry Close, promoted.

6th Norfolk Rifle Volunteer Corps—Lieutenant William Henry Scott to be Captain; Ensign Harold Augustus Ernuin to be Lieutenant, vice Scott, promoted; Thomas Robert Evans, Gent., to be Ensign, vice Ernuin, promoted: Frederick Parsons Smith, Gent., to be Honorary Assistant-Surgeon; Edmund Telfer Yates, Clerk, to be Honorary Chaplain.

Leicestershire Volunteer Rifles—6th Company—John Henry Eddowes to be Lieutenant; Isaac Blunt Dobell to be Ensign; William Grines Palmer to be Honorary Assistant-Surgeon.

4th Buckinghamshire Rifle Volunteers—Acton Tindal, Esq., to be Lieutenant.

Northamptonshire Rifle Volunteers—The Right Honourable Henry William FitzRoy, commonly called Earl of Euston, to be Lieutenant-Colonel of the several Corps.

East York Rifle Volunteers—10th Company—Lieutenant John Joseph Thorney to be Captain; Edward Lucas, Esq., to be Lieutenant; Gilbert Wilkinson, Esq., to be Ensign; Frank Wood Casson, Esq., to be Honorary Assistant-Surgeon.

7th Monmouthshire Rifle Volunteer Corps—Robert Burgess Sayer, Gent., to be Lieutenant.

Her Majesty has been graciously pleased to accept the resignation of the Commission held by Lieutenant John Phillpotts.

1st Gloucestershire Artillery Volunteer Corps—Francis Poole Lansdown, Gent., to be Assistant-Surgeon.

14th Gloucestershire Rifle Volunteers—Major Hugh Kennedy, late of the Royal Marine Light Infantry, to be Lieutenant; William Gardner, Gent., to be Ensign; Thomas James Cottle, Gent., to be Honorary Assistant-Surgeon.

18th Hampshire Rifle Volunteer Corps—Thomas Harvey, Esq., to be Captain.

10th, 11th, and 12th Dorsetshire Rifle Volunteers—The Rev. David Wauchope, Clerk, to be Honorary Chaplain.

Erratum.—11th Dorsetshire Rifle Volunteers—Robert Sadler Freame, Esq., to be Lieutenant, and not Ensign, as stated in the *Gazette* of the 13th July last.

Kent Rifle Volunteers—4th Corps—1st Battalion—George Hudson, Gent., to be Ensign, vice Butler, promoted; Augustus Allinson, Gent., to be Honorary Assistant-Surgeon.

Kent Artillery Volunteers—1st Brigade—The 1st, 2nd, 4th, 5th, 9th, 11th, 12th, and 13th Kent Artillery Volunteer Corps have been formed into a Brigade for drill and administrative purposes, and which is numbered as the 1st Administrative Brigade. The several Corps composing such Brigade will retain their present numbers and designations.

West Middlesex Rifle Volunteer Corps—Lieutenant John William Bridgman to be Captain, vice Oliphant, resigned.

36th Middlesex Rifle Volunteer Corps—Ensign Thomas Henry Baylis to be Lieutenant; Joshua Bird Allen, Gent., to be Ensign, vice Baylis, promoted; Edward Pitt Bisshopp Smith, Gent., to be Ensign.

39th Middlesex Rifle Volunteer Corps—Assistant-Surgeon George Carrick Steet to be Surgeon.

Memorandum.—4th and 8th Middlesex Rifle Volunteer Corps—Her Majesty has been graciously pleased to approve the amalgamation of these Companies into one Corps, which is numbered 4, in the county of Middlesex.

Civil Service Corps of Rifle Volunteers—The Reverend Charles Kingsley, M.A., to be Honorary Chaplain.

London Irish Rifle Volunteer Corps—Henry Valentine Edmonds, Gent., to be Ensign.

5th Company of Ayrshire Artillery Volunteers—Reverend Daniel Thomson to be Honorary Chaplain; Alexander Marshall, M.D., to be Honorary Assistant-Surgeon.

1st Company of Ayrshire Artillery Volunteers—Reverend James Sommerville to be Honorary Chaplain.

1st Administrative Battalion of Suffolk Rifle Volunteers, consisting of the 6th, 10th, 11th, 13th, and 16th Companies—James Hamilton Lloyd Anstruther, Esq., to be Lieutenant-Colonel.

13th Suffolk Rifle Volunteers—Captain Fuller Maitland Wilson to be Captain-Commandant; Lieutenant John South Phillips to be Captain, vice Wilson, promoted; Ensign George Anthony Partridge to be Lieutenant, vice Phillips, promoted; Frederick Aston Oakes, Gent., to be Ensign, vice Partridge, promoted; Edward May Dewing, Gent., to be Lieutenant; Charles Walsham, Gent., to be Ensign.

14th Lanarkshire Artillery Volunteers—Ebenezer Walker Henry, Esq., to be Captain; James Aitken, Gent., to be First Lieutenant.

4th Administrative Battalion of Lanarkshire Rifle Volunteers, consisting of the 30th, 31st, 38th, 45th, 46th, 47th, 75th, and 84th Corps—Captain Alexander Crum Ewing (of 30th Corps) to be Major; Robert Telfer Corbett, Esq., M.D., to be Surgeon; Robert Perry, Esq., M.D., to be Assistant-Surgeon; The Reverend Robert Gillan, D.D., to be Honorary Chaplain.

19th Lanarkshire Rifle Volunteers—George Knight, Esq., to be Captain, vice Moncrieff Mitchell, resigned.

26th Lanarkshire Rifle Volunteers—Ensign John Dowall to be Lieutenant, vice James Mc Intyre, resigned; Henry Brock, Gent., to be Ensign, vice Dowall, promoted.

61st Lanarkshire Rifle Volunteers—Lieutenant George Munro Kerr to be Captain, vice Hugh Reid, resigned.

1st Kirkcudbrightshire Rifle Volunteers—Lieutenant George Hamilton to be Captain, vice Laurie, promoted; Ensign David Tennant to be Lieutenant, vice Hamilton, promoted; Thomas Rainsford McLellan, Gent., to be Ensign.

5th Aberdeenshire Artillery Volunteers—Alexander Cruicksbank Grieve to be Honorary Assistant-Surgeon.

3rd [Kincardineshire Artillery Volunteers (St. Cyrus)—David Kinnear, Gent., to be First Lieutenant; James Adamson, Gent., to be Second Lieutenant.

Renfrewshire Rifle Volunteers—3rd Battalion, consisting of the 4th, 7th, 8th, 16th, 19th, 21st, and 23rd Companies, formed into a Battalion for administrative purposes. Captain John Graham, of the 7th Company to be Lieutenant-Colonel.

Staffordshire Rifle Volunteer Corps—2nd Battalion—21st Company—The Reverend Edward Rogers Pitman, Clerk, to be Honorary Chaplain; Charles Lawrence Edwardes, Gent., to be Honorary Assistant-Surgeon.

The following Appointment is substituted for that which appeared in the *Gazette* of Tuesday the 7th instant.

Staffordshire Rifle Volunteer Corps—3rd Battalion—15th Company—William Lascelles Norris, Esq., to be Honorary Assistant-Surgeon.

1st Battalion Warwickshire Rifle Volunteers (Birmingham)—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Lieutenant-Colonel William Sanders.

PRESTON ARTILLERY VOLUNTEER CORPS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Will you allow me to occupy a few lines of your space to state that an Artillery Volunteer Corps is now being raised in Preston? My reason for requesting this favour from you is because within the range of your circulation there are now resident many natives of Preston who, there is little doubt, would gladly contribute to an object like this, connected with their native town, were they aware of its having been commenced. We are now raising a fund for the establishment of an Artillery Volunteer corps here, and if distant Prestonians will assist us, any contribution to our funds will be very gladly received. I am, &c.,

ROBERT CLARKE, Hon. Sec.

THE PROPOSED VOLUNTEER REVIEW AT KNOWSLEY PARK.—A letter from the Earl of Derby upon the subject of this great Volunteer demonstration, which is to take place on the 1st of September next, was read at the meeting of the Liverpool Town Council on Wednesday, and a resolution proposed that the Volunteers in the employ of the corporation should be granted a holiday on the occasion. Mr. R. Gladstone, brother to the Chancellor of the Exchequer, vehemently opposed the motion, and during the course of a long speech, took occasion to criticise, with great severity, the Volunteer movement, its importance and character. He said that the anticipations of a French invasion were as groundless now as ever they were; that exchange of commodities was the best guarantee of peace; that the Volunteer armament would defeat the very object it professed to accomplish, and that the whole affair was an exhibition of ridiculous personal vanity. Mr. Gladstone's remarks were answered by several members, Mr. Bramley Moore, amongst others, contending that the movement was patriotic and honourable, and that it had, in a great measure, tended to preserve England from foreign attacks. He was quite as much in favour of exchange of commodities as Mr. Gladstone or any one else, but he did not undervalue the importance of the Volunteer movement.

VOLUNTEER REVIEW AND SHAM FIGHT IN ESSEX.—The Volunteers of Essex mustered in force on Saturday at Hylands Park, the demesne of Mr. Pryor, near Chelmsford, and under the command of Colonel Palmer passed in review before General Wood and his staff. They then engaged in conflict with an imaginary foe, whom they dislodged from position after position, until they finally drove him off the field, and were gladdened by finding the result of their martial daring celebrated in triumphant strains. The first troops upon the ground were the West Essex Yeomanry Cavalry, and the Essex Yeomanry Artillery. These were soon followed by the Chelmsford and Braintree corps. The other troops upon the ground were the corps of Colchester, Witham, Dagenham, Brentwood, Romford, Tower Hamlets, the Victoria Rifles, Artillery Company, and some few soldiers of the West Essex Militia. As these men were drawn out in line—the cavalry, flanked by the artillery, being upon either wing—the *coup d'œil* was very imposing. But still more so was their march as, first in fours, and subsequently in close columns, they passed in review before the general and his staff. These manœuvres constituted the review, and, these over, the sham fight, the expectation of which had brought fully 12,000 people upon the ground, commenced. The battle was opened by some of the West Essex Militia advancing from a wood upon the advancing foe, and the noise of their firing quickly brought the rest of the force into action. The cavalry, in detached parties, scoured the extremities of the demesne, firing upon the enemy lurking in the wood. The artillery came quickly to their assistance, and, by a well-sustained cannonade, dislodged their opponents from their strongest position. The Victoria Rifles and the Artillery Company then threw forward a body of skirmishers, who pressed the retreating foe until he took up a fresh position, formidable enough, but still not quite so terrible as that from which he had been a short time before driven with loss. An order to lie down, promptly obeyed, was now passed to the skirmishing troops, and the general body of the force went into action, while the artillery, again brought into play, completely turned the flank of their antagonists. While this manœuvre was being executed, it became evident that a large portion of the hostile troops were lodged in the entrenched plantations, and as the victory, now almost achieved, was in jeopardy so long as they held such strongly fortified positions—from under shelter of the trees they were supposed to be pouring a murderous fire upon the Tower Hamlets, Witham, and Braintree corps—a strong body of the Chelmsford, Colchester, and Brentwood companies was ordered to drive them from these positions, an order which they gallantly executed. Beaten on all sides, the enemy determined to make one last stand, so as to keep open his communications with the town of Chelmsford; but defeat had already demoralised his forces, and they fled like chaff before the wind when the Braintree corps charged them at the point of the bayonet. Such is a brief outline of the engagement of Saturday, in which the 3000 men who were on the ground behaved admirably.

THE UNIFORM OF THE SICILIAN ARMY.—The *Nazione* gives us a few particulars respecting the uniform of the Sicilian army, which is novel enough. With the exception of the engineers and the artillery, who are attired as in Piedmont, the other troops offer a singular spectacle. Those of the line wear a red tunic and cap, and trowsers of brown holland. The Cacciatori of the Alps have red tunics and Calabrian hats with black feathers. The Cacciatori of Etna wear deep coffee-coloured blouses, red caps, and trowsers of unbleached canvas. The "Sons of Liberty" have on white jackets and trowsers, and red Suliote caps trimmed with white. The cavalry are in red tunics with blue facings, red and green caps trimmed with silver lace; their trowsers are wide and tucked up like the Turkish ones were formerly. All the battalions are supplied with good and full bands.

According to the latest accounts, the English and French ambassadors had arrived safely at Singapore. It seems that the 11th Regiment of Sikhs has now received orders to proceed forthwith to China. This regiment, which is one of the finest in the service, had been astounded, on reaching Singapore, to find orders to disembark, and to proceed no further. The Sikhs did not like this, the more so as no explanations had been given, and great satisfaction has been caused by the conduct of Lord Elgin, who has requested the governor to forward this regiment to China by the first opportunity. The Chinese are extravagantly inflated with their success of last year, and it will obviously be necessary to strike a severe blow, in order to avoid any repetition of these unhappy wars.

On Tuesday evening a large and influential meeting was held in the Lecture Hall, Wimbledon, with a view of eliciting the opinions of the inhabitants as to the retention or otherwise of the butts on Wimbledon Common, which had been used in the late shooting matches of the National Rifle Association. It being pretty well understood that the leading gentry of the neighbourhood were in favour of the removal of the butts, while the middle-class men were known to be equally strong in the opinion that they ought to be retained, a great deal of discussion was anticipated, and it was generally predicted that the meeting would be of a very stormy character. But these expectations were not realised, and resolutions in favour of the removal of the butts were carried without a dissentient voice.

We have already recorded the principal appointments to the Staff of the China expedition. By the last mail we learn that the following additional ones have been made:—Major Pownall, 1st battalion 3rd Foot, to be a member of the allied commission at Canton; Lieutenant Steer, 2nd battalion of Royals, to be aide-de-camp to the Governor of Hong Kong; Lieutenant Perreau, 47th Bengal N.I., to be deputy assistant-commissary-general; Lieutenant Moorsom, Royal Artillery, to be fire-master and inspector of stores; Lieutenant Howarth, 44th Foot, Ensigns Butler, 31st Foot, and Treeve, 3rd battalion 60th Rifles, to the Coolie Corps; Major Cooper, 1st battalion Military Train, to command horse-transport service; Lieutenants Bannerman, 3rd Bombay N.I., J. Ramsay, 5th Bombay N.I., and N. J. Murray, 21st Madras N.I., to the same corps.

Mr. Gibbs, late military storekeeper at Edinburgh, has relieved Major Agnew of his charge of the powder magazines at Tipnor, near Portsmouth, after a service there of more than 40 years. The gallant major embarked from Portsmouth in 1808 for the Peninsula, and after following the late Duke of Wellington through some of his greatest battles, lost his leg at Vittoria, in 1813, and was subsequently appointed by the Duke to the post he has filled for so long a time.

[ADVERTISEMENT.]—RIFLEWOMEN.—A SPIRITED ILLUSTRATION OF A GROUP OF LADY VOLUNTEERS, in full uniform, is given in THIS DAY'S LADY'S NEWSPAPER AND PICTORIAL TIMES. Price 6d. stamped. May be had through all Newsagents, or direct from the Publisher, W. J. JOHNSON, 83, Fleet Street, London, E.C., on receipt of Six Postage Stamps.

THE ARMY AND NAVY GAZETTE
AND
JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription to the paper is 6*s.* 6*d.* per quarter, or 26*s.* per annum, payable in advance; and the postage—uniformly 1*d.* in the United Kingdom, but which if forwarded abroad varies according to the route and destination—must in all cases be added to the remittance. All Editorial Communications should be addressed to W. H. RUSSELL, Esq., and business letters and advertisements should be addressed to ARCHIBALD GRAHAM, to whom Post-office orders, &c., are payable. Advertisements received up to Thursday Evening. The Paper is published every Saturday in time for the Morning Mails.
Office, 16, Wellington Street, Strand, London, W.C.

WILLIAM O. MITCHELL,
MILITARY BOOKSELLER AND PUBLISHER,
39, CHARING CROSS, LONDON, S.W.
Catalogues sent on application.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*
Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C.
Established 1749.

MILITARY GENTLEMEN AND OTHERS who are not satisfied with the fit and make of their TROWSERS, are respectfully invited to call on or send to ELSTOB, who for many years has practised the cut and make of the garment exclusively. For comfort and first-rate fit in Breeches or Trowsers, ELSTOB, of 12, Avery Row, Brook Street, Bond Street, W., is not excelled by any House in London. His MATERIALS are GOOD, and his CHARGES MODERATE. Every description of KNICKERBOCKER BREECHES and TROWSERS, BELTS or DRAWERS, made to any pattern or style.—ELSTOB, 12, Avery Row, Brook Street, New Bond Street, W., Inventor and Maker of the Melton Hunting and Riding Belt.

DAY'S PATENT CHAIR-BED, a perfect combination of Easy Chair, Couch, and Bedstead, adaptable to either purpose by one simple motion, without screw, nut, rack, or complication of any description. An illustrated and descriptive circular for one stamp. W. DAY & SON, Portmanteau Manufacturers and Military Outfitters, 353 and 378, Strand, London, W.C.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

RIFLE & ARTILLERY DUTY-BUGLES, TRUMPETS, &c.—Volunteer Corps are respectfully informed that the patterns approved by Her Majesty's War Department can now be had of the Makers, Messrs. RUDALL, ROSE, CARTE, & CO. Price, with Lines and Tassels complete, TWO GUINEAS.
SILVER BUGLES, for Presentation, from TWENTY GUINEAS.
ELECTRO-PLATED BUGLES, in Case, FOUR GUINEAS.
BUGLE and TRUMPET-MAJOR DUTY-BOOKS, 3*s.* each, giving instructions, and all the regulation sounds.
DRUM MAJOR DUTY-BOOK, 4*s.* FIFE-MAJOR DUTY-BOOK, 3*s.*
PERCIVAL HUNTING HORNS in Copper and Sterling Silver.
RUDALL & CO.'S PRICE LIST, with Guide for the Formation of Bands, and Corps of Flutes and Drums, and Estimates of Cost, sent free per post.
Military Musical Instrument Manufactory, 20, Charing Cross, London, S.W.

NOTICES TO CORRESPONDENTS.

The Correspondent who writes to say that we are in error respecting the Cavalry depôt at Maidstone is himself in error. The depôts at Maidstone are three, viz., the Carabiniers, Inniskilling Dragoons, and 17th Lancers; those at Canterbury are six: the 1st, 2nd, 3rd and 7th Dragoon Guards, and the 7th and 8th Hussars. We cannot at all agree with him in thinking there will be but one Cavalry depôt, considering the very limited accommodation at Maidstone.

CONSTANT READER.—We should say that 21 years in the ranks, and 3 years commissioned, does not give a right to go on half-pay, but it entitles a subaltern of that standing to receive the full value of his commission.

A VOLUNTEER.—The maximum age for a commission in the Cavalry is now 25 years.

In our last number the Rifle contest at *Lytham* was inadvertently headed "Rifle Shooting at Preston."

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the EDITOR cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the EDITOR.

It is particularly requested that applications for copies of the ARMY AND NAVY GAZETTE, &c., and advertisements be sent to the Publisher, Mr. Archibald Graham, and not to the EDITOR.

Army & Navy Gazette.

LONDON, SATURDAY, AUGUST 11, 1860.

All the world now knows that the new Naval Discipline Bill, as amended by a Select Committee of the House of Lords, has passed that branch of the Legislature. The *Times*' article of Wednesday last must have created a fearful sensation on the subject. We suspected that our leading contemporary had omitted some *ifs* and *ors* in its startling Black List of offences punishable by "DEATH"; and we are glad that we are able to assure the general public that the bill is not quite so Draconian or "iron," as brilliant rhetoric painted it. Perhaps some martinets will regret this; and it may be the article was indited in good nature on behalf of the discipline of the fleet; for we have recently gathered many naval opinions on this subject during a pleasant cruise round and about Portsmouth and the Isle of Wight, where we have heard that the only effectual penalty that has moral force upon the idiosyncrasy of a sailor, is "hanging by the yard-arm," or the "DEATH, DEATH, DEATH!" of the *Times!* Really we wish that people would consider that "sailors," after all, are men of like passions with ourselves. We had recently propounded in our columns a theory of improving the *morale* of the sailor by merely keeping him well supplied with pocket-money; and now we hear that the terror of death hanging over them is the only moral force to penetrate blue jackets! We are afraid all evidence is against both nostrums. At all events, though we need not deny that nautical minds have a logic of their own, surely Jack is not such a fool as to believe in daylight "bogies." Between two and three thousand men desert annually from the Navy, and hundreds of them are apprehended, but none of them ever hanged. Yet in the leading journal we are informed that the mild Duke of Somerset's new "iron Act" has only this punishment for "desertion—DEATH."

The fact is, that in the Articles of War contained in the Naval Discipline Bill, there are only three crimes for which the punishment of "death without alternative" is awarded. First, for failing to fight, or surrendering to the enemy when capable of resistance; second, for failing to pursue the enemy or aid an ally; and third, for disobedience to command, and all "in presence of the enemy." But even in these cases "death" is only awarded IF the offender "has acted traitorously." If not, the punishment may be imprisonment or dismissal from the Service, or some minor punishment. Desertion is only punishable by death if it be "desertion to the enemy," and even then it is "death, penal servitude, *or*" some minor punishment. Even "traitorous correspondence" with the enemy is not punishable absolutely by death, but "death *or*" some other punishment. Indeed, the enactments are far from being over-rigorous; and we are glad of it, for we believe that the law of mutual kindness and interest would best secure the thorough discipline of the Royal Navy. We are glad that the *Times* wound up the leader we refer to with almost the same words with which we closed our article on Naval Discipline in the GAZETTE of 21st of July, namely, that the Navy will not be all we would wish "till we clear out the blackguards from the Service, *and till dismissal from a Queen's ship is viewed by the British seaman as his greatest misfortune, and a punishment he dreads.*"

In the GAZETTE of the 16th ult. we pointed out some strange oversights in the bill as originally prepared; the most glaring of which was its excluding "petty officers" from the category of officers in the interpretation clause, and thus preventing the operation of those clauses which the Duke of Somerset stated had been introduced for the main purpose of giving protection to petty officers. This has been remedied in the Revised Bill, but in a somewhat peculiar manner. Now, as before, "officer" shall "include a subordinate and a warrant officer, but shall not extend to petty officers"; but a new interpretation clause is added that "'superior officer' shall include petty officers"! This is elevating the petty officer even beyond Lieut. Stewart's aspirations. But we must not be merely critical. Upon glancing at the clauses of the bill in which the words "superior officer" occur, we are now satisfied that a "petty officer" cannot any longer, when he goes ashore, get a black eye from some blackguard he has trounced, without a remedy.

There are many other minor alterations and some improvements in the Revised Bill, bearing evidence of the Duke of Somerset's anxiety to make it perfect, but also woeful evidence of the carelessness with which it was originally drawn. There are still in it marks of culpable oversight, which we have discovered in the mere hurried glance we have been able to give it. We had no wish to notice such points at all; but one cannot help it when we find for instance, that in Clause IV., while all about "arrears of wages" has been struck out of the enactment itself, it has been allowed still to remain in the marginal heading. A strange omission also occurs in the new bill, for which we cannot imagine the reason. The "definition of mutiny" (which was rather stiff in the original bill) is now omitted altogether. We know there were differences of opinion whether the disturbances on board the Princess Royal, Edgar, &c., were mutinies, or vulgar rows; but we were told that one special merit of the new bill was to call a spade a spade, and give offences their real names and penalties. But this is really a question for the lawyers. We cannot help thinking, however, there will be an awkwardness in not knowing what "mutiny" is, when a man comes to be tried under the new Act. There is time, even yet, to set this matter right in the Commons. But have the Admiralty "heads" all gone out of town already? We find also that the offence of "striking a superior officer" is removed from the heading "insubordination" to that of "mutiny"; so that giving a petty officer ("included in superior officers") a black eye on shore may now be "construed" as "mutiny" owing to the vagueness of this "Amended Bill"! The clause relating to "disobedience to officers' commands" in the original bill is now omitted from the Revised Bill altogether; whether intentionally, or through the "cumbrous uncertainty" of the "Board machinery," we do not know. One curious enactment is, that "absence without leave" is to be considered as a crime, "notwithstanding it may not have been voluntary"! But the mulct for the offence is reduced from 1*l.* or 3*l.*, which we believe has long been the fine for "straggling," or "deserting," to two days' pay after ten weeks' absence, and six days' pay additional after every additional 25 hours' absence without leave. The imprisonment for desertion is also altered from six months to three, and for straggling from ten weeks to six in the bill as amended.

There are many other points which really require to be noticed in the Amended Bill, which, however, we are compelled to defer till next week. But we hope that it will be properly amended in Committee in the Lower House, and that we may be saved such an invidious task. These blemishes are attributable, not to the Duke of Somerset, but to those who have been entrusted with the details; and we should gladly have limited our remarks to the essential alteration and improvements in Naval Discipline which the bill is intended to effect.

The North has nobly done its part in the Great National Defensive Movement; and the account which it gave of itself to Her Majesty at Edinburgh on Tuesday last may well make Old Scotland proud again. As a picturesque display it was beyond all comparison with our Southern parade on the tame, unvaried plain of Hyde Park, which in point of effectiveness yielded in anticipation to a gathering of the clans amid the romantic beauties surrounding the Modern Athens. To the superiority of the Scottish display in this respect we were at once ready to submit, but its superiority in another way we were not equally prepared to anticipate. Greatly to the credit of our northern fellow-countrymen, and we fear a little to our own discredit, the number of Volunteers before the Queen at Edinburgh exceeded the gathering of all England in Hyde Park on the 23rd of June last. The official statement on that occasion showed that 20,890 Volunteers of all ranks marched past the Queen. At Edinburgh a similar document registered 21,514, but we have the best reason for knowing that some 300 men who were present were not included in the official list; and thus it happens that the Scotch "gathering of the Clans" was nearly one thousand more numerous than that which took place in the most populous city in the world in June last.

In every respect our Scotch brethren had a right to feel pride in presenting such a spectacle to their Sovereign—pride in their numbers, pride in the place where they were congregated, pride in the success of the day, untinged by a single cause for regret. It was a magnificent spectacle, with the heights towering above the plain covered with countless multitudes, clustered together like great swarms of bees, and giving out every now and again a hoarse hum, meant to be a cheer, for their Queen and the brave men who marched before her in stalwart pride.

But the Northerns had another reason to feel proud which we had not. The superintendence and arrangement and success of the whole display were in the hands of a countryman of their own, and, looking to the difficulty of his task, the total absence of failure was something marvellous. The ground was irregular to a degree, and could scarcely have been more unfavourably contrived for military movements. With sharp slopes and knolls, the ground actually covered by the troops was all that was really available, and how such immense masses were moved in such a space was quite a strategical puzzle. In another respect difficulties existed which did not present themselves in Hyde Park. Most of the regiments had never seen each other or the commanding officers before. They could not have done much in the way of rehearsal; and the railway companies did not exhibit very laudable punctuality in bringing the Volunteers up to time; whereas in Hyde Park, many of the corps belonging to the immediate neighbourhood of London had been acting together, more or less, during the winter and spring, and there was no ground of complaint against even the Eastern Counties as regards time. Nevertheless, in Colonel M'Murdo's hands difficulties seemed only to exist to be overcome; and everything passed off to the high satisfaction of the Queen, and the great credit of all concerned in one of the most magnificent demonstrations of our time.

We live in an age of progress. The novelty of to-day so rapidly supersedes that of yesterday that he is a safe prophet who predicts that to-morrow's discovery will supersede its predecessor. We are scarcely familiarised with the power of the Whitworth gun before we are promised a shield to protect our ships from its terrific force. The invention we are about to describe is applicable to the construction of ships of war which are required to be invulnerable, or nearly so; and during the past week the principle has been severely tested at Portsmouth by the most powerful ordnance known, under the able direction of Captain Hewlett, C.B., of the Excellent, gunnery-ship, at that

Digitized by Google

port. Before proceeding to narrate the experiments, it is necessary to describe the principle of the angulated plate, of which Mr. Josiah Jones, junior, of Liverpool, is the patentee. A ship built upon the inventor's plan differs from all vessels hitherto attempted to be made shot-proof, inasmuch as its sides are inclined at an angle of about 45°, while the sides of the floating-batteries up to the present time have been nearly vertical. The inventor proposes to give an angle to the sides of a ship, and covering the frame with protecting plates of metal, and by this means to divert the shot and prevent its penetrating the vessel's side. The angle of inclination being alike both above and below the water line of flotation, a shot striking any part is diverted, and rendered harmless to those aboard; and as the two angles unite at the line of flotation, where they form an apex of increased strength, a vessel so constructed might be used as a "ram" for running down ships, if required. When we remember that the plates of all vertical floating batteries have been penetrated over and over again by the same description of gun as that fired at the "angulated plates," we shall have said all that is required to prepare the reader for the scientific triumph achieved by the inventor and patentee.

The target practised upon at Portsmouth measured 13 feet by 9, and was composed of four plates—one of 4½ inch soft steel, one of 3½ inch soft steel, and two of 4½ inch iron, but of different manufactures. The plates were supported by timber of great strength, but being made of deal, did not afford that backing up to the plates that would be given to them by the scantling of a ship of war of moderate dimensions, which would be not only thicker, but be constructed of much harder wood. Each plate was divided into 8 squares, making 32 small compartments altogether. The gun used was an 8 inch smooth bore; the shot a solid 68-pounder; the powder was full-service charge; and the range 195 yards. The Arctic brig Griper served as a float, upon which the target was fixed, and being lashed alongside the Sirius target-ship, the Stork gun-boat took up a position at the close quarters before mentioned, and the firing commenced.

We have been thus circumstantial because the results have been extraordinary. The first shot was directed against one of the 4½ inch iron plates, and struck full and fair, but without penetrating; the shot, contrary to all expectation, flying into fragments, leaving the plate comparatively in a shower of splinters. The second and third shots were also directed against and struck the same plate, and nearly in the same spot, with similar results. The fourth shot missed the target, but struck the framework, and damaged it materially. The fifth shot was pertinaciously directed against the same plate; but the missile was shattered into fragments, which flew up and carried away a portion of the railing of the old Sirius. The sixth, seventh, eighth, and ninth shots were all aimed at and struck the same plate with similar results, the shots being shattered, and the plate, although severely hammered, still shot-proof, and capable of offering resistance to the heavy shot hurled against it.

The experiments ended at this stage of the proceedings, but were resumed on Monday, when the tenth shot was directed against that portion of the plate that had been previously battered, but the blow was struck at the junction of the two iron plates. The next shot hit the plate where it had been so repeatedly assailed, but the shot flew into fragments, while the plate, from the repeated hammering exhibited an appearance of beginning to spread out. And it must be remembered that this appearance was quite natural, for after being struck so continuously in the same place the effect produced was to reduce the thickness of the iron so that in the course of time a 4½-inch plate may be beat down to two, or even one inch. Nevertheless the next shot was again directed against the old spot, with no other apparent effect than producing a white metallic lustrous look, and shattering the shot to fragments. The next shot had the effect of causing the upper edge of the plate to spread out, and to lose the original straight outline. Another shot at the same spot with similar results. The next shot at this plate was driven against the most crippled section of the plate, and although it is difficult to over-estimate the accuracy of the fire, yet it was by no means so remarkable as the extraordinary tenacity of the plate, or the correctness of the principle of the invention. The last shot struck in the same spot, and the shot flew into fragments, and carried away the planking and railing of the frigate. Further practice at this plate was discontinued for the day, after having broken every 68-pounder shot fired against it, without being penetrated in any part; not a splinter passed through, and had a man been stationed behind it he would have been protected. We believe this is the most severe trial that any plate has ever sustained. The firing on the following day was directed against the 3½ inch soft steel plate, and struck it on its extreme upper edge, which was not considered a fair blow, for it follows as a mechanical result that the plate so struck must be chipped. The next missile, however, struck the soft steel plate full and fair, and again proved the correct principle of the invention, for the plate showed only a slight indentation, while the shot flew into a thousand fragments, and carried away a portion of the chain-plate of the Sirius.

On Wednesday the firing was resumed, when two more shots were driven against the iron plate, which had been so severely tested before, the iron still holding out and smashing the shot. There were also three shots fired at each steel plate, but the general impression is that they did not stand so well as the iron. It should, however, be remembered that all steel plates, tested at Portsmouth, up to the present trial, have been broken up by the same gun fired against Jones's angulated ones, and their standing the trial they did is another proof of the soundness of the principle of the invention.

On Thursday the firing recommenced at the old plate, which had been already struck by 14 shots, when 3 more were directed against it, making 17 shots in all, with the same results, the plate still exhibiting an appearance of being able to sustain almost any amount of additional hammering. The average indentation of each shot is about an inch and a tenth.

To sum up the whole of the various trials during the past week, the success of the principle of the angulated plate has been proved beyond a doubt, and a ship, coated with Mr. Jones's armour, would be, for all practicable purposes, invulnerable.

The Report of the Committee appointed to inquire into the state of the gun-boats built during the Russian War, must be nearly ready for the public. We are enabled from personal observation to anticipate some portion of it. In order to enable the members of the Committee to make a thorough investigation of the quality of the wood employed by Messrs. Green, Pitcher, and the other builders of these vessels, the authorities had ordered that a plank above the "fillings" should be removed from each side of forty-seven gun-boats hauled up at Haslar; and it must be most gratifying, not only to the constructors themselves, but to the Comptroller of the Navy and the officers serving under him, that the result of a severe examination has been to prove that, with the exception of two, all these boats have been built in a faithful, workmanlike manner, in accordance with the terms of the different contracts. This is more than we could reasonably have expected, when we take into consideration the anxiety which prevailed in this country during the years 1854 and 1855, in reference to the construction of gun and mortar boats. The builders were at that time told to hurry on their work, and turn it out of hand with the best materials at command; and we cannot but help thinking that more noise has been made about the matter than the case warranted. The establishment at Haslar is in perfect order; and by the aid of additional cradles, which have been lately supplied, at least ten of the gun-boats could be launched per diem, and as the guns, shot, and other stores are ready on any emergency, however sudden, to be put on board, they could be sent to sea with an expedition that would surprise not only seamen of the old school, but those who pique themselves upon their modern education. The Superintendent subjects all the engines to a rigid inspection; and there is therefore no probability of any derangement being allowed to exist. The establishment has been visited by the Committee collectively and individually, and from what we have ourselves witnessed, we are satisfied they must have gone away impressed with a proper idea of the extreme regularity which prevailed throughout the whole of its branches. In order to show the vigilance which exists in the gun-boat department, we can state that the rottenness of the timbers and the presence of short bolts in the condemned craft were discovered on one of their ordinary inspections by the officials, and reported accordingly to the proper department, long before the subject was noticed in the newspapers.

We understand that the Commission, which has been sitting to settle the details of the arrangements under which the amalgamation of the Local Indian-European force with the Imperial Army will take place, have so far progressed in their deliberations that their report may be shortly expected to be made public. We do not believe that any very formidable difficulties presented themselves, notwithstanding the anticipations to the contrary which were indulged in when the fusion of two armies, whose systems possess so little in common, was at first proposed. It is certainly very desirable that, as soon as possible after the passing of the bill before Parliament, the officers affected by it should be made acquainted with the nature of their new position; and the Government deserve credit for arranging that the details should be settled contemporaneously with the passing of the Bill through Parliament. All branches of the Service are fairly and efficiently represented on the Commission, and we have no doubt that a proper and generous consideration will be shown to every interest involved.

In the *Morning Post*, of Thursday, we read the following statement:—

"We have received information from a quarter on which reliance may be placed, that the Ordnance Select Committee have sent in their report concerning the Whitworth guns. That report, we are given to understand is condemnatory. Mr. Whitworth's ordnance are stated to be ineligible for Her Majesty's service. Four causes of objection are said to be especially insisted upon—namely, great irregularity and uncertainty of range; difficulty of extracting the expended cartridge; danger to be apprehended from the launching rearwards of the friction tubes; wildness of the ricochet."

We have the best authority for saying that the question has not been referred to the Ordnance Select Committee; and that the statement quoted from our contemporary is entirely without foundation.

Some useful changes are being carried out in the arrangements for the inspection of the Volunteers. The old plan first adopted of apportioning the Assistant-Inspectors to the several military districts has very wisely been abandoned, and their distribution will henceforward be regulated by the population of the different localities. The staff of the department has also been increased. Lieut.-Colonel Erskine of the Military Train will be Deputy Inspector-General, and, in the absence of Colonel M'Murdo on duty, the business of the department will thus be provided for. Major Douglas Jones, late Aide-de-Camp to Lord Melville, has been appointed an Assistant-Inspector in the room of Major Eagar, just promoted to the 10th Depôt Battalion. Major Dick, late of the Military Train, has also been appointed an Assistant-Inspector, and three more will be speedily nominated.

It will be remembered that Colonel Lindsay, lately moved for a Select Committee of the House of Commons, to which was referred the claim to full pay of the seven Generals who went on half pay in 1826, upon the understanding that their position as Generals was not to be prejudiced thereby. The Committee we understand has made its report, entirely sustaining the claim of the officers in question, and recommending not only that their position should be restored, but that their arrears of back pay should be made good.

The colonelcy of the 14th Light Dragoons, vacant by the death of General the Hon. Sir Henry Murray, K.C.B., will be filled, as we intimated in our last number, by Major-General Allan T. Maclean. His seniority on the list, and his conspicuously distinguished war service in the Peninsula, at Waterloo, and in India, combine to render his appointment hardly a matter of choice on the part of the authorities. The colonelcy of the 11th Hussars has also become vacant by the death of General Sir Henry Wyndham, K.C.B. Lord Cardigan will be transferred from the 5th Dragoon Guards to the 11th, which he commanded so many years. We believe that in all probability Major-General Sir James Y. Scarlett will obtain the colonelcy of his old corps, the 5th Dragoon Guards; and no appointment could be more appropriate and deserved, than that by which the Commander of the Heavy Cavalry Brigade at Balaklava would again be placed at the head of his old companions in one of the most gallant and creditable feats of arms in which a British force was ever engaged.

The death of General Sir Henry Wyndham will cause another batch of promotions in the higher ranks of the Service, by which Lieut.-General William Jervois, Colonel of the 76th Regiment, becomes a General; Major-General the Honourable T. Ashburnham, C.B., Colonel of the 82nd Regiment, a Lieut.-General; and Colonel J. Longfield, C.B., late of the 8th Regiment, a Major-General. Lieut.-Colonels Donovan of the Cape Mounted Rifles, and Henry F. Ponsonby, of the Grenadier Guards, become Colonels; and Majors W. Pym Young, of the 65th Regiment, and J. Nugent, of the 36th Regiment, Lieut.-Colonels, in succession to Generals Murray and Wyndham. With reference to an observation in our last respecting the recent promotions to the rank of Colonel, a correspondent calls our attention to the fact, that Colonels Holcombe, 1st Royals, and Kelly, 47th, were each on half pay for eight months, and were thus ineligible up to the present for the rank of Colonel from the fact of their not having served five years on full pay as Lieut.-Colonels.

The Deputy Quartermaster-Generalship at the Horse Guards will shortly be vacant, in consequence of Colonel Gordon's time having expired. Colonel O'Brien, the Assistant Quartermaster-General, also relinquishes his appointment for the same reason.

Lieut.-Colonel C. S. E. E. Gordon, 23rd Fusiliers, lately Brigade-Major at Chatham, has been appointed Aide-de-Camp to Major-General Eyre, commanding that garrison.

The command of the troops in Ceylon is vacant, as we are sorry to learn Major-General Lockyer's state of health obliges him to return to England immediately.

The office of Assistant Adjutant-General to the division at Aldershot, which is vacant by the appointment of Colonel Stewart Wood, C.B., to the Deputy Inspector-Generalship of the Irish constabulary will, very probably, be filled by Lieut.-Colonel Hallewell, now Deputy Quartermaster-General at Malta, whose ability and experience on the staff very well qualify him for the exceedingly onerous duties at Aldershot.

THE COMMAND OF THE CHANNEL.*

We are always glad to welcome the writings of officers, whether of the Army or Navy, but especially when they are devoted to the discussion of important matters in connection with their immediate professions. We have, it is true, been somewhat busily engaged of late in running through a goodly number of pages, in which we have been enlightened as to the best modes how our shores should be protected, how an enemy should be prevented from landing, and how he should be dealt with if audacious enough to put *pied à terre;* but we are not satiated; on the contrary we can always turn with a keen appetite to the examination of any work when it emanates from the pen of an intelligent and experienced officer. We have just perused a small pamphlet from the pen of Lieut.-Col. Alexander, C.B., of the Royal Marine Artillery.

Colonel Alexander has served with distinction, and his opinions are therefore not to be lightly passed over. He advocates the maritime defence of England in preference to any other, and he does so, because he firmly believes that the command of the sea is the only secure basis upon which the safety of this country can be made to rest. He supposes that the decision which has been arrived at for building fortifications is founded upon the chance of our losing, by a combination of events, the command of the Channel, but he contends, if our ships are only adapted to contend with the new engines of destruction which science and ingenuity have introduced, we are better able to defend our shores than at any previous period of our history. We are in possession of an ordnance of tremendous power. We have means of exchanging intelligence with squadrons at a distance which our fathers would have looked upon as magical; and our author indeed most particularly alludes to the wondrous effects produced by Professor Way's electric light, which, from its extreme brilliancy, its simplicity, and the ease with which it can be adapted to telegraphic communication, must be invaluable to the commander of any squadron, where extreme vigilance will be called into existence. Colonel Alexander, without conceding to the iron-cased ships now building by ourselves and our neighbours a degree of perfection over other vessels that may be constructed, agrees that it has been absolutely necessary for us to possess ships of the kind, pending the invention of something better, so that we may successfully contend with any foe who may bring such armour-cased leviathans to bear against us. He takes into consideration the probability of our having to oppose two powers, the naval forces of which combined would be superior to our own, and he argues on this that after preparing for the defence of our colonies and our extended commerce, we should have a fleet large enough to meet that of the enemy in the "open," and still have a flotilla composed of vessels of a peculiar construction, propelled by steam only, and manned by a force which he terms the "Maritime Militia," the peculiar duty of which would be to guard our coasts. He states that in our steam three-deckers we have vessels possessing immense power and great speed; and it must be remembered that the description of duties which the vessels composing the flotilla will be called upon to perform, will permit of our dispensing with the aid of sails, and to our trusting entirely to steam for our motive-power. The advantages we gain by this are manifold; we get rid of a heavy weight aloft,—a vast amount of combustible stores below; there is less resistance to progress under steam, and our speed is proportionably increased; there are no tell-tale masts to betray our whereabout in action when our position would be otherwise concealed by smoke; and there is no danger of our screw being rendered useless by entanglement in the wreck of our rigging and fallen spars.

A screw three-decker cut down to the lower deck, fitted with shot-proof iron sides, and armed with breech-loading rifled cannon on the non-recoil principle, would answer well, and the expense of conversion would in a short time be more than covered by the saving which would be effected in masts, yards, rigging, and sails, and in the greatly reduced crews which would be required to man it.

The mechanical construction of such a vessel might probably be greatly improved upon, and curvilinear sides might be substituted with good effect for rectilinear ones; but these may be considered as matters of minor detail rather than points affecting the general principles at issue.

Colonel Alexander, like a sensible man, ever alive to passing events, touching upon his profession, alludes to the value of a patent lately taken out by Mr. Josiah Jones, of Liverpool, of which we have taken notice in another column. He asserts that Mr. Jones's plan is a great step in advance of anything that has yet been done in the way of armour casing, and it possesses the peculiar merit of endeavouring to obtain increased powers of resistance, by the application of principles derived from natural laws rather than by the mere augmentation of the resisting medium employed.

Here is the opinion of one who has thought profoundly on the subject he handles, and we therefore see no reason why it should not be equally favourably entertained by those in whom we have vested the power to construct "our national defences." Colonel Alexander proposes as his plan to have built twenty heavily-armed large vessels, and one hundred smaller ones—the latter carrying one gun, which, with the crew, might be protected by a shield, on the plan proposed by Captain Cowper Coles, R.N. This fleet he would distribute in the Downs, Portland, at Plymouth or Falmouth, and "a portion of our sea-going fleet would watch the movements of the enemy, while the main body would be held in readiness to follow him, in the event of his leaving port, in whatever direction he might sail." Colonel Alexander is certain that 11,000 men would be sufficient to man a flotilla of the kind; and we agree with him that, if it be decided we should have it, there would be no difficulty in this maritime country to find good crews wherewith to man it. We recommend a perusal of this little unpretending *brochure* to all who would wish to see England properly defended.

* *The Command of the Channel and the Safety of Our Shores.* By Lieut.-Col. Alexander, C.B., Royal Marine Artillery. (London: Bradbury & Evans, 11, Bouverie Street.)

STANDING ORDERS OF THE 13TH LIGHT INFANTRY.*

Lord Mark Kerr has published a revised edition of the Standing Orders of his regiment, and in doing so has produced a code of instructions, which may be profitably perused by others than those for whom it is immediately intended.

Standing Orders are usually very uninteresting things to everyone except to those whom they concern; they frequently consist of a few trite axioms from the Queen's Regulations, a pet crotchet or two of the commanding officer's, some sufficiently stale military truths, a quantity of dry regimental statutes —*et voilà tout!* Lord Mark Kerr sees no particular advantage in adhering to this beaten track, and the not the least important point in which his orders differ from those ordinarily issued, is in the kindly and familiar manner in which they are expressed. A great deal depends upon the *tone* in which an order is given, and Lord Mark Kerr, speaking temperately, but firmly, as he does in these pages, is more likely to meet with ready obedience than the blustering martinet, with a threat and an oath at every other word.

We are glad to see his Lordship recognising the necessity for encouraging at all times a strong feeling of *espirt de corps;* this spirit prevades the whole of this little pamphlet.

He directs particular attention to the subject of cooking, until lately much neglected throughout the Army; and he seeks diligently to foster a taste amongst officers and men for every description of active amusement and manly sport. We are glad to find an officer of Lord Mark Kerr's experience laying so much stress upon this point.

It is not, however, our intention to attempt anything like a review of the various topics upon which these regulations touch; it will be sufficient for us to remark that, while they embody a very complete and excellent system of interior regimental economy, they exhibit a solicitude for the health, comfort, and well-being of the men, which we doubt not has tended in a great measure to raise the 13th Regiment to the state of efficiency and dicipline for which it is now remarkable.

To any who may desire a hint as to the management of a regiment we would recommend this little book; while those who would form some notion of what the dicipline and system of a good regiment really is, who would learn the relation in which the officers and men of the British army stand to one another, and the harmony which with good management should exist between the different ranks,—those, in short, who would learn something of the inner life of the English soldier, will do well to look over Lord Mark Kerr's "Standing Orders."

* *Standing Orders of the 13th, The Prince Albert's, Light Infantry*, by Lord Mark Kerr.

THE ROYAL VOLUNTEER REVIEW AT HOLYROOD.

(*Abridged from the "Scotsman."*)

It is not beyond truth to say that no demonstration—at least for many years—has called forth an equal or more general amount of real enthusiasm than that of Tuesday did in the shape of flag and floral decoration.

At eleven all the heights of the Queen's Park were dotted with spectators, looking like covenanter scouts for the patches of spectators on the hill slopes. By one the ridges were regularly serrated with gazers, and the white tents on Salisbury Crags had ceased to be prominent objects owing to the masses of drapery and broadcloth which had congregated, not only around them, but in every spot that commanded a specially excellent view of the review ground. The Calton Hill, too, was speckled with clusters of spectators.

A most conspicuous object in the Park was the Grand Stand, with its accommodation for nearly 4000 persons. This structure, with the official decorations liberally sprinkled over the city, was designed under the auspices of the Town Council Committee of Taste. The front of the stand, which was about 1000 feet in length, was covered by stripes of white and red jaconnet; and, with the exception of the centre part, was draped with Royal Stuart tartan. In the centre (slightly elevated above the extremities) crimson cloth was substituted for the tartan. The poles supporting the roof, and dividing as it were the platform into compartments, were decorated with tasteful wreaths of evergreens, filled in with heather, which were suspended in an easy and artistic manner; and the poles were linked together with festoons of evergreens—a drooping combination of the same completing the decoration. A refreshing and elegant addition was made to each alternate pole in the form of a bouquet, gracefully disposed in small japanned vases. The picturesque and martial element in the structure consisted in a judicious arrangement of the county militia flags, placed at intervals over the roof—the Union Jack in the centre, the Royal Standard fluttering in the breeze in front.

Patiently the mighty assemblage—for Her Majesty did not manifest her usual punctuality—waited; whilst through the three entrances of the park corps after corps defiled, sinuated like bright-scaled sea-serpents, undulated like spangled billows over the parade-ground, formed into solid masses, stacked arms and scattered like "let-out" school-boys, whilst also red-coated, white-plumed field officers, provoking from their sheeny greys and glossy bays the curvets they seemed to chide, galloped hither and thither with that seemingly frantic purposelessness which always excites the wonderment of civilians at reviews. Rain, moreover, rattled down smartly in this patience-trying interval of waiting. The hills seemed instantly to burst into a growth of mammoth mushrooms, so suddenly extensive was the opening of umbrellas. Umbrellas being, however, by no means universal possessions, many a silk hat and dress were spoiled. No discontent resulted. At length the bugles sounded, the truants rushed back to their ranks, there came genuine Queen's weather, and with it came the Queen. As soon as her scarlet liveries doubled the angle of the Palace-garden palisade myriads of *mouchoirs* fluttered like doves just taking wing, a universal clapping of hands ran across the hills like peal after peal of riflery, almost drowning the boom of the minute-guns; and lusty Scotch lungs gave a right loyal Scotch welcome to Scotland's Queen.

Among the mounted officers who took part in the review movements, or were in attendance on Her Majesty, were—Field-Marshal H.R.H. the Prince Consort; Lieutenant-General Sir George Wetherall, K.C.B. and K.H.; Lieutenant-General the Marquis of Tweeddale; Major-General Sir James Yorke Scarlett, K.C.B., Adjutant-General; Major-General Sir Richard Airey, K.C.B., Quartermaster-General; Major-General Lord Rokeby, K.C.B.; Major-General Cameron, C.B.; Col. Sir J. Douglas, K.C.B., Assistant-Adjutant-General; Capt. Fitzroy Somerset, R.E.; Col. Skyring, commanding the Royal Engineers in Scotland; Colonel M'Murdo, Inspector-General of Volunteers; Major Nelson, &c. Lord Elcho, Lieut.-Colonel of the London Scottish Rifles; Sir David Baird, Major; Captain M'Gregor, and Captain M'Kenzie, of the Highland company of this noted corps, were also present. The Duke of Buccleuch, the Earl of Leven, the Earl of Selkirk, Lord Belhaven, the Lord Provost of Edinburgh, Colonel Kinloch, &c., were present in their uniforms as lord-lieutenants or deputy-lieutenants of counties. The Queen's Body Guard of archers, numbering between fifty and sixty, was drawn up beside the Royal Standard, and attracted general attention from the quaintness of the garb, as well as from the social position of most of the gentlemen composing it. It was commanded by Lieut.-Colonel Viscount Melville, K.C.B.; and among the members present were Sir Wm. Gibson-Craig, Bart., Professor Swinton, Mr. Gillespie, Mr. Forman, Rev. Dr. Smith, chaplain, &c.

The company on the Grand Stand, and the officers' stalls in front of it, included—The Duchess of Buccleuch, the Countess of Leven, the Countess of Rothes, Viscountess Strangford, Lady Belhaven, Lieut.-General Sir Thomas E. Napier, K.C.B., the Lord Justice Clerk, Lord Neaves, Lord Ardmillan, the Solicitor-General, Principal Sir David Brewster, Professor Syme, Professor Balfour, Mr. Hope Vere, Sir Archibald Alison, Bart., Major Alison, Sheriff Glassford Bell, the Magistrates and Town Council of Edinburgh, the Lord-Provost of Glasgow Mr. Miller, M.P., &c.

Up till towards one o'clock, the contrast between the flats on which the Volunteers were to assemble and the surrounding ground, was very striking. Every spot beyond the kept ground from which any view of the proceedings could be obtained, was occupied—slope, peak, and crag. On the low ground, excepting the narrow margin of the gallery on the north side, all was bare and vacant. Between one and two the different corps began to arrive, Fifeshire, in more than one sense, taking a foremost place. The first men on the ground were the Fifeshire Mounted Rifles, flaming in scarlet and gold, and with them the Fifeshire Artillery and the Fifeshire Rifles, both of them smartly dressed and well-drilled bodies of men. Soon afterwards appeared the two Engineer corps of Lanarkshire and Edinburgh, in scarlet uniform, these and the Fifeshire Mounted Rifles showing the only gay colours among the whole Volunteer force, bright colours being of course quite incompatible with the Rifle service, to which the great mass of the Volunteers belong, and the medium and modest patterns offered by the regular army being very closely adhered to by all the Artillery corps. The next corps to take up position was, as far as we could observe, about 800 of our English friends from the county of Durham, under the command of Sir John Fife. Next appeared the Royal Company of Archers, the Queen's Body Guard for Scotland, commanded, as some sarcastic Fate would have it, by Lord Melville, one of the Ensigns-General, late Commander of the Forces for Scotland, and author of a remarkable speech about the ridiculous nature of the Volunteer movement. After two, the corps began to appear on the ground from both ends with such rapidity that it is impracticable to name them in their proper order, especially as, excepting the few corps that wisely carried bannerets telling who they were, none of them could be recognised till they had taken their position, and even then could not receive certain identification. As each corps reached the ground, most of them headed by a band of music, the enthusiasm of the spectators and the grandeur of the scene grew rapidly. Such of the corps as, in order to reach position, had to near the base of the hill and the Crags, were enthusiastically cheered by the mighty masses which covered all the slopes. The favourite air with the bands in marching upon the ground was, whether by chance or arrangement, "Bonnie Dundee." The 1st Brigade of the 2nd Division was the last to be formed, owing to the railway detentions suffered by the men of Renfrewshire and Ayrshire. Indeed, their arrival was almost despaired of, and conjectures arose how an exceedingly large gap immediately in front of the right of Her Majesty's position was to be filled up, when loud and cheerful music was heard at the eastern entrance, and the battalions of the Renfrewshire Rifles came in at quick march,

Digitized by Google

1200 strong. After all, they were little, if at all, later than the Northumberland Rifles, forming the 3rd Battalion of the 2nd Brigade of the 1st Division, who, by a railway failure, had been detained three hours beyond their appointed time.

All were now arrived except the Ayrshires, forming the 3rd Battalion of the 1st Division of the 2nd Brigade; and even before the arrival of the Renfrewshires, alterations in the arrangements seemed to be begun on the presumption that one or more of the corps would be prevented from keeping their appointment. One of those alterations seemed to be the withdrawal of the Sutherland men from the 3rd Brigade of the 1st Division, and the ranging them alongside of the county Durham Rifles, the two geographical extremes of the force to be reviewed being thus placed in contiguity. It was now considerably past three o'clock, the hour fixed for Her Majesty's appearance on the ground, and it seemed that the review must proceed somewhat marred of its fair proportions, when music was heard to the north of the ground, and a few minutes afterwards the men of Ayrshire came into the Park at the east entrance, and proceeded at a hard run, but in good order, to their allotted position. The corps which had made application in time were now all assembled, and more than 20,000 leal and stalwart men, in all the panoply of war, stood waiting for the Sovereign.

At twenty-five minutes to four o'clock, the battalions being all in line, with the officers at the front, Her Majesty left Holyrood Palace in an open carriage and four, and two or three minutes afterwards the royal *cortége* entered the park amid the rapturous cheers of the congregated myriads of spectators, and the firing of a royal salute from the Queen's Drive on the east.

On Her Majesty's arrival at the position assigned the Royal Standard was hoisted, and the Volunteers gave a royal salute. After the salute the officers returned to their places, and Her Majesty, attended by the Prince Consort and the Duke of Buccleuch on horseback, with the royal children and members of the court also following in carriages, the *cortége* being preceded and followed by the whole of the staff officers on the field, proceeded slowly round in front of the troops, who stood in the attitude of salute. Though the Volunteers, in obedience to military rule, were silent during this operation, the spectators on the platform and on the hill hailed Her Majesty with enthusiastic acclamations as she passed along. The effect of the cheering on the hill side was not less than sublime. Peal after peal broke forth in thunder, carried away by the strong wind, to be again and again renewed.

When Her Majesty had resumed her place in front of the Royal Standard, the bands of the 78th Regiment, of the 29th Regiment, and of the West York Rifles, advanced in front of the line opposite to Her Majesty, and under the direction of Mr. J. Deacon, of the West York Rifles, supplied the music to which the Volunteers marched past.

Precisely at four o'clock, the staff officers took post with their respective divisions, and gave the order, "Take ground to the right in fours," when the whole of the battalions were put in motion—The Fife Mounted Volunteers leading, the Artillery coming second, the Engineers third, and then following the enormous mass of Rifles. As the vast force began to move with measured tread, the scene assumed new splendour, no small portion of which, at least, as to the earlier part of the movement, was due to the gaiety and variety of colours arising from the Cavalry, Artillery, and Engineers in front.

The van was worthily led by the Mounted Rifles of Fifeshire, dressed in bright scarlet tunics, black helmets, and Hessian boots. This corps, at whose head rode their commander, Lieutenant-General the Earl of Rosslyn, was greatly admired—both men and horses. It is composed of the gentry and gentlemen farmers of Fifeshire—a fine body of men; and their "mount" was such as no cavalry regiment in Her Majesty's regular service could approach.

Then came the 1st Artillery Brigade, having in front the Edinburgh City Artillery, followed by a strong force from Tynemouth, Alnwick, Sunderland, and Whitehaven; but the mass of the three battalions of this brigade, about 1500 strong, were made up, in addition to the large quota furnished by Edinburgh, of seven companies from Forfarshire. Special mention, however, is due to the very smart companies from the geographical extremes—the Berwick-on-Tweed, and the 1st Caithness. The 2nd Artillery Brigade was headed by the Greenock corps—a tall and apparently well-trained body, who were followed by companies from Ayrshire, Galloway, and Argyle. Eight corps from Fifeshire made an excellent appearance, but not better than the Inverness, Stirling, and Nairn, forming part of the same battalion. The third battalion, composed entirely of Lanarkshire and almost all of Glasgow corps, drew forth special cheering, by their handsome appearance and the steadiness of their march; their execution of the wheel in coming into the alignment of the saluting base being particularly lauded by military men.

The Engineers, in number nearly 200, came next, and were loudly applauded, especially the 1st Lanarkshire—tall, straight men, in very handsome uniform.

The Rifles, forming of course the great mass of the force upon the ground, had in front two battalions of "Edinburgh City"—the Company of Advocates, which was, we believe, the first Volunteer company formed in Scotland, if not in the United Kingdom, marching in front. They were very loudly cheered, and all our city companies, which immediately followed, marched with great steadiness. The 1st Highland Company, headed by Sheriff Gordon, received special marks of popular favour. As the Highland companies approached, the bands ceased playing, and the pipes of the 78th struck up, an arrangement adhered to as each Highland Company neared Her Majesty's position. The rest of this brigade was chiefly made up from East-Lothian and the counties of the eastern borders; and the different hues of their uniforms, and the evidence which most of them afforded of good drill, were much admired.

Forfarshire had the place of honour in the next brigade, sending about 700 fine-looking men—a large proportion of them attired in the Government grey, and exhibiting a great variety in facings and caps. Our Dundee friends had also a company in the Highland garb, who made a very good appearance. After Forfar came its neighbour Fifeshire, no whit behind in dress or drill. The third and fourth battalions of this brigade were made up of nearly 1500 of our English neighbours, stout and straight, from Northumberland, Durham, and Cumberland, who received loud welcomes wherever they were recognised, the welcome, it need scarcely be said, being made specially cordial for a Northumberland corps, composed we presume of exiled Celts, in the Highland garb.

The Stirlingshire Volunteers, who made up the bulk of the 3rd Brigade, were a fine body of men, and their cap, surrounded by a band of the Gordon tartan, elicited loud cheers. The Alloa and Tillicoultry men, coming from the Ochils, might be taken as smart and buirdly specimens of the inhabitants of those districts; and they had also evidently paid good attention to their drill. The Aberdeen companies, all clad in dark grey, had a compact and steady, though somewhat sombre appearance, to which the Inverness men, headed by Provost Sutherland, furnished a pleasant contrast by their neat light grey uniforms and green or red facings. The Sutherland men, who followed, were also loudly cheered—partly, no doubt, in consequence of the great distance from which they had come to the review, both they and the Nairn and Inverness companies having had to travel all night, and having to travel all night back again on their return. Next came the Perth and Kincardine companies, furnishing nearly 700 men. Their uniforms, which were neat and tasteful, were generally admired. The fourth battalion of this brigade was to a great extent composed of the Marquis of Breadalbane's Argyll and Perthshire Highlanders. They numbered fully 500, and about half the companies wore the Celtic costume. They seemed a fine, spirited, active set of men; and both they and the noble marquis at their head were loudly cheered. Eight pipers strode in front of the first company, who made sufficient "music" to supersede the regimental bands on the ground.

The 2nd Division came next, under the command of Major-General Cameron. Among the officers who preceded this division rode Lord Elcho, in the uniform of the London Scottish. The 1st Brigade here, commanded by Colonel W. Hamilton, C.B., was composed of Renfrewshire and Ayrshire corps, with very neat dresses, including those of one or two Highland companies among them.

Glasgow and Lanarkshire furnished the whole of the next two brigades (with the exception of a corps from Rothesay), numbering in the aggregate fully 4000 men. They attracted universal attention, not more by their numbers than by the neatness of their various uniforms, and their high proficiency in all the movements which they had to perform. Many particular companies were warmly and deservedly cheered.

The first and last battalions of the 4th Brigade were also furnished by Lanarkshire; and the remainder came from Dumbarton and Dumfriesshires.

The glorious cheer which the Volunteers gave at the end of the review—far louder even than the hurrah of the more than tenfold more numerous spectators at its commencement—was a thing to be enjoyed, not merely by those on Arthur's Seat and Salisbury Crags, but on the Pentland Hills. Again and again it was repeated, and when the Queen moved off the ground numbers of the Rifles elevated their caps upon their guns, waving them with an ardour which made them look in the distance like the brandished brushes of ecstatic sweeps; whilst many of the excited soldiers threw discipline in the cause of loyalty to the winds, broke from their ranks, and crowded cheering round the royal carriage, just like a mob of Eton boys hurrahing the late duke.

Almost as wonderful as the way in which the heights were occupied was the rapid manner in which they were evacuated. A patch of green appeared here and there near the summits, rapidly widened as the multitudes thawed down the slope—then came an avlaanche, and they all were in the plain. Thanks to the admirable police arrangements, which the good tempered regulars who kept the ground only relaxed in favour of certain ladies, the Volunteers were able to leave the ground without the slightest embarrassment; the mighty mass of spectators also dispersed without any other inconvenience than an amount of squeezing not greater than that experienced in an ordinary railway crush, and a very considerable amount of dust which made black broadcloth drab and raven tresses prematurely grey.

Among the Volunteers but one sentiment of satisfaction and becoming pride in the proceedings of the day seemed to prevail.

The march off the ground was equally interesting to the march to it. The crowds that accompanied every battalion were very great; and in the principal thoroughfares, such as Waterloo Place and Princes Street, the solid line of spectators on either side through which the Volunteers passed suggested strongly the questions as to where so many men, women, and children had come from, and where they were to go to.

Lieutenant-General Wetherall, after riding for some distance beside the royal carriage, returned, and, addressing the staff and battalion officers, said he had been commanded by Her Majesty to express her admiration of the steadiness and precision which characterised the large body of Volunteers whose movements she had witnessed. Her Majesty had been graciously pleased to say that their appearance and numbers reflected the highest credit both upon their officers and themselves; and further, that she would take an early opportunity of expressing her satisfaction more formally in a General Order. This announcement was received with enthusiastic applause.

The troops were then marched off the ground by four exits in admirable order, and in accordance with the programme issued by Colonel M'Murdo.

To set an army in the field is a basis of solid praise, and if so, there is most certainly no man more thoroughly entitled to main eulogium than Colonel M'Murdo, who made the arrangements and dispositions in accordance with which the whole magnificent spectacle was carried out from beginning to end without, in our opinion, a single hitch. We merely wish to direct attention to the fact that by the accurate and judicious activity of one mind, perfectly familiar with the business before it, the Sovereign and the people were gratified by a demonstration of loyalty and power which has no parallel in ancient or modern history.

Sir George Whitlock has been offered, and has accepted, the command of the Northern Division of the Madras Army, in succession to General Tulloch, who vacates in a few months.

EXPERIENCE OF THE PURCHASE SYSTEM.

The following note comprises the experiences of a distinguished general officer now on the Staff:—

Although the question of purchase in the Army is pretty well exhausted, it may not be amiss to lay before the public my own experience of its practical working, the said experience being based upon a service on full pay of beyond forty years, more than thirty of them in one regiment.

My practice, therefore, may not unfairly be pitted against the mere theory—for it is little better—of the opponents of a system which most assuredly works well in our Service.

A leading journal would appear to lay it down as an axiom, that the man who purchases must necessarily be a worse officer than he who obtains promotion in his regular turn. This objection, however, is now met by the examination of candidates for promotion.

The advocates of a routine system for the most part look upon purchase in but a narrow spirit; nor indeed is the question altogether fairly considered even by those who desire to retain it.

It has been insisted upon as one of the "hardships" of doing away with purchase, that even an officer who has paid beyond the regulated price of promotion will lose all chance of recovering that money. But in what consists the hardship? No officer purchases with an idea of again selling. True, circumstances may ultimately occur to induce him to retire, but it by no means follows he will obtain a shilling beyond the regulation. In my own case, had I sold out as lieutenant-colonel I should have been 1600*l.* poorer than at the outset of my career, and a service of thirty years thrown away. Yet where would have been the hardship of this? I wanted rank, and paid for it willingly. Had the speculation failed, I might have termed it "bad luck," but surely nothing worse. As I am entirely unable to understand why the possession of a little money should interfere with the qualities necessary in an officer, or why, because he obtains promotion in four or five years, instead of waiting ten or fifteen, he should be worse than his less lucky neighbour, I shall pass this objection without further comment.

Then, as to supersession, it must and ever will exist in some shape or other; nor can it greatly matter whether it occurs through purchase by a brother officer, or by the transfer of a man from another corps. To avoid it, it would be necessary that promotion should be general in the Army, the inconveniences of which would be excessive; often so even to those promoted, and who would naturally prefer as seniors awaiting the chance in their own corps.

People who exclaim against supersession lose sight of the promotions in the Crimea, when mere boys became captains superseding subalterns of twelve or fifteen years' standing in regiments in India, some of whom had seen a deal of hard work.

But the only fair way of arguing the subject of purchase is to consider the poor man alone; and in this view only shall I look at it.

Now, I had myself been rather more than five years an ensign, and should have continued there nearly two years longer had I not purchased; thereby giving a step to all below me. As third lieutenant and five years in the rank, I induced a captain to sell out instead of taking half-pay, and, although I passed over two, who certainly were none the worse for it, it gave the others a step, besides saving the half-pay to the country. I again went over two as captain, after three years and a-half. Now, these very men recommended me to offer one of the majors a large sum to take an unattached lieut.-colonelcy. In fact, they preferred a brother officer to a stranger from the half-pay.

As major I purchased for the regulation after five years and some months; thus being 19½ years to lieut.-colonel, through purchase, when, without it, I should have been 22 years before even obtaining a majority; and considerably longer had not purchase existed in the Army. I declined to give more for the last step, and equally refused to allow a junior to pass over me; and I may here remark that, although I have known cases of prevention of a step through such refusal, I am not aware of any instance in which a "slur" was fixed upon the individual. It were indeed monstrous in a commanding officer to permit such an opinion to be expressed. The officer who submits to one supersession of the kind, might come into the predicament of having to do so a dozen times.

From lieutenant-colonel to major-general, I was twenty years. Nine-and-thirty years to that rank during the purchase system, where should I have been without it?

In those days, however, promotion from lieutenant-colonel was at least progressive, whereas under the present rule, men holding the brevet rank may be years to the rank of colonel; being passed in the interim by men vastly their juniors in the Service.

But in reality the whole question of supersession is sheer nonsense. Everyone upon entering the Service knows that in some way or other he is liable to it. He may d—n his own ill-luck, or say of his neighbour that he is a lucky dog, ever falling on his legs—the utmost expression of "soreness" I am aware of. The poor man knows he will be purchased over, but, on the other hand, equally considers the advantage to himself of an ultimate sale of his commission for the benefit of his family should circumstances oblige him to retire.

In some shape or other purchase will always obtain. In the late Company's service each officer below the one retiring was expected to pay towards the step; and I have known 90,000 rupees (9000*l.*) to be in course of payment at one time and in the same corps, to the serious hampering of the juniors, caused by the retirement of three men at the same moment. According to my experience the system of purchase is eminently favourable to the poor man. Not only does he often gain materially through the retirement or purchase of those above him; he may feel that with a family, or with precarious health, or from any other cause, he would do wisely to retire. Now, by selling out he realises a certain sum which he can invest; while to take half-pay, which, moreover, he cannot do under 20 years, he is in a worse position than before. Though even in this money would pass, for of course he would expect something from those gaining the step.

Deprive such men of the chance of selling, and you compel them to hold on to their own excessive disgust, and consequent injury to the Service. I fear that, as a rule, there are not very many men who after 20 years in the junior ranks—

Digitized by Google

and if purchase be abolished, half the Army will be so—do not become pretty well wearied of the work. They may continue to carry it on conscientiously, but surely with slackened energy.

During the outcry upon the condition of the Army in the late war, it was insisted that officers should be shelved at sixty—as stupid an idea as could enter the brain of the most radical of innovators. It is certainly something new to hear that an Englishman becomes broken down at that age. I only wonder that men like Napier, Gough, Clyde, and others of that class were not quoted in proof of the assertion. But, under the proposed changes, few men would become lieut.-colonels under forty years; those from the ranks rarely ever. What, then, will be done with these men? Under the present system, every man sets out with hoping at some time or other to become at least a field-officer, whereas, if purchase should be discontinued, it will be a lucky chance if he rise beyond captain; while, if obliged to retire, he has a mere pittance to fall back upon, and that only during his, perhaps few, remaining days.

There seems to be a conviction among certain theorists—for among the anti-purchase people hardly one takes a practical view of the subject—that purchase alone favours the aristocrat or the moneyed man. This, again, is a great mistake; I have known many men who have commenced upon their pay, yet contrived to purchase in the upper ranks. It is, moreover, urged that these moneyed men make a mere convenience of the Service. Whereas, in reality they are the very men who hold to it. Is it a common sense view of the thing to believe that a man buys rank merely to sell it again? True, some there are who discover in no long time they have mistaken their profession. These retire, and the Service is the better for it; on the other hand, those of the poorer class, who chance to come to the same conclusion, would have no alternative but to continue on; and, disliking their work, is there not a chance of their doing it unwillingly and in a slovenly fashion?

In short, nothing is more certain than that purchase is the best of "weeders." It permits the retirement of the old and worn-out officer upon more advantageous terms than the country could afford. It gets rid of men who don't like the Service, and who are consequently next to useless. And lastly, it is an immense advantage to a corps in which are any "black sheep"—men who are a pest to the regiment, perhaps, yet not to be caught by a court-martial; but who will retire, if offered the price of their commissions. During my own long regimental command I saw enough of this. There are indeed stations where to cashier a man is little better than to hang him outright; for, without a sixpence in his pocket, how is he to exist? how get home? Not, however, that I should consider this if the case really required a court-martial.

Theorists dwell upon the constitution of other armies, but these have little in common with our own. The difference between the French peasant and the gentleman is trifling compared with that of the corresponding classes among us. The French gentleman is compelled to enter the ranks, the Englishman seldom does so, and of those who do few turn out well. I have had several to deal with; one of them did well enough as a colour-sergeant, but, in an evil moment for him, and in opposition to my own advice, his father purchased an ensigncy for him, and in no long time he went altogether to the bad. The really valuable class in the ranks are the sons of farmers, tradesmen, &c., but few of these will enlist with the hopeless prospect before them of so many years before the chance of a commission falls to them. Doubtless the peasant is a fine fighting fellow, but then he seldom possesses much of an education until after enlistment, when he is given the alternative of learning to read and write or going before a court-martial. How far this is compatible with British liberty may perhaps admit of dispute. The working of the system is bad, for it crams the school with idlers, interfering greatly with the attention the master could otherwise give to the more industrious.

It is insisted that, by improving the condition of the soldier, we shall obtain a better class of men. A dozen years ago I had a conversation upon the subject, and what I then said has been verified to the letter. Notwithstanding the many improvements, or what have been intended as such, the men of the present day are not, in a single respect, better than those of thirty years ago. There may be rather less drinking, perhaps, but of the more serious offences of desertion, stealing from a comrade, and some other crimes, we have as much, if not more. In time of peace we may, to a very limited extent, have something of a choice of men; but none during war, when we must perforce take all who offer. Moreover, it must not be overlooked that a vast number of those who would formerly have enlisted are entirely lost to us through emigration, and of course this evil—for to the Service, it is so—will continue, for the hard-working respectable man will naturally prefer high wages and independence in Australia or Canada, to India as a private.

Upon the subject of purchase, I must add one further remark. It has been proposed to limit it to the majority; the lieut.-colonel to be selected from the Service generally. But to what monstrous favouritism and injustice would not this lead, and in what a position would it place the Commander-in-Chief? The evils of such a system must be palpable to every one, soldier or civilian, and do not require discussion. This much, however, may be done, and which has not hitherto been sufficiently attended to; namely, that in every case of a field-officer being reported inefficient; a searching inquiry should be made into his character, and if the individual be shown unfit for command, he should be passed over, or compelled to retire. Yet even this system would have its difficulties so long as general-officers report "most favourably" of men notoriously worthless; of which I have seen not a little.

But in hardly one point of view is it easy to see a better system than the present one for a time of peace; for in what way is a man to show out his more superior qualities until tried in the field? On the other hand, any radical change is unnecessary during war, for valuable men will then come to the surface fast enough.

A system of shelving officers merely because old and unlucky, would do infinite harm to the Service, to say nothing of the enormous expense to the country. Such men may have worked honestly and well. Why then throw them aside like an old hound that has had his day? And how would it work in the case of men from the ranks, who could rarely become ensigns under thirty years of age?

Of course, very few gentlemen born would enter the Service at all with so poor a prospect before them. We should in fact have an army from the lower classes; and then what becomes of the higher scale of education? of the sort of men to command an army? of the higher rank of staff?

I say, therefore, leave purchase alone, and, for the credit of the British Army, while, of course, pushing on any men from the ranks who possess the needful qualities, take the majority of the officers from the upper classes. I, a mere commoner, insist, and this from long experience and thought, upon the advantage of such men to the Service.

It is true that, among the "scions of nobility," so bedaubed by one of the journals, we do occasionally meet with a bad one, though why the one unlucky fellow should be so hounded at where a dozen as bad commoners are allowed to pass out of the Service without remark, is best known to those who, for their own purposes, would gladly annihilate the aristocracy altogether; yet, with some little inconsistency, rejoice when a title is bestowed upon a gallant and clever soldier, particularly if he has risen from among "the people," forgetting that the sons of such men equally fall into the category with these same "scions." Would a single one of these enter the ranks, from which their fathers had, nevertheless, risen? I think not.

Such, then, are the opinions of one who at least has had practical experience for his guide. They are disinterested, also, for the only connection I have in the Service is a non-purchaser.

M. G.

COMPARATIVE RANGES OF SHOT AND SHELL.

It is well known that at low elevations shell will, *cæteris paribus*, range farther than solid shot, because the *vis inertiæ* of the lighter projectile is more easily overcome, and it is driven at a greater velocity. At high elevations the solid shot has the advantage, because the areas of the resistance of the air being the same, the heavy solid shot having the greater momentum, is less retarded. A comparison has lately been made in some of the papers between a gun firing a comparatively light shell and the Whitworth 80-pounder firing solid shot, at low elevations; but the conditions are manifestly not equal. The range of the Whitworth 80-pounder firing shell at 5° of elevation, was tested at Southport last week. The charge used was 10lbs. of powder, and the following ranges were obtained with 10 rounds:—

No. of Round.	Range in Yards.	Deviation, Yds.	
1	3057	1 R	The wind blew strong from R. to L. across the range, slightly from the front.
2	2959	7 L	
3	3043	3 L	
4	2947	1 R	
5	2930	1 L	
6	2932	4 L	
7	2922	3¾L	
8	2965	4¼R	
9	2974	3 L	
10	2973	4¾L	

Mean Range ... 2970 yards.

It appears from this table that the mean range of the Whitworth 80-pounder, firing 10 rounds of shells at 5°, with 10lbs. of powder was 2970 yards, and its extreme range was 3057 yards.

The writer of the paragraph quoted in last week's ARMY AND NAVY GAZETTE, was therefore not correct in stating that the so-called "enormous range of 2700 yards," obtained by Captain Blakely's gun, was superior to that of all others, including the Whitworth.

It would be well in claiming any particular range for any gun to give the exact ranges and deviations of all the shots fired, which should be sufficiently numerous to enable an opinion to be formed. It is scarcely fair to the public to publish the range of any single shot as the range of a gun.

HOUSE OF LORDS.—FRIDAY.

EAST INDIA FORCES AMALGAMATION BILL.

The second reading of this bill gave rise to a discussion, which, although marked by the ability which usually characterises debates in their Lordships' House, necessarily involved merely a repetition of the arguments used for and against the measure in the other House. The Duke of Argyll moved the second reading, and in doing so went over the topics with which Sir Charles Wood's repeated speeches on the subject have rendered the public familiar. —Lord Ellenborough, on the other hand, in an eloquent speech, urged the reasons which Lord Stanley originally advanced against the bill. He felt his opposition to be useless, but it was a satisfaction to him to have that opportunity — it might be the last — of showing his attachment to the Indian Army and people of India, to the advocacy of whose interests he had devoted thirty-two years of his public life.—Lord de Grey and Ripon followed in support of the measure, and was succeeded by the Duke of Cambridge who spoke remarkably well. He had considered the subject with the greatest care, and had consulted military authorities of eminence, and the result at which he had arrived was that the time had come for settling this great question. The bill was a necessary complement of the change already made in Indian administration. One great advantage of the measure would be the addition of 5000 tried officers to the British Army, and the difficulty could not hereafter arise which occurred during the Crimean war, relative to the employment of Indian officers. —The Earl of Derby said he would not take on himself the responsibility of advising their lordships to reject the bill, but he received it with some doubt and misgiving, and thought that Parliament had been called upon to legislate in this matter in the absence of sufficient information.—Lord Clyde briefly addressed the House in support of the measure, and was received with cheers on rising. He declared that what he had witnessed of the conduct of the local Army in India, satisfied him that the bill now proposed was absolutely necessary.—After a few words from Earl Granville the bill was read a second time.

HOUSE OF COMMONS.—FRIDAY.

No question connected with the Services came under discussion in this House.

NAVAL FORCES IN THE BAY OF NAPLES.—According to the *Moniteur de la Flotte* we find that at the beginning of this month there were lying before Naples the following number of ships-of-war of different nations. Five English line-of-battle ships under the command of Rear-Admiral Mundy, C. B.; five French line-of-battle ships under command of Vice-Admiral de Tinan and Rear-Admiral Paris; one Russian line-of-battle ship; the American corvette the Iroquois; the Austrian frigate Schwartzenberg, and one dispatch-vessel of the same power; the Spanish corvette City of Bilbao, also attended by a dispatch vessel. The French dispatch steam-vessel Prony was likewise in the bay. The same paper states that the Neapolitan royal navy consists of 1 screw line-of-battle ship, in the course of construction; 16 steam-frigates and corvettes, among which are such vessels as the Bourbon, Hector, Ercole, Fiera-Mosca, Fulminante, Guiscardo, Stromboli, Capri, and Vesuvio; 18 steam dispatch-vessels, 2 sailing line-of-battle ships, 5 sailing frigates, 2 sailing corvettes, 7 brigs, and 50 gun-boats; making together about 100 vessels, carrying upwards of 900 guns, and propelled by a steam-power of about 7000 horses. In addition to these the Neapolitan government has chartered several steamers belonging to different French companies. We agree with our French contemporary when he states that it is a matter of surprise the king of Naples did not make use of so powerful a squadron, which, when efficiently worked, would have been no contemptible auxiliary to his army of 80,000 men.

The reserve Channel fleet, under the command of Commodore Yelverton, C.B., has arrived in Portland from a cruise, and has been inspected by the Lords of the Admiralty. The ships will now return to their respective districts, having completed the exercise and cruise for which they had been assembled.

The orders of the Admiralty for the whole of the iron-plated steam floating batteries lying in the Medway, at Chatham, with the few others at the remaining ports, to be docked and examined, in order that any defects discovered in them may be repaired, cause a considerable amount of activity in the smiths' department at Chatham dockyard, the workmen employed in which have commenced working overtime until a late hour in the evening.

His Russian Majesty's screw steam-frigate Great Admiral, 60, and a corvette, both from the eastward, arrived in Plymouth Sound on Thursday afternoon.

BLUEJACKETS IN NEW ZEALAND.—I can only, in passing, notice the gallant exploit of Captain Cracroft, of the Niger, and his band of bluejackets. This feat has done much in the way of intimidation; the Maori now dreads the sight of a sailor. Cracroft, however, had a narrow escape. As he and his men were entering the pah, pell-mell with the insurgents, a native took deliberate aim at him, and was in the act of firing when a sailor, who saw him, cut him down. An amusing episode, it is said, took place in the pah. 10*l.* reward had been proclaimed for the man who took the rebel flag. Four sailors got hold of it simultaneously, and in their eagerness to secure the prize they temporarily forgot the hubbub around them, and their own danger, and began to pummel each other with their fists.—*New Zealand Examiner.*

The following are the casualties by death in the armies of India reported by the last mail:—H.M.'s Forces: Captain Evelyn Leslie, H.M.'s service, at Calcutta, June 18. Bengal: Captain E. Willoughby, Bengal Artillery, at Brighton, aged 29, July 27; Lieutenant James W. Wylie, Bengal Horse Artillery, at Muttra, aged 20, June 17; Dr. Moline, Senior Surgeon, 54th Foot, suddenly, of cholera, at Cawnpore, June. Madras: Lieutenant James Campbell, H.M.'s Madras Engineers, at Salt Hill, near Windsor, aged 28, July 25; Ensign C. C. G. Murray (doing duty 43rd Madras L.I.), at Madras, June 18; Major F. Vardon, 25th Madras N.I., at Mercara, about June 27; Captain W. Dent, 22nd Madras N.I., at sea, on the steamer Nemesis, June 5. Bombay: Major B. K. Finnimore, Bombay Artillery, of cholera, at Mazagon, aged 35, June 24; Colonel J. Cooper, 7th Bombay N.I., at Bath, aged 58, July 31.

THE VICTORIA CROSS.—War-Office, August 7.—The Queen has been graciously pleased to signify her intention to confer the decoration of the Victoria Cross on the undermentioned soldier of Her Majesty's army, whose claim to the same has been submitted for Her Majesty's approval, on account of an act of bravery performed by him in India, as recorded against his name, viz.:—2nd Battalion Military Train, No. 201, Private Samuel Morley. On the evacuation of Azimgurh by Koer Sing's army, on the 15th of April, 1858, a squadron of the Military Train and half a troop of Horse Artillery were sent in pursuit. Upon overtaking them and coming into action with their rear-guard, a squadron of the 3rd Sikh Cavalry (also detached in pursuit), and one troop of the Military Train, were ordered to charge, when Lieutenant Hamilton, who commanded the Sikhs, was unhorsed, and immediately surrounded by the enemy, who commenced cutting and hacking him whilst on the ground. Private Samuel Morley, seeing the predicament that Lieutenant Hamilton was in, although his (Morley's) horse had been shot from under him, immediately and most gallantly rushed up, on foot, to his assistance, and in conjunction with Farrier Murphy, who has already received the Victoria Cross for the same thing, cut down one of the Sepoys, and fought over Lieutenant Hamilton's body, until further assistance came up, and thereby was the means of saving Lieutenant Hamilton from being killed on the spot.

By our private advices from St. John's, Newfoundland, we find that His Royal Highness the Prince of Wales had to contend in the Hero with contrary winds during the passage out, and these were frequently very strong. The only remarkable incident that occurred after leaving Plymouth was the death of the gun-room steward, who, in a fit of temporary insanity, committed suicide by jumping overboard. His Royal Highness was in the enjoyment of excellent health and appeared to have enjoyed the cruise, notwithstanding the rough weather which he had encountered. The Hero, just before reaching St. John's, had run short of coal, owing, it is believed, to the patent fuel not having been of good quality. This composition had been specially prepared with a view to produce very little smoke, but in attaining this very desirable end the heat-producing capabilities were seriously affected.

Obituary.

The last West India Mail brought the intelligence of the death at St. Thomas's of Lieutenant John Barclay Scriven (1810). Lieutenant Scriven had been suffering from the effects of the West India climate, which, considering his advanced age, was not surprising. He had left his cabin for the purpose of taking a little air, and it is supposed from sheer weakness fell overboard and was drowned. Lieutenant Scriven, we presume, was not born with a "silver spoon" in his mouth, for he was at the time of his death just 50½ years a lieutenant; he had seen a good deal of Service in the Channel from 1803 to 1809, and was an energetic, resolute officer, always sought employment and never shirked it.

We are sorry to announce the death of Mr. Robert Knox, master (1841). Mr. Knox's death was sudden, as he was serving at the time of its occurrence in the Dauntless coast-guard ship, on her summer cruise in the Channel.

The death of Commander John Bowerbank, on the retired list, has been recorded. The deceased officer entered the Service in 1804, and served off Brest in the Latona frigate; he subsequently accompanied Lieut.-General Sir John Moore's expedition to Portugal, and was present at the re-embarkation of the troops after the battle of Corunna. He saw some hard service in the North Sea, and participated in a desperate encounter with 20 Danish gun-boats, which were repulsed in a dark night from an attack on the Melpomene, Captain Fred. Warren, but not before they inflicted a loss of 5 men killed and 29 wounded on the British ship. Commander Bowerbank was serving as Lieutenant of the Bellerophon when Napoleon the Ist surrendered to the late Sir Frederick Maitland.

General Gustavus Nicolls, of the Royal Engineers, died a few days since at his residence, near Southampton. The deceased general, who stood third on the list of his branch of the service, obtained the rank of second lieutenant in 1794. He had seen much active service in his early life, having gone out with several regiments as reinforcements to Gibraltar, on the war breaking out with Spain in 1796, and remained blockaded in that fortress two years and a-half. In 1799 he proceeded to the West Indies. In 1808 he accompanied Sir George Prevost to Nova Scotia as commanding engineer, under expectation of hostilities with America, and remained there until the war broke out in 1812, and was actively employed in the protection of the frontiers of Nova Scotia and New Brunswick. He was present at the capture of Moose Island, Castine, and Belfast. The late general was also commanding engineer in Canada part of 1814 and 1815. In July, 1851, he was appointed a Colonel-Commandant of the Royal Engineers. His commissions bore date as follows:—Second Lieutenant, November 6, 1794; First Lieutenant, March 3, 1797; Captain, March 30, 1802; Brevet-Major, June 4, 1813; Lieut.-Colonel, September 1, 1813; Colonel, July 29, 1825; Major-General, January, 10, 1837; Lieut.-General, November 9, 1846; and General, June 20, 1854. The gallant officer was in his 80th year.

Major-General Hassell R. Moor, formerly in the Royal Artillery, died on Friday week at his residence in the neighbourhood of Farnham. The deceased general served in the Peninsula from January, 1811, to October, 1813, and was present at the battles of Busaco, Fuentes d' Onor, and Salamanca, also at the sieges of Ciudad Rodrigo and Badajoz, the action of Castrajon, and numerous other affairs with the enemy. For his services in the Peninsula he had received the silver war medal and five clasps. He was appointed Second Lieutenant 22nd of December, 1803; Lieutenant, 1st of May, 1804; Captain, 1st of December, 1812; Major, 22nd of July, 1830; Lieutenant-Colonel, 22nd of July, 1840; and Colonel, 11th of November, 1851. He had retired upon full-pay.

We regret to announce the death of Sir John Hindmarsh, which occurred in London a few days since. Sir John entered the Navy in 1793. He served in the Bellerophon in Lord Howe's action, June 1, 1794; in Cornwallis's retreat, and at the battle of the Nile. For his conduct in this latter action, when in temporary command of the Bellerophon, he received the public thanks of Lord Nelson, and was presented with a sword by the officers of his own ship. He served under Sir James Saumarez in the battle of Algesiras and the Straits of Gibraltar, and as lieutenant at Trafalgar. He also served under Lord Cochrane at the Basque Roads, Flushing, and the capture of the West India Islands. He was the first Governor of the colony of South Australia, and was Governor of Heligoland from 1840 to 1856. He had received a medal and seven clasps, and at the time of his death had attained the rank of Rear-Admiral.

Major G. M. Stopford, Royal Engineers, died at Brompton barracks, Chatham, on Tuesday. The deceased officer, who was the son of Admiral Stopford, served throughout the whole of the campaign in the Crimea, and was present at the battles of Alma, Balaklava, Inkerman, and Sebastopol, where he served as Aide-de-camp to General Sir John Burgoyne. He also superintended the laying down the field electric telegraph in the Crimea. Major Stopford was twelve years in the corps of Royal Engineers, his commissions bearing date:—Second Lieutenant, October 1, 1847; First Lieutenant, July 14, 1851; Captain, February 23, 1856; and Major, September 22, 1858. In addition to the Crimean medal, the deceased officer was decorated with the French war medal, the Sardinian medal, the 4th class of the Medjidie, and the Turkish medal.

We regret to announce the death of General Sir Henry Wyndham, K.C.B., Colonel of the 11th Hussars, which took place at Cockermouth Castle on Thursday week. He had been somewhat indisposed for some time back, but his illness did not appear to be of a character to raise serious apprehensions in the minds of his friends as to its result. However, on Thursday evening his death took place. The deceased was about seventy years of age. He was second son of the third Earl of Egremont, who died in 1837, and succeeded to the lordship of the barony of Egremont, and the honour of Cockermouth, as well as to the other estates belonging to his father in this county. The deceased general was one of the few surviving Waterloo veterans. He served in the Peninsula campaigns of 1808-9, 1811, and 1813, including the actions of Robia, Vimiera, Benevente, Albuera, Usagre, Morales de Toro, Villena, and the Pyrenees. He was also present at Waterloo, where he was severely wounded. He entered the service in 1806, and became a general in 1854. He had been Colonel of the 11th Hussars since 1847, and by his death that appointment is now vacant.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

ANDERSON—August 4, at Douglas, Isle of Man, the wife of Captain Anderson, 32nd Light Infantry, of a daughter.
BOSTOCK—August 8, at 54, Chester Square, London, the wife of J. Ashton Bostock, Esq., of a son.

WELLAND—July 22, at Clifton, Sophia Welland, widow of the late Major Frederick Welland, of the H.E.I.C.S.

The decision of the authorities at the Horse Guards, with regard to the late court-martial held at the Cork Barracks, on Staff-Assistant-Surgeon James G. Creasy, on a charge of having been in a state of delirium tremens, brought on by the excessive use of ardent spirits, has just been received. It confirms the decision of the court before which the charge was tried, acquitting Dr. Creasey, who, in consequence, has been released from arrest, and has resumed his official duties.

REOPENING OF THE NATIONAL ASSEMBLY ROOMS, High Holborn, MONDAY, August 13.—The Proprietor begs to announce the completion of the alterations, decorations, &c., of the above popular and splendidly appointed BALL ROOM, which, during the recess, has undergone a complete renovation, is embellished in the most elaborate and elegant manner, including a new and beautifully painted ceiling, and is also furnished in a novel and costly style, and that it will be Re-opened for the Season on Monday next. The justly celebrated Band, conducted by Mr. W. M. Packer, will perform a new selection from Wallace's "Maritana," Jullien's Last Waltz, &c. Doors open at Eight o'clock, and close at Twelve punctually. Admission 1s.

FARMS, ESTATES, &c.

MESSRS. HEARLE & CO., LAND AGENTS AND SURVEYORS, 5, Crescent Place, Blackfriars, E.C., direct attention to the very great facility for Letting and Selling Farms and Estates, afforded by the extensive circulation of their printed Lists, containing upwards of 200 farms and estates, which are published twice per month, and distributed to some hundreds of applicants, free. These Lists contain estates throughout England to be let or sold, especially suitable to the requirements of noblemen and gentlemen of the Naval and Military profession.

MONEY.—MONEY ADVANCED at a few hours' notice, on the most advantageous terms, to Noblemen, Officers in the Army, Heirs to entailed estates, and Gentlemen of property, on their personal security, also on security of reversions to landed estates, at 5 per cent., payment of which may be deferred until possession, on application to Mr. DICKER, 10, Craig's Court, Charing Cross, S.W.

MONEY.—Noblemen, Officers in the Army, Persons holding Government Appointments, Clergymen, and other Gentlemen, can have ADVANCES upon their notes from a private channel without life insurance or delay, and with secrecy.—Apply to Mr. HUDSON, 28, Regent Street, Piccadilly, W.

SOYER'S SULTANA SAUCE, RELISH, SUCCULANTE, AROMATIC MUSTARD, &c.—These excellent Preparations, of which the *Lancet* in its sanitary analisation of Articles of Food reported so favourably of their Purity and Wholesomeness, are to be obtained of all Grocers and Italian Warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes; impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE & BLACKWELL, Purveyors to the Queen, 21, Soho Square, London, W.

TEA.—The Newspapers and Price Currents daily report that COMMON Teas are dearer, and FINE are cheaper. What is the reason of this? Because common (and not fine) is sold to the Public. STRACHAN & Co. guarantee that their Black Teas, from 3s. 8d. to 4s. 2d., consist only of the FINEST descriptions.

26, Cornhill, E.C.

No connection with any other house.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, HILL & MILLARD, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

CAMP AND CABIN FURNITURE.—Illustrated Priced Catalogues of the Newest Description of Portable Furniture, Portmanteaus, Despatch and Dressing Cases forwarded on application to Messrs. WOOLF & SON, 59, Piccadilly, opposite St. James's Street. Estimates for Uniform for any branch of Her Majesty's Service, post free from their Army and Navy Contracting Establishment, 45, Old Bond Street, W., one door from Piccadilly.

THE INCOMPARABLE BEDS, FOR AIR OR HOT OR COLD WATER (AYCKBOURN'S PATENT).—These Beds may be filled with air or hot or cold water, they require no tossing about (or making as it is termed), are easily washed, are light and portable, may be packed in a carpet bag, and therefore invaluable to EMIGRANTS, YACHTSMEN, NAVAL AND MILITARY OFFICERS AND TRAVELLERS. They form in an instant Six or more Swimming Belts, and will stand any climate. No Emigrant should leave this country without one or more of these Beds.

Beds, 6 feet long by 3 feet wide, price 3l., and 7s. 6d. extra for every 6 inches additional width. Pillows, 20s. Inflating Apparatus, 2s. 6d. Will be forwarded on receipt of Money Order by BENJAMIN GEORGE, corner of Ware Street, near the Canal Bridge, Kingsland Road, N.E.

J. DENT & CO., FURNISHING UPHOLSTERERS, 30, 31, 32, and 99, Crawford Street, Baker Street, W. Every article of the best description.

OFFICERS IN THE ARMY will find the best assortment of PORTABLE MILITARY FURNITURE, and Articles for Barrack and Camp service generally, at HILL & MILLARD'S Portable Military Furniture and Outfitting Warehouse, 7, Duncannon Street, Trafalgar Square, W.C. Illustrated catalogues on application. Manufacturers and Patentees of the Army Chair, Square-mouth Travelling Bag, Despatch Box, Writing & Dressing Case, &c., &c.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary defining power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. BURROW, Great Malvern, Worcestershire.

EDWIN KESTERTON, COACHBUILDER, 93 AND 94, LONG ACRE, LONDON, W.C.

STAR & GARTER HOTEL, PORTSMOUTH, Adjoining the Floating Bridge.

JOSEPH SPENCER, Proprietor, many years manager, now sole proprietor of the above old established Hotel, has great satisfaction in assuring his numerous patrons that the remodelling of the establishment being now complete, he is enabled to offer increased accommodation at moderate charges. The attention of Officers of the United Services, Yachting Gentlemen, and Private Families, is very respectfully invited to this Hotel, which will be found replete with comfort.

A private Billiard Room. Hot and Cold Baths.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Gloves and Belts*),

172, NEW BOND STREET, LONDON, W.,

And Sold by all respectable Chemists throughout the Empire.

NERVO-ARTERIAL ESSENCE, prepared only by Dr. WM. BATCHELOUR, M.R.C.S.E. 1835, and M.L.A.C. 1834. It strengthens the vitality of the whole system without reaction, and speedily removes nervous complaints. In bottles, at 2*s.* 9*d.*, 4*s.* 6*d.*, 11*s.*, and 33*s.*, at Goodyer's, 31, Regent Street, W.; Butler & Crispe's, 4, Cheapside, E.C.; Sutton & Co., Bow Churchyard, E.C.; Barclay & Sons, Farringdon Street, E.C.: 12, Finsbury Place South, City, E.C., and all Chemists.

RUPTURES. — HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—circumference two inches below the hips. Price single, 12*s.*; double, 18*s.*; postage 10*d.* and 16*d.* Illustrated circulars on application to Mr. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

BY HER MAJESTY'S ROYAL LETTERS PATENT. (GRANTED 1860.)

MR. A. ESKELL, SURGEON DENTIST, 8, Lower Grosvenor Street, W., Sole Inventor and Patentee of an Invention which has for its object the Perfect and Painless Adaptation of ARTIFICIAL TEETH upon a novel principle, whereby one set of teeth lasts a lifetime, and a second, or reserve set, is unnecessary. Changes take place in the mouth from absorption of gums, removal of stumps, teeth, &c., and ordinary sets would, under these circumstances, be comparatively useless, or only rendered available at some cost, but upon Mr. Eskell's patented process they are not impaired in the slightest degree. Residents abroad or in the country have it in their power to adjust their artificial teeth at all times without the aid of a dentist. Mr. Eskell does not grant licences to use his patent, which can only be obtained at his residence, 8, Lower Grosvenor Street, where the medical profession, the nobility, gentry, and the public may see specimens, and obtain every information. Teeth stopped, &c. All consultations free.—8, Lower Grosvenor Street, S.W.; and Bennett's Hill, Birmingham.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 7, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

PHARMACIE FRANÇAISE, 57, PRINCES STREET, LEICESTER SQUARE, W.C.—LE MAOUT, Chemist, from Paris.—Medicamens Spéciaux Remèdes Raspail—Capsules Le Maout—Ricord's Medicines, Plants, and all French Medical Articles. Prescriptions accurately prepared. Chloroform Capsules for Sea-sickness.

TAVARESSE'S PATENT FLEXIBLE CAPSULES, by which Castor Oil and nauseous Balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with Gelatine. These Capsules may be obtained of BELL, 338, Oxford Street, W.; HOOPER, Pall-Mall East, S.W.; KEATING, St. Paul's Church Yard, E.C.; and medicine vendors throughout the kingdom.

EVANS & LESCHER, London, Patentees.

KEATING'S PERSIAN INSECT DESTROYING POWDER.—FLEAS IN DOGS, POULTRY, &c., are instantly destroyed, as also Bugs, Beetles, and every other insect, by this Powder, which perfectly harmless to animal life; sportsmen particularly will, therefore, find it invaluable. Sold in packets, 1*s.*, 2*s.* 6*d.*, and 4*s.* 6*d.* each, or post free for 1 or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79, St. Paul's Churchyard, London, E.C. Take notice, each genuine packet bears the above name and address. Sold by all druggists.

TWILIGHTS, MILDEW, BED-BUGS.—GISHURST COMPOUND, patented for protecting and destroying these and other pests. See *Gardeners' Chronicle*, *Cottage Gardener*, and *Field*. In boxes, 2*s.* 3*s.*, 10*s.* 6*d.*, retail of all Nursery and Seedsmen. Wholesale of PRICE'S Patent Candle Company, Limited.

THE NEW PERRYIAN RED INK PEN is warranted not to discolour red ink, or corrode any other inks. Price 1*s.* per card of 12 pens and holder. Sold by all Stationers.

PERRY AND CO.'S IMPROVED PATENT ELASTIC BANDS, for universal use, at greatly reduced prices. 3*d.*, 6*d.*, and 1*s.* per box, and upwards. Sold by all Stationers. Wholesale by PERRY & Co., Manufacturers and Patentees, 37, Red Lion Square, W.C., and 3, Cheapside, London, E.C.

Office, 1, York Street, Covent Garden, W.C.; and all Booksellers.

A SPLENDID PRESENT for the SEASON, "THE OVERLAND ROUTE TO INDIA," illustrated with 32 large choice Engravings, from pictures by Grieve, Telbin, and Absolon, forming a handsome folio volume, and is a most interesting pictorial detail of the entire route from Southampton to Calcutta. This beautiful work was lately published at two guineas; the whole stock is now offered in its original rich binding for only Twelve Shillings and Sixpence complete.—Prospectuses to be had of, and post-office orders made payable to, EDWARD LACEY, 434, West Strand, London, W.C.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.

Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.

"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald*.

Liverpool, 134, Duke Street.

Just ready for publication, uniform with the Pocket Editions of the "Field Exercise" and "Queen's Regulations."

A MANUAL OF MILITARY LAW, for all Ranks of the Army, Militia, and Volunteer Services; comprising an Account of the Constitution, Composition, and Procedure of Courts-Martial; and a Detail of the Crimes that may be tried and the Sentences that may be awarded by each description of Court. Also, a Notice of the Practice and Procedure of Courts of Inquiry, and a Short Exposition of the Law of Evidence. To which is added, an Abstract of the Acts governing the Volunteer Force; an Account of the Law relating to Recruiting; and a Review of the Duties, Obligations, and Liabilities of Soldiers to Civilians and the Civil Power; of the Duties of Civilians towards the Military; and of the Legal Rights, Privileges, and Exemptions of Soldiers. By Colonel J. K. PIPON, Assistant Adjutant-General at Head Quarters, and J. F. COLLIER, Esq., of the Inner Temple, Barrister-at-Law.

London: WM. H. ALLEN & Co., 7, Leadenhall St., E.C.

VOLUNTEER RIFLE CORPS.—NOTICE. In consequence of the heat and fatigue experienced by gentlemen after exercising and review, many have been induced to try OLDRIDGE'S BALM OF COLOMBIA, which invariably has produced such a peculiar refreshing coolness to the head, that it has become a most valuable toilette requisite. It also nourishes and strengthens the roots and body of the hair, prevents it falling off or turning grey, and causes a beautiful appearance, with wave or curl, at the same time cleansing it and removing the scurf. 30 years' celebrity has proved there is no wash equal to it for improving and producing new hair, whiskers, and moustache. Price 3*s.* 6*d.*, 6*s.*, and 11*s.* per bottle. Wholesale at C. & A. OLDRIDGE'S, 22, Wellington Street, Strand, W.C.

SEQUELIN'S OIL.—This Vegetable Preparation is an infallible restorative of the hair, eyebrows, whiskers, and moustaches, &c., producing growth, checking its falling off almost instantly, and imparting to it unequalled softness and brilliancy. One bottle is sufficient. Price 6*s.* and 10*s.* The money returned if not effectual. Sold by the Inventor, SEQUELIN, 40, Wharton St., Lloyd Sq., W.C., London.

EDWIN KESTERTON, COACHBUILDER, 93 and 94, LONG ACRE, LONDON, W.C.

HANDBOOK — SOUTH WALES. Map, post 8vo.

From the *Times*.

"MR. MURRAY has succeeded in identifying his countrymen all the world over. Into every nook which an Englishman can penetrate he carries his distinctive RED HANDBOOK. These familiar and invaluable HANDBOOKS now comprise our SOUTHERN COUNTIES, including the coast line from DOVER TO THE LAND'S END. This series is intended to proceed until it maps out and includes the entire island; but in the meantime this very considerable instalment deserves a welcome, for it supplies a long felt want, and supplies it satisfactorily."—*Times*.

WANTED, a MESSMAN, for the Officers' Mess 78th Highlanders. Apply to Mess President, Edinburgh Castle, inclosing terms and testimonials.

NORTH AND EAST YORK MILITIA ARTILLERY.—To Non-commissioned Officers of the Royal Artillery, Royal Marine Artillery, and Indian Artillery.—WANTED, for the Permanent Staff, several SERGEANTS. Applications to be sent to the Adjutant, Scarborough, Yorkshire, by whom all inquiries will be answered.

SOUTH MIDDLESEX RIFLE VOLUNTEERS.—WANTED, for the above Corps, a PERMANENT HEAD DRILL SERGEANT, who will be required to make himself generally useful, and to do the Orderly Room duty. Salary, 52*l.* per annum, and one suit of uniform. Apply to the Adjutant, personally, at Beaufort House, Walham Green, S.W.—SPENCE D. TURNER, Captain and Adjutant, South Middlesex Rifle Volunteers.

THE LONDON VOLUNTEER FUSILIERS. Minimum height 5 feet 6 inches. Gentlemen desirous of JOINING the above Corps, organising under distinguished patronage, are requested to apply to W. E. SHEARMAN, Esq., late 87th Fusiliers, Hon. Sec. Uniform, scarlet, &c. Annual subscriptions, 1 Guinea; Ditto, Honorary Members, 2 Guineas.
25, Conduit Street, Regent Street, W.

ROYAL NAVAL ESTABLISHMENT,
EASTERN PARADE, SOUTHSEA.
(LATE MR. THOMAS EASTMAN'S, R.N.)
CONDUCTED BY MRS. EASTMAN.

The studies of the Pupils are under the direction of Mr. GEORGE E. SPICKERNELL, the Head Master, assisted by other Masters, for many years with the late Mr. EASTMAN.

The following gentlemen have recently passed from this Establishment as Naval Cadets—Messrs. Hough, Dugdale Coddington, Gissing, Lindeman, Bancroft, Campbell, Herbert, Kingscote, Wells, Baring, the Count F. Metaxa, Messrs. Massy, Watkins, and Joyce.

350 Gentlemen have passed from this Establishment as Naval Cadets, and more than 200 as Marine Cadets, &c. &c.

The highest references can be given. Applications to be addressed to Mr. SPICKERNELL.

NAVAL CADETS.

OF THE 43 SUCCESSFUL CANDIDATES at R. N. College, 12th June, TEN were prepared at NORTH GROVE HOUSE, SOUTHSEA, viz., Messrs. Stewart, Gabbett, V. Orlebar, Henderson, Master, Fellowes, Sidney Smith, Blackett, Millett, Knollys. Mr. Mounsteven, who passed first at the Competitive Examination for Marine Cadetships, was also prepared at North Grove House.
W. BELL, Chaplain, R.N.;
A. BURROW, Chaplain and Naval Instructor;
W. JOHNSON, Naval Instructor.

ROYAL NAVAL ACADEMY.—Of the many pupils prepared at the Academy conducted by MR. C. F. COOPER, R.N., not one has failed to pass, and eight have taken 1st, 2nd, and 3rd places at the Royal Naval College.—Address, Beresford Place, Southsea.

NAVAL AND MARINE CADETS, ETC.

THE REV. THOS. KNIGHT, B.A. Hon. St. John's, Cam., receives PUPILS for the Royal Navy, Army, Woolwich, and Addiscombe. NINE out of ELEVEN of Mr. Knight's Pupils PASSED at the Royal Naval College, 12th June, 1860, taking 1st, 2nd, 3rd, 6th, 7th, 11th, 11th, 17th, 19th places in the respective divisions of 99 candidates, of whom 62 passed and 37 failed.—St. Mary's Hall, Southsea, Hants.

ROYAL MILITARY ACADEMY, WOOLWICH, S.E.

At the recent Competitive Examination for admission into the Royal Military Academy, Woolwich, commenced on the 30th ultimo, the following gentlemen passed directly and on first trial from Mr. R. B. DE BURGH'S MILITARY ESTABLISHMENT, Dublin:—

Mr. G. C. Bayley,	5th Place.	Mr. F. B. Knox.
Mr. T. Fraser,	9th ,,	Mr. C. W. E. Murphy.
Mr. H. M. Hayes,	13th ,,	Mr. C. F. B. Grey.
Mr. R. G. Scott,	17th ,,	Mr. W. H. Rathborne.

The number of successful candidates direct from Mr. De Burgh being greater than that from any other Establishment in the United Kingdom.

At the Examination held in January, 1860, the following gentlemen (the only candidates direct from Mr. De Burgh's) passed on first trial:—

Mr. W. J. Galway.	Mr. R. A. Livesay.
Mr. J. L. Morgan.	Mr. C. Greer.

Mr. Galway obtained 4432 Marks and the Tenth Place; and Mr. Morgan 4108 Marks and the Fourteenth Place. These high Marks were obtained without the aid of Classics, their Marks for Mathematics alone having been 2555 and 210 respectively.

ROYAL INDIAN MILITARY COLLEGE, ADDISCOMBE.—At the late Competitive Examinations for admission into the Royal Indian Military College, held in January, 1860, and May, 1860, the following gentlemen (the only candidates direct from Mr. De Burgh's) passed on first trial:—

Mr. H. Hardinge	...	...	... 2nd Place.
Mr. L. F. Boileau	...	...	... 12th ,,
Mr. T. R. Disney	...	...	... 25th ,,

At the above Examinations, the successful candidates direct from Trinity College, Dublin, had been under Mr. De Burgh's tuition.

Mr. De Burgh's references to the Parents of present and former pupils include the following:—The Right Hon. and Right Rev. the Lord Bishop of Meath, the Right Hon. Joseph Napier, Venerable the Archdeacon of Meath, Colonel Lake, C.B.; Colonel Knox, J.P.; Colonel Morgan, R.A., Swansea.

No. 6, Harcourt Street, Stephen's Green, Dublin.
July 30th, 1860.

ARMY EXAMINATIONS.—Candidates for the Artillery, Line, and Cavalry, are rapidly and efficiently prepared at an establishment, the pupils of which have, within the last two years, come out seven times first, five times second, and three times third on the list. Apply to Captain LENDY, Sunbury, S.W.

THE ARMY, WOOLWICH, ADDISCOMBE, DIRECT APPOINTMENTS.—An OXFORD GRADUATE, very successful in the above examinations, has VACANCIES for TWO resident or non-resident PUPILS. Able tutors attend, and the pupils receive an amount of individual attention not obtainable in large establishments. Terms moderate and inclusive. References of a high order.—Address B. A., 28, Queen's Road, Haverstock Hill, N.W.

STAFF EXAMINATIONS.—Twenty-four Officers have already joined the Military College of Sunbury this year, to read either for the Staff College, or for direct appointment on the Staff. Apply to Captain LENDY, Sunbury, S.W.

HANWELL COLLEGE, Middlesex, W., is still retaining its high character; it has long been known as one of the most successful Institutions in the kingdom. A Prospectus will be forwarded on application to the Rev. Dr. EMERTON, Principal.

MILITARY EXAMINATIONS.—MR. PINN, B.A., 8, Clifton Road, St. John's Wood, N.W., PREPARES CANDIDATES (resident or not) for Woolwich, &c., or for direct commissions. His great experience as a tutor, entire devotion to the work, and the small number he receives, ensure rapid and solid progress. He has always passed his pupils. Terms moderate.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to OSWALD HUNTER, Esq., The Cedars, Putney, S.W.

SELECT CLASSICAL AND MILITARY ESTABLISHMENT, HOLLAND HOUSE, BLACKHEATH, by T. KIMBER, M.A., Author of "Vauban's First System," &c. References:—The Rev. Dr. Jelf, King's College, London; the Rev. Canon Hey, York, &c. Prospectuses can be obtained from Rivington's, Waterloo Place, S.W.; Parker & Son, 445, West Strand, W.C.; Ponsonby, Dublin; The Library, Cheltenham; Stotheran, York.

*** Arthur E. Havelock, who gained the highest number of marks at the examination in June for admission to Sandhurst, passed from Holland House.

MILITARY EXAMINATIONS.—A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

ARTILLERY EXAMINATIONS.—Candidates for the Competitive Examinations are individually prepared at an establishment which receives six pupils only for that branch of the Service. Four resident professors. Apply to X., care of Messrs. PARKER, 445, Strand, W.C.

SPECIAL MILITARY TUITION, including Geometrical and Military Drawing, Hindustani, Fortification, Military Surveying and Reconnoitering. By Lieut.-Colonel MORLAND, who also continues the preparation of candidates for Addiscombe and the Military Competitive Examinations.—At 20, Norland Square, Notting Hill.

ARMY EXAMINATIONS.—An OFFICER, the Author of "Army Reform," "Our Military System," "The Sandhurst Course," "Radetzki's Campaign in 1848," &c., &c., who has passed numerous gentlemen for the Guards, Line, and Artillery, and all without one failure, and who has now the sons of a Duke, a Marquis, and of a General Officer amongst his pupils, ATTENDS AT THE RESIDENCES OF CANDIDATES any distance in or out of Town. Reference to Officers and others. Address, H. A., ARMY AND NAVY GAZETTE Office, 16, Wellington Street, W.C.

HOME TUITION.—A MARRIED CLERGYMAN, the Curate of Childs, near Hampstead, Graduate of Oxford, late Scholar of his College, much experienced in tuition, wishes to receive into his house SIX PUPILS, to whom he offers every educational advantage, together with the comforts of a home. Terms, eighty guineas.—Address Rev. J. E., Childs' Hill, Hampstead, N.W.

EDUCATION IN FRANCE.—TWO GENTLEMEN, one an English and the other a French Protestant, with the assistance of five highly-qualified Masters, PREPARE 14 YOUNG GENTLEMEN for the Competitive Examinations for Woolwich, Sandhurst, Addiscombe, the Indian Civil Service, and direct appointments in the Army. Terms, 50 to 60 guineas. Address, B.A., Post-Office, St. Pierre, Lés Calais.

H. J. & D. NICOLL'S Establishments for Gentlemanly and Moderate-priced Clothing, REGENT STREET, CORNHILL, & MANCHESTER.

THE CAPE PALETOT, INVERNESS CAPE, or SLEEVED CAPE, used in private life, as well as for Volunteer Corps.

H. J. & D. NICOLL, 114, 116, 118, 120, Regent Street, W.; 22, Cornhill, London, E.C.; and 10, St. Ann's Square, Manchester.

CLOTHING FOR YOUTH.—The KNICKERBOCKER, the Highland Dress, Ladies' Travelling Mantles, Riding Habits, and Pantalons de Dames à Cheval, with much novelty and general excellence, H. J. & D. NICOLL have for the remainder of this season at WARWICK HOUSE, 142 and 144, Regent Street, W. In the autumn this branch will be removed to the rear of the old Establishment.

VISITORS TO THE SEASIDE AND TOURISTS will find much ease and comfort in the NEUTRAL-COLOURED LOOSE COAT, fastened by one or more buttons, with Trousers and Vest, all of one material, as originally introduced by Messrs. NICOLL, of Regent Street, W., and Cornhill, E.C.; they recommend also a Black Velvet Coat, and for gentlemen seeking a kind of half-dress morning coat a fine black cloth is specially prepared; this garment is edged with braid and cut somewhat as a riding-coat, and is getting into general use.

NEW REGULATIONS FOR NAVAL CADETS, for passing the College may be obtained on application to B. JOSEPH & Co., or sent post free to all parts of the world, with full list of prices of Outfits for young gentlemen entering the Navy.

A large stock of fashionable clothing at moderate prices may be had either ready made or made to order in a few hours' notice at the Hall of Commerce, 92 & 93, Queen Street, Portsea. B. JOSEPH & Co., Proprietors.

COLT'S REVOLVER RIFLES AND PISTOLS, AND NEW MODEL SHOT AND BALL GUN, for Naval, Military, and Sporting purposes, Travellers, and House protection. Rifles, 36-44-, 56-, 100th calibre; 18, 21, 24, 27, 30-inch barrel.

REVOLVERS, large, medium, small bore; 4, 5, 6, 7½-inch barrel; 5 and 6 shots. Descriptive price list free.—For SALE, Wholesale and Retail, by the Patentee and Manufacturer, SAM. COLT, 14, Pall Mall, S.W.
Avoid counterfeits and base imitations.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.
Gun Factory Established 1780.

THOMAS WILSON'S BREECH-LOADING RIFLE.

Mr. Thomas Wilson begs to call the attention of the public to his new BREECH-LOADING RIFLE, and to state that he has committed the working of the patent to Messrs. Rabone, Brothers, & Co., of 47, Broad Street, Birmingham, to whom all inquiries or other communications may be addressed.

This Rifle is well adapted for all branches of Her Majesty's Service, and is pronounced by the highest authorities to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—

1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.

2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.

3rd. It is easy to manufacture, and can be made entirely by machinery.

4th. It is so constructed that accident from careless loading, or otherwise, is impossible.

5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly, for firing, without the aid of tools. This facility would be occasionally valuable in rendering the Gun useless to an enemy, or to mutinous troops.

6th. The action is always in good order, requiring no adjustment in use.

7th. The action is equally applicable to single and double-barrel Guns, and may be used for sporting as well as military purposes.

8th. The principle can be applied to all ready-made Enfield guns, at an immense saving to the country.

Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.

A pattern may now be seen at Mr. Lancaster's, No. 151, New Bond Street, W.; and at Mr. Pritchett's, No. 86, St. James's Street, London, S.W.; as well as at Messrs. Rabone, Brothers, & Co.'s, 47, Broad Street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 568 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60*s.* per 1000; blank, 33*s.* per 1000.
Manufactured by THOMAS H. ANTHONY, 37, Broad Street, Birmingham.

ELEY'S AMMUNITION, comprising WIRE CARTRIDGES for killing game at long distances, WATERPROOF PERCUSSION CAPS, GUN-WADDINGS, BREECH-LOADING CARTRIDGES, and every description of Sporting and Military Ammunition.—ELEY BROTHERS, Sole Contractors to the War Department for Jacob's Rifle Shell Tubes, Cartridges and Caps for Colt's, Adams', and other Revolvers; Enfield Ammunition, &c.; Gray's Inn Road, London, W.C. Wholesale only.

WE are not aware whether the ordinary forms in which the vote for Coast Defences has been taken, admit of any subsequent alteration in the plans intended to be carried out when the money was asked for. If not, the necessary modifications had better be made before the bills finally pass through Parliament, as it is evident that it would be most unwise that Ministers should be so hampered, or prevented from laying out the money so freely granted, in the very best manner calculated to secure the safety of the kingdom. We make these remarks, not merely on account of the letter of Major-General Napier, which appeared in the *Times* in the course of this week, pointing out two weak points in the Commissioners' scheme of defence for Portsmouth and the Isle of Wight; though, of course, any suggestion coming from so high a quarter ought to receive due attention from the authorities, which we may presume would be the case, whether made publicly or, as we must say we think would be the more proper course, if made confidentially to the War Department. There are, however, some things bearing on such subjects which cannot be kept secret for ever; and among these nothing can be regarded of greater importance in war, since the discovery of rifled ordnance, than what has now been *proved* can be done, by means of iron and steel, to neutralise a cannonade. When the Coast Defence Commissioners made their report, and even when the vote was taken in the House of Commons for six millions sterling, to be applied in carrying out their recommendations as regards the sea defences of our dockyards, it was supposed—a supposition, indeed, based upon all experiments made up to that time—that iron-sided vessels could not resist shot, and that "masonry work" was after all the best thing for our money. But the recent experiments made at Portsmouth, of which we gave an account in last week's number, upon Jones's angular target, have completely altered the whole problem. Parliament voted the money for the defences of our dockyards to seaward, believing the Government to have obtained the best opinions on the subject; but a discovery having since been made which must revolutionise the main principles of fortification, Government is bound, in the spirit of the grant made to them for the defences of the realm, to make use of that discovery, and expend the grant in the way which may now appear to be most effectual.

Mr. Jones, of Liverpool, who has patented his invention of angulated armour-cased sides for ships of war, has behaved with great public spirit. At a large expense he prepared a target, sloped at an angle of 45 degrees, for diverting shot, and invited the authorities to do their best to penetrate or smash it—as they had invariably done when firing at the wall-sided floating-battery Trusty. These plates were subjected to a test tenfold more severe than was ever attempted against iron plates before, and they stood the test. They were only fixed upon deal instead of oak or teak; they were fired at with a 68-pounder gun, and at but 200 yards' distance; and the only result of 17 shots, striking exactly on the same spot, was to hammer out the iron a little, but the plates were neither penetrated nor broken. When the Trusty was fired at, even at 400 yards, sometimes the shot went clean through at the first stroke; or, if not, at the second shot the plate was penetrated, or broken and started off from its timbers. In fact, as was stated in the *Times* of the 10th instant, "this plate manufactured in the Mersey must be one of the finest plates ever forged to have stood so successfully the very severe tests to which it has been subjected." What masonry work, let us ask, would have stood anything like such a concentrated battering? A martello tower has since been tried, and crumbled to dust from a distance of upwards of 1000 yards!

But we must hasten to point out some of the obvious results that must flow from the success of these experiments. That the bolts from an Armstrong or Whitworth gun can be diverted by means of 4½-inch iron and 3½-inch steel plates, if properly constructed, is now a public fact. The French know it as well as we do. If we do not apply it, they will. And let it not be supposed that, although we recently described affairs at Cherbourg as all very quiet, the French Emperor has been doing nothing towards discovering what Mr. Jones has proved can be accomplished. We know that no effort has been wanting across the Channel to perfect the manufacture of the iron armour intended for their new floating-batteries; and so far back as February, 1859, it was stated in *Galignani* that attempts had been even then made so to shape such armour as to cause the shot to glance. Well, then, we take for granted that the building of the Warrior and Mars on the old principle, with vertical sides, will at once be suspended, and that the new principle will be applied to them. It has been recently stated that all the old floating-batteries are to undergo examination, and be furbished up, with the view of their being immediately brought into use in aid of the coast defences. To this, as a temporary measure, there can, of course, be no objection. In fact, the Trusty, moored at No Man's Land, would perhaps be as effective as the stone battery they proposed to build there. But this brings us to the all-important question—now that we can have invulnerable floating-batteries, capable alike of maintaining a fixed station and manœuvring in a general engagement, and which can be constructed with tenfold the rapidity of any masonry, and be almost as durable,—whether we should not defend our dockyards and coasts by means of these, as our second sea-line, instead of by fixed fortifications?

Let us see what the Royal Commissioners have said in their Report bearing upon this question. In the first place, what has been the effect of our latest improvements in artillery upon fixed fortifications? "The invention of artillery of longer range and more accurate aim, has rendered all defences designed for the earlier state of war incapable, without very extensive additions, of defending the places for the protection of which they were designed." (Report, § 19.) So, if you advance your works to meet the improvements of to-day, some fresh discovery is made, a gun of still longer range is invented, and your advanced works are thrown away. It is true that by carrying out these to an enormous extent, in anticipation of the improvements of years, you can meet that objection; but then the extent of garrison and of the expense become so great that this is impracticable. But that is not all. Throughout the evidence taken by the Commissioners, every naval officer gave it as his opinion that even wooden ships-of-war could now steam in past any fixed batteries you could build, and would probably sustain very little damage in doing so. The Commissioners, therefore, especially recommended the building of iron moveable floating batteries, as "highly efficient for defensive purposes," and "most serviceable as auxiliaries to the permanent fortifications for the defence of harbours and inner waters." (§ 23.) If they could speak thus of wall-sided batteries built on the old plan, intended to resist shot by mere strength of material alone, what would they not say of scientifically constructed vessels, off the sides of which the most powerful shot would bound or glance, and do no damage whatever?

The able Committee of Naval Officers over whom Sir Thomas Maitland presided, who furnished the Royal Commissioners with this idea of iron moveable floating batteries, proposed that these vessels should have their guns mounted on turn-tables under shot-proof cupolas (the invention of Captain Cowper Coles, R. N.); and that they should be capable of steaming about 10 knots an hour, and that the iron-plated floating-batteries already existing should also co-operate with them. (§ 23.) Here, then, is the germ of a perfect system of sea defences. Let us have the Isle of Wight, the Needles, and Spithead protected by invulnerable vessels of new and scientific construction, without masts, with guns under cover, capable of accomplishing a speed of 10 or 12 knots an hour, and what enemy will dare approach us? These floating movable batteries would lie at bay in such positions as to bar the approach of any vessel, and keep the enemy beyond the range of any guns either now existing or which may hereafter be invented. They could stand across the path of any venturesome commander, and if passed by any chance, they would follow after the enemy, and give him plenty to do behind, or sink him, before he could get into harbour. This would be our reply to Cherbourg. Besides our ordinary Channel fleet, we should have a second and elastic line of defence, of invulnerable vessels, cautious about moving at all from certain bounds, but ready also when the enemy should be found in full force, to concentrate an overwhelming destruction upon him. Would not six millions sterling give us eighteen or twenty such vessels, to guard our shores far around our principal dockyards, to render any landing impossible, and secure also London from all possibility of attack? If so, shall we waste this money upon masonry-work and immoveable fortifications? And when might we expect to see these built? Or who shall stop the way, and prevent us now taking the lead in the scientific application of iron and steel for all defensive purposes? We have had a Scientific, or War Invention Committee for several years, who have given special attention to iron plates; but they have discovered nothing. Their *forte* seems to have been in resisting all suggestions for experiments, except upon the devoted Trusty. From her they seemed determined to extract some good. Like Balaam and Balak, going from place to place in order to curse Israel, they have taken the Trusty hither and thither—to Portsmouth, to Shoeburyness;—they have fired at her at a distance, and then they have gone to another place, even nearer; but always with the same success. Her clumsy dead-wall sides have been smashed and broken; and they have been forced "to curse her altogether!" A private gentleman, with money and pluck, has however done what the War Department ought to have accomplished. The necessary experiments have at last been made—all honour to Mr. Jones! But the next step must be taken by Government. The matter is in the hands of the Admiralty. How soon might we have a sufficiency of invulnerable steamers? Or, are we to be surprised, by the expected European crisis, in the midst of jog-trot building and building, and only woke up to our desperate folly, by the arrival of vessels from France, all cased in invulnerable angulated armour, quietly copied from English inventions, neglected by the Government of England?

We publish in another column a letter from the Minister for War to the Lord-Lieutenants of counties, inclosing the expression of Her Majesty's pleasure at the brilliant sight witnessed by her at Edinburgh on the 7th of this month. The two great demonstrations of the North and the South respectively, at Holyrood and Hyde Park, are enough to make the year memorable in the history of the country; and the minor manifestations of the popular strength and patriotism at Newton-le-Willows last week, and those at Knowsley and Gloucester, which have yet to take place, are only numerically less gratifying than the Royal displays in question. We believe that in future we may look forward to one or two similar inspections by Her Majesty; and it ought to be the aim of each of the national corps to take a conspicuous position among its fellows on these occasions.

THE ARMY.

1st Life Guards. A squadron under the command of Captain Lord MountCharles is doing duty at Hampton Court.

3rd Dragoon Guards. Captain J. C. Boucher has obtained sick leave to England.

6th Dragoon Guards. Lieut. Buchanan has obtained sick leave to England; Lieut. Gifford is on sick leave to Mussoorie to November 1; and Lieut. Pereira to Deyrah to October 15.

7th Dragoon Guards. Captain J. V. Cleland has arrived home in charge of invalid detachments from Kurrachee. Cornet Drake is on sick leave to Murree to November 18.

1st (Royal) Dragoons. On Wednesday the non-commissioned officers and privates assembled in the garrison schoolroom, Arbour Hill, Dublin, to present the following address, the accompanied by a very handsome silver cup and salver, to Rev. Mr. Halpin. The address was read by Sergeant-Major Norris. "Reverend Sir,—We, the non-commissioned officers, and privates of the 1st (Royal) Dragoons, beg most respectfully that you will accept this small token of our esteem and respect as a memento from us. You having been our pastor and kind adviser for a period of nearly four years, we cannot let this opportunity pass without expressing our deep and heartfelt regret at your departure from amongst us. We also offer up our prayers for your safety and prosperity on this earth, and may every blessing and happiness await and attend you when in a foreign land, is the fervent hope of your humble servants. Signed on behalf of the non-commissioned officers and privates of the 1st (Royal) Dragoons, John Norris, Sergeant-Major." This is the second testimonial from the Royal Dragoons to the Rev. Mr. Halpin, several of the sergeants' wives having presented him last month with a very beautiful silver inkstand, to testify their esteem, and regret at his departure from Dublin.

6th Dragoons. Lieutenant the Hon. W. O. B. Annesley is about to retire from the Service.

7th Hussars. The depôt has moved from Canterbury to Maidstone. Lieutenant R. D. Steuart has been appointed to act as adjutant vice Lieutenant Topham, appointed to the command of the Rohilcund Horse. Assistant-Surgeon Slaughter has passed in Hindostanee.

10th Hussars. Cornet Holford has been examined as to his fitness for promotion to the rank of Lieutenant.

17th Lancers. Cornet Young and Assistant-Surgeon Clery have sick leave to England. The leave to Calcutta granted to Major Knight is cancelled at his own request.

Royal Artillery. The following officers of the Royal Artillery, arrived from England, have joined their respective batteries in India:—Lieutenant Hornsby to Lucknow, Lieutenant Graves to Seetapore, Lieutenant Glasgow to Agra, on first arrival in India. Captain Warren has been appointed deputy-assistant-quartermaster-general to the Royal Artillery in Bengal, vice Addington. Lieutenant L. de Cetto has leave to England under new rules, medical certificate. The following postings and removals of officers of Royal Artillery are ordered to take place:—Captain and Brevet Lieut.-Colonel C. Smith, No. 6 battery, 11th brigade, is appointed to H battery, horse brigade, in Madras Presidency, and will proceed to join. Lieutenant T. R. Oliver will proceed from Allahabad to Madras to join H battery horse brigade, to which he has been appointed. Lieutenant Salmon, from Calcutta to Seetapore, to join No. 3 battery 11th brigade. On the arrival of this officer at Seetapore, Lieutenant W. Smith, from Seetapore to Meerut, to join F battery horse brigade, on being relieved by Lieutenant Salmon. On arrival of Lieutenant Smith at Meerut, Captain Arbuthnot will proceed to Calcutta, *en route* to England. Lieutenant Ford is posted to No. 3 battery 14th brigade, and will remain at Fort William and do duty with depôt Royal Artillery. Captain Whinyates, of the Horse Brigade, is on leave from Aldershot to the 15th of October. Captain Higgon is also on leave from camp to the 14th of September.

Royal Engineers. The 4th company under Lieutenant G. S. Berkeley has arrived home from India, where it had been employed during the mutiny. The memorial arch to the officers and men of the Royal Engineers who fell in the Crimea, which has been some time in progress at Brompton Barracks, is nearly completed; the entire work, with the exception of a few of the ornaments, being finished. The arch, which is one of the handsomest structures of the kind in this country, is surmounted by a broad pedestal, on which appears the following:—"The corps of Royal Engineers to their comrades who fell in the war with Russia, 1854-5-6." The name of every officer and man of the Engineers who lost his life in the Crimea is engraved on the arch. It is understood that Her Majesty will be present on the occasion of the ceremony of "opening" the memorial arch.

Scots Fusilier Guards. The 1st battalion has moved from the camp at Aldershot to Wellington Barracks, to be stationed.

6th Regiment. The following committee of paymastership, consequent on the death of Paymaster M'Donald, has been appointed—Major Catty, Captain Unwin, and Captain Powell; Major Catty to perform the duties of paymaster on the responsibility of the committee. Captain W. T. Bartley has leave to England on medical certificate. Ensign F. Helyar has leave to England, under new rules, for four months, from date of leaving the regiment.

7th Regiment. Lieut. Gardner is about to retire from the Service.

8th Regiment. A portion of the 1st battalion has arrived at Gravesend from India with Captains Meade and Stebbing and Lieutenant Moynihan, V.C. The head-quarters will be stationed at Sheffield. Brevet-colonel F. P. Haines, 1st battalion, has resigned his appointment as military secretary to Sir P. Grant, Commander-in-Chief at Madras, from the date of his embarkation, the battalion to which he belongs having been struck off the strength of the Indian establishment from May 5, 1860.

13th Regiment. We are sorry to record the death of Captain Segrave, of the 1st battalion, which occurred in Wales on the 8th inst. He had been in the Service since 1850, and was present during the latter portion of the operations in the Crimea. By his death Lieutenant H. L. FitzGerald and Ensign Jenkins obtain respectively a company and lieutenancy without purchase. Captain A. Bainbrigge has leave to Ceylon, from June 25 to September 30.

16th Regiment. The 1st battalion is ordered to be attached to the 3rd brigade, at Aldershot.

17th Regiment. The 2nd battalion left Aldershot yesterday morning for Shorncliffe, to be stationed.

18th Regiment. Leave of absence has been granted to Captain G. A. Elliot to England. The 2d battalion is ordered to be attached to the 3d brigade at Aldershot. Lieut.-Colonel Sir H. Havelock is on leave to the 23rd of October.

24th Regiment, 1st battalion. Captain R. G. A. de Montmorency has leave to Murree, from June 1 to October 15. Surgeon R. Gamble is on sick leave to Simla and hills north of Deyrah, from May 16 to September 30.

27th Regiment. Lieutenant H. M. Caine has passed in Hindoostanee.

38th Regiment. Brevet-Lieutenant-Colonel Loftus is on leave from April 14 to October 20. Ensign W. W. Miller is ordered to act as instructor of musketry to his regiment.

42nd Regiment. Lieutenant the Hon. R. H. Stewart has passed in Hindoostanee.

43rd Regiment. Lieutenant H. C. Talbot has leave to England viâ the Cape of Good Hope.

45th Regiment. Ensign Caldwell has leave from Aldershot to September 30.

48th Regiment. Captain W. H. Knight has passed in Hindoostanee.

51st Regiment. Major W. Agg is on leave home for eighteen months from date of quitting the regiment under new rules. Captain R. G. Mason and Lieutenant L. C. Hamilton have leave home on medical certificate. The depôt is ordered to move from Chichester to Chatham.

52nd Regiment. Quartermaster Knott has arrived in England.

57th Regiment. Colonel H. J. Warre has reported his arrival and assumption of his duties as Acting Military Secretary to His Excellency the Commander-in-Chief in India.

58th Regiment. Captain Hall is on leave from Aldershot to October 31. Ensign Dane is ordered to be examined as to his fitness for promotion.

60th Rifles. Ensign Barker, who is under arrest at Winchester, has sent in an application for leave to sell.

69th Regiment. Captain J. W. H. Anderson has leave to England under new rules for eighteen months from date of leaving the regiment.

70th Regiment. Lieutenant Backhouse is acting as Quartermaster to the regiment.

71st Regiment. We hear from India that a court-martial, assembled at Morar, has sentenced George Campbell, a private in this regiment, to imprisonment with hard labour, in the fortress of Agra for two years, for stabbing a comrade. Agra Fort is the hottest prison in India, and, according to to an Indian paper, "the sentence is equivalent to death."

73rd Regiment. The reinforcements for this regiment, to the number of 259 non-commissioned officers and men, will embark at Gravesend to-day in the Gosforth. Lieutenant J. W. Miles has leave to England for eighteen months.

77th Regiment. Captain M. W. Dickson is on leave to Darjeeling, from May 6 to November 6, on medical certificate.

81st Regiment. Lieutenant Harnett and Quartermaster Correll have arrived home from India. Lieutenant H. J. Faircloth is ordered to act as instructor of musketry to his regiment. Lieutenant G. F. Jellicoe has leave to Murree, in extension, from May 14 to October 30, on medical certificate.

82nd Regiment. Lieutenant T. Acton (on civil employ) has leave to England for six months, from date of embarkation. Ensign C. Worthy is to proceed to sea for six months, on medical certificate.

83rd Regiment. Captain Wright has taken command of the depôt at Chatham.

88th Regiment. Brevet-Major E. D. Radcliffe is on leave to Mussoorie, from June 1 to November 1 on medical certificate; Lieutenant J. B. Whitla is on leave to the hills north of Deyrah, from May 23 to August 22, 1860, on medical certificate; Lieutenant E. A. Perceval has leave to Simla, from 10th June to 24th August, on medical certificate.

91st Regiment. Lieutenant F. Pike is to act as Brigade-Major to the Queen's troops in Madras, during absence of Brevet-Major Sir C. W. Cuffe, Bart.

93rd Regiment. Captain R. S. Williams has leave to Cashmere from June 10 to October 10. Lieutenant A. O. Tabuteau has leave to Cashmere from June 20 to September 20.

98th Regiment. Captain S. H. H. Edwards has arrived home from India in command of invalid detachments of various regiments in Scinde, the Punjab, &c.

100th Regiment. We find the following in a Canadian paper:—"We regret extremely to notice in the *Gazette* issued by the War Office on the 3rd of July, the appointment of two gentlemen cadets from the Royal Military College to Ensigncies in this regiment. The names of these young men, H. W. Ashford and G. W. Prior, are quite unknown to us, and we shall be happy to learn, what at present we very much doubt, that they are so connected with Canada as to warrant their appointment to this, our own peculiar regiment, raised by ourselves from among our own people. The commissions, in short, we were led to believe, would be conferred upon Canadians alone." The 100th Royal Canadians are not exclusively officered from the natives of Canada, no more than the ranks are exclusively filled from the same colony, which only contributed about one-fourth of the regiment.

Rifle Brigade. Lieutenant C. E. Buckley, of the 3rd battalion, has passed in Hindoostanee. Colonel Macdonell, C.B., is on leave to the 28th February, 1861. Lieutenant C. G. Slade, 1st battalion, is on leave from Aldershot to September 30.

Cape Mounted Riflemen. The depôt of this regiment (forming a portion of the Cavalry Depôt at Canterbury) is now upwards of 100 strong, and consists for the most part of fine lads of 18 years of age and under. The rule as to age and standard (the latter not exceeding 5 feet 3 inches) insures a body of men well adapted to this popular corps, of which the late Lieutenant-General Sir George Cathcart, on first seeing one of its squadrons ride out to skirmish with the enemy, remarked "It was the only regiment of light cavalry in Her Majesty's service." Lieutenant Talbot de B. Hughes has arrived home on leave from the Cape.

Cavalry Depôt, Canterbury. The troops of the Cavalry Depôt paraded on Wednesday, for the purpose of witnessing the presentation of medals with gratuities for long service and good conduct to Troop Sergeant-Major James E. Hampton, 8th Hussars, and Sergeant Malley, of the Cavalry Depôt Staff. Colonel Gibsone, on the occasion, in an eloquent and impressive manner, pointed out to the young soldiers of the garrison what was attained by good conduct. The troops, previous to being dismissed, marched past in an admirable manner.

Colonel John Stewart Wood, C.B., who has just been appointed Deputy-Inspector-General of Constabulary in Ireland, has returned to Aldershot, where he discharges the duties of Adjutant-General. After to-day he will commence his duties in the constabulary. Colonel Wood has seen a great deal of military service in India and in the Crimea, has several medals for distinguished conduct, is a Knight of the Legion of Honour, and a member of the Turkish Order of the Medjidie of the Fourth Class. Entering the army as ensign in 1831, he served with the 48th Regiment in the Coorg campaign, in India, in 1834, and in 1838 and 1839 he served as aide-de-camp to Sir Robert Sale in the Affghanistan campaign. In the subsequent campaign in Affghanistan, in 1842, he was present in nearly every battle, including those of Jellalabad and Tezeen, and at the capture of Cabool. Colonel Wood also served during the Crimean war as Assistant-Adjutant-General to the third division of the Army, and for the last five years has been Adjutant-General to the Aldershot division.

The subject of the new knapsacks was mentioned in the House of Commons on Thursday evening by Colonel French, who asked the Secretary of State for War whether the present regulation knapsacks were ever under trial before they were ordered to be adopted in the Line; if so, by what regiments, and for how long a period; who invented or recommended the adoption of the stick which now passes along the upper portion of the knapsack next the men's shoulders; who were the contractors who furnished these knapsacks with the sticks across them; from whom did the contractors receive the orders for their supply to the troops; and what proportion of these knapsacks was given to each contractor to supply. Mr. S. Herbert said the following was the report on the knapsacks:—"The present pattern knapsack with stick was sealed on the 11th of May, 1857. It had been previously tried by regiments and depôts at home. The stick was introduced at the recommendation of Lieutenant-General Sir George Wetherall, then Adjutant-General, the idea being taken from a Swiss knapsack. The knapsack being an article of necessaries, the property of the soldier, the addition of the stick to the pack was made by degrees by the men at the recommendation of the Adjutant-General. The knapsacks are supplied by the *Government* to recruits only, and for this purpose contracts were entered into with the following tradesmen for the new pattern of 1857:—Messrs. Grover & Co., Marks & Co., Prater, Dolan, & Co., Ireland & Sons, Hibbert & Co., Gilpin & Co., Isaac & Campbell, Bryan & Co."

SHORNCLIFFE CAMP.

Major Bell, of the 37th Company of the Kent Rifle Volunteers, has joined the 2nd Royal Cheshire Militia at Shorncliffe, for the purpose of going through a complete course of squad, company, and battalion drill with the above corps.

Ensign Carmichael has joined the regiment, on appointment.

Nine hundred and seventy rank and file and 36 officers marched into camp on the 17th inst., occupying the C Range, lately vacated by the Royal Antrim Artillery, who have marched to Woolwich.

COLCHESTER CAMP.

The announcement of the removal of Major-General Wood from the command of this camp has occasioned considerable regret amongst the officers of the staff and of the several depôts, by whom he was highly esteemed for the gentlemanly and courteous yet firm manner in which he conducted the command of the camp.

The total number of men who have within the past few weeks left the camp for foreign service has been about 1000 rank and file. Inconvenience having been experienced in forwarding married men and their wives and families with the drafts from this camp, they have been sent on by other ships from time to time. On Wednesday several married soldiers belonging to the 34th and 54th Regiments, with their wives and children, embarked on board the Conway at Birkenhead to proceed to India.

During the week several changes have taken place in the staff of this camp. Major C. C. de Morel will relieve Brevet-Colonel E. A. G. Muller at Stirling Castle, and His Royal Highness the Commander-in-Chief has appointed Major H. A. Welman, Acting Adjutant of the 5th Depôt Battalion, at Parkhurst, to join the 9th battalion here, and supply the vacancy occasioned by Major de Morel's removal. Staff-Surgeon H. A. M'Dermott, in medical charge of the 10th depôt battalion, has proceeded to the Gold Coast, relieved by Staff-Surgeon J. M. G. Laing. Deputy-Commissary-General Napier has received orders to proceed to India, and will leave immediately on the arrival of Deputy-Commissary-General Marsh from Malta, his successor.

Drafts of men are now periodically sent to Landguard Fort for rifle practice, and for some months about 200, gleaned from the several depôts, have been placed under canvas. The weather has been by no means favourable to this mode of encamping troops, drenching rains having fallen almost daily for weeks; nevertheless, the men are in a healthy condition, and, under the command of Major Westhead and a body of rifle instructors, are making most satisfactory progress. The practice ground, situated upon a tongue of land running into the sea, opposite Harwich, is admirably suited for the purpose, its situation being highly promotive of the physical condition of the troops.

DOVER.

The 1st battalion of the 60th Rifles joined the Dover garrison in the early part of last week from India. The whole of the men bear the impress of hard fighting in the late unfortunate outbreak in our Indian possessions. We may add that sickness is not at all prevalent with them, and that they have been fêted to an extensive amount by the inhabitants of this borough.

On Thursday, the 16th inst., a numerous assemblage of the Artillery and Rifle Volunteers of Kent took place at Dover for the funeral of Sergeant Monger of the Cinque Ports Artillery Volunteers, who was unfortunately killed by the explosion of a gun at Archcliff Fort whilst engaged in his duties as a Volunteer artilleryman on the previous Thursday. Nothing that has occurred for some years raised such an excitement in Dover, and at an early hour on the above morning evidence of something unusual taking place was shown by the whole of the flags displayed on the vessels in the harbour, at the Sailors' Home, and other places being displayed half-mast high; 2 o'clock p.m. being arranged for the funeral to take place, the 1 p.m. train to Dover brought many corps, both Volunteer Artillery and Rifle corps, to take part in the mournful ceremony. The road from the general hospital to the end of Snargate Street was lined both sides by detachments of the 47th Regiment, the 1st battalion of the 60th Rifles, and the Royal Artillery, whilst next them were arranged detachments of the Folkestone, Hythe, Sandgate, Ramsgate, Margate, and Sandwich Volunteer Artillery and Rifle corps; besides many from other districts in Kent. The weather was, unfortunately, very wet. In passing through Snargate Street, on the way to the cemetery, the procession was met by the mayor and town council in their robes of office, who fell into the procession, and proceeded to the ground where the funeral service was read by the incumbent of St. James's Parish, after which a salute was fired by a firing party of the Royal Artillery detailed for that purpose. The shops in the line of the procession were closed, and business was universally suspended during the continuation of the ceremony, which was under the direction of Major Field of the Royal Artillery.

The Army Gazette.

WAR OFFICE, PALL MALL, AUGUST 14.

14th Regiment of Light Dragoons—Major-General Allan T. Maclean to be Colonel, vice General the Hon. Sir Henry Murray, K.C.B., deceased.

4th Regiment of Dragoon Guards—Duncan Anderson Farquhar, Gent., to be Cornet, by purchase, vice Royds, promoted.

Military Train—Ensign Edward William Henry Webb, from the 58th Foot, to be Lieutenant, by purchase, vice Bodkin, who retires.

2d Regiment of Foot—William Edward Montague, Gent., to be Ensign, by purchase, vice Bennitt, appointed to the 6th Dragoons.

3d Foot—Surgeon Alfred Crocker, from the Staff, to be Surgeon, vice Barker, appointed to the Staff.

4th Foot—Ensign James Henry McEwen to be Lieutenant, without purchase; Lieutenant Henry Arthur Grey Todd to be Adjutant, vice Ensign Francis Robert Sandys, who resigns the adjutancy only; Charles Greenlaw Leggett, Gent., to be Ensign by purchase, vice Studdert promoted.

12th Foot—William Stewart Hamilton, Gent., to be Ensign by purchase, vice Wallace, appointed to the 6th Dragoons.

16th Foot—Horatio John Thomas Walpole, Gent., to be Ensign by purchase, vice Bell promoted.

18th Foot—Assistant-Surgeon William Orr, from the Staff, to be Assistant-Surgeon, vice Hyde, appointed to the Staff.

19th Foot—Charles Gilbert Fryer, Gent., to be Ensign by purchase, vice Rogers promoted.

20th Foot—Stewart Abercrombie Wroughton, Gent., to be Ensign, by purchase, vice Gibaut, promoted; Charles Ramsay Gibb, Gent., to be Ensign, by purchase, vice Vernon, promoted.

21st Foot—James Whitton, Gent., to be Ensign, by purchase, vice Thorburn, promoted.

25th Foot—William Bigsby Brown, Gent., to be Ensign, by purchase.

29th Foot—Richard Alexander Oswald, Gent., to be Ensign, by purchase, vice Fawcett, promoted.

34th Foot—Ensign Thomas Howard McDougall Murray, to be Lieutenant, without purchase, vice Rutledge, deceased; Ensign Philip Walker, from the 3d Foot, to be Ensign, vice Murray.

53d Foot—Lieutenant-Colonel and Brevet-Colonel William Parke, C.B., from the 72d Foot, to be Lieutenant-Colonel, vice Payn, who exchanges.

55th Foot—Lieutenant Percy Lytton Bellamy to be Captain, by purchase, vice Parke, who retires; Ensign George Wildman Yates Fitzgerald to be Lieutenant, by purchase, vice Bellamy.

57th Foot—Captain John Robert Wilmot has been permitted to take and henceforth use the surname of Grimston only, in lieu of that of Wilmot.

58th Foot—Leonard James Wilkinson, Gent., to be Ensign, by purchase, vice M'Crae, who retires.

65th Foot—Duncan Chisholm Oliver Spiller, Gent., to be Ensign, by purchase, vice White, promoted.

72d Foot—Lieutenant-Colonel William Payn, C.B., from the 53d Foot, to be Lieutenant-Colonel, vice Brevet-Colonel Parke, C.B., who exchanges; Captain and Brevet-Major Charles John William Norman to be Major, by purchase, vice Major and Brevet Lieutenant-Colonel Alexander Dalton Thellusson, who retires; Lieutenant Edward James Upton, to be Captain, by purchase, vice Norman; Ensign Albert Tanner to be Lieutenant, by purchase, vice Upton; Cornet James Elmsley Macaulay, from the 12th Light Dragoons, to be Ensign, vice Sherlock, promoted.

73d Foot—Surgeon Gordon Kenmure Hardie, M.D., from the Staff, to be Surgeon, vice Booth, deceased.

75th Foot—Assistant-Surgeon William Millar, from the Staff, to be Assistant-Surgeon, vice Reid, deceased.

77th Foot—Captain James Lazenby, from half-pay unattached, to be Captain, vice Fosbury, appointed Captain of a company of Gentlemen Cadets, Royal Military College.

89th Foot—Thomas Bedford Urquhart, Gent., to be Ensign, by purchase, vice Osler, who retires.

91st Foot—John Breadalbane Campbell, Gent., to be Ensign, by purchase, vice Elrington, appointed to the 2d Dragoon Guards.

93d Foot—Captain John Bond from half-pay unattached, to be Captain, vice Edward Welch, who exchanges.

95th Foot—Charles William Fiddes, Gent., to be Ensign by purchase, vice Knipe, promoted.

96th Foot—Ensign Frederick Hanniker to be Lieutenant, by purchase, vice French promoted.

UNATTACHED.

Lieutenant James Bunbury Hamilton, from Adjutant Recruiting District, to be Captain without purchase.

COMMISSARIAT DEPARTMENT.

Acting Deputy Assistant-Commissary-General Herbert Taylor Ussher, having completed the required service on the Western Coast of Africa, to be confirmed in the rank of Deputy Assistant-Commissary-General.

CHAPLAIN'S DEPARTMENT.

The Christian name of Fourth Class Chaplain Butler is Edward and not Edmond, as stated in the *Gazette* of the 1st of April, 1859.

HOSPITAL STAFF.

Surgeon Francis Oliver Barker, from the 3d Foot, to be Surgeon, vice Crocker, appointed to the 3d Foot.

Assistant-Surgeon Richard Armstrong Hyde, from the 18th Foot, to be Assistant-Surgeon, vice Orr, appointed to the 18th Foot.

BREVET.

Major Augustus C. Honnor, 1st Bombay Native Infantry, to be Lieutenant-Colonel in the Army.

Captain and Brevet-Major Pearson Scott Thompson, 14th Light Dragoons, to be Lieutenant-Colonel in the Army.

Brevet-Assistant-Surgeon Joseph Walter Raleigh Amesbury, of the Bengal Army, to be Surgeon in the Army.

THE INDIAN ARMY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It may be gathered from the debate that took place in the House of Lords on the 10th inst., relative to the local European force in India, that the astounding announcement which appeared in your well-informed paper of the 28th ult., will prove to be but too correct as to the extinction of half that force.

Besides the artillery, the local European force of the Indian Army consists of twelve regiments of Infantry—six at Bengal, three at Madras, and three at Bombay—together with five regiments of European cavalry in Bengal. It appears by your statement intended to abolish half the infantry regiments, and two out of the five regiments of cavalry.

Such a measure is unnecessary as regards the requirements of the Service, and would prove most injurious and unjust towards a large body of officers. To annihilate half the regiments of infantry and supply their places with new corps from the Royal Army, which must be increased to do so, is to stigmatise them in such a manner as a recollection of their past distinguished services ought to have saved them from. For although great dissatisfaction prevailed among the men of this force in 1858, yet it was caused entirely by the mismanagement of Government, and not the fault of their officers. The Commander-in-Chief could not have considered their conduct mutinous at that time, or he would not have permitted upwards of 2000 of those very men who had taken their discharge to enlist immediately on their arrival in England.

Before the mutiny there were ten regiments of regular native cavalry in Bengal, which were disbanded early in 1858. Five regiments of European cavalry were then formed of 818 men each, to which the officers of every two of the late native cavalry regiments were appointed. In July of that year (1858) the Governor-General represented "That it is very desirable that the cavalry regiments (European) should be ten of 440 sabres each rather than five of 818 sabres each. . . . Should this proposal be complied with it will be necessary that not less than three regiments of cavalry from the English Army should be retained at Bengal for the present."

In the Memorandum from the Horse Guards, dated the 27th of December, 1858, the Duke of Cambridge states in reference to Lord Canning's recommendation above quoted, "In deference however to the opinions so strongly expressed, I would propose a middle course, by forming the ten local regiments of three squadrons each into eight regiments of 500 sabres . . . Four regiments of the line with the eight local corps, would give 6800 men."

It thus appears to be the opinion of His Royal Highness the Duke of Cambridge and the Governor-General of India that about 6500 European cavalry are requisite for Bengal alone, whether line or local, in twelve regiments. Should therefore only three of the five regiments of the local cavalry be added to the line, as appears to be contemplated, a considerable increase will require to be made in Her Majesty's Light Dragoons to meet the demand for Bengal. It would surely be the most just and simple course to pursue, to amalgamate the present five local regiments, complete in officers, horses, and equipments, with the Royal Army.

Should it be determined, however, to obliterate one-half of the local European Army of India, it is difficult to understand how "the rights and privileges of the officers are to be preserved," as has been asserted by the Secretary of State for India they would be. He will find it a difficult problem to solve, unless amalgamation and not destruction be adopted.—I am, &c., QUI HI.

RECOVERY OF SUNKEN TREASURE.—An interesting experiment is in progress for recovering treasure from the 36-gun frigate Lutine, which foundered off Terschelling, on the Dutch coast, sixty-one years ago. The Lutine had been captured by the British from the French, and had been selected to convey an amount of specie, supposed, according to some statements, to be nearly 2,000,000*l.*, partly for the pay of British and Russian troops, and partly for the assistance of Hamburg merchants. During the past thirty or forty years various attempts have been made to recover the treasure, and about 50,000*l.* had, at considerable expense, been obtained, but the wreck ultimately sanded up, and her position was not re-discovered until some fishermen accidentally found a portion entangled in floating ice. Within the last few weeks the parties interested have resolved to employ Heinke's diving apparatus, and the result is that an examination has been effected, which shows that the wreck is at present unusually free from sand, although still buried to a great extent, and that hopes are held out of the possibility of a considerable portion of the treasure being recovered this season.—*Times.*

THE CAMP LIFE OF THE PRINCE IMPERIAL.—A letter from the camp from Châlons, of the 13th, says:—"The weather is so bad manœuvres are not possible; but some experiments with rockets of long and short range have been made before the Emperor, and they, on the whole, succeeded. After dinner yesterday the Emperor took the young Prince to see a balloon with which Godard made several experiments. The spectacle appeared to interest greatly his imperial highness. I can give you some details of the fire in the Emperor's quarters—an accident which, no doubt, rumour will exaggerate. The fire commenced in the pavilion, which on one side touches the residence of the Emperor, and on the other, that of the Prince Imperial. The room in which the conflagration took place was occupied by the women in the service of the Prince, and was occasioned by a flue being too near some woodwork. At the first cries of alarm the Emperor hastened to the Prince's room, and carried him to his own apartment, his imperial highness not being even awakened. The fire was happily extinguished in time to prevent it from reaching the adjacent constructions, which are of wood. The Emperor at once distributed recompenses to the men who exerted themselves in putting out the flames. Part of the wardrobe of the Prince was destroyed, and this morning he had only one pair of bottines left. The gouvernante and the female servants have lost the greater part of their clothing. The prolongation of the stay of the Grand Duke of Baden has prevented the Emperor's departure for Plombières, as he had intended."

THE NAVY.

ADMIRALTY, AUGUST 16.

PROMOTIONS.

Acting Lieutenant to be Lieutenant—Herbert R. Holmes, who served as mate of the Siren, 16, sloop, on the south-east coast of America station, from May, 1857, until promoted to Acting-Lieutenant, 19th May, 1859.

Assistant-Surgeon to be Surgeon—Robert Creighton (1850), who served in the Hawke, 60, in the Baltic, and who has been employed in guard ships at Portsmouth and Woolwich since June, 1856.

Second Masters to be Masters—Charles M. Hughes, Francis Hixson, Frederick Howard, George A. F. Day, Edawrd P. Bedwell, Edward Spence, Robert Gilpin, Richard T. M. Pearce, Robert Brown, Dover Farrant, John A. N. Petch, George Patterson.

APPOINTMENTS.

Captain—J. M. Hayes, to the Tartar.

Commanders—Sholto Douglas to the Espoir; E. W. Shaw to the Curlew.

Lieutenants—Edmund L. Strangways to the Impregnable, 78, at Devonport; Edward M. Hankinson to the Amphion, 36, in the Mediterranean; Herbert R. Holmes to the Donegal, 101, Channel Squadron; John L. Way to the Donegal; C. B. Powell and B. S. Hamilton to the Tartar; Henry Fox to the Curlew.

Masters—Adolphus E. Parks to the Curlew; John E. Chapple to the Tartar; Henry C. Selmond to the Firebrand; Francis B. Henwood to Asia, for service in Shannon; Wm. P. Harris to Amphion; Dover Farrant to Lapwing.

Surgeons—Dr. George Mason to Tartar; Robert Creighton to Curlew.

Mate—Somerbed M'Dougall to the Royal Albert, 121, Channel Squadron.

First-Class Engineer—Henry Brown to the Fisgard, for charge of the machinery of the Spiteful.

Assistant-Surgeons—John Bishop to the Icarus, 11, on the North America and West India station; John Fisher (additional) to the Fisgard; Peter Comrie to the Centurion; James R. Anderson to the Cambridge; W. N. Bennett (additional) to the Victory; W. D. Smyth to Haslar Hospital; Thomas N. Warren to Plymouth Hospital; W. T. Carr and Richard Eustace to the Portsmouth division of Royal Marines; Henry Haddow, confirmed in Scylla; John Cruikshank, confirmed in Aboukir.

Acting Assistant-Surgeons—Charles P. Mulvany to the Gorgon, 6, at Portsmouth; Francis Egan, George Muir, and George V. Hart to the Chesapeake, 51, at China, as supernumeraries; Arthur I. Ireland, to the Lizard.

Acting Second-Class Assistant-Engineer—Matthew Lilt to the Cumberland, for temporary charge of the machinery of the Victor.

Third-Class Assistant-Engineer — Thomas P. Potts to Hornet.

Acting Third-class Assistant-Engineers—Owen Douglas and Thomas Gees Sanders to the Asia; John Richardson to the Asia, as supernumerary.

Midshipmen—John Bradford to the Amphion; Richard W. Hope to the Hannibal.

Assistant-Paymaster—Alfred L. Eversfield to the Asia.

Master's-Assistant—Joseph Southwick to the Espoir.

Clerks — Harry Langsworthy to the Impregnable; Richard Olivey to the St. Vincent; W. H. Bowen to the Blenheim.

COAST-GUARD OFFICE, AUGUST 16.

APPOINTMENTS.

Inspecting-Commanders.—H. G. St. John Mildmay, vice Risk, appointed to the Indus; G. M. Balfour, vice Bowie, placed on the retired list; J. M. Jackson, vice Shaw, appointed to the Curlew.

Ajax, 60, screw guard-ship, Captain John M'Neill Boyd, left Plymouth Sound on Saturday last for her station, Kingstown, which she has safely reached, and resumed her old moorings.

Alecto, 5, paddle steam-sloop, Commander Henry J. Raby, V.C., sailed from Lagos on the 10th of July in search of a notorious slaver sailing under American colours. This craft had, it is stated, made three successful trips. Mr. Brand, the British consul at Lagos, died on board the Alecto on the 16th of June.

Anson, 91, screw liner. According to present arrangements this fine ship will be launched from Woolwich yard on Saturday the 15th of next month.

Archer, 13, screw corvette, Captain A. B. Craufurd, bearing *pro. tem.* the broad pendant of Commodore Edmonstone, while attempting about the latter end of June to ascend the river at Cameroons, got on shore, and was not floated off again until the coals, guns, and other heavy stores, had been thrown overboard. She was subsequently towed to Fernando Po with damaged machinery by the screw steam-sloop Falcon, Commander Arthur E. Fitzroy.

Ariadne, 26, screw frigate, Captain E. W. Vansittart, was at Halifax as part of the royal squadron, on the 1st inst.

Bacchante, 51, screw frigate, Captain Donald M. Mackenzie, flag-ship of Rear-Admiral Sir Thomas Maitland, C.B., was spoken with on the 18th of July in 6° north latitude, 27° west longitude.

Blenheim, 60, screw coast-guard ship, Captain Edward Tatham, arrived at Milford Haven on Sunday last, and took up the moorings formerly occupied by the Eagle.

Briton, target vessel, has been docked at Portsmouth.

Cadmus, 21, screw corvette, Captain Henry S. Hillyar, C.B., was in Port Royal harbour on the 25th of July.

Chanticleer, 17, screw, is rapidly approaching completion at Portsmouth; her decks are being laid, and would be ready for launching at an early date if required.

Cornwallis, 60, screw coast-guard ship, Captain George G. Randolph, passed through the Downs on Monday last from the westward, and has safely arrived in the Humber, and has resumed her station in that river as coast-guard ship.

Cuba, schooner, tender to Imaum, was lying in Port Royal harbour on the 21st of July.

Dryad, 50, screw. This frigate, recently laid down at Portsmouth, has her keel and futtocks in position.

Digitized by Google

There are not many shipwrights employed upon her or upon the Royal Alfred, 80, in the adjoining slip, the strength of the yard being engaged upon the Glasgow and Chanticleer.

Elk, 12, gun-brig, Commander H. Campion, is nearly dismantled of her masts and rigging, and her stores cleared. She is ordered to be paid off at Chatham on Monday next.

A court of inquiry was held on board on Tuesday, by Vice Admiral W. J. Hope Johnstone, in consequence of reports having been made by Commander Campion respecting insubordination and drunkenness on board.

Firebrand, 6, paddle steam-sloop, Commander James M. Bruce, was inspected at Sheerness last Saturday by the Commander-in-Chief, Vice-Admiral Hope Johnstone, and on Monday passed through the Downs. On Tuesday this vessel arrived in the River Colne, off the village of Brightheysea, having been sent down by the Admiralty to confer with the collector of customs, as to certain alleged breaches by the boats of that port of the fishery convention, which prohibits the catch of deep sea oysters within what are called "the fenced months." She left the river on Wednesday, and will continue to cruise off the coasts of Essex and Kent and in the Channel, for the more rigid enforcement of the terms of the fishery convention.

Flying Fish, 6, Commander Charles W. Hope, was at Halifax on the 1st inst. as part of the royal squadron.

Gibraltar, 101, screw-liner, was launched at the top of high water on Thursday afternoon, from one of the building slips at Devonport dockyard. Mr. Peake, the master-builder of the yard, had charge of the launch, which was most successfully performed. Rear-Admiral Sir Thomas Pasley, Bart., was present, as were also His Excellency the French Ambassador and the Comtesse de Persigny, Lord Churston, and many other distinguished persons. The ship was christened by Miss Edgecumbe, daughter of the Hon. George Edgecumbe.

Geyser, 6, paddle steam-sloop, Commander George M. Jackson, has left Portsmouth Sound, and will, it is stated, be attached at present to the Channel Fleet.

Gladiator, 6, paddle steam-sloop, Commander Henry D. Hickly, was at Greytown by the latest accounts. We find that the Atlantic Mutual Insurance Company has presented to Commander Hickley a silver tea service, and a chronometer; to Lieutenant Gilby, the first lieutenant, a chronometer; and to the petty officers and crew a sum of sixteen hundred and fifty dollars, for the assistance rendered to a brig called the St. Mary, on the 5th of October, 1859.

Glasgow, 50, screw, will soon be ready for the caulkers. This vessel is a very fine specimen of the 50-gun class; a good many hands are employed upon her, and she is expected to be launched in about two months.

Gorgon, 6, paddle steamer, Commander Bedford P. C. Pim has been docked at Portsmouth.

Hawke, 60, screw coast-guard ship, Captain W. Crispin, after having received stores at Plymouth, left for Queenstown, where she has safely arrived and taken up her old station.

Herald, 8, Captain Henry M. Denham, was at Sydney when the last mail was despatched to England. The following is an extract of a letter from her:—"My voyage to England is to terminate at Spithead, where I am to be, if what is cut out for me can be accomplished in February next. Nevertheless, as the lines of deep soundings in reference to electric cables and chronometric distances to be measured from this to Timor, Singapore, Ceylon, Mauritius, Cape of Good Hope, St. Helena, and Ascension, will eat up time, I shall be lucky to reach England by the end of March."

Hero, 91, screw liner, Commodore George H. C. Seymour, C.B., was at Halifax on the 1st inst. The following is an extract of a letter from her, dated the 30th of July:—"The Prince left the ship in one of the boats, and at a few minutes before noon landed at the dockyard amid the thunder of salutes from the six British war steamers in port. He was accompanied by the Duke of Newcastle and Governor-General Bruce. He was received at the landing-steps by Lord Mulgrave, who was introduced by the Duke of Newcastle, and with whom he shook hands with self-possessed ease and cordiality, at the same time uttering a few words of gratification, while a pleasant smile lighted up his happy-looking countenance. The mayor and aldermen of the city were introduced on the spot by Lord Mulgrave, when their speaker read an address of welcome to him. The Prince listened calmly and attentively, and at the end read a reply. His utterance was as clear and unfaltering as his mother's, and the expression of face meanwhile just as bland and mposed."

Himalaya, screw steam-ship, Captain Seccombe, left Plymouth on Monday evening for Liverpool.

Hogue, 60, screw coast-guard ship, Captain Reginald J. J. Macdonald, was placed last Monday in the basin at the Keyham steam-yard, and has since been taken into dock in order to ascertain what repairs she may require before returning to her station.

Hornet, 17, screw sloop, Commander William B. Elphinstone, tested her speed at the measured mile, in Stokes Bay, on Tuesday. At the conclusion of the trial she came into harbour to prove her compasses, take in stores, &c. It is supposed her destination is China.

Immortalité, 51, screw frigate, which is fitting out in the steam-basin at Portsmouth, is expected to be shortly commissioned.

Leveret, gun-boat tender, has sailed from Portsmouth for Portland.

Megæra, 6, screw troop-ship, Commander Henderson, arrived at Malta from England, and last from Gibraltar on the 9th inst. She will proceed in a few days to Corfu and Cephalonia, and will convey the 2nd battalion of the Queen's Royals from the latter place to Gibraltar. She will then return to England.

Nile, 90, screw liner, Captain Edward K. Barnard, bearing the flag of Rear-Admiral Sir Alexander Milne, K.C.B., was at Halifax on the 1st inst.

Octavia, 51, screw. This frigate has been lengthened amidship and aft. Her stern and body-posts are in position, and her futtocks are laid ready for her cant timbers. She retains her original bow. She promises to be a fine addition to the converted 40-gun frigate class.

Pembroke, 60, screw coast-guard ship, Captain Edward P. Charlewood, passed through the Downs from the westward on Tuesday for Harwich, where she arrived the same evening, and took up her old moorings.

Perseverance, 2, iron screw troop-ship, Commander Edward R. Power, left Madeira on the 1st inst., for Barbadoes.

Pioneer, paddle steam-vessel, built by Mr. Thompson, of Greenhithe, for the Colonial Department of the Government, arrived at Woolwich on Saturday, to be completed with all dispatch for the Zambesi expedition.

Prince Regent, 131, screw, has been undocked at Portsmouth. The body part of this ship is now in position, and her after futtocks laid on that portion of her stern, where she is being lengthened. She will soon be ready to receive her cant timbers, which are moulded, and appear to be composed of better seasoned wood than has been used lately in Portsmouth Yard.

Prince of Wales, 131, is receiving her machinery in No. 7 dock, Portsmouth.

Prometheus, 5, paddle steam-sloop, Commander Sidmouth S. Skipwith, got on shore in the Sherbro river in the month of June, and had landed her guns and stores with the view of being beached, so that the injuries she had received might be ascertained. The slave trade appears to be flourishing while the number of our cruisers have been diminished. We have two disabled on the coast, with another in attendance on one of the "lame ducks," and another, the Torch, which should before this have been on her cruizing ground, scarcely clear of the Channel. Mr. Buxton has a fair ground of complaint against the Admiralty, and he should at once urge upon their Lordships the necessity of reinforcing the squadron, not on the coast, but at the point of debarkation—Cuba.

Rhadamanthus, steam-vessel, was paid down on Wednesday, and the crew granted leave of absence.

Russell, 60, screw coast-guard ship, Captain George Wodehouse, arrived in Falmouth harbour on Saturday last from Portland, and has taken up the moorings at her old station.

Shannon, 51, screw, is expected to be commissioned shortly at Portsmouth.

Sparrowhawk, 4, screw steam-vessel, Commander John C. Byng, arrived at Hong Kong on the 10th of June.

Styx, 6, paddlewheel steam-sloop, Commander John H. Cave, was at Halifax on the 1st inst., and had been employed in conveying His Royal Highness the Prince of Wales from one point of interest to another.

Supply, steam-vessel, Master-Commanding Balliston, has discharged several cases containing ancient mosaics and sculpture, which were excavated from the supposed site of Carthage, under the direction of the Rev. Nathan Davis. These antiquities were on Wednesday forwarded from Woolwich to the British Museum.

Tartar, 20, 250-horse power and 1296 tons, at Sheerness, has been commissioned, and is to have a complement of 250 officers and men. Captain John Montagu Hayes, who has been appointed to her command, entered the Navy in 1829. He has served in the Mediterranean, on the coast of Africa, South America, East Indies, and commanded the Phœnix, 6, in the White Sea during the late Russian war.

Torch, 5, screw steam-vessel, Commander F. J. Smith, sailed from Portsmouth on Sunday for Plymouth and the West Coast of Africa. It is to be hoped that the Torch will now be able to get away to her station without any further necessity of repairs.

Valorous, 16, paddle steam-frigate, Captain William C. Aldham, C.B., was at Halifax on the 1st inst., and had on one occasion embarked His Royal Highness the Prince of Wales.

Wizard, screw gun-vessel, built by Messrs. Smith, of Newcastle, arrived at Woolwich on Wednesday for completion. Five other vessels of this class, viz., the Britomart, Lee, Mullet, Dart, and Snipe, are now in a forward state at Woolwich, and when completed will, it is reported, be furnished with an armanent of rifled ordnance for service in China.

A court-martial was held on board the Impregnable guardship in Hamoaze, Devonport, on Saturday last, to try Mr. John James Patterson, third-class gunner of the Geyser, 6, paddle-wheel sloop, Commander George M. Jackson, on the following charges:—1st. Neglecting to obey orders when directed, first, by Commander Jackson, and secondly, by Senior Lieutenant Silverlock, to give in a written statement of the powder, shells, and arms in the Geyser, having stowed the stores in a manner unsatisfactory to Commander Jackson. 2nd. For having on the afternoon of the 6th instant been drunk and unfit for duty, and when asked by Commander Jackson for the keys of the magazine, being unable to recollect what he had done with them. 3rd. For having two stone jars, each holding about three pints of shore rum stowed in his cabin, without first having received permission from Commander Jackson to bring them on board. The prisoner pleaded not guilty to the first charge and to that part of the second which involved drunkenness; but pleaded guilty to not having known where the keys of the magazine were (they were in the possession of a gunner's mate) and also to the third charge. The court having taken into consideration the high character of the certificates produced by the prisoner did only adjudge him to be dismissed from the Geyser, and to be rendered ineligible for promotion for three years.

At a "Competitive Examination for Marine Cadetships," held at the Royal Naval College, Portsmouth, on the 8th, 9th, and 10th inst., cadetships were awarded to Messrs. Peters, Mathias, Cassan, Campbell, Armstrong, Tupman, Spalding, Moore, and Gibson. Two of the foregoing were prepared at the establishment of "North Grove House," by Messrs. Bell, Barrow, and Johnson, who also prepared Mr. Mountsteven, first at the last competitive examination.

Mr. John Creasey has been appointed store-keeper at Sheerness Dockyard, vice Bedford, removed to the office for the affairs of India.

Fifty-four boys from the Hastings, at Liverpool, arrived last week at Plymouth, and were entered immediately on board the flagship Impregnable, in Hamoaze.

The China mail, with dates from Hong Kong to the 23rd June, Amoy 17th, Foochow 15th, and Shanghai 14th, which was delivered in London on Monday last, brought us very little news in connection with our naval forces, beyond that which we gave in our impression of last week. The following were the stations of Her Majesty's ships, and those lately belonging to the Hon. East India Company by the last accounts:—At Hong Kong: the British steamers Arracan, Australian, Beagle, Esk, Feroze, Pioneer, Ringdove, Sphinx, and Sydney; the gunboats Bouncer, Cockchafer, Grasshopper, Hardy, Haughty, Insolent, Janus, Sparrowhawk, Starling, and Weazel.—At Canton River: the British steamer Highflyer, and the gunboats Staunch and Watchful.—At Amoy: the British sloop Acorn.—At Shanghai: the British steamers Cruiser, Furious, and Nimrod, and the gunboat Woodcock.—At the North: the British frigates Cambrian and Actæon; the steamers Adventure, Atalanta, Bentinck, Berenice, Centaur, Chesapeake, Coromandel, Encounter, Fury, Hesper, Imperieuse, Inflexible, Magicienne, Odin, Pearl, Roebuck, Sampson, Scout, Simoom, Snake, Urgent, Vulcan, Waterman, and Zenobia; and gunboats Algerine, Banterer, Bustard, Clown, Dove, Drake, Firm, Flamer, Forester, Havre, Kestrel, Leven, Opossum, Reynard, Slaney and Snap.

The following letter has been addressed to our leading contemporary: "Sir,—Permit me through the medium of your journal to return my sincere and heartfelt thanks on behalf of myself and 27 of my crew to Captain Hornby and the officers of Her Majesty's steamship Tribune, for their manly, generous, and humane conduct in rescuing us from the ship Sarah and Emma, of Liverpool, when foundering in latitude 47 S., longitude 85 W., on the 8th of May last. By giving this a place in your columns, you will much oblige, sir, yours faithfully, R. Walker, Master.—Liverpool, Aug. 10."

In the House of Lords on Monday evening last, the Earl of Shrewsbury moved for the production of certain correspondence between captains on the Reserve List of the Navy and the Board of Admiralty, commencing November, 1859. In doing so, the noble earl stated that the object he had in view was to bring under their lordships' attention the case of a number of officers to whom he believed injustice had been done by the new scheme of the Admiralty, which proposed giving to officers who retired after 60 years of age a retiring allowance of 18*s.* a-day. The officers whose interests he advocated were not included in that plan, and desired to participate in it.—Lord Chelmsford also supported the claims of the officers adverted to.—The Duke of Somerset explained that, in the present case he had followed the uniform practice of the Board of Admiralty and the rule laid down by all Orders of Council since 1851 with regard to captains on the Reserved List. His Grace remarked that Lord Chelmsford had argued the question like a sea-lawyer, and he was not prepared to encounter him with an equal amount of legal knowledge. He would, however, have no objection to produce the correspondence moved for, provided that he should at the same time give that which had subsequently occurred.—After a few observations from the Earl of Hardwicke, who strongly supported the case of the captains on the Reserve List, the Earl of Shrewsbury consented to the amendment suggested by the Duke of Somerset, and the motion was agreed.

A correspondent of the *Moniteur de la Flotte* states that the destruction by fire of the Reine des Clippers, was owing to the carelessness of a man who accidentally set fire to a cask of brandy with a naked light, which he was holding in his hand. The crew had barely time to escape with their lives, losing all their effects as well as arms. The man who was the cause of the catastrophe was severely burnt.

The Navy Gazette.

ADMIRALTY, August 14.

NEW LIGHTHOUSE IN THE ADRIATIC.

This *Gazette* contains a notice from the Hydrographic Office, Admiralty, stating that official information has been received that a light has been exhibited since the 10th of July from the lighthouse recently erected on Monte dei Cappucini, to mark the position of the port of Ancona, on the western coast of the Adriatic. This notice affects the following Admiralty Charts:—Adriatic Sea, sheet 2, No. 200; and Ancona, No. 1880; also Mediterranean Lights List, No. 207.

WAR OFFICE, PALL MALL, August 17.

The *Gazette* announces that the distribution of proceeds and tonnage bounty of the slave-vessel Kate Helen, captured on the 15th September, 1858, by Her Majesty's ship Viper, will commence on Thursday the 23rd instant, at Somerset House.

The following are the shares due to an individual in the several classes:—

	£	s.	d.		£	s.	d.
Flag share	51	18	2	Sixth class	20	5	8
Lieutenant-Commanding	123	5	10	Seventh class	13	10	6
Fourth class	40	11	2	Eighth class	6	15	3
Fifth class	22	10	8	Ninth class	4	10	3
				Tenth class	3	6	0

Notice is also given that the distribution of proceeds and tonnage bounty of the slave vessel Rufus Soule, captured on the 11th October, 1858, by Her Majesty's ship Viper, will commence on Thursday, the 23rd inst., at Somerset House.

The following are the shares due to an individual in the several classes:—

	£	s.	d.		£	s.	d.
Flag Share	37	8	5	Sixth class	14	12	4
Lieutenant Commanding	88	17	6	Seventh class	9	14	10
Fourth class	29	4	9	Eighth class	4	17	6
Fifth class	16	4	10	Ninth class	3	5	0
				Tenth class	1	12	6

NAVAL GOOD-CONDUCT BADGES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—When every nerve is being strained to make the Naval Service more popular with the men, I cannot but think that if the following suggestions were carried out by the Admiralty, it would be esteemed a great boon to the sailors.

On the detachment of Marines being embarked, an embarkation-sheet accompanies them, with the information, which is read over to the men before leaving barracks, when they will become entitled to one or more badges, provided their subsequent conduct merits the distinction, the pay which accompanies it, and a consideration when their pension becomes due.

I would ask why should not the same information be afforded to the seamen? Nothing would be easier than to transmit before leaving England, after the complement be completed, a duplicate of the description-book, when a list could be prepared at Somerset House, and forwarded to the ship, to be read to each man on his passing at muster after its receipt. As the case now stands, the routine is for a man to inquire from the clerk how his servitude stands. There is, I venture to state, a great deal of grumbling on this head on the lower deck of most of our men-of-war. A sailor takes for gospel all that comes from the "Admiralty."—I am, &c.,

IRON-CASED SHIPS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It is almost unnecessary for me (having already published my opinions) to express how entirely I agree with Colonel Alexander in his general views and proposals, for the necessity of a second line of defence, as a coast patrol, for the safety of our shores, irrespective of our sea-going fleet.

Allow me to express my great pleasure in reading your able review of this "unpretending brochure," giving an importance to the subject through your valuable and widely-circulated GAZETTE, that cannot fail to draw the attention of the country to the development of our natural resources for "maintaining command of the Channel," which is now admitted by all to be of such vast importance to the country.

You have kindly made allusion to my shield. but as it might be inferred that my shield is only adapted for small vessels, may I ask you to quote the following paragraph? "This most valuable invention can be applied, not only to small vessels, but to ships of the largest size." Again, in a lecture at the Royal United Service Institution, I stated that a ship with my shields, of the same dimensions as the Warrior, would have a broadside of 26 guns, in lieu of only 18, as the Warrior now has, and also of bringing 4 guns right ahead and astern.

I see in the *Times* that the present floating-batteries are to be put in order, and placed for the protection of our dockyards; this, although but a small step in advance, shows that the Government are aware of the importance of iron-cased floating-batteries.—I am, &c.,

COWPER P. COLES, Captain R.N.

THE MILITIA.

MILITIA ESTIMATES COMMITTEE.—The select committee appointed to prepare estimates of the disembodied Militia of Great Britain and Ireland for the year ending the 31st of March, 1860, consisting of Mr. Sidney Herbert (chairman), General Peel, Mr. Headlam, Sir G. C. Lewis, Mr. Ellice, Sir J. Ramsden, Mr. Clive, Colonel Kingscote, Colonel Wilson Patten, Colonel Smyth, Colonel Pinney, and Colonel North, have had two sittings. At the first it was ordered that all Lieut.-Colonels Commandant of Militia should be added to the committee; and at the second the committee considered the estimates, which were agreed to, and the chairman was directed to report them to the House. The committee then broke up.

The Militia Gazette.

WAR OFFICE, PALL MALL, AUGUST 14.

Royal North Lincoln Militia—Her Majesty has been graciously pleased to accept the resignation of the commission held by Captain William Longstaffe.

WAR OFFICE, PALL MALL AUGUST 17.

Northamptonshire Regiment of Militia—Ensign Henry Charles Chaves Lucena to be Lieutenant.

Worcestershire Regiment of Militia—John Barber, Esq., to be Lieutenant.

NATIONAL DEFENCES.—An estimate has just been published of the sums required to be voted for the ensuing financial year for fortifications at home and abroad. The fortifications required abroad are not expensive, and 49,832*l.* only are asked on their account. For the fortifications at home the sum required is 545,523*l.* Of the items which make up this amount the largest is 80,000*l.*, required for the western defence of Devonport Dockyard. This sum is, of course, only the first instalment of that which will be required to complete the work, namely 240,000*l.*; and the same remark may be applied to all the items mentioned in the estimate. Among the larger items are the following:—70,000*l.* for the improvement of the defences of Dover, 16,000*l.* being also required for a casemated officers' barrack in the citadel of the same place; 50,000*l.* for the sea defences of Pembroke; 65,000*l.* for the intermediate forts for the defence of Portsmouth, in addition to which 15,000*l.* will be required for the Stokes Bay lines; 35,000*l.* for the Helsea lines; 12,000*l.* for the Southsea lines; 2500*l.* for improvements in Cumberland Fort; and 300*l.* for a battery at Hurst Castle. The sum required for the defences of commercial harbours, including the Humber, is 75,000*l.*, a sum to which, however, 347,000*l.* will have to be added before the work is complete; and 5000*l.* is required for Volunteer batteries.

SIR W. G. ARMSTRONG AND HIS WORKPEOPLE.—On Monday evening a most interesting meeting took place at the Elswick Engine and Ordnance Works, Newcastle-on-Tyne, very little short of 4000 people attending a tea party there to celebrate the anniversary of the mechanics' institute, reading-room, and school of art, supported by Sir W. G. Armstrong and Co. and their workpeople. This firm now employ 2000 men and lads, the men, from the very nature of their occupation, being of the highest class of skilled workmen. Classes, it seems, are kept open during the winter for the instruction of workmen and their sons, teachers being employed by Sir W. G. Armstrong and his partners. Seventy-eight young lads had attended the ornamental free-hand drawing class, and sixty the mathematical class; and one of the most interesting features of the meeting was the distribution of prizes amongst those who had excelled as students. A silver watch, gold chain, and box of tools, purchased by the managers and workmen, were also presented to Henry Gurnell, one of the apprentices, who had exhibited great personal heroism in rescuing a drowning lad from the river Tyne. Sir John Fife, the Rev. W. Maughan, Mr. Barkas, Mr. Hutchinson, Mr. Glynn, and other gentlemen delivered speeches to the large assembly.

The Dutch squadron, under the command of Commodore W. Wipff, which made its welcome appearance in Malta harbour during the early part of the month, has received orders by telegraph to proceed to the coast of Syria, in order to protect the subjects of His Majesty the King of the Netherlands, and to obtain reparation for the insult and injury done to the Dutch consul at Damascus The commodore's vessel, the Zeeland, left for Beyrout on the 5th inst.

M. de Baulincourt, the French military attaché at Berlin, has been killed in that city by a fall from his horse.

VOLUNTEERS.

METROPOLITAN.

THE HON. ARTILLERY COMPANY.—A good proportion of the members of the City of London Hon. Artillery Company, accompanied by the regimental band, have left for Sandown, in the Isle of Wight, where it is the intention of the corps to establish its head-quarters during the next fortnight, for the purpose of carrying out a course of ball practice on the sands of its bay. The marching of this celebrated regiment though the town of Portsmouth created great enthusiasm amongst its inhabitants, every one appearing to be determined on giving them a warm reception.

LONDON RIFLE BRIGADE.—On Saturday afternoon the members of this brigade assembled in the Guildhall, and preceded by their splendid band, marched to the Waterloo station of the South-Western Railway, from whence they proceeded by train, under the command of Lieut.-Colonel Hicks and Major (Alderman) Rose, to Bushy Park, to keep the ground for the Queen's Westminster Volunteer corps, during their inspection by Colonel M'Murdo, Inspector-General of Volunteers. The brigade now numbers upwards of 1600 effective members, and for some time past preliminary musketry inspection has been given in the grounds of the Crystal Palace, where their armoury and butt have been erected. The latter is now completed, and it is positively asserted that targets will be placed there immediately, to enable the members to commence ball practice.

QUEEN'S WESTMINSTERS.—The announcement that this corps would be reviewed at Bushy Park on Saturday attracted a large number of persons to the locality. The corps left town by the half-past two o'clock train, and arrived on the ground shortly after three o'clock. They took up their position in an open space in the park, under the command of Earl Grosvenor, amidst the cheers of the visitors. Colonel M'Murdo, who was appointed to inspect the corps, was in attendance, accompanied by Colonel Hicks, Major Rose, and other officers. The evolutions of the corps were most satisfactory; and Colonel M'Murdo expressed himself highly pleased with them, observing that in the event of an invasion of this country they would be found to be an efficient defence. The corps subsequently enjoyed themselves in hurdle jumping and such-like amusements, and the review terminated in a most satisfactory manner. TheSt. Margaret's Corps. On Monday evening upwards of 80 gentlemen connected with this corps supped at Gibbon's King's Arms Hotel, Bridge Street, Westminster. Captain Elliot presided. The occasion of the supper was the presentation to Lieutenant Crawford, of the Royal Artillery, the original drill-master of the corps, of a beautiful claret cup, bearing an appropriate inscription. The supper was magnificently served, and the evening was agreeably passed.

THE VICTORIA RIFLES.—On Saturday evening last the Victoria Rifle corps (Colonel the Duke of Wellington), the oldest of all the Rifle Volunteer corps, mustered at their practice-ground, Kilburn, under the command of Lieut.-Colonel Colville, to receive a silver bugle at the hands of the Duchess of Wellington. Shortly after six o'clock a numerous and fashionable assembly of ladies and gentlemen, amongst whom were many of the nobility, having assembled on the ground at Kilburn, the corps was formed into three sides of a square, when the Duchess of Wellington, escorted by a bevy of ladies, advanced towards the centre of the square, the silver bugle, worth upwards of 50*l.*, bearing an inscription commemorative of the presentation, being borne on an elegantly embroidered silk velvet cushion, and the Duchess being met at this point by the officers. Her Grace, in a few brief but appropriate observations, presented the instrument to the corps, handing it to the senior captain, who, having addressed some suitable acknowledgments to the Duchess and the ladies by whom Her Grace was accompanied, its reception was announced by a general salute, and the band struck up a spirit-stirring air.

ST. GEORGE'S RIFLES.—The prizes shot for during the annual course of the present year are to be awarded on the 20th of October. The principal prizes are as follow:—A challenge cup, the property of the corps for ever, to be held for one year by the member who has the honour of winning it. The first prize, the gold medal of the St. George's, will be awarded to the winner of the challenge cup. The second prize, a silver tankard, value 10*l.* will be awarded to the member who gains the greatest aggregate number of points throughout the course in the first period, with a proviso that he is a marksman with a minimum of seven points. The third prize, a silver goblet, value 7*l.* 10*s.*, will be awarded to the best shot in the third class, standing. The fourth prize, a silver cup, value 5*l.*, will be awarded to the best marksman in each company. The fifth prize is a Whitworth rifle, presented by a lady on certain conditions. Ties will be shot off in the usual manner according to the class of the range to which they refer.

LONDON IRISH.—On Saturday this corps marched out from head-quarters, Hungerford Hall, headed by its band. During the week the ordinary drills have taken place.

9TH (WEST) MIDDLESEX RIFLES.—The advanced members of this corps, to the extent of nearly 100, have been recently engaged in musketry instruction at Wormwood Scrubbs, whilst the general members have been attending, as usual, company drill. An additional establishment has been opened by the corps, at Allen's Riding School, Seymour Place, and the cadet company just formed is progressing very satisfactorily. The corps went through a series of evolutions on Saturday at their head-quarters, Lord's Cricket Ground. About 250 rank and file were present.

7TH (ISLINGTON) MIDDLESEX.—On Saturday afternoon the members of this corps assembled at head-quarters, and marched, headed by the drums and fifes of the Coldstream Guards, to the Albany Street Barracks, where the 29th (North) Middlesex were already mustered. The two corps then proceeded to the Regent's Park, where they were put through several battalion movements by Captain Ebsworth of the 7th Middlesex, who expressed his satisfaction at the steady and soldier-like bearing of the men. At the conclusion of the drill, the two corps marched to the head-quarters of the 29th Middlesex, where a plenteous supply of refreshments was provided by the members of that corps. In separating for the night, the 7th Middlesex expressed their thanks for the handsome treatment they had received, by giving three cheers for their brother Volunteers of the 29th, which were most heartily responded to by that corps.

12TH (BARNET) MIDDLESEX RIFLES.—On Saturday last this corps mustered in the barrack square, Barnet, and preceded by the excellent band of the 2nd Edmonton Militia regiment, marched to Hadley Hurst to be sworn in. This ceremony, which has been delayed by a variety of local circumstances, was completed with considerable *éclat* under the presidency of Lord Radstock. The corps afterwards partook of a sumptuous dinner, provided by the liberality of Captain Wilbraham Taylor, whose unavoidable absence in the north of England was a subject of deep regret. The day's proceedings were brought to a close with some volley firing, which was effected with great steadiness and precision, the result of the extensive practice in musketry which the local advantages enjoyed by this corps enables it to secure.

19TH (WORKING MEN'S COLLEGE) MIDDLESEX.—The drill is continued every evening at head-quarters, in Queen's Square; and the St. Luke's and St. Ann's Soho companies drill in their respective localities.

37TH (BLOOMSBURY) MIDDLESEX. — On Saturday afternoon the members assembled at the Foundling Hospital, and marched out to Hornsey for ball practice for advanced members.

We learn that a new corps for the Metropolis, under the title of the London Volunteer Fusiliers, is being organised; and we understand that it will be under the auspices of officers of long standing and experience before the enemy.

BERKSHIRE.

5TH (MAIDENHEAD) COMPANY OF BERKSHIRE RIFLE VOLUNTEERS.—On Thursday this corps mustered 70 rank and file at their parade ground, and headed by the drum and fifes of the Reading corps, marched through the town to the residence of their Quartermaster, Mr. R. W. Grenfell. There a large assemblage of the neighbours were gratified by a sham fight on a small scale.

BUCKINGHAMSHIRE.

THE 4TH (AYLESBURY) RIFLES.—On Monday the general muster of this corps was made the occasion of festivities for the inhabitants of the district. The grounds of Velvet Lawn, the property of Lady Frankland Russell, afforded an excellent scene for the evolutions, which, besides the ordinary manœuvres, included a miniature sham-fight, a skirmishing party being detached into the woods, and defending a position so selected as to afford cover for the retreat. The most interesting feature of the day, however, was the presentation to the corps of a silver bugle, which Lady Frankland Russell, in the name of the ladies of Aylesbury, handed to Captain Irby, the commanding officer. The scene was enlivened by the presence of many Volunteers from other corps, including the 1st City of London, 13th Somersetshire, 6th Westmoreland, London Scottish, Civil Service, St. George's, St. Alban's, &c. Captain Charles Murray, Captain-Commandant South-West Middlesex, the senior Volunteer officer of the district, took the orders of Lieut. Colonel Caulfield Pratt, the reviewing officer, who, at the banquet after the review, expressed his high sense of the efficiency of the corps.

CORNWALL.

CORNWALL RIFLE VOLUNTEERS.—The 1st, 2nd, 7th, 11th, 12th, 15th, and 17th companies, from Penzance, Camborne, Helston, Truro, Hayle, and Redruth, under Major-General Tremenheere, commanding the 1st Battalion, were assembled on the 7th instant in the grounds of Trevethow, near Hayle, the seat of Mr. W. Praed Tyringham, for inspection by Lord Vivian, the Lord-Lieutenant of the county. The meeting was one of unusual interest, and attracted a large concourse of spectators. At the conclusion of the review Lord Vivian expressed his great gratification at the efficiency of the battalion, and addressed to the men some suitable remarks on the Volunteer movement generally, and on the necessity of meetings for battalion exercise, such as he had just witnessed. He also suggested that measures should be taken for an early inspection of both the battalions of the county, in brigade, by Major-General Hutchinson, commanding the western district. All on the ground seemed highly pleased, and the proceedings closed with cheers for the Queen and the Lord-Lieutenant, such as Cornishmen know how to give.

The members of the 19th Cornwall Volunteer Rifle Corps took the oath of allegiance on Friday last at the Town Hall, Camelford. One and all appeared full of spirit, and expressed themselves as determined to work hard and do their utmost to qualify as efficient soldiers. Before separating three cheers for their Queen, Lord-Lieutenant, and corps were given.

DEVONSHIRE.

The Devon County Volunteer Association, which has been formed through the instrumentality of Earl Fortescue, the Lord-Lieutenant of Devonshire, and other noblemen and gentlemen, has announced its intention of offering prizes of 100*l.* and downwards to be competed for in a short time, at some eligible place in the county, by Volunteers connected with the various corps in Devonshire and elsewhere. A large muster of Volunteers and a spirited competition are anticipated.

Through the exertions of Mr. Thomas Dyke Acland, son of Sir T. D. Acland, about 40 officers and non-commissioned officers belonging to various Volunteer corps in the West have assembled during the past week in Exeter for musketry practice and drill, on the principles adopted at Hythe. Mr. T. D. Acland inaugurated the meeting by an address on the Hythe practice. The members have been constant in their attendance each day, and have made gratifying progress.

ESSEX.

ESSEX RIFLE VOLUNTEERS.—The members of the Ilford or 2nd Essex corps have just had a competition for a Jacob rifle, given by Mr. John Davis, of Cranbrooke Park, to the best shot in the first class at 700 yards; two silver cups to the best shot in each wing, given from the funds of the corps, the winner of the rifle not being allowed to compete; a silver cup of the value of 5*l.* 5*s.*, given by Lieutenant Clifton, for the best shot in the second class, at 400 yards; a silver flask of the value of 5*l.* 5*s.*, given by Mr. Harvey, for the best shot in the first class at 500 yards; and a field glass given by Mr. Doublett, for the best shot in the first class (winners of previous prizes excepted) shooting from the

Digitized by Google

shoulder at 300 yards. The first prize was carried off by Mr. Edward Agar, who obtained four points; the second by Mr. S. W. Fry, who made three points; the third by Mr. Knowles, who made two points; the fourth (Lieutenant Clifton's) by Mr. R. Wilson, who made five points; the fifth (Mr. Harvey's) by Mr. J. Hart, who made five points; and the sixth (Mr. Doublett's) by Mr. F. Mitchell, who made six points.

1st (Romford) Essex Rifles.—For some time an unpleasant feeling with regard to the commanding-officer has existed in this corps, which was one of the earliest formation in the county. In consequence, Captain Hamilton has resigned the command, and Champion Russell, Esq., of Upminster, Major in the West Essex Regiment of Militia, has been elected captain in his stead.

5th (Plaistow) Essex Rifles.—This rifle corps, which is of recent origin, has chosen the following gentlemen as officers, subject to the approval of the Lord-Lieutenant:—Captain, H. Sewell, Esq.; Lieutenant, F. Robinson, Esq.; Ensign, J. Bell, Esq. Dr. Williams has undertaken to act as honorary secretary, and the full complement of non-commissioned officers has been made up.

6th (Colchester) Essex Rifles.—The members of this corps are now actively engaged in preparing for the rifle match for a magnificent silver cup, given by J. Gurdon Rebow, Esq., of Wyvenhoe Park, which is shortly to take place, and from the skill which has been displayed before the target, there is every prospect of some very superior shooting. The question of the formation of a second company has been again revived, and should it be carried out, there is a probability of the command being undertaken by J. H. Errington, Esq., of Leaden Park, the present High Sheriff of the county.

7th Essex Rifles. — This corps was on Tuesday inspected by Lieut.-Colonel Ibbetson, Assistant-Inspector of Rifle Volunteers.

Grays.—An Artillery corps has been formed for this town, under the auspices of R. B. Wingfield Baker, Esq., of Orsett; and the War Office has undertaken to supply the men with two field-pieces for practice. It already numbers about 50 effective Volunteers, and will immediately proceed to the election of officers. The most fraternal feeling exists between this corps and the 1st Kent Artillery Volunteers, the officers of which are kindly lending their aid to the organisation of the force.

GLAMORGANSHIRE.

The 4th Glamorgan Volunteer Artillery. — On Monday the prizes offered by this corps were shot for at Cardiff. The prizes were—1st, a handsome silver cup; 2nd, a breech-loading pistol; 3rd, a silver medal. There were upwards of 40 competitors from the Glamorgan and Monmouth Corps. The first prize was won by Private John Owen, of the Dowlais Company, 2nd Glamorgan. An informality in conducting the shooting caused some doubt as to the winner of the second prize. The difficulty was got over by the officers of the Volunteer Artillery handsomely presenting a duplicate of this prize to the second claimant. The winners of these prizes were Private William J. Jenkins, of the Dowlais Company, 2nd Glamorgan (who won the first prize at the last competition at Cardiff), and Lieut. Gethin, of the Newport Company, Monmouthshire. The third prize was won by Sergeant Thomas, of the Swansea Company, 3rd Glamorgan.

GLOUCESTERSHIRE.

Gloucestershire is likely to be well supplied with Volunteers. We hear that the Duke of Beaufort contemplates raising a corps of mounted Volunteers, to be armed with rifle carbines. They would not interfere with the Gloucestershire Yeomanry Cavalry. This mounted corps would enable Gloucestershire to supply Volunteers of all arms—horse, foot, and artillery. The Duke gives 25*l.* towards the prize fund for the rifle shooting in the county; the Earl of Ellenborough also gives 10*l.* and Lord Dynevor 10*l.* 10*s.* to the same fund.

Lord Northwick called a meeting of his neighbours and gentlemen possessing property in and around Moreton-in-the-Marsh, where the counties of Gloucester and Worcester intermingle, with the view of raising a corps of Volunteers for the district. The meeting was held at Northwick Park, and there were present, besides his lordship, the Earl of Harrowby, the Rev. C. E. Kennaway, G. B. Dodwell, H. Bromfield, and G. H. Chance, with several laymen. It was resolved to get up a corps, and Lord Northwick offered the use of some of his fields for target practice. The new corps will take the name of the "North Cotswold," and it is understood that gentlemen are ready to undertake the duties of captain, lieutenant, and ensign.

HAMPSHIRE.

Portsmouth Civil Service Volunteer Corps.—The Lord-Lieutenant of the county having expressed a wish that the drills of this corps should commence as early as practicable, a general meeting of the members was held on Monday evening last to take the necessary steps to carry his lordship's wishes into effect. The chairman having explained to the meeting the wishes of the Lord-Lieutenant, and having stated that as the members now mustered two hundred and twenty men it was necessary that the captains of the different companies should be elected to assist him in the drills; but that before the officers were appointed the resolution passed at a former meeting, viz., that "no officer should be appointed until some progress had been made in the drills" should be rescinded. The resolution having been accordingly rescinded, the members proceeded to nominate the candidates, when the meeting was taken by surprise by the chairman reading to the members the nomination of three candidates, which he stated had been sent to him some days previously. The papers were signed by several members, but as the names upon them were nearly the same, the effect produced upon the meeting was that it was a party manœuvre. The gentlemen proposed were Messrs. Rogers, Conolly, and Forey; but on their names being read Mr. Helby was immediately proposed from the body of the meeting, and duly seconded, and a ballot proposed. The result of the ballot was, that Mr. Rogers, Mr. Helby, and Mr. Conolly, were re-elected as captains of the 2nd, 3rd, and 4th companies. The election of Mr. Helby gave great satisfaction to the meeting, if we may judge from the enthusiastic manner his short but earnest address was received. After giving cheers to the captain-commandant, and three cheers for the Queen, the meeting separated. The drills commenced on Wednesday evening last; for the future the evenings for drill will be Tuesdays and Thursdays, with voluntary drill every evening excepting Saturday. To facilitate the progress of this important corps a large shed, and room over, has been placed at the disposal of the members by the kindness of the superintendent for drill, and which, being near to the factory gate, is welcomed as a very great boon, particularly during the winter months. The Civil Service Corps at Portsmouth, if we may judge from the rapid progress it is making, is extending, and being composed of the artisan class, the men will possess an amount of muscular power and endurance equal to the best Volunteer battalions. This is a step in the right direction, for it has been remarked that the movement up to the present time has been mainly recruited from the middle ranks of society. Indeed it was to be expected that the initiative would be taken by that class which possessed money and a certain amount of leisure. It speaks well for the patriotism of the country that from that class alone the Volunteer force musters about 150,000 men. Nevertheless it is felt necessary to extend this number, and to recruit from the artisan class as much as possible. But the difficulty of working this all but untouched strata of our population, has been that time and money to the labouring classes are very serious considerations, which have been instrumental in keeping them from joining the movement. For this reason the Portsmouth Civil Service Corps, composed of artisans and working-men solely, deserves encouragement, as it opens a wide field for imitation. It is suggestive of what may be done not only in the other Government yards, but will afford information as to the manner in which their clothing and equipment are raised to the artisan classes of all England. In the different Royal Dockyards there are from 15,000 to 20,000 strong men employed, to whom toil is familiar, and to whom the military duties of a Volunteer would be mere sport and pleasureable excitement.

HERTFORDSHIRE.

St. Alban's Rifle Corps.—A rifle corps rural fête has been organised to take place at St. Alban's on Monday, in a meadow commanding a view of the far-famed abbey; and a review of the Hertfordshire and several metropolitan corps, under the command of Colonel Bigg, is announced as one great feature of the proceeding, which will also include sports, pastimes, and amusements on an extensive and liberal scale, concluding with fireworks, balloon race, and grand ball.

KENT.

Kent Rifle Volunteers.—On Thursday last, the officers of the 1st battalion of the Kent Rifle Volunteers dined together, to the number of forty-six, at the Trafalgar, Greenwich, Lieut.-Colonel Thorold in the chair. Viscount Sydney, Lord Lieutenant of the county, and Sir Thomas Maryon Wilson, Bart., Lieut.-Colonel of the West Kent Militia, were also present; and among the officers were the Adjutant, Captain S. F. Jacson; Majors — Farnall and Congden; Captains—Hillyard, Montgomerie, Rucker, Carter, Harris, Wilkinson, &c., &c.; Ensigns—Walmsley, Marchant, Barnes, Barnett, &c., &c.; Honorary Chaplains—Rev. W. H. Smithers and Rev. E. J. Selwyn. The dinner was served in Mr. Hart's usual first-rate style, and afterwards the customary loyal and other toasts were given and cordially responded to. The band of the Charlton company played at intervals during the entertainment.

The 13th Kent Artillery Volunteer Corps (Sheerness Dock-yard), under the command of Captain Robinson, Commandant of the corps, marched, for the first time under arms, several miles up the island on Monday, preceded by their band. The corps presented a very soldierlike appearance, due, chiefly, to the instruction of their Acting Adjutant, Lieutenant Gillies, R.M. The corps are making excellent great gun practice both with shot and shells; and great satisfaction is felt by the superintendent, Captain Charles Wise, A.D.C., having become an honorary member.

The 17th Kent Rifles.—The ladies of Tunbridge Wells have presented a silver bugle to this corps. The task of presenting the gift devolved upon Mrs. Fisher, the wife of the Captain of the corps, who stated it to be a token of the warm interest the ladies of the neighbourhood had taken in the formation of the corps. The event was celebrated by a public dinner at the Sussex Hotel, at which Captain Fisher presided, and among the company were Viscount Hardinge, Sir Walter Stirling, Mr. Alderman Salomons, M.P., and other gentlemen.

A review of the several artillery and rifle volunteer corps of West Kent, comprising Woolwich, Greenwich, Deptford, Blackheath, Lee, Lewisham, Bromley, Dartford, Eltham, Plumstead, Charlton, &c., is fixed to take place to-day before Viscount Sydney (Lord-Lieutenant of Kent), in the park of Sir Thomas M. Wilson, Bart., at Old Charlton.

NOTTINGHAMSHIRE.

The Robin Hood Rifles.—Lieutenant-Colonel Crawford, commander of this corps, called a meeting of the manufacturers and tradesmen of Nottingham on Monday afternoon for the purpose of considering the propriety of permitting the young men in their employ (members of rifle corps) to have a holiday on Thursday afternoon weekly for drill exercise. The attendance being very limited no definite arrangements were made, and the meeting adjourned.

STAFFORDSHIRE.

An inspection of the North Staffordshire Battalion of Rifle Volunteers — eight companies being present — took place in Trentham Park on Tuesday last, in presence of thousands of spectators from the Staffordshire Potteries and Newcastle and adjoining places. The inspection was conducted by Colonel Buller, the colonel of the regiment, assisted by Captain Buchanan, the adjutant. Each company was accompanied by its band. As this is only the second time the companies have been brought together for battalion drill, the way in which they executed the various manœuvres was highly creditable to them, and frequently elicited expressions of admiration from the spectators. At the close of the inspection the colonel, in addressing the officers and men, said he had been quite taken by surprise with respect both to the numbers present and the efficiency to which they had attained, and he should have the pleasing task of forwarding to the lord-lieutenant of the county a flattering report of their efficiency. The North Staffordshire battalion of rifles is a very fine body of men, nearly of uniform height, and they looked remarkably well on parade.

SURREY.

6th Surrey Rifles.—Last Saturday this corps assembled on Esher Green for the purpose of presenting the prizes that had been shot for to the successful competitors. A ten-guinea cup was gained by Mr. R. Bainbridge, and two valuable rifles by Ensign Few and Mr. Henry Burnett. A handsome silver bugle having been subscribed for by the ladies of the neighbourhood, they appointed Lady Duff Gordon to present it to the corps, which her ladyship did in a clear and effective speech:—"Captain Sir Henry Fletcher, officers, and men of the 6th Surrey Rifle Volunteers. The ladies of Esher and its neighbourhood have desired me to present to your corps a silver bugle subscribed for by them. We earnestly hope that it may never sound but for your training in those martial exercises by which you are qualifying yourselves to act as our defenders. But if the day should come when its notes must ring on a field of battle, I assure you (in the name of the subscribers to this bugle) how confident we feel that it will stir up true and gallant hearts ready to shed their blood in defence of our country, of our freedom, and of the Queen who so faithfully serves, and so truly represents our happy constitution—that constitution which has fostered the spirit of unanimity and self-reliance which has once more called out the Volunteers of old England. Already a moral triumph has been achieved. The frank assurance of renewed friendship lately made to our Government by the French Emperor, proves that the British nation has found the way to win his regard. Let us on no account relax in our efforts to deserve it. Defence, not Defiance is your watchword. But should an enemy ever stand on these shores, and so defence become defiance, may this our bugle be the first to sound the advance, and the last to sound the retreat."

SUSSEX.

The 3rd battalion of the Sussex Rifle Volunteers, comprising the following corps, 1st (Brighton), 2nd (Cuckfield), 4th (Lewes), 7th (East Grinstead), and 16th (Battle) met, under the command of Lieut.-Colonel R. Moorsom, at Brantridge, near Balcombe, the seat of Captain Meek, the Commandant of the 2nd Sussex corps. The battalion mustered very strong, and at the conclusion of the drill the commanding officer expressed his approbation of the way the men and officers had gone through their evolutions. Each man had had 10 rounds of blank ammunition served out to him, and the volley and file-firing, considering the short time the men have had arms, were very good.

YORKSHIRE.

The 16th (Harrogate) Company of the West Riding of Yorkshire Rifle Volunteers.—This corps assembled at the Stray, High Harrowgate, on Wednesday last, when a handsome silver bugle, which cost 60 guineas, was presented to the corps by Mrs. Robert Reynard (the sole donor), widow of Captain Reynard, of Harrogate. There was a large assemblage of military and other persons on the occasion. The corps was under the command of Captain Harrison, who put them through several evolutions, which they performed in a very creditable manner.

The Bradford Rifles.—The Misses Rawson, of Nidd Hall, ladies of the manor of Bradford, have offered to lease to the Bradford Battalion of Rifle Volunteers, at a nominal rent, a field conveniently situated at the town for the site of an armoury, drill-room, and offices of a permanent character, which it is proposed to erect for the use of the corps. It is estimated that the buildings will cost about 1000*l.*, and the money is to be raised by a bazaar, to be held in St. George's Hall next spring. A committee is forming to carry out the project. It is stated that the Low Moor Iron Company intend establishing a company of Rifle Volunteers, to wear the same uniform as the Bradford corps, and to be attached to that battalion.

Hull.—The Volunteers of Hull, both Artillery and Rifles, have been for the past few weeks actively pursuing their drill, for the purpose of being enabled to put in a creditable appearance at the review at Hull on Monday, the 27th inst., before Lord Wenlock, on the occasion of the great demonstration then to take place in connection with the ceremony of the Mayor of Hull (Mr. Pearson) giving to the town 27 acres of land for a people's park. The Rifle Volunteers of Hull now comprise five companies, with an average of 70 men to each company. The whole of the companies, with the exception of the last-formed one, have had silver bugles presented to them by the ladies of Hull, and about three weeks ago the whole of the men were reviewed at Hesslewood.

1st Battallion West York Rifle Volunteers.—The rifle shooting by the head-quarter (York) companies of this battalion is progressing famously; and much interest is manifested in the approaching rifle contest, to be held on the 9th and 10th of October next, on Bootham Stray, at the superior 1000 yards' range in the possession of the corps. Already the following prizes have been offered for competition; and it is expected more will be announced. A splendid challenge cup, to be shot for at 700, 800, and 900 yards' range, given by Lady Nay Thompson, of Sheriff Hutton Park, near York; a silver tankard, value 10 guineas, given by Major Briggs; a silver cup, value 10 guineas, given by the Sheriff of York; a silver cup, value 5*l.*, given by Captain Lloyd; another silver cup, value 5*l.*, by the same officer; a silver cup, value 5*l.*, given by Captain Meek; another silver cup, value 5*l.*, given by the same gentleman; a silver cup, value 5*l.*, given by the subalterns of No. 1 Company; and a silver cup, value 5*l.*, given by the subalterns of No. 2 Company. The rifles used in the shooting to be the long and short Enfields used by the respective companies. A very good prize list, but hardly enough diversified in the awards.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, August 14.

Kent Rifle Volunteers—26th Corps, 1st Battalion—Edward Vaughan Arbuckle, Gent., to be Adjutant from the 3d of July, 1860.

Kent Rifle Volunteers—26th Corps, 1st Battalion—Edward Vaughan Arbuckle, Gent., Adjutant of the 1st Battalion, 26th Corps, to serve with the rank of Captain.

Digitized by Google

for drill and administrative purposes, and has been numbered as the 4th Administrative Battalion in the county of Kent. The several corps composing such battalion will retain their present numbers and designations.

2d Hampshire Rifle Volunteer Corps—Captain Thomas Willis Fleming to be Major.

20th Hampshire Rifle Volunteer Corps—Charles Bovill Smith, Gent., to be Ensign.

Stogursey or 11th Somerset Volunteer Rifle Corps—Alfred Howse, Gent., to be Honorary Assistant-Surgeon.

Taunton or 3d Somerset Company of Volunteer Rifle Corps—Francis Wheat Newton, Esq., to be Lieutenant, vice Allen, resigned.

West Middlesex Rifle Volunteer Corps—Lieutenant Charles Dear to be Captain, vice Compton, promoted; Ensign James Williamson to be Lieutenant, vice Bridgman, promoted; Ensign John Barber to be Lieutenant, vice Dear, promoted; Goodwin Marriner, Gent., to be Supernumerary Lieutenant.

1st Middlesex Artillery Volunteer Corps—John Dennis Caulcher, Gent., to be Second Lieutenant.

London Irish Rifle Volunteer Corps—Peter Charles Duncan, M.D., to be Assistant-Surgeon.

1st Lincolnshire Rifle Volunteer Corps—Her Majesty has been graciously pleased to accept the resignation of the commission held by Major Weston Cracroft Amcotts as Captain-Commandant.

1st Battalion of Lincolnshire Rifle Volunteers—Weston Cracroft Amcotts, Esq., to be Major.

4th Lincolnshire Rifle Volunteers—William Garfit, Esq., to be Captain, vice Hopkins, resigned.

6th Lincolnshire Rifle Volunteers—Henry Peake, Gent., to be Lieutenant, vice Peacock, promoted.

3d Essex Rifle Volunteers—Robert Growse, Esq., M.D., to be Honorary Assistant-Surgeon.

5th Essex Rifle Volunteers—Samuel Lloyd Howard, Esq., to be Captain; Charles Raymond Pelly, Esq., to be Captain; James Kayess, Esq., to be Captain; George Archer Hilleary, Esq., to be Lieutenant; Barclay Reynolds, Esq., to be Lieutenant; Philip Savill, Esq., to be Lieutenant; Charles William Tanner, jun., Esq., to be Ensign; Walter Geere, Esq., to be Ensign; George Tyser, Esq., to be Ensign.

13th Aberdeenshire Rifle Volunteers—Patrick Rose Innes, Esq., to be Captain; William Cruickshank to be Lieutenant; James Grieve to be Ensign.

Roxburgshire Rifle Volunteers—No. 2 Company—The Rev. James Smith to be Honorary Chaplain; William M'Lean M'Kenzie, Esq., to be Honorary Assistant-Surgeon.

1st Lancashire Artillery Volunteers—Second Lieutenant Daniel Stephen M'Guinniss to be First Lieutenant.

4th Lancashire Artillery Volunteers—Samuel Ashton Thompson, Gent., to be Second Lieutenant.

17th Lancashire Artillery Volunteers—John McCabe, Esq., to be Captain.

23d Lancashire Rifle Volunteers.—William Gardiner, M.D., to be Assistant-Surgeon.

56th Lancashire Rifle Volunteers—Robert Hankinson Barrett, Esq., to be Captain; William Slater, Gent., to be Ensign.

Memorandum—Her Majesty has been graciously pleased to accept the resignations of the Commissions held by Lieutenant John Fishwick Leeming, Lieutenant Thomas Dale, and Ensign Thomas Lewis Williams, in the 2d Manchester, or 28th Lancashire Rifle Volunteers.

4th Company of Cheshire Artillery Volunteers—Alfred Parr, Esq., M.D., to be Honorary Assistant-Surgeon.

15th Company of Cheshire Rifle Volunteers—Edward Moloney Gleeson, Gent., to be Honorary Assistant-Surgeon. 22d Company of Cheshire Rifle Volunteers—Thomas George Dixon, Esq., M.D., to be Honorary Assistant-Surgeon.

1st Lanarkshire Artillery Volunteers—George Hasband M'Leod, Esq., M.D., to be Surgeon; John M'Micken Pagan, Esq., M.D., to be Surgeon.

21st Lanarkshire Rifle Volunteers—Lieutenant John Robertson to be Captain, vice John Boag, appointed Major of the 7th Administrative Battalion of Lanarkshire Rifle Volunteers; William Henry Hill, Gent., to be Lieutenant., vice John Robertson, promoted; Hamilton Ramsay Buchanan, Gent., to be Ensign, vice William Robertson, resigned.

40th Lanarkshire Rifle Volunteers—James Mc Intyre, Esq., to be Captain, vice William Rigby, appointed Major of the 6th Administrative Battalion of Lanarkshire Rifle Volunteers.

7th Surrey (or Southwark) Rifle Volunteer Battalion—Lieutenant Owen Clutton to be Captain, vice Crowe, resigned; Ensign Albert Francis Jackson to be Lieutenant, vice Cox, resigned.

8th Surrey Rifle Volunteers—Ensign Edward James Rickards to be Lieutenant; Norbury Pott, Esq., to be Ensign, vice Rickards, promoted; Nathaniel Charles Alexander, Esq., to be Ensign.

19th Surrey (or Lambeth) Rifle Volunteer Battalion—Lieutenant Henry Plews to be Captain; Ensign Frederick Thomas Prewett to be Lieutenant, vice Plews, promoted; John Richards, gent., to be Ensign; Henry Knight, Gent., to be Ensign.

Memorandum—The Queen has been graciously pleased to accept the resignations by Captain Robert Crowe, Lieutenant John Pope Cox, and Ensign John Sebastian Christie Renneck, of the Commissions held by them in the 7th Surrey (or Southwark) Rifle Volunteer Battalion.

1st Flintshire Battalion of Rifle Volunteers—Lieutenant-Colone Herbert Watkin Williams Wynne, M.P., to be Major.

4th or Holywell Company of Flintshire Rifle Volunteers—Jesse Conway Davies, M.D., to be Honorary Assistant-Surgeon.

WAR OFFICE, PALL MALL, August 17.

1st Battalion of West Riding of Yorkshire Rifle Volunteers (York)—Captain Charles Edward Preston, half-pay 18th Royal Indian Regiment of Foot, to be Adjutant, from the 25th June last.

3rd Battalion of West Riding of Yorkshire Rifle Volunteers (Bradford)—Francis Lepper, Esq., late Captain 81st Foot, and 7th Lancashire Militia, to be Adjutant with the rank of Captain from the 29th May last.

Memoranda—The 18th (Pontefract), 19th (Rotheram), and 20th and 21st (Doncaster), Corps of West Riding Yorkshire Rifle Volunteers, have been united in a battalion for administrative purposes, with a Staff consisting of 1 major and 1 adjutant; the battalion is numbered the 4th, in the said West Riding, and the several corps composing it will retain their present numbers in the County Force.

1st West Riding of Yorkshire Rifle Volunteers (York)—Her Majesty has been graciously pleased to accept the resignation by Major George Briggs of his commission as Captain-Commandant of this corps.

12th West Riding of Yorkshire Rifle Volunteers (Skipton)—Her Majesty has been graciously pleased to accept the resignation of the commission held by Captain Mathew Wilson in this corps.

6th Westmoreland Rifle Volunteers—Captain Jasper Selwyn to be Captain-Commandant, vice Ruxton, resigned.

East York Artillery Volunteers, 3rd Company—Christopher Wharton Mawn, Esq., to be Honorary Assistant-Surgeon.

Worcestershire Rifle Volunteers, 2nd Battalion—Captain Henry James Scobell, to be Lieut.-Colonel; Captain Sir Henry E. F. Lambert, to be Major.

No. 1 Company—William Cowen, Esq., to be Honorary Assistant-Surgeon.

No. 7 Company—Daniel Timmins, Esq., to be Honorary Assistant-Surgeon.

No. 14 Company—William Woodward, Esq., to be Honorary Assistant-Surgeon.

No. 17 Company—William Smith, Esq., to be Honorary Assistant-Surgeon; the Reverend George Frederick Fessey to be Honorary Chaplain.

Wiltshire Volunteer Rifle Corps—17th Company—Francis Edward Thompson, Gent., to be Lieutenant; Henry Jenner Hillier, Gent., to be Ensign.

2nd Hampshire Rifle Volunteer Corps—Frederick Perkins, Esq., to be Captain, vice Fleming, promoted.

2nd Buckinghamshire Rifle Volunteers—William Charles Small, Gent., to be Assistant-Surgeon; the Rev. James Poulter to be Honorary Chaplain.

3rd or New Radnor Company of Radnorshire Rifle Volunteers—Thomas Baskerville Mynors, Esq., to be Lieutenant; Thomas Steven Duggan, Gent., to be Ensign; Henry Osmond Brown, Gent., to be Honorary Assistant-Surgeon.

16th Norfolk Rifle Volunteer Corps—Lieutenant William Amhurst Tyssen Amhurst to be Captain; Ensign Anthony Hamond to be Lieutenant, vice Amhurst, promoted.

8th Rifle Volunteers—Lieutenant George Fearn to be Captain; Lieutenant William Brooks to be Captain; Ensign William Birt to be Lieutenant; Ensign John Rea to be Lieutenant; John Robinson Gibson, Esq., to be Lieutenant; Robert Farr, Esq., to be Ensign; William Kitson, Esq., to be Ensign.

1st or Duke of Manchester's Mounted Volunteer Corps—Lieutenant Frederick Polhill Turner to be Captain; Robert Wigram Arkwright, Esq., to be Lieutenant; Cornet George Onslow Newton to be Lieutenant, vice Turner, promoted; Crewe Alston, Esq., to be Cornet; Francis Day, Esq., to be Cornet, vice Newton, promoted.

1st Newcastle-upon-Tyne Rifle Volunteers—William Weallens, Esq., to be Captain; Ebenezer Budden, Gent., to be Lieutenant; Charles Henry Morton, Gent., to be Ensign.

5th Westmoreland Rifle Volunteers.—William Fell, Gent., to be Honorary Assistant-Surgeon; the Rev. Henry John Marlen to be Honorary Chaplain.

Memorandum—6th Westmoreland Rifle Volunteers—The Queen has been graciously pleased to accept the resignation of the Commission held in this Corps by Captain Augustus Ruxton.

London Irish Rifle Volunteer Corps—The Rev. Robert Heys Atherton to be Honorary Chaplain.

Memorandum—40th Middlesex Rifle Volunteer Corps—The Queen has been graciously pleased to approve of Captain James Maxfield Walters bearing the title of Captain-Commandant in the above corps.

Tower Hamlets Rifle Volunteers (No. 5)—James McKissock, Gent., late Lieutenant in the London Scottish Volunteers, to be Captain; Alexander Beatts, Gent., to be Lieutenant; James Thomas Morland, Gent., to be Ensign.

Suffolk Artillery—Octavius Daniel Weld, Gent., to be Second Lieutenant; Thomas Bolger Gent., to be Second Lieutenant.

2nd Cumberland Artillery Volunteers—John Giles Mounsey, Esq., to be Captain-Commandant, vice Salkeld, promoted.

42nd Lancashire Rifle Volunteers—The Reverend Thomas Chambers, M.A., to be Honorary Chaplain.

23rd Lancashire Rifle Volunteers—The Reverend Thomas Parkes, M.A., to be Honorary Chaplain.

4th Aberdeenshire Artillery Volunteer Corps—Robert Beveridge, Esq., M.D., to be Honorary Assistant-Surgeon.

City of Edinburgh Rifle Volunteer Corps—James D. Gillespie, Esq., M.D., to be Assistant-Surgeon. Lieutenant Thomas Graham Murray to be Captain, vice Anstruther, resigned.

1st City of Edinburgh Artillery Volunteer Corps—James Maclean fo be Captain. John de la Condamine to be First Lieutenant; Alexander Lauder Stobo to be Second Lieutenant.

Staffordshire Rifle Volunteer Corps—1st Battalion, 36th Company—Clement Wedgwood, Gent., to be Lieutenant; the Rev. George Ferris Whidborne, Clerk, to be Honorary Chaplain; William Haslam Davis, Gent., to be Honorary Assistant-Surgeon.

[The following appointment is substituted for that which appeared in the *Gazette* of Tuesday the 7th inst.]:—

Staffordshire Rifle Volunteer Corps—3rd Battalion, 35th Company—Robert Woodward, the younger, Gent., to be Lieutenant.

1st Berwickshire Artillery Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the Commission held by First Lieutenant Bowhill.

THE LONG ENFIELD.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Sir,—Colonel M'Murdo, no doubt, reads your paper, so I write this to suggest to him the advisability of his ordering the long rifle drill to be substituted in the Volunteer regiments and companies for the short rifle drill, now practised by those corps. They are armed with the long piece, and they ought, in my humble opinion, to be drilled accordingly. The men are much distressed by being made to carry the long rifle at the advance and trail, when they might be carrying it, as soldiers of the Line do, at the shoulder and slope. There is no probability that the Volunteers will ever be furnished with the short rifle, therefore it is a mistake to drill them to the manual of that arm. The long Enfield is the better of the two, and every soldier of the Line is now a rifleman.—I am, &c. N. P.

The Volunteer Review at Edinburgh.—The following War Office Circular has been issued to Lords-Lieutenant of counties:—"War Office, 13th August, 1860. I have the pleasure of enclosing a copy of a General Order, in which the Adjutant-General has been authorised to express Her Majesty's admiration of the soldierlike bearing of the Volunteers reviewed by Her Majesty at Edinburgh on Tuesday last, and of the high state of efficiency to which they have attained in an incredibly short space of time, and in which Her Majesty finds another proof that she may at all times rely upon their patriotism and loyalty. In communicating this document to you, and requesting you to enclose copies of it to the commanding officers of the different corps in your county, I avail myself of the opportunity to express to you the high gratification with which Her Majesty's Government have observed the rapid success of the Volunteer movement throughout the country, the zeal and public spirit which were displayed by the corps present at the late review, and the very efficient manner in which they went through the various movements that they were called upon to perform on that occasion. I have also to convey to you the thanks of the Government for the assistance which you have afforded me in the raising and organisation of this force, and for the zeal with which you have discharged the onerous duties which have devolved upon you in connection with it.—I have the honour to be, &c., S. Herbert."—The following General Order has been issued from the Horse Guards:—"The Adjutant-General has received the Queen's commands to convey her thanks to the several corps of Artillery and Rifle Volunteers assembled at Edinburgh on the 7th inst., and to assure them of the satisfaction and gratification with which Her Majesty beheld the magnificent spectacle there presented to her. Her Majesty could not see without admiration the soldier-like bearing of the different corps as they passed before her, and she finds in the high state of efficiency to which they have attained in an incredibly short space of time, another proof that she may at all times surely rely on the loyalty and patriotism of her people for the defence, in the hour of need, of the freedom and integrity of the empire.—By order, J. Yorke Scarlett, A.-G."

Review of the Lancashire and Cheshire Volunteers.—The review of the Lancashire and Cheshire Volunteers at Newton-le-Willows on Saturday proved a great success. The review took place upon the racecourse, about two miles and a half from Newton station, and the Volunteers and the public began to assemble upon the ground simultaneously a little after three o'clock. From this time to half-past five o'clock, when Lieut.-General Sir George Wetherall opened the review, the arrivals were incessant. The rains of several previous days had rendered the ground wet and uncomfortable; but up to this hour only a few light showers had fallen to check the general desire of the public to witness the proceedings on Saturday. At the moment of opening the review the spectacle presented was a magnificent one. In the centre of the ground the Volunteers were drawn up in four brigades. The second, third, and fourth Manchester regiments, 1800 strong, covered the front, forming a line of 300 to 400 yards. In the rear of this line was the remainder of the first brigade. In the rear of these, again, were massed the three other brigades, the third occupying the centre. The cavalry, 300 strong, occupied a position on the right flank to the front. The grand stand was crowded by the rank and fashion of the neighbourhood, including a great number of ladies, and swelled considerably by visitors from a distance. The other stands were also very crowded, and a dense mass of people lined the sides of the racecourse, extending to a considerable distance right and left of the stands. In front of the troops, and between them and the stands, were the general and his staff. Among the lookers on were some hundreds of gentlemen in the various uniforms of the Line and of Volunteers not taking part in the proceedings. The evolutions indicated in the programme occupied about two hours. All the movements of the troops were effected with an ease, coolness, and regularity which astonished the public, and drew forth praise from soldiers of the Line. The firing which took place by the covering companies while the change of front was effected brought down a shower of rain, and when the marching past took place, which concluded the review, the water fell in torrents upon the poor fellows. Nevertheless the Volunteers went through the operation with a coolness and displayed an amount of perfection which showed that they had paid excellent attention to drill since their embodiment. The whole spectacle was one reflecting the highest credit upon them, and the Liverpool companies especially drew repeated marks of approbation from the lookers-on, owing to the soldierly bearing they presented. A portion of the Manchester and some other troops also shared in this mark of public approbation. About half-past seven the public began to disperse, owing to the rain, but the troops requiring refreshment some of them remained on the ground to a much later hour. The review was most creditable to the Volunteers, and a great success. The review being over, Sir George rode with his staff towards the troops, and complimented them upon the military knowledge they had displayed.

The Volunteer Encampment at Crosby.—The greatest novelty in connection with the Volunteer movement in this part of the country is the encampment amongst the sandhills at Crosby, under the personal supervision and command of Lieutenant-Colonel Bousfield. The men in camp belong exclusively to the 1st battalion of Lancashire Rifles, the majority being members of the first company. The tents were pitched upwards of a fortnight ago, the object being to inure the Volunteers to the hardships of camp life, as well as to bring them near the shooting ground on the shore, where they may, by constant practice morning and evening, learn to become expert marksmen. A rather sheltered site has been fixed upon amongst the hills, about five minutes' walk from the railway station, and each tent appears to have been planted so as to avoid the damp which accumulates in some parts of the ground. Altogether there are 41 tents, including the "canteen establishment," where refreshments are supplied according to a fixed tariff. Viewed from the most elevated of the sandhills the encampment has rather a picturesque appearance, although the visitor on first seeing it cannot fail to be reminded of some of those gipsy gatherings that are to be met with in eastern countries. The "lines" enclosing the camp are indicated by small flags, inside of which no Volunteer is permitted to enter without being in uniform. At night sentinels guard the ground by watches, and in other respects strict military discipline is enforced. The men rise at five o'clock in the morning, and then prepare for drill, rifle shooting, skirmishing, &c., which generally begin at six o'clock. Breakfast is afterwards had, and the majority of the Volunteers return to town about nine o'clock to engage in the business of the day, leaving the tents in charge of a few men and boys, who attend to the victualling and cleaning departments. The same routine of training is observed in the evening. On every alternate Wednesday there is battalion drill, when the "campaigning" is enlivened by two or three bands of music from Liverpool. The tents, on the whole, are pretty snug, every care being taken to make them "weather-tight." In some instances, small iron bedsteads are introduced, but the majority of the men sleep on mattrasses laid on straw. The muskets and the usual accoutrements are piled in the centre, whilst in some instances barrels of Allsopp's best pale ale and baskets of Champagne adorn the interior. The "canteen establishment" is large, but still it is quite inadequate in size to meet the requirements of the camp, and an enlargement will in consequence be effected. The late heavy rains have rendered camp life rather disagreeable, and several of the tents are now deserted in consequence; but on the whole the men have endured exposure to wind and rain with an extraordinary amount of fortitude and perseverance. Slight colds have prevailed; but these have soon disappeared. The Volunteers will remain at Crosby two or three weeks longer.—*Liverpool Mercury.*

A Hint for Marksmen.—There is good news for our rifle Volunteers at home. The ancient town of Cologne, emulous of throwing Wimbledon into the shade, has proposed to give a prize to expert shots, such as probably was never before offered to the masters of cross-bow or rifle. The prize consists in nothing less than a splendid castle on the banks of the Rhine—a castle of modern build, but in the style of the middle ages, with crenated towers, deep moats, drawbridges, cisterns, fountains, verandas, grottoes, and all the other appurtenances of an ancient knightly mansion. English travellers up the Rhine, who have kept a sharp look out, will have perceived, just opposite the town of Coblentz, close to the frowning fortress of Ehrenbreitstein, a *Burg*, surrounded by extensive vineyards and wooded domains, looking proudly down on Rhine and Moselle, and almost rivalling in beauty of situation the neighbouring Stolzenfels. Well, it is this splendid property, called the *Schützenberg*, which the town of Cologne promises to the best shot in the forthcoming rifle-match within its walls. The match will be open to all nations of "Germanic" origin, including the British. Numerous invitations have already been sent for this great meeting, which, it is expected, will be numerously attended by deputations from all parts of Germany, Denmark, Sweden, Holland, Belgium and England. The Prince-Regent, it is stated, has accepted the presidency of the meeting, and various other German Sovereigns, foremost among them the former ruler of Bavaria, Ludwig, the poet-king, have promised their assistance and contributions.

NOTICES TO CORRESPONDENTS.

In reply to a Subscriber, we believe that the 23rd Fusiliers at present are composed of men from all parts of the kingdom, but no doubt the Welsh element prevails to an extent far above the average in other regiments.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the Editor.

It is particularly requested that applications for copies of the Army and Navy Gazette, &c., and advertisements be sent to the Publisher, Mr. Archibald Graham, and not to the Editor.

Army & Navy Gazette.

LONDON, SATURDAY, AUGUST 18, 1860.

The discussion which has arisen respecting the means of attracting artisans and labourers to the Volunteer corps, obliges us to consider what was the origin of the movement, and what is its legitimate position among the different bodies constituting the defensive army of the realm. Hitherto the force has been in the main composed of the upper and middle classes reaching down (if we can so decidedly stratify society) to the lower-middle class—to shopmen and small clerks and tradesmen. Except where some patriotic employer or magnate has undertaken the equipment of his own labourers or tenants, the Volunteer body contains hardly any members of what, for want of a better name, we must describe as the lower classes. It is now felt by many that it is desirable to make available for national defence the immense numbers comprised under that designation; and during the week Lord Elcho, Sir John Shelley, and several of our daily contemporaries, have been debating the best means of achieving that most desirable object. One suggestion is that existing corps should adopt a cheap, workmanlike dress, suited for service, with which alone the Volunteers should be asked to supply themselves, leaving the more opulent or fanciful to use a "swell" costume for private display, if it so please them. Another is that artisan companies, more cheaply clad, should be attached to the present corps. A third, that in large districts general corps should be formed upon such economical foundation, and with such arrangements as regards payments by instalments, &c., as would bring them fairly within the means of the class now practically excluded from the movement. A fourth plan is the formation of distinct artisans' corps on the cheapest possible footing, in part sustained by public contributions. Active steps are at this moment being taken to carry out this last suggestion; and it is in opposition to it that the three first-mentioned ideas have been thrown out by Lord Elcho.

We have strong objections to every one of these proposals; but there is one most wholesome argument to be drawn from all, and that is, the necessity for economy. The means of the poorest, and not of the richest members of every corps should be borne in mind in devising their uniform and equipments. Commanding officers should take care that once the uniforms are obtained, they should be made to go as far as possible, by not having them worn too frequently or under circumstances likely to cause them unnecessary damage. Lord Elcho has most truly said that the test of the permanence of the Volunteer movement will be the number who will provide themselves with a second outfit when the present is no longer presentable on parade. It should be the object of all to render the necessity of a new supply as little frequent as possible. When he has done his utmost in this respect, and when he has made the uniform as economical in cost as is consistent with efficiency and that soldierlike appearance which all experience shows to be essential to the well-being of any military body, the commanding officer will have done the best he can to secure the permanence and welfare of his regiment. A policy of this kind is required, and we shall be rejoiced that the present discussion has arisen if it only end in bringing about so desirable a result.

As regards the social classification of Volunteers, it is not so much a question of rank as one of means, and the point is when we reach a class whose means do not allow them to purchase uniforms and equipments, how are we to deal with them so as to make them available for national defence? To our minds, when we come to this class, it is the province of the Government to step in and give clothing and equipments from the national funds, and the best way of doing it is by such a reconstruction of the Militia as will make it popular with those next in point of means and social position to the Volunteers. The distinctive character of the Volunteer force, as compared with the other military bodies of the State, is that each man should place himself properly dressed and equipped at the disposal of the State. When his means do not permit him to do so, he had better seek another channel of military usefulness than by joining a force which is essentially self-sustaining. Public subscriptions are, after all, but public payments in a particular form, and ought to be exceptional, unless in the instance of the first start of the movement, when many expenses were of necessity incurred beyond those appertaining to each particular individual. The present Militia system has been a failure so far as the maintenance of a large defensive force is concerned; and in the present session of Parliament the Minister for War gave some excellent indications of a desire to effect wholesome reforms. Let him carry these reforms further with a bold hand; let him thoroughly and really localise the Militia, make it suitable to the respectable artisans of each locality, and the difficulty which is now being so warmly discussed will be, after a very short time, satisfactorily solved. A Volunteer should be able to present himself dressed and equipped for service at his own expense. A man who is too poor to do that need not be ashamed, under fair conditions harmonising with the pursuits by which he gains his subsistence, to avail himself of the assistance of the country given in the regular and legitimate way.

We feel some difficulty in pursuing our criticism of the Naval Discipline Bill, in order to give our readers a succinct view of its main provisions, from our uncertainty whether some of its apparent alterations of previous enactments are not simply blunders, like others we have already pointed out. We cannot tell, for instance, whether striking a petty officer, being in the execution of his office, *or not being in the execution of his office*, and whether afloat *or on shore*, is, or is not, intended to be regarded as "mutiny" in future. This offence is certainly placed under that heading in the Amended Bill, having also been specially removed from under "insubordination;" and therefore there cannot be a doubt (more especially in the absence of the definition of "mutiny" which the bill contained before it was amended) that as the bill now stands the offence in question is "mutiny," though this can scarcely have been intended. The introduction of the words "or not being in the execution of his office," which were not in clause 18 of the original bill, is of itself enough to show that the clause as amended (§ 16) must have been placed under mutiny through some unaccountable oversight.

Clause 21 of the original bill has also undergone a strange transformation as clause 18 in the Amended Bill; inasmuch as the offence of quarrelling or fighting with any other person than an officer—but with this addition, "*whether such other person be or be not subject to this Act*"—is still allowed to remain under the heading "insubordination," though it is manifest that fighting or quarrelling with a person on shore totally disconnected with the Service cannot possibly be "insubordination," however wrong it may be, or deserving of punishment, otherwise. We can also imagine circumstances in which Jack's fighting or quarrelling may have been provoked, where he has been more sinned against than sinning; and, at all events, if this quarrel has not occurred with those of higher grade than himself, or in their presence and contrary to their orders, it is not in the nature of things that it can be regarded as "insubordination," and there can be no advantage in calling it so.

We regret to find that the abominable offence we alluded to in a previous article still stands in Clause 38 with the sole punishment of penal servitude against it, contrary to the ordinary law of the realm, which this section of the bill professes to follow. If this is allowed to stand, it will necessitate an alteration in the ordinary criminal law of the country, which we would earnestly deprecate; and if the object of this injudicious modification of existing law has been to bring the offence within Clause 49, as not capital, and render it triable by the commanding officer of a ship, we think that only makes the matter worse. In the first place, this is not an offence which should be left to the captain to deal with. Most officers would rather it went before another tribunal; and 2ndly, the only punishment awarded for this crime being penal servitude, and the commanding officer being restricted from awarding that penalty, if he did try it, he could not punish it.

There is an important alteration in the Amended Bill as regards corporal punishment. Clause 16, § 8, stood originally, "No officer, petty or non-commissioned officer, shall be subject to corporal punishment." Now it stands, "No officer shall be subject to corporal punishment: no petty or non-commissioned officer shall be subject to corporal punishment, except in case of mutiny." Now, although in no instance whatever in the bill is corporal punishment, *eo nomine*, awarded as a penalty for any offence—not even for mutiny—in Clause 48 it is laid down that "corporal punishment shall be deemed equal to imprisonment, and may in all cases be inflicted as a substitute for or in addition to imprisonment." The amended clause, therefore, subjects "petty or *non-commissioned* officers" to corporal punishment *in case of mutiny*; but warrant officers and subordinate officers, as well as commissioned officers, are exempt, under the definition of "officer" in Clause 76; for, as we pointed out last week, "petty officer" is not included under "officer," but under the term "superior officer" only! "Non-commissioned officer" here evidently applies to Marines; as otherwise, both the warrant and subordinate officers would be subject to corporal punishment, since they are not "commissioned officers."

By Clause 49 the commanding officer of a ship may try, summarily, any offence not capital, under the Act. But except in case of "open mutiny," no man can be sentenced by him to corporal punishment till his offence has been inquired into and reported on by one or more officers appointed by him. He is not, however, held bound by their "opinion," but may thereupon act as, according "to his judgment, may seem right."

We think it unnecessary to touch upon the new court-martial regulations. As a rule, discipline in the Navy must be maintained on board each ship through its own officers, as order in a great city is secured through the police and magistracy. Courts-martial, like the higher criminal courts on shore, are only useful for extreme offences, and should only be had recourse to exceptionally. Indeed we might well say, that when a court-martial is necessary, except to try officers, the ordinary and best means of enforcing discipline has already failed. We regret to find, not only from printed pamphlets, but from written communications with which we have been favoured, that a very general accusation is put forward against certain captains of the Navy themselves, as in a great measure the cause of defective discipline in the fleet. It is said that "smart fellows," who are, however, simply "blackguards," are too often made petty officers, and continued in their position after being guilty of disgraceful conduct. Also, that lieutenants and junior officers are not duly supported by their captains, and their authority is, consequently, despised by the men. This results from "the popularity dodge" practised by "an officer who winks at offences, or, what is almost worse, only half punishes them, that he may be called a nice fellow by the ship's company, and who, with a view to popularity, grants demands made by the men which ought not to be granted, and takes their part, even when they are wrong, against his

Digitized by Google

junior officer."—So it is stated in the Letters of Lieut. D. Stewart, R.N., to Sir John M'Neill, G.C.B., which we have quoted on previous occasions. We find an allusion to the same thing in the recently published Suggestions of a "Rear-Admiral," who says, "If greater attention were given to the higher object of raising the seaman's character, instead of vainly attempting to render the naval service popular by pandering to his lowest propensities, it is probable that by degrees the amount of corporal punishment would be greatly reduced." We have also, from an independent source, in MS., that "the first step to restore the discipline of the Navy must emanate from the captains, and that the perversion of discipline, followed by many of the 'popular captains,' of sacrificing the officers to the men must cease" before anything effectual can be hoped. We are further informed that this system not only disgusts and renders uncomfortable the junior officers, whilst it puts discipline out of the question, but is disliked by the "good men" on board. In the evidence before the late Manning Commission several petty officers gave evidence in accordance with this view. They all, without exception, stated that strict discipline was not disliked by the best men, to whom it is indeed a protection, but only by the blackguards.

The suggestions of a "Rear-Admiral" on the subject of establishing naval prisons are well worthy the attention of the Admiralty, especially as imprisonment is now the most common punishment for ordinary offences, and will continue to be so under the new bill. It appears that out of 317 male prisoners recently in Hants county prison, only 112 were civilians, and 205 were soldiers or sailors, but chiefly the latter, as soldiers are generally confined in the military prisons, and are only sent to the common gaols when their discharge from the Army is intended. A "Rear-Admiral" also states, that in the year ended 31st July last, about three per cent. of the whole seamen and marines of the Channel Squadron have been prisoners in the gaols of Winchester, Exeter, and Dorchester; and in fact that the number of "jail-birds" in the Service is gradually tainting it with the "convict element" and "all the evils which must arise from association with felons."

We must close our remarks on this most important subject with another extract from Mr. Stewart's pamphlet, in order to show how much of these evils can at once be remedied by efficient commanding-officers: "I served about four years with an officer, who was remarkable as being one of the best in the Service. He left a ship, in which I served with him, in the perfection of good order, and in three or four months after his leaving her we had a 'mess-trap row.' He joined a small ship as commander; and, from being one of the worst specimens of a British man-of-war, she became an ornament to the Service. After he left her she again relapsed into the old state." Here we have the converse of the proposition that "manners make the man." It is clearly upon "the man" that good manners and morals on board ship most chiefly depend. We have another proverb that "Good masters make good servants;" and we doubt not that this is especially true on board ship, and that more could be done to restore the discipline of the Navy, by the earnest endeavours of competent officers, than by any code of laws whatsoever.

Mr. Mare did his country good service when he constructed that very fine specimen of naval architecture, the Himalaya; and the Lords of the Admiralty of the day, who purchased her from the Peninsular and Oriental Steam Navigation Company, completed one of the best bargains ever effected by any public board, and are therefore deserving of the best thanks of all who take an interest in the united services. We say united services, for the Himalaya has from the time she was first brought into the Navy been, with the slight exception when she conveyed the astronomer royal and party to the coast of Spain, employed in conveying troops and supernumerary seamen from one end of the world to the other. She has steamed to the east and to the west, to the north and to the south; and it has been our pleasing duty, from the time this journal has been established up to the present moment, to record a series of brilliant passages made by her. We have scarcely time to note her movements. To-day she sails from Portsmouth for Plymouth, and her arrival there is reported simultaneously with her departure. We hear, again, she has left the latter port for Liverpool, and a few hours later the telegraph flashes up a notice of her safe entrance into the Mersey. We cannot say too much in praise of this noble vessel. She has always done the work cut out for her in an admirable manner; and with this staring us in the face we ask, why have we not a dozen Himalayas? It is true we have the Vulcan, Urgent, Perseverance, Megæra, Simoom, and Adventure; they are capital vessels of their kind, but are small and confined in comparison with the Himalaya, and not one of them averages much more than half her tonnage; still they present a great improvement over the wretched vessels which the old transport commissioners were in the habit of taking up for the conveyance of soldiers to our distant possessions. Many of our military readers must shudder when they look back upon the tedious days and the suffocating nights passed on board one of those ships, belonging to an owner standing high in the estimation of the late "Meek" authorities at Somerset House, and probably ranking A 1 at Lloyd's, but very low in the opinion of the three or four hundred unfortunate fellows doomed to find a home in her during a passage of some five or six months to the banks of the Hooghly. It would not be difficult to conjure up a recollection of the abominable cooking, the monotonous conversation of the master and his mates, the rust-stained water, the fiery liquids denominated port and sherry, the rolling of the unwieldy tub day after day under a vertical sun, and the pestiferous lower deck at night. What the middle passage is to the poor unfortunate African, these horrible voyages, in a somewhat less degree, were to the officers and men who were ordered to undertake them. We have done much in the way of improvement, but we are sadly behindhand. The sufferings of the discharged soldiers of the Indian Army on their passage home are still fresh in our memory; and the miseries endured in that charnel-ship, Accrington, are not all yet made known, and we have to wait for another mail from Calcutta for the latest intelligence connected with her. We therefore boldly suggest to the authorities, especially to Sir Charles Wood, the necessity for at once building a number of vessels of the Himalaya class, with all the improvements which have risen up since she was launched. We do not want Leviathans at a cost of half a million sterling; but we do require ships sufficiently large to convey, if necessary, one thousand souls to any quarter, however distant, on board of which all necessary requirements, nay, comforts, can be had for the men; for we hold that it is better to land in India one good sound man at a cost of say 100*l.* than to disembark any number at a less cost only fit for the hospital, and incapable of resisting the first effects of climate. We are about to incur a vast outlay of money in erecting a sanatorium at the Cape of Good Hope. We are not sorry for this, although we question if spots in Penang and Ceylon might not have been found equally healthy, and not so far afield. Time will show us the number of patients received into this building who could date their first symptoms of physical debility from the sufferings endured between the British Channel and the shores of India. We feel thoroughly convinced that in proposing the immediate construction of a fleet of steam transports, we carry with us the Horse Guards and the Medical Department of the Army; for the reports from their officers abroad must have convinced them of the necessity of a change in a system which can only be upheld by antiquated men, who look back with fond regret upon the palmy days when "John Company" flourished, and sea-captains made splendid fortunes in three voyages,—"nous avons changé tout cela." We are more alive to the justice of the old adage "live and let live." We want to train up men for the Army and Navy at a just estimation of their value. We are willing to pay well, and therefore expect to be served well. We do not hold out golden prospects to our naval captains, but we promise them an honest remuneration for the exercise of their professional knowledge, and we expect them to discharge their duty. We hold that the institution of an extended transport service would be an invaluable auxiliary to the executive branch of the Navy. At present we have some 1200 men belonging to Her Majesty's troop ships. Now, if we were only to treble the number of such vessels, we should have some 4000 seamen, well-disciplined and, above all, accustomed to "the Service," ready on an emergency to take their part, without further drill or preparation, against an enemy. We have said enough, we are sure, to enlist the attention of the Duke of Somerset and his colleagues to a question which is attracting much notice in the mind of the public.

It is stated that Mr. Ward (of Auburn, United States) has received instructions from the Admiralty to carry out a final series of experiments at Woolwich Dockyard, preparatory to his system being adopted in the Royal Navy. We shall indeed be glad if all possible latitude be granted to Mr. Ward, as our great desire is to see an improvement made in the mode of conveying messages from ship to ship, both at sea and at an anchorage; but we doubt if the Lords of the Admiralty will arrive at any decision in reference to Mr. Ward's invention, pending the trials which are by authority to be made also at Woolwich with Professor Way's new electric light, especially when it is taken into consideration, that experience has shown us that a flash of white light is seen at a greater distance than any coloured one that has as yet been exhibited. We cannot believe that their Lordships will act hastily in a matter of such extreme importance.

The steam iron-cased floating batteries, which were built in the last year of the Russian war, are undergoing inspection and repairs at the various dockyards near to which they are stationed, and we are glad to find that, up to this time, the reports as to their soundness are highly satisfactory. We have no doubt, from the writings of Captain Cowper Coles, R.N., Colonel Alexander, R.M.A., and other very distinguished officers, that these batteries will form an invaluable arm of defence in case of any attempted invasion; and it is quite apparent to us that, if they are cased with the new angular plated sides, which have successfully withstood all the firing which Captain Hewlett, of the Excellent, with all the appliances which he has so liberally at command, they would be invulnerable. This is a point most worthy of the consideration of the Lords of the Admiralty.

The ships which were stationed at Queenstown under the command of Rear-Admiral Erskine have joined the Commander-in-Chief at Milford Haven. The stay of the fleet at its present anchorage is uncertain; but letters addressed to it up to Monday will find it there.

The Royal Commission appointed to inquire into the state of the dockyards has suspended its labours, and will not resume its sittings until the 16th of October.

We have heard with much satisfaction that, notwithstanding the suddenness of the last examination for direct commissions, 61 candidates have passed, out of 84 presenting themselves. Some will, doubtless, imagine that from the superiority of this result, as compared with that of the last examination, there has been a change; but we have been informed that, with the exception of a more practical character being given to some of the arithmetical questions, there was no difference in the style of the two examinations.

A great deal has been said and done as to the advisability of keeping a proper proportion of the Commissariat in Great Britain, and of maintaining a sufficient supply of officers at home, to form a nucleus for an exigency. Nevertheless we are informed that the Chatham, South Wales, and London districts are without officers, because there are none at home to occupy them. No wonder that we hear of failures and shortcomings in the department at these stations.

The improved arrangements for the inspection of the Volunteer corps, to which we have already alluded, are now nearly completed. The present Assistant-Inspectors will have the head-quarters of their respective districts fixed as follows: Major Nelson, London; Lieut.-Colonel Luard, Reigate or Guildford; Lieut.-Colonel Ibbetson, Cambridge; Major Hume, Exeter; Major Dick, Birmingham; Major Harman, York; Major Jones, Edinburgh. Assistant-Inspectors have yet to be appointed to three districts—the North-Western, whose head-quarters will be Liverpool; the Welsh, at Swansea; and the South Scottish, Glasgow. In all probability three Majors of Depôt Battalions, who are about to be reduced, will be selected for these appointments.

We hear that Major-General Lockyer is likely to be succeeded in the Ceylon command by Colonel O'Brien, now Assistant-Quartermaster-General at the Horse Guards. Colonel O'Brien, although never engaged actively in the field, has rendered useful service in almost every part of the globe: he is a capital linguist, an efficient administrator, and a popular officer.

We learn that the Second Majors of about four or five of the Depôt Battalions are about to be reduced, one officer of that rank being considered sufficient for the discharge of the duty.

Captain P. A. A. Twynam, of the 1st battalion 15th Regiment, has been appointed Brigade Major to the 3rd Brigade at Aldershot.

We are sorry to hear that Sir Harry Smith, Lieut.-General Lautour, and Lieut.-General Broke, are all suffering from severe indisposition.

A subscriber requests us to put the following question to the Indian Army Amalgamation Committee to decide:—"When officers are transferred to the proposed Staff Corps in India from the late Company's Regiments, will they be compensated for the price of their commissions in consequence of its being really a retirement from the regiment, a gain to their juniors, but a pecuniary loss to themselves? This may be considered one of the rights or privileges so lately guaranteed by Parliament. Those now in the Service may claim it, but not those who may hereafter join." We think we can answer that the Commission would decidedly decline to give "compensation," such as our correspondent alludes to. An appointment to the Staff Corps is a valuable promotion to the officer who obtains it; and it is not usual to compensate a man by money for advancing him in his profession to a higher and more remunerative position. Even in the Queen's Army, where money is openly paid for promotion, it would not be done; and certainly it is not likely to be done in the case of the old Company's Service, whose payments are all illegitimate, secret, and unrecognised by the State.

A MANUAL FOR NAVAL CADETS.*

Few but professional men can appreciate all the industry and ability necessary to be the writer and compiler of such a work as Captain Boyd's "Manual for Naval Cadets." A second edition of it has just appeared; and although we think the title by no means explains its general usefulness to sailors of every age and standing, we cannot help pointing it out as containing much information most necessary to those young spirits who are daily quitting the firesides of our English homes to go and tread in the footsteps of Blake, Rodney, Howe, and Nelson. We do not believe that this book, excellent as it is, or its worthy fellow, recently published by the Messrs. Routledge, and entitled "Seamanship and Naval Duties," will of themselves make thorough sailors of our youngsters; practice alone in sea-going vessels can accomplish that. Captain Boyd knows full well, that had he as a boy, fresh from irksome Latin and Euclid, eager for the great future of a sailor life, been thrust into some den on board of a ship, and given the 500 pages of his own Manual as the first great barrier to be mastered before he could aspire to be a sailor, the probabilities are he would have been utterly, disheartened; and even had he remained in the Navy have eschewed all books, after he had mastered that one Manual, for the rest of his days. On behalf, therefore, of our sons, who go to sea, not because they dislike books, but rather that they are sick of school, and desire to embrace a life of activity and energy, we raise a warning note against the young sailors of the Navy being drilled, schooled, and examined into mere automatons; whilst we cheerfully hail such books as this Manual as of incalculable value to the sailor, whether he be young or old. It will be a treasure to the youngster, because he will always in it have a friend who will enlighten him on all points on which he may desire information; and it will be a companion to the oldster, who, feeling aware of his deficiencies, would, but for such a book, live on in ignorance, rather than divulge to his superiors that he did not know what he ought to have acquired earlier in life. When we say oldsters, we mean not only mates, but even lieutenants, commanders, and captains, for they all may need frequently to turn to such a vade mecum as this Manual. Captain Boyd has evidently had this in view in the compilation of his work, and has avoided saying so because he doubtless knew the indignation with which self-sufficient ignorance would visit any such atttempt to divulge the fact, that the admiral of the present day may know less than one of his own midshipmen, and that many a commander is often at the mercy of his engineers or gunners. We can only thus account for the presence of such chapters as those upon Mechanical Power, Floatation, the Telescope, Organisation of a Man-of-War, the Theory of Winds, and the Steam Engine. All these are far too abstruse for boys of from fourteen to sixteen years of age, who have, God knows, enough to do apparently in acquiring a knowledge of the more practical feats of knotting, splicing, steering, rigging, working boats, ships, and guns, as well as practising the art of navigation with the naval instructor, keeping their regular watches, and spending one day in the week under the chaplain for religious instruction. It must be, therefore, as a general manual, that the Admiralty have patronised this work, and in some respects it might have been better to have divided it into two parts, separating the purely rudimentary portion from that adapted to those who are more advanced in sailor knowledge. This suggestion would be worth consideration, in the event of the Manual reaching a third edition, and that it will do so we doubt not.

On the rudimentary portion of this Manual, that is, the portion strictly intended for the cadets and midshipmen of the Navy, we need not dwell; every knot, bend, hitch, and all the mysteries of rigging are not only well explained, but so illustrated by a series of excellent plates that the difficulties of the embryo sailor are very much lessened. The chapter on the handling of boats is one which may profitably be studied by not only royal and mercantile naval officers, but by every yachtsman, nay, by every civilian who aspires to put foot into even a punt upon our shores. They may, by taking heed to Captain Boyd's counsel, save not only their own lives, but avoid risking those of their fellow-men, and in many cases be able to give assistance to people in need.

But when we come to those chapters in which Captain Boyd treats of subjects adapted to the senior branches of his gallant profession, we find much to ponder upon. He is an officer well known as having been an old and excellent first-lieutenant, one who fills in a man-of-war the office of adjutant in a smart regiment, where all is not left to the sergeant-major and non-commissioned officers. The opinions of one so experienced must be of value, and we only regret that they should be so curt. Here, in future editions especially, if the Manual be divided, we think important additions might be made, especially on the mode of carrying on duty in command of a ship, whether as first-lieutenant or officer of the watch, with the proper words of command, and necessary precautions in executing every evolution. There is, we hear, a sad tendency amongst young officers now-a-days to shorten sail or handle a ship in the manner of the piratical heroes of Fennimore Cooper's time. They do not, it is true, with the Red Rover, wait for the squall to strike them, and then shout out, "Clew up, clew down, and cut away;" but the new mode is little better; it runs somewhat thus: "Bausan's mate, watch in studding sails!" It is piped, "Are you ready?" "All ready, sir." "Haul taught! "In stud sails." Now we have no hesitation in saying that we could make a wooden doll work ship, or make and shorten sail, if this constitutes seamanship; and without entering into technical details, Captain Boyd will see to what we point as an essential in his Manual. Commander Forsyth's work, now out of print, contained, amongst much that was useless, some very needful information upon this head for young naval officers.

In taking leave of thisvaluable work we must be allowed to allude to the present unsettled condition of the naval officers, and the men of our Navy, and to express an earnest hope that before very long a more harmonious working of the Servicewill prevail abroad and at home. Routine or system, and discipline are essentially connected with each other. System is the grand machinery of a man-of-war; it produces discipline or order, and that system can no longer be left to the whim or caprice of every officer. We agree with the remark made by the gallant author, that it is an error to suppose that a scale should be laid down in which every minute is to bring its specified labour, or that a man-of-war's man's existence is to be tabulated upon a routine board; but we cannot help thinking that it is high time that amongst naval officers there was one established plan as to the hours of labour, the hours of rest, the punishments and recreations of their men, the amount of exercise and proficiency requisite in gunnery and seamanship, the degree of obedience and subordination to be exacted, and a just and general definition of crime. This we fear is far from the case at present; we have reason to know that it is one of the grievances of which our men now very justly complain, and we see no remedy for it, except in the establishment of a Standing Navy, officers always in harness, and the formation of one uniform school, based upon the experience gleaned during the thirty years in which the man-of-war's man has been tossed to and fro between the discipline of the past and a happy-go-lucky system of popularity-hunting, which many weak officers have supposed to be the system of the future.

Discipline and seamanship are the two anchors by which that proud Service, the safeguard of England, will ride out all the storms that may ever assail it. Seamanship and a love of the ocean are born in us, but it was not till discipline was joined to seamanship that we became the terror of England's foes, and eventually swept them from the seas. In the last war discipline was maintained with the strong arm and by fear. Let naval officers now turn their attention how to attain the same perfect discipline, perfect obedience, by uniformity of system, based on early training, and mutual confidence arising from a thorough appreciation of the high principles by which their officers are actuated. If men like the gallant author of this Manual will turn their attention in an independent spirit to the solution of this problem, they will indeed render their country good service. It is quite as important as the rigging and efficient handling of their ships; and it is worthy of their deepest, heartiest, and most generous consideration. The present state of actual poverty in which the working-men of the Navy—the officers born without silver spoons in their mouths—are kept, has a tendency to break down the nobler impulses of their nature, and to make those who know most of the subject waive all independence of thought or action to those in whose hands are invested all the high places of the Royal Navy, but who are as supremely ignorant of its requirements, as of the tastes and dispositions of the seamen. This is a sad fact, which is pressing itself upon public attention: and the remedy will come before long. During the coming recess time will be given to naval rulers to amend and reform, to relieve an overburdened list of officers, and to root out the canker of a long peace. If they fail to do so, we feel assured that such pressure will be brought to bear in the session of 1861, that a sweeping change of system will be insisted upon. This country does not require that officers who have given their best abilities to the acquiring of such knowledge as may fit them to command her ships of war, should have to impoverish themselves or incur debt to be able to occupy the post of captain; and on the other hand she will not submit to see a Service, whose watchwords are zeal and devotion, prostituted by what seamen call "beefsteak officers"—men who look about and bid solely for those appointments where money, not honour, shall be the guerdon. Sordid feeling is ever born of the experiences of great want. The naval officer must not be able to justify the former by being subjected to the latter. This country and her legislature must look to that; but on the other hand let us remind the naval officers, and we say so to those of all classes, that they joined the Navy to defend Great Britain against her enemies. War is their profession, and to win victory in the day of their country's need, the great question to the solution of which all grades and classes have pledged their energies, ability, and zeal. It was not to earn the one or two good prizes of a pecuniary character which hang high up the tree of naval Service that our admirals, we hope, when young, doffed a blue jacket; and a struggle for honours and personal risk, not greed of the money bags, must be the example to be set to the younger spirits of the profession, if the Navy is to be what it should be. And at any rate, let the poor naval officer lay this comfort to his heart, that the man who said he died happy when twenty sail of the French line struck to him, and yet left his only child a pauper, earned an imperishable glory in his country's history, and an imperishable monument in the love of every English sailor.

* *A Manual for Naval Cadets.* By John M'Neil Boyd, Captain, R.N. Second Edition. (London: Longman, Green, Longman, & Roberts.)

NEW ZEALAND.*

Considering that, as Surgeon-Major Thomson tells us in his Preface, "ninety volumes, two hundred pamphlets, and nearly a hundred weight of Parliamentary papers have been printed" about New Zealand, it is surprising how little real knowledge we English people generally have of this interesting colony. We most of us know that the climate is good; and remembering Sidney Smith's witty advice to Bishop Selwyn, on his departure for that country, to have constantly a good supply of "cold curate and roasted clergyman on the sideboard," with a view to conciliating the chiefs, we easily recollect what we have heard about the cannibal propensities of the natives. But beyond this the generality of us know little or nothing. It is possible that the late disturbances in the colony will have the effect of inducing us to turn our attention that way; but as some of our readers may feel puzzled about making a selection from the mass of works to which we have referred as treating of the subject, we wish to recommend to their notice one which we consider supplies us with the required information in a peculiarly agreeable and reliable form.

"The Story of New Zealand" is the work of a gentleman who, during the eleven years he was in the country, enjoyed every facility for acquiring a knowledge of the aborigines, and of their history; he had access, he tells us, to unpublished official documents, and intercourse with representative men; he sojourned for months among the natives in the interior; and, last not least, had the benefit of the society of an "enlightened friend" with a hard name,—Wiremu Maihi te Range-katreke.

It is not surprising that a man thus situated should resolve upon writing a History of New Zealand; but there are many who, even with these advantages, would have bungled over the task, and produced voluminous work, too dry to afford us amusement, and too shallow to afford us instruction. Luckily however, Dr. Thomson is not a bungler, and his work is both amusing and instructive.

He gives us some interesting particulars respecting the zoological curiosities of New Zealand, one of the most remarkable of which is the absence of indigenous quadrupeds, whose places were supplied by a gigantic race of birds destitute of wings, and averaging thirteen feet in height. It was with the leg-bone of one of these birds called a Moa, that Professor Owen achieved his most remarkable triumph; from no other data than a thigh-bone which was brought to England in 1839, Professor Owen drew up a wonderfully correct notion of the bird. "The conclusions arrived at were so improbable, that Mr. Owen's friends tried to suppress the publication of the paper, from an impression that it would shipwreck his scientific reputation. Since then Professor Owen has established, on the evidence of fossil remains sent to England by various settlers, the former existence of fourteen species of wingless birds in New Zealand, and not the least curious objects to be seen in the mighty city of London are the skeletons in the Royal College of Surgeons and the British Museum of two of New Zealand's feathered giants. The British Museum skeleton has only lately been discovered, and was built up by Professor Owen from bones sent from the Middle Island; it belongs to a species distinguished from all its gigantic kindred by having a foot resembling that of an elephant." (I., p. 32.)

These gigantic birds have now become entirely extinct, none having been seen since 1650. The evidence as to their former existence is complete, and it is one of the peculiarities of all birds with imperfect wings, says Dr. Thomson, that they are making rapid strides towards extinction.

Our author confirms the opinion commonly entertained respecting the climate of New Zealand, which, from a sanitary point of view, he regards as nearly approaching perfection. "No single locality in Europe," he says, "has a temperature during the whole year like that experienced in New Zealand. The north island, in short, possesses the summer heat, tempered with a sea breeze, of Paris, Brussels, and Amsterdam, with the winter cold of Rome; while the middle island has a Jersey summer, and a winter in mildness resembling that of Montpellier" (I., pp. 38, 39); and accordingly he recommends it as "an invaluable residence for Europeans who have lost their health in India, China, or the warm districts of Australia."

The opinion of Dr. Thomson, as a medical man, on this point is of course extremely valuable; and the more so as he supports his views by a quantity of tabular information in the Appendix which would gladden the hearts of the Statistical Congress.

Dr. Thomson's history of the aborigines is complete

* *The Story of New Zealand; Past and Present, Savage and Civilised.* By Arthur S. Thomson, M.D., Surgeon-Major 58th Regiment. Two Volumes, with Illustrations. (London: Murray, 1859.)

Digitized by Google

and interesting; weaving their quaint traditions into the information of a more solid character which he has gathered elsewhere, he produces a narrative at once pleasing and instructive, and shows us that the New Zealander, in his various stages of civilisation, from the early days when the rude Malay proas set sail from Sumatra, and skimmed over the waters of the Eastern Archipelago, bearing to the shores of New Zealand the wild savages who were to people them, down to the present day, when allusions to cannibalism are disagreeable, and natives living among Europeans laugh when reminded of their having used pumpkins for drinking cups, shells for knives, and rivers for looking-glasses." (II., p. 297.)

The cannibalism which in early times militated so effectually against intercourse with these strange islanders, and the thought of which even to this day exercises a pernicious influence upon the colonisation of the country, is now, Dr. Thomson tells us, entirely a thing of the past, the latest authentic instance of it having been in 1843; "and to the credit of the present generation of New Zealanders be it said, few willingly admit to strangers that they ever shared in a cannibal feast." (I., p. 148.) The notions commonly entertained respecting this horrible custom would appear to be extremely erroneous: "*Human flesh was never eaten by the New Zealanders as food* . . . . the fact of it having been sacred, and forbidden food to women (one half of the population), is a strong argument against human flesh having been used as a substitute for animal food" (I., p. 147); and in the preceding page Dr. Thomson states that "it was such a disgrace for a New Zealander to have his body eaten, that if crews of Englishmen and New Zealanders, all friends, were dying of starvation in separate ships, the English might resort to cannibalism, but the New Zealanders never would." (I., p. 146.) There are one or two traditions respecting the origin of cannibalism, which indicate pretty plainly that revenge was the New Zealander's principal motive for indulging in it; "human flesh was eaten by the New Zealanders from motives of revenge and hatred, to cast disgrace upon the person eaten, and to strike terror" (I., p. 145); and it must be admitted that the possibility of your enemy seating himself before your trunkless head, and indulging in such a grim chuckle of triumph as the following (which Dr. Thomson says was actually addressed by a chief to the head of his opponent), would tend considerably to aggravate the horrors of war: "What! you wanted to run away, did you? but my *meri* overtook you, and after you were cooked you were made food for my mouth. And where is your father? he is cooked! And where is your brother? he is eaten! And where is your wife?" &c., &c., &c. (I., p. 130.)

But we can devote no more space to this strange and horrible custom, nor can we do more than refer to the numerous other subjects of interest which Dr. Thomson discusses at length: the religion of the country, the extinction of slavery, the games and amusements of the people, their literature, their domestic ceremonies, and their quaint traditions and superstitions,—respecting all these our author has something new and interesting to tell us, thus throwing considerable light upon the early history of the natives.

The power usurped over the people by sorcerers, who were supposed to be capable of conjuring up the spirits of the dead, seems to have been very great; and there is something extremely unnatural and barbarous in the superstition that the "spirits of dead infants were most dreaded, because from their short residence on earth they had acquired no attachment to mankind." (I., p. 117.) The idea is worthy of a people who ate their enemies from motives of revenge, and who danced triumphantly over the fields of battle, scooping out and swallowing the eyes of the prostrate wounded. (I., p. 256.) The second part of these volumes is devoted to the history of the discovery of New Zealand by Europeans; and when we come to our own part in the transactions which followed, we hardly know whether to be proud or ashamed of it; proud undoubtedly we must be of the work which has been done in this benighted land, of the noble labours of our missionaries, and the just but firm policy pursued by successive governors, particularly by Sir George Grey,—and traced in the volumes before us in a lucid and masterly manner; but there is much to blush for in the conduct of our countrymen: the different massacres of boats' crews, which we have been taught to look upon as evidence of the bloodthirsty and savage nature of the New Zealanders, generally turn out to have been provoked by our own disgraceful conduct: even the terrible massacre of the Boyd was the result of our ill-treatment of a native called Tarra, or George, who having been shipped to work a passage from Sydney to Wangaroa, was twice severely flogged for refusing to work when sick. The traffic in preserved human heads, then in great request in European museums, and carried on to a terrible extent by our traders, was the indirect cause of much bloodshed. Our unauthorised and unsolicited interference in native feuds, our rapacity, our arrogance, our intolerance, all contributed in a greater or less degree to promote bad feeling, and ultimately resulted in quarrels and carnage; and the advice of one of their chiefs to a missionary who had preached a sermon in the native camp on the text "Whence come wars and fightings?" to deliver the same discourse in the English camp, where it would be much more applicable, seems not to have been wholly unnecessary.

Taranakai, the scene of the recent disturbances, appears always to have been unfortunate in this respect; in early days it was the arena in which quarrels between ourselves and the natives were fought out, the cause being generally then, as now, some dispute about the sale of land; a subject, indeed, which throughout our residence in the colony seems to have been a constant and fruitful cause of dissention.

The third and concluding part of Dr. Thomson's work contains some interesting remarks respecting "the decrease of the New Zealanders, their progress in civilisation, with hints to emigrants," nor is this the least valuable portion of this very interesting book.

There appears to be no doubt that the natives are sensibly decreasing in numbers; and the reasons which our author assigns for this are—"1st, Inattention to the sick; 2nd, Infanticide; 3rd, Sterility; 4th, New Habits; 5th, New Diseases; and, lastly, the evil effects arising among men from intermarrying with scrofulous blood-connections, or what is better expressed by the term 'breeding in and in.'" (II., p. 285.) The rate of decrease produced by these causes Dr. Thomson considers to be one per cent. annually, "a rate of mortality," as he justly observes, "which if it goes on unchecked, must soon blot out the race from the land."

Let us hope that our legislators will turn their attention to this important subject, and introduce such compulsory sanitary and other reforms as will preserve the colony from this grievous result. It is satisfactory, however, to learn that the natives are advancing surely, though slowly perhaps, in civilisation; and Dr. Thomson, being fond of statistical proofs, gives us some tables in his text and in the Appendix, showing the strides which the country has made since 1770, exhibiting a progress which is sufficiently remarkable.

Here, with a few useful hints to emigrants, Dr. Thomson concludes his—we had almost said his labours; but if the compilation of his work afforded him half the pleasure which we have derived from its perusal, his task must have been a very pleasant one indeed.

We must not omit to do justice to the excellent plates and plans with which these volumes are embellished; they enhance materially the value of a work which we hope such of our readers as have a desire to improve their acquaintance with New Zealand will be induced by our remarks to peruse.

At this period, when public attention has been drawn by the debates in the House of Commons to the increased expenditure in our dockyards, fortifications, and the Naval Estimates generally, any work likely to afford useful information upon these national objects ought to be considered welcome. In this light we view a "Hand-book of Portsmouth and Guide to the Dockyard and Fortifications," published by Lewis, of the High Street in that town. This little, unpretending shilling volume, contains a great deal of useful and reliable information, as well as graphic descriptions of the points of interest in the locality, including the new defences, &c. We recommend this hand-book of our chief naval arsenal to such of our professional and non-professional readers as may take any interest in these matters.

INTELLIGENCE FROM THE SEAT OF WAR IN SICILY.

[From our Own Correspondent.]

The prospects of Sicily seem brightening daily, and are already sufficiently promising to have attracted a French company of capitalists, and another of Genoese; agents from both of which have already arrived at Palermo, with a view to the construction of railways into the interior. The constant successes attending the progress of Garibaldi's arms do not seem to have blinded the war minister as to the importance of coast defences, and he is now busily engaged in the construction of two fortresses for the protection of the city of Palermo. Minotti Garibaldi, the son of the Dictator, has arrived at the above-named city wounded, but is reported as progressing favourably. Amongst the anecdotes related of the recent engagement at Milazzo is one recounting the capture of a Neapolitan cavalry officer by a volunteer named Angelo Nobile, belonging to the battalion of sharpshooters of Cosenz, under circumstances so creditable to the captor, that Garibaldi, who was present at the time, is reported to have allowed Nobile to retain the sword of his captive as an honourable souvenir of his meritorious bravery. Every day makes an addition to the naval force at the disposal of the Dictator; another English steamer, of 800 tons and 300 horse-power, has arrived from England, which, with the Elvezia, Amsterdam, Belgunce, and a couple of steam tugs, as well as the reinforcement presented by the desertion of the Veloce and the captures, present a respectable appearance. The whole military force at present in Sicily is as follows: 1 brigade of the line, regular; 4 battalions, commanded by General Nino Bixio; 2 brigades, commanded by General Medici; 3 brigades, commanded by General Cosenz; 1st, 2nd, 3rd, and 4th battalions of Cacciatori dell' Etna; all the Sicilian volunteers bound to serve during the time the war may continue; 1 company of Cacciatori Genovesi; 1st and 2nd batteries of artillery; 1 battalion of engineers; 1 squadron of "Guides;" 2 battalions of Cacciatori dell' Alpi Scelti; 1 battalion of the Figli della Liberta, about 900 strong, raised and commanded by Colonel Dunn—in this there are many foreigners. Of the above force 3 brigades, a section of artillery, 2 companies of engineers, and 4 battalions of the Cacciatori dell' Etna are in the direction of Syracuse, Milazzo, &c. In addition to the existing army as just stated, the following are expected to be complete in a few days: the 4th and 5th brigades of the regular line regiments, the 1st regiment of cavalry commanded by Signor la Cerda, for which saddles, &c., are hourly expected from France by Captain Vassallo; the 5th, 6th, 7th, 9th, and 10th Cacciatori dell' Etna; and the 3rd and 4th batteries of artillery. Besides this growing force there are 200 "guards of internal security;" a squadron of Compagni d'Armi; and several battalions of militia of the first class, corresponding to the National Guard Mobile, and dressed in blouses. Twelve hundred men are encamped near Catania, and the force conducted into the interior remains there. The enrolments are open for the 1st regiment of artillery (field), for the marines—pay 1 franc 3 sous—for two battalions of regulars, commanded by Majors Badia, Bolla, and Ponesberg, and for the corps of Sicilian carabineers, commanded by Colonel Calderari. The lists for a second regiment of cavalry, and for additional batteries of artillery, are in course of formation. The Sicilian military uniforms, with the exception of the artillery and engineers, who are dressed similarly to the same corps in Piedmont, exhibit great varieties of the picturesque in costume. The regiments of the line wear a tunic of scarlet cloth, with a cap of the same colour and trowsers of brown unbleached linen; the Cacciatori dell' Alpi wear also the scarlet tunic, but instead of a cap of corresponding colour, wear a Calabrian hat with plume of black feathers; their trowsers are of black cloth. The Cacciatori dell' Etna resemble no other corps, and combine with a dark coffee-coloured blouse, unbleached trowsers; and to crown all, a scarlet forage-cap. The "Sons of Liberty" (Dunn's regiment) wear a jacket and trowsers, suit of white, and a flat scarlet cap with white band and without peak. Scarlet seems to be a favourite colour in Garibaldi's army, arising in all probability from the great successes that attended the red clad volunteer bands of Italians in 1858, and the no less remarkable terror inspired by the reappearance of the same scarlet tunics on the shores of Sicily. The royal troops still hold the fortesses at Syracuse and Messina, at the latter place by virtue of the convention the present state is likely to continue for some time. But how long? Meantime the national force is growing every hour, and 600 men have arrived in one steamer. Several Neapolitan officers have deserted to Garibaldi, and report states that many others are inclined to follow their example.

Naples, 11th August.—The all-absorbing topic here is the approaching elections of representatives for the National Parliament. This subject affords to journals of all political shades a good property article as often as topics of local interest are scarce. The most exalted patriotism, the most uncorrupted faith, and the most supreme disinterestedness are professed on all sides, by constitutionalist, liberal, and Garibaldian sympathisers. Meantime a new question has arisen, that touching the rights electoral of returned exiles; and more particularly such as may have become naturalised during their residence in foreign countries. No more effective apple of discord could possibly have been thrown on the political stage at the present time than this. It serves, in the first place, to exhibit the unmitigated dislike of the old absolutists against the exiles, as well as their jealousy of the preponderance the liberal members, recruited from the ranks of such sufferers for the cause of liberty, would be certain to exercise in the parliament if once admitted; at the same time that the tenacity with which the opposite side of the question is adhered to by the popular party proves no undervaluing of the importance of the interests concerned. Amongst the candidates for senatorial distinction is the Duca Di San Donato, whose former career may be sketched in a few words. He was a political prisoner in 1847; major in the Neapolitan National Guard, 1848; exiled in 1849: he has returned on the faith of the amnesty. As the duke is a consistent adherent to the national cause, his right of admission to the new parliament will of course be warmly contested, and will in all probability decide the question for many others who are similarly situated. The present state of Naples, as far as the deluge of pamplets and newspapers is concerned, fast approximates to that of Paris in 1787, as it is described in Carlyle's "History of the French Revolution," "flooded with pamphlets *regorge de brochure*, flooded and eddying"—in figurative language it is a sheer snowing of them, and like to snow up the government thoroughfares. It would seem as if great political changes ever usher into existence hosts of ephemeral publications, single sheets, political songs, and cheap newspapers of every sort. One would suppose that in such a state of affairs any attempt at censorship or supervision of their contents would be hopeless; notwithstanding, this Herculean labour is, we perceive, performed; in proof of which I have but to cite the case of three papers lately suppressed, the names of which are, *Il Filibustiere*, *L'Omnibus*, and *La Liberta*. No special reason for this act has been as yet vouchsafed, nor have any particular articles they contained been noted as the cause of government displeasure. It would be impossible to give your readers even a per-centage of the flying reports one hears every day in every part of the city, often inconsistent with each other, and almost always of such a nature, or proceeding from such source as is not altogether reliable. Take, for example, that of an attempted descent by Garibaldi's men at Reggio, which, although published in the constitutional papers, and copied from the official journal, many gravely doubt, and the more so as the expedition is said to have consisted only of 200 men! Those who appear to know most of the Italian and Sicilian question say that if Garibaldi determines to attack Naples he will do so first under cover of a feigned landing elsewhere, but certainly on a larger scale than that reported to have attempted a descent on Rezzio. As the resistance here would to a certainty be much greater than any hitherto met with, the invaders, however daring, will require a much stronger force than that necessary for the reduction of such places as Syracuse or Messina. There is no doubt but great numbers would flock to join the Dictator's standard,—which, in case I have not before mentioned it, I may tell you is a tricolor, green, white, and red, with the Sardinian arms in the centre,—and a large accession to his strength would be caused by desertions from the king's army; yet, at the same time, it must not be forgotten that Royalists are more numerous here than at Palermo, and the victory would be by no means a walk over. It is stated, on good authority, that at a cabinet council held on the night of the 9th inst., there was a

Digitized by Google

division amongst the councillors of the king, and the opposite opinions were these—the first, to disarm the National Guards and disband that force—its author, my informant cannot name; the other was that of Liborio Romano, who advised the king to give up all the forts and strongholds to the National Guard, to go at the head of his army against the Austrians, and endeavour to oust them from Milan, and by thus identifying himself with the national cause of Italian unity and liberty, deserve well of his people, and be their king by choice, rather than as it now is, by might—a tenure that becomes more and more endangered every hour.

COMPETITIVE EXAMINATIONS.

A Report from the Examiners appointed to decide the merits of the respective candidates for admission to the Royal Military Academy, Woolwich, at the last competitive examination at Chelsea Hospital, has just been issued, to which is appended some observations by the Council of Military Education. The following are the most important items of the document:—

Mathematics: Examiner, Rev. Canon Heavyside, M.A., late of Haileybury College.—"Instead of any improvement in the general attainments of candidates in relation to the examination for admission to the Royal Military Academy, Woolwich, there is a visible deterioration. All the faults I have before adverted to seem to me to be now exaggerated. The candidates or their tutors have not been impressed with the necessity of a good grounding in the elements of pure mathematics before the mixed mathematics are attempted." Ditto: Examiner, Mr. T. Todhunter, M.A.—"I cannot speak favourably of the papers of the candidates for admission to the Royal Military Academy. I observe the same deficiency which I have remarked on former occasions, namely, imperfect knowledge of the lower subjects, and extreme inaccuracy in the work."

Notes by the Council.—The Council cannot allow the remarks of the Rev. Canon Heavyside and T. Todhunter, M.A., to pass without observation. From the commencement of the system of competitive examination, the want of a proper acquaintance with the earlier and more practical parts of mathematics has been complained of, and it cannot be doubted that the large number of failures at the last examination is in a great measure attributable to the loose manner in which candidates have been hurried through their studies.

Classics: Examiner, Rev. M. Pocock.—There was much foolish guessing and vague writing in answer to questions in history and geography, and (which is worth attention) those individuals most distinguished in language do not also gain high marks in history.

French: Examiner, M. Esquiros.—The examination was more conspicuous for the quantity of papers handed in than for their quality. It falls far short of what might have been expected of so large a competition. A good deal of mediocrity prevailed through the whole.

Experimental Sciences: Examiner, F. A. Abel, Esq.—The general deficiency in chemical knowledge which I had to notice on a former competitive examination was again observable in the result of the last examination.

The examiners in German and some other branches reported favourably of the progress made by the candidates.

The Report concludes by a notice, signed by the Council of Military Education—Major-Generals Rumley and Portlock, Lieut.-Colonel Addison, Colonel Elwyn, and Canon H. Mosely—to the effect that the cause of the great number of failures appeared to be that candidates were not well grounded in the lower branches of mathematics, and had been hurried through their studies, but the Council trusted that these failures would have some effect as regards the preparation of future candidates.

THE FATAL OCCURRENCE AT DOVER.

The Town Council having assembled on Wednesday morning and appointed a coroner to succeed the late Mr. Thompson, the inquiry into the circumstances attending the melancholy catastrophe which took place at Archcliff Fort on Thursday week, and resulted in the death of Lieutenant Thompson and Sergeant J. Monger, of the Dover Volunteer Artillery Corps, was opened at the New Sessions House at noon.

The Coroner, Mr. W. H. P. Payn, having sworn the jury, addressed to them some brief remarks on the circumstances attending the accident, when they proceeded to view the bodies of the deceased and the scene of the occurrence.

Captain Wollaston, commanding the Volunteer Artillery Corps, Captain Astley, Lieutenant Stilwell, and Lieutenant Court, officers of the corps, were present at the inquiry. Major Field, of the Royal Artillery, was also in attendance.

The jury having returned to the Sessions House, the following witnesses were examined:—

Edward Ferrand Astley.—I am a captain in the Dover Volunteer Corps, and I was present at the Archcliff Fort Batteries on the evening of Thursday last. In consequence of hearing that some of the members of the Volunteer corps had fallen over into the trench I ran round, and after passing one who did not appear to me to be seriously injured, I came to Lieutenant Thompson, who was then lying on his back in a dying state. Upon examining, to ascertain the cause of the injury, I found the blood was flowing freely from a wound, or from two small wounds I should rather say, near the left groin, and on trying by pressure to arrest the bleeding I found the injuries to be of such a nature that it was quite impossible to hope to save his life. I remained with him until he died, and was present when his body was removed into the fort at Archcliff. I should say the time that elapsed from my first going to him till his death was ten or twelve minutes. Mr. Thompson was sensible. I spoke to him as soon as I got to his side, and he recognised me. He subsequently asked what it was all about, and wanted to get up. He then asked for some water, and in a few minutes afterwards for some brandy, after which he did not speak any more. He died, I have no doubt, from internal hemorrhage. The wounds were very slight. My own impression was that a splinter had struck him, occasioning the injury which proved fatal. I did not see Sergeant Monger previous to his death. He was being removed from the trench just as I got to Lieutenant Thompson. After Mr. Thompson was carried into the fort I went to the military hospital to see what was the nature of the injuries sustained by the persons who had been carried there, and I then saw Monger lying dead. I am a member of the Royal College of Physicians, and hold a surgeon's diploma. I believe that Monger died from internal injuries, occasioned by the fall and from another person falling on him.

By the Foreman—I could not say the length of time that elapsed before Mr. Thompson asked for water, everything was so confused. Brandy could not be got; but I sent into the fort, and Colonel Stotherd sent some wine, having no brandy at hand. I tried to administer a little, but found it impossible; indeed, if it could have been administered it would have been useless, except to prolong life a short time.

George Bennett, hatter, residing in Snargate Street, and a gunner in the Dover Cinque Ports Artillery Volunteers.—I was No. 6 man of No. 3 gun on the evening of the accident. I was watching the shot discharged from No. 2 gun. I saw the shot fall a little short of the target. The order to fire No. 3 was then given, and directly the gun was fired I heard the screaming of women. I turned to look at the battery from which No. 2 gun was being fired, and saw Sergeant Matthews, the instructor of the corps, come out of the battery, and heard him say, "For God's sake go down into the trench, for the men are blown over!" As soon as I got into the trench I saw Sergeant Monger lying on his back, perfectly motionless, and groaning heavily. I saw also Mr. Thompson. A piece of the gun was lying between them. Bugler Tucker was standing by the side of Monger, who was quite unconscious. I then, with assistance, conveyed Mr. Monger to the hospital upon a hurdle, and he ceased to breathe very shortly after we had laid him on a bed.

By the Jury—As far as I could judge from my own observation the shot fell from 50 to 60 yards from the target; but my opinion should not be taken as a strictly accurate one. I observed no difference in the report when No. 2 gun was fired from an ordinary report.

Mr. William Fuller, a Trinity Cinque Ports pilot, residing at Bulwark Hill, Dover, deposed as follows:—About half-past six o'clock on Thursday evening I went with my two sons to witness the target practice of the Volunteers. I was standing in a field overlooking the South Eastern Railway, about 100 yards in advance of the guns that were being fired, and at an angle of about 40 degrees from the line of fire On No. 2 gun being fired for the fourth time I saw from 50 to 60 pieces blown upwards from the gun, and in the midst of them a huge fragment, which ascended higher than all the rest. It rose at least fifty feet into the air. At the same instant I saw four individuals swept off the parapet, the nearest to me, whom I have since ascertained to be Mr. Thompson, turning several summersaults in the air before falling. I also saw two falling together, and the fourth descending singly. I immediately went to the trench, which I reached within forty seconds after the explosion I first saw one of the Volunteers reclining on the ground close to the wall. With assistance I lifted him up, and found that it was Mr. Thompson. He was groaning, and breathing heavily. I felt satisfied he was dying. With the assistance of some other persons I removed him to the centre of the trench on the north side of the bastion. My attention was then called to Sergeant Monger, who appeared to be in the agonies of death, and who was lying in the centre of the trench. I found the large piece of gun I have before mentioned within four or five feet from Mr. Thompson's legs. From seven to eight minutes elapsed before getting assistance from the fort. From the time of Mr. Thompson's falling till he died, five-and-twenty or thirty minutes elapsed.

Edward L. Wollaston, captain of the 1st Cinque Ports Artillery Volunteers, examined.—An order was given for gun practice by the corps on the evening of Thursday last. I gave the orders to fire. I heard No. 3 fire, and saw the shot strike the water. Looking to my left I saw James Hadlow, who was No. 7 on No. 2 gun, coming towards me with his hands up to his face wounded. The smoke had hardly cleared away at that time. I said, "What's this?" I then saw that an explosion had taken place, and my attention was directed to Gunner Gilfillan, who was more seriously wounded. Captain Astley came up immediately and examined him, and said he thought his arm was broken, but that otherwise he was not materially injured. Captain Astley then asked me to hold his arm in a position that would not be painful to him, and we placed him on a hurdle to carry him off. He seemed to be groaning and in much pain; but he said, "Oh, captain, I think I can walk," and he was assisted away. My attention was now directed to our drill-instructor, Sergeant Matthews, who was on the parapet, looking down into the trench. He said to me, "There are some people hurt in the ditch, sir!" I stepped into the parapet, and saw that Sergeant Monger was on a hurdle, being carried away; also a relative of my own. I then ran round through the fort to the ditch, and found Lieutenant Thompson lying on his back. Life was not quite extinct; but after about five minutes he ceased to breathe.

By the Jury—Not more than the usual charge was fired from the gun on this occasion. The flannel bags used for holding the charge would not contain more than the necessary quantity. I cannot say I noticed particularly whether the charge had been rammed home in this particular gun; but if it had not been, the cartridge could not have been pricked.

Gunner John Penn—I am a baker, living in High Street, Charlton, and belong to the Artillery Volunteers. I was No. 3 at No. 2 gun on the evening of Aug. 9. It was my duty to load. The cartridge was supplied to me by No. 7, and I placed it in the gun, giving it the whole length of my arm. The shot was supplied by No. 5, together with the grummit wad. I placed both in the bore, and took up my position to assist No. 2 in ramming home. We rammed home in two distinct motions, and drew back a pace, as is usual. I have performed the same duty as on this occasion several times before from this gun as well as others, and it was rammed home on Thursday in the same way as on other occasions. There is a difference in the force required to ram home different guns, but this gun was very easily rammed. The man who served the vent and pricked the cartridge did not cry out, or we should have rammed again.

Sergeant John Matthews, of the Royal Artillery, quartered in Dover, and instructing-sergeant to the Dover Volunteer Corps, having given similar evidence as to the proper loading of the gun, proceeded to say:—The practice commenced as usual from right to left, and so went on till the accident happened, at the fourth round of No. 2 gun. After the gun was fired I found myself covered with dirt and shingle. I thought, knowing the high elevation of the gun, that something must be the matter. I looked to my left and saw No. 7, who had fired the gun with his hands up over his head, and the blood running down his face, and on turning my eye to the gun I found there had been an explosion. I exclaimed, "My God, there is an explosion, and some men are over into the ditch." I then went to the battery No. 3 gun and gave the alarm, when every man left the gun, and went to render assistance. I then got upon the parapet, and looked over into the trench, where I saw Mr. Thompson and Sergeant Monger both lying. I consider that every man at No. 2 gun knew his duty, and did it. We had not a young hand at the gun.

By the Foreman—I did not see the shot alight, my attention being taken up by the accident.

John Leigh, silk mercer, Snargate Street, Dover—I am a gunner in the 1st Cinque Ports Volunteers. I was told off on the evening of the explosion as one of a range party. The shot from the exploded gun fell 100 yards from the target. Three other shots were also 100 yards distant. The shot from No. 2 gun, previous to the discharge with which it exploded, went within two yards of the target. We were not aware from any circumstances that an accident had taken place, and remained on our station till it was quite dark.

Lieutenant William Rooke, Royal Artillery, deposed he had seen the gun loaded, and that the numbers of the gun all performed their duties steadily and correctly.

By the Jury—I had attended the practice of the Volunteers twice before, and in my opinion that gun was loaded quite as well as it had been previously.

James Stilwell, solicitor, residing in Dover, and a lieutenant in the 1st Cinque Ports Artillery Volunteers, said: I was in the battery with Captain Wollaston on the evening of Thursday last. I was ordered by Captain Wollaston to see after No. 2 gun, the second gun from the right. Three rounds were fired from it. The two men who rammed home the charge did their duty very well. There was no difficulty in ramming the gun as there sometimes is. The charge went home easily, and from the mode in which the ramming was done I should say the charge was well home.

The inquiry was then adjourned until Tuesday next, when scientific evidence as to the cause of the explosion will be adduced.

ARTISAN VOLUNTEER CORPS.

Lord Elcho, in a letter to the *Times*, discusses a question which has probably occupied the attention of most sincere friends of the Volunteer movement. The Volunteer force includes representatives of all ranks of society. It is impossible, however, to ignore the fact that the working classes furnish a comparatively insignificant quota,—a circumstance which arises neither from a want of loyalty on the part of our working men, nor from a fear on the part of the authorities that it would be unsafe to convert the masses into expert riflemen. Money has been, and is, the great difficulty. Lord Elcho thinks "we cannot calculate with any degree of certainty upon the permanent amount of our force until we see what number pay for a second uniform." It has been proposed to form special corps of working men, but the objection to this suggestion is, that it would strike at the very root of the movement, that it would create class distinctions where feelings of perfect unity and brotherhood should exist. What is required is a less expensive system, and the three modes suggested by Lord Elcho of remedying this acknowledged evil are—

1. By existing corps adopting a cheap, comfortable, working-dress, which should be the uniform of the corps, and the cost of which should be under 3*l*., and therefore within the means of the working-men, while at the same time there might be a more ornamental and expensive dress, which any member of the corps might or might not get, according to his state and fancy, but in which he would never appear on parade. 2. By having artisan companies attached to existing corps, whose dress, though the same in colour and general appearance, might be less ornamental and expensive. 3. By establishing a corps confined to no class or district, but the expenses of which would be limited—say to 3*l*., so as to enable artisans to join.

Artisans might be allowed to pay for their outfit by instalments; the entrance-fee might, in their case, be remitted; while the Government might, in addition to a rifle, deal out to each Volunteer a fixed allowance of ammunition.

Lord Elcho's letter has, as might be expected, evoked some critical comments. Sir John Shelley writes to the *Times*:—

"Lord Elcho proceeds to read a lecture to Volunteer corps of the metropolis, and to point out that in order to admit the best working men into their ranks, an alteration must take place in their system, the extravagance of the present day must be given up, and Volunteers must be content to wear an inexpensive uniform on parade; but that if the taste or fancy of any member of the corps should induce him to get a more ornamental or expensive dress, that the smarter uniform must never appear on parade. Why, sir, in my opinion here will at once arise one difficulty; the artisans of the metropolis will not, as I believe, enter in any numbers any corps into which they are not received on perfect equality with their fellows. The fact of one man being permitted to wear an expensive uniform for highdays and holidays, which the artisan would not be able to afford, would at once create a distinction fatal to a feeling of equality; and, setting aside the fact of such a proposition being most unsoldierlike and as smacking of playing at soldiers, I say let no man be allowed to wear a dress in which he does not appear on parade, and no invidious distinction can exist."

Captain Montgomerie (commanding the 34th Kent Rifle Volunteers) writes to the same effect on the same point:—

"Of the three modes suggested by Lord Elcho I cannot but consider the first two objectionable, as perpetuating that distinction between different classes which I am sure it is the object of his Lordship and of all those who have at

Digitized by Google

heart the permanence of the Volunteer movement to do away with. Any artisan who finds members of the corps he may join allowed to wear (even off parade) a 'more ornamental and expensive dress,' which his own means preclude him from adopting, must be constantly reminded thereby of his own inferiority in social rank—at least, in one of its principal symbols, the purse. The third mode, that of establishing corps confined to no class, but with limited expenses, is much more advisable, and has been carried out with signal success in various metropolitan districts, as well as in some provincial towns."

HOUSE OF COMMONS.—FRIDAY.

DEFENCE OF LONDON.

Sir De Lacy Evans gave notice that on Thursday next he would move an address to Her Majesty praying that she would be pleased to give directions to have carried into effect the recommendations of the Royal Commission on the National Defences in paragraphs 156 and 158 of the report to Her Majesty for the construction of a fortified work on Shooter's Hill, calculated for a garrison of 1500 men, with a view to the protection of Woolwich Dockyard and Arsenal, and as an important element of the defences of the metropolis. Also praying Her Majesty to be pleased to direct that a Royal Commission be appointed to examine and report to Her Majesty on the lines of march available to an invading army advancing against London; on the obstacles or positions which may be occupied or prepared to obstruct or defeat an enemy on these lines of advance, and on the points of *appui* or support of the national forces in their operations or manœuvres in the vicinity, and for the defence of the metropolis of the empire.

THE LATE ACCIDENT AT DOVER.

Mr. H. B. Sheridan asked the Secretary of State for War whether the gun which recently burst at Dover had been inspected by a Government officer, with a view of ascertaining whether there were imperfections in the metal sufficient to account for the explosion which took place. Whether the Government had any means of knowing how often the gun had been previously fired during the long period it seemed to have been in use. Whether it was the intention of Government to make any investigation, with the view of deciding, on scientific grounds, how often guns of similar calibre might with safety be fired. Whether Government supplied to each Volunteer Artillery Corps an efficient officer at the Government expense capable of superintending and instructing the Volunteers in artillery practice. And whether it was the intention of Government to aid in the efforts of the local authorities to compensate the representatives of the unfortunate persons who had thus lost their lives in their endeavour to serve their country; relying upon the supervision of the Government with reference to the material supplied.

Mr. Sidney Herbert stated that Captain Hardy, of the Royal Artillery, had examined pieces of the gun which had burst, in order to ascertain whether any flaw had existed in it, but he had found none. On the contrary, nothing could appear more sound than the metal. The gun had been sent from Woolwich, and had been used for practice by the Rifle Artillery, but not to a degree that could have injured it; 100 rounds only had been fired from it, whereas a gun was not thought in a state likely to be dangerous until after 1000 rounds had been fired from it, though frequently 3000 or 4000 rounds were fired from sound guns. An officer and a non-commissioned officer of the Royal Artillery were present when the accident occurred. If the persons who had suffered had been non-commissioned officers, the rules of the Service would not provide any relief for their widows and families. As it was, inquiry should be made as to whether the widows of the unfortunate gentlemen who had been killed were in circumstances which required assistance, and if so, their cases would receive the most favourable consideration from Government.

On the order of the day for going into a Committee of Supply, Sir De Lacy Evans complained of the determination of the Government not to allow Volunteer corps to be enrolled in Ireland, and reminded the House that the Duke of Wellington, when Secretary for Ireland in 1808, encouraged the formation of these corps, and attributed great value to them as a defence against invasion.

Mr. Griffith expressed an opinion that it was unjust to officers of cavalry, and discreditable to the country, that a stoppage should be made from their pay of 8½*d.* per horse per day—the forage supplied to horses which they are required to keep for the performance of their regimental duty.

ARMY ESTIMATES.

The House having gone into a Committee of Supply, the sum of 560,000*l.* was voted for defraying the charges for the embodied Militia from the 1st of April 1860 to the 31st of March 1861.

The next vote, 595,355*l.* for works, buildings, and repairs for fortifications at home and abroad, gave rise to a desultory conversation, but no serious objection was taken to the estimate, which was ultimately agreed to.

The following notes for the Non-effective Services were then agreed to:—25,390*l.*, Rewards for Military Services; 75,860*l.*, Pay of General Officers; 492,357*l.*, Pay of Reduced and Retired Officers; 184,523*l.*, Widows' Pensions and Compassionate Allowances; 44,123*l.*, Pensions and Allowances to Wounded Officers; 30,638*l.*, In-Pension; 1,144,895*l.*, Out-Pension; 136,837*l.*, Superannuation Allowances, &c. This completed the Army Estimates.

The Italian papers state that the steamer the Queen of England has brought to Garibaldi the following contributions in aid of the Sicilian cause:—Seven of Blakesley's cannon, 1150 Enfield rifles, 80 common rifles, 40 pistols, 16 other cannon (two rifled, with the carriages complete), 40 cases of bombs, 389 cannon-balls; to which are added 1125 cases of Colt's revolvers, sent to Garibaldi from America by Major Hartley. The entire freight of the vessel represents a value of 50,000*l.* The same vessel which thus conveyed the "bane" carried, as we learn, also the "antidote" of war, in the gifts of "The Ladies' Garibaldi Benevolent Association," namely, 25 hospital tents, four large boxes of medicines, supplies of splints and bandages, and lint, and numerous air-beds and air-cushions, for the use of the wounded volunteers.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BETHUNE—August 3, at Luss, Loch Lomond, the wife of Lieut.-Colonel Bethune, 9th Regiment, prematurely, of a son, stillborn.
BISSETT—August 8, at Heathfield Park, county Donegal, the wife of G. E. L. Bissett, Esq., late Captain 19th Regiment, of a daughter.
BUCKLE—August 13, at Crow Hill, Nottinghamshire, the wife of Captain Buckle, H.M.'s 40th Regiment, of a son.
BURRARD—August 12, at Lady Burrard's, in the Isle of Wight, the wife of Lieut.-Colonel Sidney Burrard, of a son.
CLOSE—August 13, at Langley Villa, Clifton Hill, Brighton, the wife of Lieut.-Colonel F. A. Close, of a son.
DICKSON—July 31, at 9, Lansdown Place West, Bath, the wife of Captain J. B. Dickson, R.N., of a daughter.
DOUGLAS—August 12, at Kensal Manor House, the wife of Major-General R. P. Douglas, of a daughter.
FLOWER—August 14, at Banstead, Epsom, the wife of Captain Lamorock Flower, 3rd Regiment Royal Surrey Militia, of a daughter.
HAWLEY—August 10, at 32, Lower Bagot Street, Dublin, the wife of Lieut.-Colonel Hawley, 60th Rifles, of a son.
INGLIS—August 7, at Choisey, Wallingford, Berkshire, the wife of Dr. John Inglis, H.M.'s Bengal Army, of a daughter.
LYON—August 15, at 7, Queen's Terrace, Hyde Park, the Hon. Mrs. Claude Lyon, of a son.
MAXWELL—June 20, at Mussoorie, East Indies, the wife of Colonel G. Vaughan Maxwell, C.B., 88th Regiment, of a son, stillborn.
MUNDY—August 11, at Southsea, Hants, the wife of Colonel Pierrepont Mundy, Royal Artillery, of a son.
SCARMAN—August 9, at Durham, the wife of Thomas Scarman, Captain and Adjutant North Durham Militia, of a daughter.
SCOTT—June 22, at Bareilly, India, the wife of Captain F. Cunninghame Scott, 42nd Royal Highlanders, of a daughter.
SHERLOCK—August 12, at Dundee, the wife of Captain Sherlock, 74th Highlanders, of a son.
SKINNER—July 1, at Alighur, Bengal, the wife of Lieutenant Russell Morland Skinner, Adjutant of Military Police, of a son.
THOMPSON—August 14, at Odlham, the wife of Edward Percy Thompson, Esq., of a son.
THRING—August 4, at Nutwell, Woodbury, Devon, the wife of E. B. Thring, Esq., H.M.'s Indian Army, of a son.
WILLIAMS—August 9, at Athgarvan Lodge, Curragh Camp, county Kildare, Ireland, the wife of Major Williams, 3rd Light Dragoons, of a son.

MARRIAGES.

ARBUTHNOT—WOOD—August 15, at St. Luke's, Cheltenham, by the Rev. P. C. Law, rector of Northrepps, Norfolk, uncle of the bridegroom, Captain George Alexander Arbuthnot, H.M.'s 8th Regiment Madras Light Cavalry, eldest son of Colonel George Bingham Arbuthnot, H.M.'s Madras Light Cavalry, to Fanny Isabella, eldest daughter of Lieut.-Colonel Herbert William Wood, late of H.M.'s Madras Army.
CHADWICK—BRODERICK—May 19, by special licence, by the Rev. C. H. Blumbhart, Richard Augustus, second son of the late Major Chadwick, Chetnole, Dorset, and Lieutenant 5th M.N.I., to Rachel, eldest daughter of J. Broderick, Esq.
CONYERS—CURTEIS—August 14, at St. George's, Hanover Square, by the Rev. Thomas Henry Lane Fox, rector of Stourminster, uncle of the bridegroom, the Lord Conyers, to Mary, elder daughter of the late Reginald Curteis, Esq., and step-daughter of Lieut.-Colonel Fitzroy Campbell.
HALL—ELPHINSTONE—August 15, at Sidbury, by the Rev. H. Gibbes, M.A., assisted by the Rev. S. Walker, M.A., Angus William Hall, Esq., Captain H.M.'s 58th Regiment, eldest son of Colonel Hall, of Killean, Argyllshire, to Amelia Anne, second daughter of Captain Elphinstone, R.N., Livonia, Devonshire.
JONES—VAUGHAN—August 6, at St. James's Church, Piccadilly, by the Rev. W. H. Hawker, I. Inglis Jones, Esq., late Royal Horse Guards, of Derry Ormond, Cardiganshire, to the lady Elizabeth Mallet Vaughan, eldest daughter of the Earl of Lisburne, of Crosswood Park, Aberystwith.
LACY—MANNERS—August 8, at Parsonstown, by the father of the bridegroom, Gilbert de Lacy Lacy, Esq., of H.M.'s 12th Regiment, eldest son of the Rev. Charles Lacy, rector of Allhallows, London Wall, to Maria, eldest daughter of Lieut.-Colonel Manners, late 59th Regiment, of Chesterfield, King's County, Ireland.
MACONOCHIE—BAKER—June 2, at Etawah, N.W.P., India, by the Rev. F. Clinton, George B. Maconochie, Esq., youngest son of Captain Maconochie, R.N., K.H., to Heppy, youngest daughter of the late George Baker, Esq.
MORGAN—SMITH—June 20, at Waltair, Captain Osborne Morgan, H.M.'s 38th M.N.I., to Anna Maria Harris, eldest daughter of Dr. Charles Irving Smith, Garrison Surgeon, Vizagapatam.
MURCHISON—URQUHART—April 11, at Kenisdale (the residence of the bridegroom), Victoria, Australia, by the Rev. J. Singleton, A.M., Roderick Impey Murchison, Esq., to his cousin, Julia Rose, only daughter of Captain J. Urquhart, H.M.'s 27th Regiment (Inniskillings.)
PRATT—BONHAM—August 14, at St. Leonard's-on-Sea, by the Rev. F. Vincent, uncle to the bride, Captain Henry Hamilton Pratt, late of the 94th Regiment, only surviving son of the late J. Pratt, Esq., to Annie Blanche, daughter of the Rev. John Bonham, of Ballintaggart, county Kildare.
ST. GEORGE—EVANS—August 15, at the parish church, Lyminster, by the Rev. Howard St. George, M.A., incumbent of Billinge, Lancashire, brother to the bridegroom, assisted by the Rev. O. P. Oakes, M.A., rector of Hawksdown, Suffolk, brother-in-law to the bride, Colonel St. George, C.B., Royal Artillery, to Elizabeth, Marianne, youngest daughter of Thomas Evans, Esq., Lyminster House, Arundel, Sussex.
SWETE—SWEENY—August 7, at St Thomas's Church, Dublin, by the Rev. Edward Lewis, rector of Knockmark, uncle of the bride, assisted by the Rev. D. O'Sullivan, the Rev. Charles John Swete, 22, Barrington Crescent, Loughborough Park, Brixton, to Frances, daughter of the late Major Sweeny, 70th Regiment.

DEATHS.

BEEVOR—June 1, at Adelaide, South Australia, Ellen, widow of the late Captain Horace C. Beevor, of the 13th Regiment, Madras Army, and fifth daughter of the late Rev. Holt Okes, D.D., of Woodford, Essex, aged 43, leaving seven children to lament her loss.
HOLLINGS—August 12, at Bath, Fanny Louisa, relict of the late Captain Henry Hollings, of the 66th Bengal Native Infantry.
LUARD—August 9, John Dalbiac Luard, Artist, late Lieutenant 82nd Regiment, second son of Lieut.-Colonel Luard, in his 29th year.
MARRYAT—August 11, at the Manor House, Mapperton, aged 46, Georgiana Charlotte, wife of Lieut.-Colonel Marryat, and daughter of the late Rev. Townshend Selwyn.
OLDHAM—August 12, at By-dorp House, Hanwell, the residence of his son-in-law, Lieut.-Colonel John Field Oldham, aged 77.
PIGOT—August 5, in Queen Square, Bath, Mrs. Elizabeth Pigot, relict of the late Major George Pigot, of H.M.'s 9th Light Dragoons, aged 69.
SEGRAVE—August 8, at Croft-y-Bwla, Monmouthshire, from the effects of sun stroke, O'Neil S. Segrave, Captain 13th (Prince Albert's) Light Infantry, eldest surviving son of O'Neil Segrave, of 28, Glocester Place, Portman Square.

THE REVIEW AT KNOWSLEY.—The review at Knowsley promises, says the *Liverpool Albion*, to be a very brilliant gathering of Volunteers. Up to the end of last week 5772 officers and men had accepted the invitation of the Earl of Derby; and this does not include the numerous and efficient regiments of the city of Manchester, with the exception of the 40th Lancashire (the 3rd Manchester), who have already signified their intention to be present, 500 strong. The other regiments have been wholly engaged by the Newton review; but now that splendid meeting—the largest yet attempted in this part of the country—is over, we may anticipate their speedy acceptance of the courteous invitation of the noble earl. Lord Derby seems to wish the Volunteers to regard the meeting at Knowsley more in the light of a holiday than a day of military business, and that the men will during the evening be "dismissed" to the enjoyment of the park and pleasure-grounds of Knowsley.

MONEY.—Noblemen, Officers in the Army, Persons holding Government Appointments, Clergymen, and other Gentlemen, can have ADVANCES upon their notes from a private channel without life insurance or delay, and with secrecy.—Apply to Mr. HUDSON, 28, Regent Street, Piccadilly, W.

RIFLE REGULATION GLOVE.—W. TENT begs to inform those Gentlemen who have joined the different Corps, that he has had made for them expressly the BLACK BUCK REGULATION GLOVE that is being worn by the 7th Surrey and other Corps. To be had only of W. TENT, Shirt Maker, &c., 4, Birchin Lane, Cornhill, E.C. N.B. The Dress of the 7th Surrey to be seen on application.

THE MOUNTED RIFLE CORPS BOOT. Can be worn outside the trowsers in wet weather, entirely superseding the trouble and inconvenience of leggings, forming, in fact, the most complete military boot extant. Suitable for a knock-about boot in the country, &c. Price 38*s.* Shooting and Hunting Boots in every design and material.

KING & SOTHERS, 21, Piccadilly, W.

RIFLE VOLUNTEERS AND THE PUBLIC.—The E. I. O. WATERPROOF will make Boots pleasurably soft for Summer wear, healthily impervious to wet, and improve the polish. Price 6*d.*, 1*s.*, and 1*s.* 6*d.* E. I. O. Royal Crimean Waterproof Company, 124, Aldersgate Street, E.C.

RIFLE CORPS CAPES AND KNEE PADS.—WARNE'S PATENT TUBULAR INDIA-RUBBER CUSHIONED KNEELING PADS, non-absorbent of moisture; also, the new make WATERPROOF RIFLE CAPES, permitting perfect ventilation and entirely free use of arms. Mineralised India-rubber Waterproof Sword and Bayonet Covers, Patent Tubular India-rubber Mattrasses for Voyagers, for the East Indies, and for Camping out. Wholesale of W. WARNE & Co., India-rubber Manufacturers, 9, Gresham Street West, E.C.

RIFLE CORPS TENT.—FREDERICK EDGINGTON, Inventor and Sole Manufacturer of this celebrated Tent, without a pole in the centre, from 4*l.* Marquees and Flags lent on hire. Address, THOMAS ST., OLD KENT ROAD, LONDON, S.E.

No connection with any other house.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, HILL & MILLARD, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

CAMP AND CABIN FURNITURE.—Illustrated Priced Catalogues of the Newest Description of Portable Furniture, Portmanteaus, Despatch and Dressing Cases forwarded on application to Messrs. WOOLF & SON, 59, Piccadilly, opposite St. James's Street. Estimates for Uniform for any branch of Her Majesty's Service, post free from their Army and Navy Contracting Establishment, 45, Old Bond Street, W., one door from Piccadilly.

THE INCOMPARABLE BEDS, FOR AIR OR HOT OR COLD WATER (AYCKBOURN'S PATENT).—These Beds may be filled with air or hot or cold water, they require no tossing about (or making as it is termed), are easily washed, are light and portable, may be packed in a carpet bag, and therefore invaluable to EMIGRANTS, YACHTSMEN, NAVAL AND MILITARY OFFICERS AND TRAVELLERS. They form in an instant Six or more Swimming Belts, and will stand any climate. No Emigrant should leave this country without one or more of these Beds.

Beds, 6 feet long by 3 feet wide, price 3*l.*, and 7*s.* 6*d.* extra for every 6 inches additional width. Pillows, 20*s.* Inflating Apparatus, 2*s.* 6*d.* Will be forwarded on receipt of Money Order by BENJAMIN GEORGE, corner of Ware Street, near the Canal Bridge, Kingsland Road, N.E.

OFFICERS IN THE ARMY will find the best assortment of PORTABLE MILITARY FURNITURE, and Articles for Barrack and Camp service generally, at HILL & MILLARD'S Portable Military Furniture and Outfitting Warehouse, 7, Duncannon Street, Trafalgar Square, W.C. Illustrated catalogues on application. Manufacturers and Patentees of the Army Chair, Square-mouth Travelling Bag, Despatch Box, Writing & Dressing Case, &c., &c.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary defining power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. BURROW, Great Malvern, Worcestershire.

CABIN FILTERS.—The Last Improvement.—Dr. Ward says "I would strongly recommend every family going a distant voyage to take one of LIPSCOMBE'S SELF CLEANSING CHARCOAL CABIN FILTERS; it will be found invaluable." These Patent Filters can only be obtained of LIPSCOMBE & Co., Temble Bar, W.C.

FOR FOREIGN OFFICE PASSPORTS, VISAS, AND MOUNTING, apply to TURNER & ADAMS, 65, King Street, Downing Street, S.W. Town and Country orders completed per post, and first-class couriers provided.

EDWIN KESTERTON, COACHBUILDER, 93 AND 94, LONG ACRE, LONDON, W.C.

STAR & GARTER HOTEL, PORTSMOUTH, Adjoining the Floating Bridge.

JOSEPH SPENCER, Proprietor, many years manager, now sole proprietor of the above old established Hotel, has great satisfaction in assuring his numerous patrons that the remodelling of the establishment being now complete, he is enabled to offer increased accommodation at moderate charges. The attention of Officers of the United Services, Yachting Gentlemen, and Private Families, is very respectfully invited to this Hotel, which will be found replete with comfort.

A private Billiard Room. Hot and Cold Baths.

CAFE RESTAURANT DU QUADRANT (AND HOTEL), 62, REGENT STREET, W. Private Rooms for Parties. Wedding Dinners, Soirées, and Hampers for the Races provided.

HILFERICH & GAFFINO, Proprietors.

MR. MARKWELL, Wine Merchant to Her Majesty, Nos. 35 to 40, & 45, Albemarle Street, and 4, Stafford Street, Piccadilly, London, W. Naval and Military Messes supplied.

BURGUNDY WINES.—The most delicious of French Wines in a state of high perfection; old choice Claret and Rhenish Wines, and most exquisite "old fine Champagne" Cognac Brandy, &c. &c. Priced lists sent free on application. Address to A. JOUBIN, 9, St. Benet's Place, Gracechurch Street, E.C.

SCHOOL OF MUSKETRY, HYTHE.—J. H. & J. BROOKE, WINE MERCHANTS, HYTHE and FOLKESTONE. Price Lists free per post. Goods forwarded to any Railway Station in England, carriage paid.

EAU-DE-VIE.—This Pure PALE BRANDY, though only 18*s.* per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38*s.* per doz.; or securely packed in a case for the country, 39*s.*—HENRY BRETT & Co., Old Furnival's Distillery, Holborn, E.C. To be obtained only at their Distillery.

KINAHAN'S L. L. WHISKY *v.* COGNAC BRANDY, advanced only 1*s.* per gallon at present.—This celebrated OLD IRISH WHISKY rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3*s.* 8*d.* each, at most of the respectable retail houses in London, or wholesale, at 8, GREAT WINDMILL STREET, HAYMARKET, W.—Observe the red seal, pink label, and cork branded, "Kinahan's L. L. Whisky."

ALLSOPP'S PALE ALE, in Bottle, recommended by Baron Liebig and all the Faculty, may now be had in the Finest Condition of Messrs. HARRINGTON PARKER, & CO., who have REDUCED the Price of this highly esteemed beverage to 4*s.* 6*d.* per dozen Imperial Pints.

2*s.* 9*d.* ditto Imperial Half-pints.

Address, HARRINGTON PARKER, & Co., 5½, Pall Mall, London, S.W.

TO PRESIDENTS OF MILITARY MESSES.

BAVARIAN TONIC BEER.—This highly popular Tonic Beer is now in its highest perfection; it is pure and refreshing, and is patronised by most of the leading members of the medical profession. Price, for cash, 4*s.* per dozen quarts, delivered to all parts of London free. Best Devonshire Cider, quarts 7*s.*, pints 4*s.* Hereford Rough, quarts 8*s.*, pints 4*s.* 6*d.*

C. SPIKINS & Co., Sole Agents for London, 9, Duke Street, Portland Place, W.

CYDER AND PERRY IN THE GREATEST PERFECTION.—Devonshire Cyder, 8*s.* qrts., 4*s.* 6*d.* pts.; Cockagee Somerset Cyder, 14*s.* qrts.; Old Field Perry, 18*s.* qrts., 10*s.* pts.; the real Taynton Squash Perry, 25*s.* qrts., 15*s.* pts. Hampers and bottles, 3*s.* per dozen extra, or can be returned at BENJAMIN VICKERS'S Stores, Hay's Lane, Tooley Street, S.E., and 8, Spring Terrace, Wandsworth Road, S.—Post Office Orders, 196, Tooley Street, S.E.

IMPORTANT TO OFFICERS.—Have all your BOTTLED ALES, WINES, &c., PACKED IN SEYMER'S REFRIGERANT STRAW ENVELOPES, which entirely prevent Heating, Fermentation, and Breakage, will use repeatedly as Wine Coolers, prevent all litter on board ship or in quarters, and save 20 per cent. in space and freight. Supplied by all Wine Merchants at 9*d.* per dozen, and wholesale by THOMAS WHITEHEAD, 37, Eastcheap, London, E.C.

CROSSE AND BLACKWELL, Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. & B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg, and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, Relish, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable Oilmen, Grocers, &c., and wholesale of CROSSE & BLACKWELL, 21, Soho Square, London, W.

GARDNERS' £2 2*s.* DINNER SERVICES complete, best quality. A large selection of patterns of the choicest description. Breakfast, Dessert, Tea, and Toilet Services, at the lowest possible prices. Cut Wines, 3*s.* 6*d.* per dozen; Cut Quart Decanters, 7*s.* 6*d.* per pair.—H. & J. GARDNER (by appointment to Her Majesty, the Board of Green Cloth, Lords of the Treasury, Admiralty, Office of Works, Customs, and the other Government Offices), 453 and 63, Strand, Charing Cross, S.W. Established 108 years. Engravings free by post.

GLASS AND CHINA.

PELLATT & CO. have for more than thirty years had the honour to supply Officers' Messes with the above articles, and continue to manufacture the quality which has during that period given great satisfaction. Patterns and Estimates forwarded to all parts of the Country.—Address, Falcon Glass Works, Blackfriars, London, S.E.

MESSRS. OSLER, 45, Oxford Street, London, W., beg to announce that their NEW GALLERY (adjoining their late premises), recently erected from the designs of Mr. Owen Jones, is NOW OPEN, and will be found to contain a more extensive assortment of GLASS CHANDELIERS, Table, and Ornamental Glass, &c., than their hitherto limited space has enabled them to exhibit.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Gloves and Belts*),

172, NEW BOND STREET, LONDON, W.,

And Sold by all respectable Chemists throughout the Empire.

NERVO-ARTERIAL ESSENCE, prepared only by Dr. WM. BATCHELOUR, M.R.C.S.E. 1835, and M.L.A.C. 1834. It strengthens the vitality of the whole system without reaction, and speedily removes nervous complaints. In bottles, at 2*s.* 9*d.*, 4*s.* 6*d.*, 11*s.*, and 33*s.*, at Goodyer's, 31, Regent Street, W.; Butler & Crispe's, 4, Cheapside, E.C.; Sutton & Co., Bow Churchyard, E.C.; Barclay & Sons, Farringdon Street, E.C.: 12, Finsbury Place South, City, E.C., and all Chemists.

RUPTURES.—HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A *flexible band*, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic *pad secures* the hernia. Measure required—circumference two inches below the hips. Price single, 12*s.*; double, 18*s.*; postage 10*d.* and 16*d.* Illustrated circulars on application to Mr. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

BY HER MAJESTY'S ROYAL LETTERS PATENT. (GRANTED 1860.)

MR. A. ESKELL, SURGEON DENTIST, 8, Lower Grosvenor Street, W., Sole Inventor and Patentee of an Invention which has for its object the Perfect and Painless Adaptation of ARTIFICIAL TEETH upon a novel principle, whereby one set of teeth lasts a lifetime, and a second, or reserve set, is unnecessary. Changes take place in the mouth from absorption of gums, removal of stumps, teeth, &c., and ordinary sets would, under these circumstances, be comparatively useless, or only rendered available at some cost, but upon Mr. Eskell's patented process they are not impaired in the slightest degree. Residents abroad or in the country have it in their power to adjust their artificial teeth at all times without the aid of a dentist. Mr. Eskell does not grant licences to use his patent, which can only be obtained at his residence, 8, Lower Grosvenor Street, where the medical profession, the nobility, gentry, and the public may see specimens, and obtain every information. Teeth stopped, &c. All consultations free.—8, Lower Grosvenor Street, S.W.; and Bennett's Hill, Birmingham.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

PHARMACIE FRANÇAISE, 57, PRINCES STREET, LEICESTER SQUARE, W.C.—LE MAOUT, Chemist, from Paris.—Medicamens Spéciaux —Remèdes Raspail—Capsules Le Maout—Ricord's Medicines, Plants, and all French Medical Articles. —Prescriptions accurately prepared. Chloroform Capsules for Sea-sickness.

SAVARESSE'S PATENT FLEXIBLE CAPSULES, by which Castor Oil and nauseous Balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with Gelatine. These Capsules may be obtained of BELL, 338, Oxford Street, W.; SANGER, 150, Oxford Street, W.; HOOPER, Pall-Mall East, S.W.; KEATING, St. Paul's Church Yard, E.C.; and medicine vendors throughout the kingdom.

EVANS & LESCHER, London, Patentees.

NATURE'S GREAT REMEDIES, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c. Dr. BUCHAN'S celebrated DOMESTIC MEDICINES consist of the PATENT SUGAR-COATED VEGETABLE PILLS, UNIVERSAL VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, never-failing remedies, affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates. Sold by Buchan & Co., Patentees, 22, Newman Street, Oxford Street, London, W., and all chemists in town and country. Just published, gratis, or post free for one stamp, Extracts from Dr. Buchan's Work, entitled BUCHAN'S DOMESTIC MEDICINE, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child. Prices:—Pills, per box, 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.* Ointment, per pot, 1*s.* 1½*d.*, and 2*s.* 9*d.*; Essence, per bottle, 11*s.*, or family bottle containing four times the quantity, 33*s.* Agents:—Barclay & Sons, 75, Farringdon Street, E.C.; J. Sanger, 150, Oxford Street, W.; Hannay & Co., 63, Oxford Street, W.; Butler & Crispe, 4, Cheapside, E.C.; Bartlett Hooper, 43, King William Street, London Bridge, E.C.; R. Howden, 75, Great Russell Street, W.C.; Prout & Harsent, 229, Strand, W.; Church Street, E.C.; Darby & Gorden, 140, Leadenhall Street, E.C., London.

VOLUNTEER RIFLE CORPS.—NOTICE. In consequence of the heat and fatigue experienced by gentlemen after exercising and review, many have been induced to try OLDRIDGE'S BALM OF COLOMBIA, which invariably has produced such a peculiar refreshing coolness to the head, that it has become a most valuable toilette requisite. It also nourishes and strengthens the roots and body of the hair, prevents it falling off or turning grey, and causes a beautiful appearance, with wave or curl, at the same time cleansing it and removing the scurf. 30 years' celebrity has proved there is no wash equal to it for improving and producing new hair, whiskers, and moustache. Price 3s. 6d., 6s., and 11s. per bottle. Wholesale at C. & A. OLDRIDGE'S, 22, Wellington Street, Strand, W.C.

LEQUELIN'S OIL.—This Vegetable Preparation is an infallible restorative of the hair, eyebrows, whiskers, and moustaches, &c., producing growth, checking its falling off almost instantly, and imparting to it unequalled softness and brilliancy. One bottle is sufficient. Price 6s. and 10s. The money returned if not effectual. Sold by the Inventor, LEQUELIN, 40, Wharton St., Lloyd Sq., W.C., London.

KEATING'S PERSIAN INSECT DESTROYING POWDER.—FLEAS IN DOGS, POULTRY, &c., are instantly destroyed, as also Bugs, Beetles, and every other insect, by this Powder, which is perfectly harmless to animal life; sportsmen particularly will, therefore, find it invaluable. Sold in packets, 1s., 2s. 6d., and 4s. 6d. each, or post free for 1 or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79, St. Paul's Churchyard, London, E.C. Take notice, each genuine packet bears the above name and address. Sold by all druggists.

BLIGHTS, MILDEW, BED-BUGS.—GISHURST COMPOUND, patented for preventing and destroying these and other pests. See *Gardeners' Chronicle, Cottage Gardener*, and *Field*. In boxes, 3s., 10s. 6d., retail of all Nursery and Seedsmen. Wholesale of PRICE'S Patent Candle Company, Limited.

SERIES IV. 102 Species. 25 Plates. With Dissections of all the Species.

Synoptical Tables of the Orders, Genera, and Species. General View of the Structure and uses of the Sea-Weed Family. Sketch of their classification and Distribution. Instructions for the Cultivation of the Algæ, their preservation in the Herbarium, and their preparation as objects for the Microscope.

*** Either Volume may be had separately, price £2 2s. each.

NOTICES OF THE PRESS.

"In this Work of 'British Sea-Weeds' is to be found all that could be wished for, and more than could be expected, in reference to the tribe in question. The specimens you gather from the beach, wash and carefully display before admiring eyes, are not more fresh and perfect than are these illustrations now before us. Drawings, however highly finished in coloured plates, and however faithfully they represent what they are intended to place before you, are not to be compared with these prints. You touch them with your finger to ascertain whether they lie upon the surface of the paper or are a part of it."—*Morning Chronicle.*

"This volume is well qualified to receive popular approval, but it has, beyond this, other recommendations. It is a first-class scientific book, and it is a first-class book as regards its execution. . . . As a scientific book, the authors have well done their part too; for they have given us a clear, correct, and comprehensive scientific account of the plants they have treated on, adding such popular information as the subject admitted of; and they have given us in addition, well-executed magnified dissections of the parts essential for scientific study."—*Illustrated London News.*

"For this kind of work Nature-Printing is exactly adapted. Every delicate and inimitable ramification is most attractively and accurately represented. The fifty-six plates in this volume can scarcely be surpassed, and have not, as far as we know, been equalled. . . . We have found them pleasing, and still pleasing during several inspections. The volume is handsomely got up, and will make a very attractive drawing-room table-book at home or at the sea-side."—*Athenæum.*

"The process by which it is produced is that delightful one which has been a labour of love to Mr. Henry Bradbury in bringing to perfection, and which was first applied to the Ferns. To speak of the accuracy of the plates is of course a misnomer. They are of the nature of photographs; and the only possible drawback to the work is, that its extreme beauty will banish to the drawing-room table, as a mere example of pretty drawing, what, as a scientific manual, has not been equalled."—*Saturday Review.*

BRADBURY & EVANS, 11, Bouverie St., Fleet St., E.C.

ROYAL NAVAL ESTABLISHMENT,
EASTERN PARADE, SOUTHSEA.
(LATE MR. THOMAS EASTMAN'S, R.N.)
CONDUCTED BY MRS. EASTMAN.

The studies of the Pupils are under the direction of Mr. GEORGE E. SPICKERNELL, the Head Master, assisted by other Masters, for many years with the late Mr. EASTMAN.

The following gentlemen have recently passed from this Establishment as Naval Cadets—Messrs. Hough, Dugdale Coddington, Gissing, Lindeman, Bancroft, Campbell, Herbert, Kingscote, Wells, Baring, the Count F. Metaxa, Messrs. Massy, Watkins, and Joyce.

350 Gentlemen have passed from this Establishment as Naval Cadets, and more than 200 as Marine Cadets, &c. &c.

The highest references can be given. Applications to be addressed to Mr. SPICKERNELL.

NAVAL CADETS.

OF THE 43 SUCCESSFUL CANDIDATES at R. N. College, 12th June, TEN were prepared at NORTH GROVE HOUSE, SOUTHSEA, viz., Messrs. Stewart, Gabbett, V. Orlebar, Henderson, Master, Fellowes, Sidney Smith, Blackett, Millett, Knollys. Mr. Mounsteven, who passed first at the Competitive Examination for Marine Cadetships, was also prepared at North Grove House.

W. BELL, Chaplain, R.N.;
A. BURROW, Chaplain and Naval Instructor;
W. JOHNSON, Naval Instructor.

ROYAL NAVAL ACADEMY.—Of the many pupils prepared at the Academy conducted by MR. C. F. COOPER, R.N., not one has failed to pass, and eight have taken 1st, 2nd, and 3rd places at the Royal Naval College.—Address, Beresford Place, Southsea.

NAVAL AND MARINE CADETS, ETC.

THE REV. THOS. KNIGHT, B.A. Hon. St. John's, Cam., receives PUPILS for the Royal Navy, Army, Woolwich, and Addiscombe. NINE out of ELEVEN of Mr. Knight's Pupils PASSED at the Royal Naval College, 12th June, 1860, taking 1st, 2nd, 3rd, 6th, 7th, 11th, 11th, 17th, 19th places in the respective divisions of 99 candidates, of whom 62 passed and 37 failed.—St. Mary's Hall, Southsea, Hants.

ROYAL MILITARY ACADEMY, WOOLWICH, S.E.

At the recent Competitive Examination for admission into the Royal Military Academy, Woolwich, commenced on the 30th ultimo, the following gentlemen passed directly and on first trial from Mr. R. B. DE BURGH'S MILITARY ESTABLISHMENT, Dublin:—

Mr. G. C. Bayley,	5th Place.	Mr. F. B. Knox.	
Mr. T. Fraser,	9th ,,	Mr. C. W. E. Murphy.	
Mr. H. M. Hayes,	13th ,,	Mr. C. F. B. Grey.	
Mr. R. G. Scott,	17th ,,	Mr. W. H. Rathborne.	

The number of successful candidates direct from Mr. De Burgh being greater than that from any other Establishment in the United Kingdom.

At the Examination held in January, 1860, the following gentlemen (the only candidates direct from Mr. De Burgh's) passed on first trial:—

Mr. W. J. Galway.	Mr. R. A. Livesay.
Mr. J. L. Morgan.	Mr. C. Greer.

Mr. Galway obtained 4132 Marks and the Tenth Place; and Mr. Morgan 4108 Marks and the Fourteenth Place. These high Marks were obtained without the aid of Classics, their Marks for Mathematics alone having been 2555 and 210 respectively.

ROYAL INDIAN MILITARY COLLEGE, ADDISCOMBE.—At the late Competitive Examinations for admission into the Royal Indian Military College, held in January, 1860, and May, 1860, the following gentlemen (the only candidates direct from Mr. De Burgh's) passed on first trial:—

Mr. H. Hardinge	2nd Place.
Mr. L. F. Boileau	12th ,,
Mr. T. R. Disney	25th ,,

At the above Examinations, the successful candidates direct from Trinity College, Dublin, had been under Mr. De Burgh's tuition.

Mr. De Burgh's references to the Parents of present and former pupils include the following:—The Right Hon. and Right Rev. the Lord Bishop of Meath, the Right Hon. Joseph Napier, Venerable the Archdeacon of Meath, Colonel Lake, C.B.; Colonel Knox, J.P.; Colonel Morgan, R.A., Swansea.

No. 6, Harcourt Street, Stephen's Green, Dublin.
July 30th, 1860.

ARMY EXAMINATIONS.—Candidates for the Artillery, Line, and Cavalry, are rapidly and efficiently prepared at an establishment, the pupils of which have, within the last two years, come out seven times first, five times second, and three times third on the list. Apply to Captain LENDY, Sunbury, S.W.

THE ARMY, WOOLWICH, ADDISCOMBE, DIRECT APPOINTMENTS.—An OXFORD GRADUATE, very successful in the above examinations, has VACANCIES for TWO resident or non-resident PUPILS. Able tutors attend, and the pupils receive an amount of individual attention not obtainable in large establishments. Terms moderate and inclusive. References of a high order.—Address B, A., 28, Queen's Road, Haverstock Hill, N.W.

STAFF EXAMINATIONS.—Twenty-four Officers have already joined the Military College of Sunbury this year, to read either for the Staff College, or for direct appointment on the Staff. Apply to Captain LENDY, Sunbury, S.W.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to OSWALD HUNTER, Esq., The Cedars, Putney, S.W.

MILITARY EXAMINATIONS.—At the late Examination for Direct Commissions, out of 403 Candidates only 60 passed. MR. PINN prepared the second in order of merit, who obtained above 5000 marks, only 1800 being required for qualification. Being a Skilled Teacher, he can undertake to pass the most deficient. Terms very moderate. Mr. PINN, B.A., 8, Clifton Road, St. John's Wood, N.W.

SELECT CLASSICAL AND MILITARY ESTABLISHMENT, HOLLAND HOUSE, BLACKHEATH, by T. KIMBER, M.A., Author of "Vauban's First System," &c. References:—The Rev. Dr. Jelf, King's College, London; the Rev. Canon Hey, York, &c. Prospectuses can be obtained from Rivington's, Waterloo Place, S.W.; Parker & Son, 445, West Strand, W.C.; Ponsonby, Dublin; The Library, Cheltenham; Stotheran, York.

*** Arthur E. Havelock, who gained the highest number of marks at the examination in June for admission to Sandhurst, passed from Holland House.

ARTILLERY EXAMINATIONS.—Candidates for the Competitive Examinations are individually prepared at an establishment which receives six pupils only for that branch of the Service. Four resident professors. Apply to X., care of Messrs. PARKER, 445, Strand, W.C.

SPECIAL MILITARY TUITION, including Geometrical and Military Drawing, Hindustani, Fortification, Military Surveying and Reconnoitering. By Lieut.-Colonel MORLAND, who also continues the preparation of candidates for Addiscombe and the Military Competitive Examinations.—At 20, Norland Square, Notting Hill.

EDUCATION IN FRANCE.—TWO GENTLEMEN, one an English and the other a French Protestant, with the assistance of five highly-qualified Masters, PREPARE 14 YOUNG GENTLEMEN for the Competitive Examinations for Woolwich, Sandhurst, Addiscombe, the Indian Civil Service, and direct appointments in the Army. Terms, 50 to 60 guineas. Address, B.A., Post-Office, St. Pierre, Lés Calais.

H. J. & D. NICOLL'S Establishments for Gentlemanly and Moderate-priced Clothing, REGENT STREET, CORNHILL, & MANCHESTER.

THE CAPE PALETOT, INVERNESS CAPE, or SLEEVED CAPE, used in private life, as well as for Volunteer Corps.

H. J. & D. NICOLL, 114, 116, 118, 120, Regent Street, W.; 22, Cornhill, London, E.C.; and 10, St. Ann's Square, Manchester.

CLOTHING FOR YOUTH.—The KNICKERBOCKER, the Highland Dress, Ladies' Travelling Mantles, Riding Habits, and Pantalons de Dames à Cheval, with much novelty and general excellence, H. J. & D. NICOLL have for the remainder of this season at WARWICK HOUSE, 142 and 144, Regent Street, W. In the autumn this branch will be removed to the rear of the old Establishment.

VISITORS TO THE SEASIDE AND TOURISTS will find much ease and comfort in the NEUTRAL-COLOURED LOOSE COAT, fastened by one or more buttons, with Trousers and Vest, all of one material, as originally introduced by Messrs. NICOLL, of Regent Street, W., and Cornhill, E.C.; they recommend also a Black Velvet Coat, and for gentlemen seeking a kind of half-dress morning coat a fine black cloth is specially prepared; this garment is edged with braid and cut somewhat as a riding-coat, and is getting into general use.

NEW REGULATIONS FOR NAVAL CADETS, for passing the College may be obtained on application to B. JOSEPH & Co., or sent post free to all parts of the world, with full list of prices of Outfits for young gentlemen entering the Navy.

A large stock of fashionable clothing at moderate prices may be had either ready made or made to order in a few hours' notice at the Hall of Commerce, 92 & 93, Queen Street, Portsea. B. JOSEPH & Co., Proprietors.

Avoid counterfeits and base imitations.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of
GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.
Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.
Gun Factory Established 1780.

THOMAS WILSON'S BREECH-LOADING RIFLE.

Mr. Thomas Wilson begs to call the attention of the public to his new BREECH-LOADING RIFLE, and to state that he has committed the working of the patent to Messrs. Rabone, Brothers, & Co., of 47, Broad Street, Birmingham, to whom all inquiries or other communications may be addressed.

This Rifle is well adapted for all branches of Her Majesty's Service, and is pronounced by the highest authorities to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—

1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.

2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.

3rd. It is easy to manufacture, and can be made entirely by machinery.

4th. It is so constructed that accident from careless loading, or otherwise, is impossible.

5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly, for firing, without the aid of tools. This facility would be occasionally valuable in rendering the Gun useless to an enemy, or to mutinous troops.

6th. The action is always in good order, requiring no adjustment in use.

7th. The action is equally applicable to single and double-barrel Guns, and may be used for sporting as well as military purposes.

8th. The principle can be applied to all ready-made Enfield guns, at an immense saving to the country.

Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.

A pattern may now be seen at Mr. Lancaster's, No. 151, New Bond Street, W.; and at Mr. Pritchett's, No. 86, St. James's Street, London, S.W.; as well as at Messrs. Rabone, Brothers, & Co.'s, 47, Broad Street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 568 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60*s.* per 1000; blank, 33*s.* per 1000.

[COPY.]
"Ordnance Select Committee, Royal Arsenal, Woolwich, April 17th, 1860.

"Sir,—Since I last addressed you on the subject of your Waterproof Cartridges, I have to inform you that 60 of them have been exposed in an atmosphere saturated with moisture, at a temperature of 90 degrees, for a fortnight. The result has been favourable, as far as this test is concerned, to their Waterproof qualities.

"I have, therefore, to request you will be good enough to state, for the information of the Committee, the nature of the lubrication you employ; whether it is in any way connected with the Waterproof properties of the Cartridge, and whether, in the event of their being adopted, the Service lubrication, which is wax, might not be employed.

"I have the honour to be, Sir,
"Your obedient Servant,
"J. H. LEFROY, Colonel, R.A.

"Mr. Thos. H. Anthony,
"37, Broad Street, Birmingham."

GOLD CHAINS.—PARIS FIRST CLASS MEDAL FOR JEWELLERY, AND LONDON PRIZE MEDAL FOR GOLD AND JEWELLED VASE.—WATHERSTON AND BROGDEN respectfully invite the public to an inspection of their GOLD CHAINS AND JEWELLERY, which have been honoured with a First Class Medal at the Paris Universal Exhibition, accompanied by the flattering testimonial of "*Excellente bijouterie courante; Modèles Spéciaux à sa Fabrique.*" "Excellent jewellery, comprising chains, bracelets, brooches, rings, necklaces, seals, &c., every article being remarkable for its high finish," all made on the premises.
WATHERSTON & BROGDEN, Goldsmiths.
Manufactory, 18, Henrietta Street, Covent Garden, London, W.C. Established A.D. 1738.
N.B.—Assays made of Chains and Jewellery for 1*s.* each.

BRAVINGTON, LATE YOUNG, 51, PRINCES STREET, LEICESTER SQUARE, W.C.
GOLD WATCHES, CHAINS, AND JEWELLERY,
Of the Best Quality, new and second-hand, at
Moderate Prices.
Money advanced on Diamonds, Plate, Jewels, &c.

PRIZE MEDAL FOR RIFLE VOLUNTEERS.—T. R. PINCHES & CO. have always the above ready for delivery. Gold, 10*l.* 10*s.* Silver, 2*l.* 2*s.* Bronze, 1*l.* 1*s.*—27, Oxendon Street, London, S.W.

GARIBALDI.—Just out, a beautiful MEDAL of the above-named immortal hero, to commemorate the Rise of Sicily. White metal, 6*d.*; in *morocco case*, 1*s.* 6*d.*; bronze, 4*s.*; in morocco case, 5*s.*
C. J. FRANCIS & Co., Publishers, 6, Warwick Court, Holborn, W.C.

BEST AND CHEAPEST TEAS AND COFFEES IN ENGLAND
Are at all times to be obtained of
PHILLIPS AND COMPANY, TEA MERCHANTS,
8, King William Street, City, London, E.C.
Black or Green Tea, 2*s.* 8*d.*, 2*s.* 10*d.*, 3*s.*, 3*s.* 4*d.*, & 4*s.*
A General Price Current published every month, containing all the advantages of the LONDON MARKETS, and is sent free by post on application.
Sugars are supplied at Market Prices.

TEA.—The Newspapers and Price Currents daily report that COMMON Teas are dearer and FINE are cheaper. What is the reason of this? Because common (and not fine) is sold to the Public. STRACHAN & Co. guarantee that their Black Teas, from 3*s.* 8*d.* to 4*s.* 2*d.*, consist only of the FINEST descriptions.
26, Cornhill, E.C.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY,
AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE
THE FINEST STARCH SHE EVER USED.
Sold by all Chandlers, Grocers, &c., &c.
WOTHERSPOON & Co., Glasgow and London.

THE GUINEA COAL COMPANY'S (duly screened) WALLSEND COAL, One Guinea Ton (All the Year Round). HORATIO MORGAN, Consignee for London, Office, 17, Wellington Street, Strand, W.C., where all orders are to be sent.
N.B. No Agents or Travellers employed.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Park Place North, Clapham Road, in the county of Surrey, at the office of Messrs. BRADBURY & EVANS, in the precincts of Whitefriars, in the city of London, and published by him at the office, No. 16, Wellington Street, Strand, in the county of Middlesex.—SATURDAY, August 18, 1860.

ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

THE Ministry have made a great mistake, if they imagine that, because they were supported in their Defence of the Realm Bill, either the House of Commons or the country was quite satisfied with what was proposed. They were so far content to find that the Government did not propose to carry out the whole scheme of the Royal Commissioners as regards their land defences for the Royal Dockyards. But no class in the country, save the disloyal Manchester party, wished the Dockyards to be left unprotected to sea-ward. Then all parties worth reckoning were anxious that something should at once be undertaken; and the proposal of the Ministers for the year seemed to be the very least that should be done. What was asked for was therefore freely granted, to be laid out upon the responsibility of Government.

The speech of Lord Ellenborough, however, in the House of Lords, with its ominous reference to the defence of Woolwich being left unprovided for, and the motion of Sir De Lacy Evans for a fresh commission to organise the defence of the Metropolis, are evidences of the real dissatisfaction that remains in the legislature and throughout the country, notwithstanding the passing of the Bill for the Defence of the Realm. The fact is, Lord Palmerston, in his "chaffing" speech in support of his Bill, was guilty of an *ignoratio elenchi.* There has been no disposition in Parliament or out of doors, on the part of unprofessional people—excepting always Mr. Bright—to judge this matter apart from the opinions of military authorities. The noble viscount tried to make out, that it was only sailors who called out for ships, and soldiers for an army in the field; but that Ministers had been guided by a mixed Commission, of soldiers, sailors, and engineers, and by the evidence taken on the subject. Now, the public, as represented by the press, have very seldom advanced a word not founded upon the Commissioners' own Report. Their conclusions were found fault with upon their own showing. They were not appointed by Her Majesty to provide for the defence of the Dockyards, but "for the security of the United Kingdom." If a writer in a popular magazine threw out a scheme for the defence of London, it was because the Commissioners themselves emphasised the point, and complained that the defence of London was not properly brought before them. Whether they were right or wrong in thus interpreting their functions, and limiting the scope of their inquiry in accordance with the main drift of the instructions of the Secretary for War, instead of fulfilling all that Her Majesty's Commission seemed to require of them, need not now be discussed. Both their Report itself and the evidence appended to it, made the general public acquainted with the paramount importance of London in case of invasion. Not that we mean to say this was not a question which unprofessional persons could have judged of before, as well as the military. Besides, we had been told it long ago by the French. They have never talked of invading us, without saying they would push for London. But supposing the general public so ill-informed as Lord Palmerston imagines, and incapable of judging rightly in such a matter of their own knowledge, we say the the Commissioners' Blue Book itself has been the basis of public opinion. That it did not agree with the conclusions of the Report of the Commissioners is very true. But the Report was not based on the evidence. And, moreover, Her Majesty's Government did not themselves propose to carry out the Commissioners' views. A vote was taken, not to carry out their recommendation, but only a limited scheme, in accordance with the views of the Cabinet. Of course, what was proposed was partly recommended by the Commissioners. How could it have been otherwise? Doubtless even Sir John Burgoyne will approve of much, if not all, that is now about to be done. The general public, also, guided by such opinions and common sense, have no objections to offer. But still people are not satisfied. Though they do not wish to hamper the Government in doing anything to increase our security, they are perfectly certain that more must be done than what Ministers have proposed.

No man could have given stronger evidence in favour of "an army in the field" than Sir John Burgoyne, though he is "an engineer." The supporters of the Government plan, too, cannot deny the importance of it. Nay, they now declare that this is the sole defence intended for London; and that the fortifications of the Dockyards are really intended to make them secure, chiefly that our army in the field may not be distracted in looking after them, but may concentrate its whole efforts to secure the capital! Very good,—could fortifications only take care of themselves; but Sir John Burgoyne's great objection to extensive fortifications round the Dockyards to landward was, the "*army*" *they would require to defend them,* and the consequent weakening of our disposeable army for the field. Of course, should any question arise, whether the Dockyard fortifications are to be fully garrisoned and London left undefended, or every effort made to save London, even if one or two Dockyards might fall, we all know what will be determined —London must be saved, at all hazards. And we put it to any man of sense, whether it is not a dangerous thing, for the country to build extensive fortifications, which we may not be able to hold—and Sir John Burgoyne has great fears that we could not hold all the fortifications which were proposed for Portsmouth —whether, in short, it is not the very means, and the only means, which would enable a foreign foe, once landed, to retain his footing?

But to come to Woolwich. The defence set up for the Government for omitting Woolwich from their plan—though the Royal Commissioners were specially directed to report upon it, keeping in mind its bearing upon the defence of London—is the worst argument possible. We are to remove our arsenal from Woolwich! We are at once to retire to Cannock Chase! In the first place, this is not true. In the next place it is cowardly. Like most acts of cowardice, also, it is the most dangerous step we could take. We may now, indeed, regard it as a fortunate circumstance that Woolwich is where it is. It is part of London; and as the occupation of London by an enemy MUST NEVER BE, let us hope that Woolwich is safe. We have been wont to regard all the soil of Britain as sacred. We were not much pleased therefore with the land-side fortifications for the Dockyards; because their existence assumed an enemy was to be allowed to land, to march unmolested, and sit down to open fire upon them without interruption. Having got rid of this hypothesis, we are not likely now to be contented with one in which Woolwich—and if Woolwich, the Metropolis—is coolly tabooed-off, as a land of promise for the enemy.

But it was not proposed by the Royal Commission, and cannot be intended by Government, to remove everything away from Woolwich. Cannock Chase was proposed as an *additional* arsenal; not to take the place of Woolwich altogether. Be this as it may, however, while London stands, it is clear Woolwich MUST be made perfectly secure. Let those acquainted with Government works, and indeed who know the cost of all extensive buildings and machinery, think for a moment of the probable expense of the new establishment at Cannock Chase, and say whether the outlay had not better be devoted to rendering Woolwich and London safe? We care not whether it be by masonry work or earth-work, by floating batteries or an army in the field, or the latter combined, but Woolwich must be defended. To leave it, and run off to Cannock Chase, would be a lasting national disgrace, whether invasion is attempted or not. Coming after the Premier's defiant speech, introducing the Bill for our Defence, to do so would have but one parallel in our history with which we are acquainted. It would be like the act of *the little boy who chalked up a certain defiant phrase upon the wall, and then ran away!*

A very interesting letter has been addressed to the *Times,* in which the writer gives an account of his experiences at Cherbourg during the present month. We perfectly agree with our contemporary's correspondent, and can vouch for the accuracy of his statements; but it should not be forgotten that invariably at this season of the year, when curious visitors abound in France, a dullness pervades the Imperial arsenals and yards. The busy periods are the winter and spring months.

We learn from the *Moniteur de la Flotte* that La Gloire, an iron-plated frigate, has been completed at Toulon, and has proceeded to sea in order to test her various qualities. M. Dupuy de Loine, the designer of the vessel, proceeds to sea in her. It is stated that the best results are expected from the trial-performances of La Gloire; and if they prove to be satisfactory, several ships of large dimensions will be immediately laid down on the same principle. L'Invincible, a vessel similar in all respects to La Gloire, is progressing rapidly towards completion at Toulon.

THE CHANNEL FLEET AT MILFORD HAVEN.

The Channel Fleet arrived in these waters on Friday, the 17th, about noon, and came to anchor opposite the town of Milford. On Monday, the admiral and some of the chief officers landed in the dockyard. The Hampshire Artillery fired a salute from the fort on the heights when he came on shore, and a guard of honour from the 8th Depôt Battalion was also in attendance.

The fleet had a very rough passage across the Channel, which enabled them to appreciate Milford Haven, as the moment they entered they found themselves in smooth water, which shows what an admirable harbour of refuge this would form for vessels bound up or down St. George's Channel, &c. It can be entered at any time of tide, as there is plenty of water even at the lowest spring-tide to take the largest ship in the Navy up to the dockyard, a distance of about eight miles from the entrance, under St. Anne's Head.

The superficial area of Milford Haven is greater than any harbour in Britain, as it extends over, at high water, 7778 acres, and at 3 fathoms below low water, 3158 acres, this latter being greater than the high-water area of any other harbour. There is great facility in coaling, as at the new pier of Milford any ship could be brought alongside; and when a railway which is in contemplation is completed, coals can be put on board at once from the railway truck. The Act is already obtained for opening this small line of about eight miles, which will communicate at once with the local districts, also joining the South Wales Railway, which is in connection with the Great Western through to London.

The fortifications at Popton Point, and the one opposite, are beginning to show themselves, and when all are completed will render the passage of the Haven secure against shipping. Some other works ordered on the heights round Pembroke Dock, recommended by the Committee of the House of Commons, will be commenced immediately on both sides the water.

The Mayor of Pembroke, with the principal inhabitants of that ancient town and its vicinity, entertained the admiral and officers of the fleet at a ball and supper in the Town Hall; the company was select and numerous; the room was so full as to make dancing rather a difficult operation. The supper, laid out in the market-place, was most excellent. The *coup d'œil* was remarkable from the variety of uniforms of Army, Navy, Militia, Yeomanry, and Volunteers. All parties seemed to enjoy themselves exceedingly, and did not break up before sunrise. This quiet old town has not witnessed such gaiety for many years; perhaps, not since the days of the celebrated Longbow.

The admiral and principal officers were invited to dine with Lord Cawdor on Thursday, at his beautiful mansion of Stackpole Court.

It is not yet known when the fleet will depart, but is supposed it will go early in the ensuing week.

THE ARMY.

5th Dragoon Guards. Captain Godman, Brigade-Major, Cavalry Brigade, at Aldershot, is on leave to the 12th of September.

7th Dragoon Guards. Captain Blinkhorn has arrived home from India on sick leave in the Earl of Balcarras troop ship.

4th Light Dragoons. The following account of the plight in which this gallant corps is at the Curragh Camp has been published. "The Scots Greys, 3rd Light Dragoons, and three batteries of Artillery arrived in camp about three months ago, and were followed towards the middle of July by the 4th Light Dragoons. From the time that the first detachment arrived until now, the weather has been more or less inclement, scarcely a day passing without rain; and you may imagine the discomfort of being under canvas when the atmosphere within one's tent resembles something between a vapour bath and a Scotch mist, while the floor is thoroughly saturated with moisture. As regards the two first-named regiments and the Artillery, they were permitted to make themselves as comfortable as circumstances would allow; liberty being accorded them to raise turf walls, make drains, gravel paths, &c., and the situation of their camps lying on a considerable declivity, it may be said of them that 'their lines were laid in pleasant places,' and indeed would almost realise all that the sunny haze of a young lady's imagination might conceive. Not so, unfortunately, with the 'Fourth Lights;' the site of their camp is the worst that could possibly have been chosen on the Curragh, being literally a bog, a swamp of the dismallest kind encircling more than half of it. Within a week after their arrival half the regiment were washed out of their tents, and forced to 'change position to the right.' On Friday morning at *réveille*, we were surprised to find that after only a few hours' continuous rain a lake of considerable width (I speak without exaggeration) had formed round two sides of the camp. This has since encroached still further, cutting off all communication between the men's tents and their camp kitchens, latrines, &c. The miserable state of both horses and men, unless seen, can hardly be imagined; the latter are crammed 10 or 12 in a tent, hardly as many yards in diameter—while the horses, poor beasts! patiently stand up to their hocks in a lake of liquid mud which rivals that once existing in the neighbourhood of Balaclava. The destruction of men's clothing is necessarily very great, and really it seems extremely hard that the poor fellows should be thus forced into debt, which it will take months to pay off."

9th Lancers. The regiment will shortly move to Aldershot from Exeter.

10th Hussars. Lieut.-Colonel Baker is on leave to the 16th of September.

11th Hussars. The regiment has moved from Birmingham to Manchester, to be stationed.

12th Lancers. The left wing, including the remaining troops of the 12th Lancers, about which some anxiety began to be felt, arrived at Gravesend on Wednesday in the troopship John Temperley, from Calcutta. The left wing includes 117 non-commissioned officers and men, with the following officers:—Lieut.-Colonel T. G. A. Oakes, Captain Chandos F. Clifton, Lieutenant Robert Edward Roe, Lieutenant Francis T. Blunt, and Assistant-Surgeon Edward M. Wrench. They sailed from Calcutta on the 10th April last.

16th Lancers. Lieutenant Cowtan has leave of absence from 13th August until his retirement from the service shall take place. A medical board has been ordered to examine and report upon the state of health of Lieutenant Webster.

Royal Artillery. We are sorry to learn by the last Bombay mail of the death of Lieutenant Power De La Poer Trench of the Royal Artillery, which occurred at Gorruckpore on the 3rd of last month. Lieutenant Rait has sick leave to England. The following moves from Aldershot are ordered:—No. 8 (Major Du Plat's) battery to Christchurch; No. 1 (Captain Morris's) battery to Horfield; No. 5 (Major Green's) battery to Dorchester.

Royal Engineers. Lieutenant Haslett, Royal Engineer Train, has leave from Aldershot to the 19th September, on private affairs. General Nicoll's death will promote Colonel Williams, now commanding at Chatham, to major-general; Brevet-Colonel Chaytor to colonel; Brevet-Major Baillie to lieut.-colonel; and Second Captain Schaw, to first captain. By Brevet-Major Stopford's death the adjutancy at Chatham becomes vacant; and Lieutenants Gossett and Grant, the latter on the staff in Canada, will be promoted to second captains. General Nicoll's death also promotes Lieutenant-General Sir Charles Pasley to the rank of general, and Major-General Ward to the rank of lieut.-general and colonel-commandant. We understand that Captain C. E. Harvey will succeed the late Major G. M. Stopford as senior adjutant at the Royal Engineer establishment, Chatham, and that Lieutenant W. B. Gossett will be the junior adjutant, vice Captain Harvey. On Wednesday, the 8th of August, Sapper Hercules Wright, 35th Company, received from the Royal Humane Society, through the Coroner of the Aldershot district, a handsome testimonial on parchment, for having plunged into the Basingstoke canal, and saved the lives of three Riflemen, on the 25th June, 1860. The Coroner presented him with a sovereign at the same time.

Grenadier Guards. The 1st battalion will move to Dublin on the 1st of October, relieving the 3rd battalion. The 3rd battalion is ordered to march from the Curragh to Dublin next week.

2nd Regiment. The 2nd battalion has been ordered from Corfu to Gibraltar, but it is now doubtful if the move will take place.

5th Regiment. A draught from the 1st battalion from the camp at Colchester, embarked on Monday for India. The draught comprised Brevet-Major Arthur Scott, Lieutenant G. A. Shegog, Ensign W. C. Ormond, and 203 rank and file.

8th Regiment. Another detachment of this regiment has arrived home from India. It consists of 179 rank and file, with Captain F. Longfield, Lieutenant Corfield, and Ensign Brown. The Depôt of the 1st Battalion will move from Chatham to Templemore, to join the 16th Depôt Battalion.

10th Regiment. Lieutenant Scott, 1st battalion, is on leave to the 26th of September, on private affairs.

14th Regiment. On the embarkation of the 2nd battalion for New Zealand, the Depôt will proceed to Fermoy to be stationed.

16th Regiment. The 1st battalion has received orders to hold itself in readiness to remove from Aldershot to Shorncliffe.

17th Regiment. The 2nd battalion of the 17th Regiment were officially inspected by General Mansel on Tuesday, 21st instant, on their arrival at Shorncliffe Camp; the general expressed himself much pleased with the soldierlike appearance of the battalion.

19th Regiment. Lieutenant Smith, 2nd battalion, is on leave to 30th September.

21st Regiment. Lieutenant Blakesley, 2nd battalion, is on leave from the 15th of August to the 29th of September.

25th Regiment. The 1st battalion has been held in readiness to leave Gibraltar for Dublin. It is now, however, uncertain whether the move will take place. Lieutenant Hanley, 2nd battalion, is on leave to the 18th of September.

27th Regiment. The Depôt is ordered from Buttevant to Cork, to join the 20th Depôt Battalion.

43rd Regiment. Captain Glover is appointed aide-de-camp to Sir Henry Ward, the new Governor of Madras.

50th Regiment. Major Tupper is acting as Military Secretary to the new Governor of Madras.

53rd Regiment. The troopship Lady Clarendon, with the head-quarters of the 53rd Regiment, under command of Lieut.-Colonel English, C.B., arrived in Plymouth Sound on Wednesday. The head-quarters of the 53rd include 362 men, 20 women, and 20 children. Officers,—Lieut.-Colonel F. English, C.B., Major Buck, Captain Frederick A. Walter, Lieutenants Alfred K. Ffrench, George Porter, John Bell, Robert Prince, Charles Bagnall, and Wm. Auchinleck; Ensign F. Rolls, Adjutant Charles Pye, and Assistant-Surgeons Richard Hungerford and Robert Beale. The 53rd will be quartered in the Raglan Barracks, Devonport. Brevet Lieut.-Colonel Maycock and wife were left at the naval hospital in Simon's Bay.

68th Regiment. Captain C. C. Fitzroy has been appointed aide-de-camp to Sir Henry Ward, Governor of Madras.

73rd Regiment. On Saturday the officers and reinforcements for this regiment, consisting of Captain G. Renny, Lieutenant W. Clarke, Ensign B. J. A. Monsell, Ensign H. Syne, Ensign C. W. H. Richardson, and 259 non-commissioned officers and men embarked on board the Gosforth troop ship, for Calcutta, to join the service companies of their regiment.

Rifle Brigade. Lieut.-Colonel Lord A. G. Russell, 1st battalion Rifle Brigade, has leave of absence from 24th August to 7th October, 1860, on private affairs.

The following Circular has been issued from the War Office:—"War Office, August 9, 1860.—As the use of white metal plugs for shells has been discontinued, and the metal of which they are composed can be made available for the manufacture of bullets for diaphragm shells in the royal laboratory at Woolwich, Mr. Secretary Herbert desires that the storekeepers at the various military store stations will send all plugs of the above description which are in their charge to Woolwich by the earliest public opportunity, in order that they may be made use of accordingly. —J. Crawford Caffin, Director of Stores."

The following Circular has been issued:—"War Office, August 17, 1860.—Instances having occurred in which barrels of ball cartridges have been issued without percussion caps, Mr. Secretary Herbert has decided that in future when ball cartridges are issued for practice, the proportion of 110 caps per 100 cartridges shall be retained in each barrel, instead of, as at present, taking the whole number of surplus caps from one or more barrels. The barrels are to be marked with the letter P before issue, in order to show that the ammunition is for practice. Military store officers must be careful to adopt this course for the future.—J. Crawford Caffin, Director of Stores."

Tenders will be received at the Royal Engineer Office, Woolwich, in September next, for the immediate erection of a new military hospital, on a site of Government land, for the use of the Royal Artillery, it being intended to convert the present Ordnance Hospital into barrack-quarters. The site of the new hospital has been selected by the Army Sanitary Committee. The new Royal Marine Hospital—a specimen of modern architecture of exceeding merit—is now rapidly approaching completion: it embraces numerous wings, each of which contains wards, lofty and well ventilated; and asphalted promenades are connected with the windows for the use of the patients.

Lieut.-General Sir Harry Smith, G.C.B., is, we are happy to learn, nearly recovered from his recent indisposition, which at first occasioned some uneasiness among the gallant general's friends.

The Adjutant-General, Sir James Yorke Scarlett, has issued a Circular Memorandum, dated the 6th instant, of which the following is a copy:—"By the regulations of the Service a soldier is required to keep his cap on in the presence of a superior; but as the contrary usage prevails in civil life, the General Commanding-in-Chief directs that in a civil court and before a magistrate, a soldier, not under arms, shall remove his cap."

The following Circular Memorandum has been issued, addressed to the Army at home and abroad:—"Horse Guards, August 7. With reference to paragraph 4, page 178, of the Queen's Regulations and Orders for the Army, the General Commanding-in-Chief desires that, in preparing the discharge-documents of a soldier already in possession of one or more good-conduct badges, the Board will invariably state, at the foot of the first page of the proceedings thereof, the date (when within a month or two) on which he may be entitled to an additional badge. His Royal Highness also requests that when a soldier has been wounded in action during any part of his military career, the name of the engagement and description of wounds received may likewise be inserted on the first page of the proceedings of the Board held to verify and record his services.—By command, James Yorke Scarlett, Adjutant-General."

National Rifle Association.—The council of the association, in reference to the next annual prize meeting in 1861, have decided that Her Majesty's prize and the gold medal of the association shall be competed for on the same terms as those of the present year, and also invite the gunmakers of the United Kingdom to a competition with rifles of a minimum bore of ·451, and a maximum weight of 9½lb., the pull of the trigger being not less than 3lb. This competition will take place at Hythe in February, the notice of the day appointed being previously given. Each competitor will have to bring six rifles of the same description and quality. The rifles will be fired from fixed mechanical rests, and the one that gives the best figure will be selected as the description of rifle with which the Queen's prize, together with the gold medal of the Association, shall be competed for, subject to the condition of the manufacturer undertaking to supply the number of rifles required by the council within a time specified, and of their being in every respect equal to the one chosen.

Army Medical Department.—The following is a list of the successful candidates at the competitive examination for Commissions in the Army Medical Service, Aug. 20.

Order.	Name.	Degree.	Place of Education.
1.	Godwin, C. H. Y.	—	London, St. Bart. Hos.
2.	Walters, John	M.B.	London, King's College.
3.	Gillespie, F.	M.D.	Cork.
4.	Gore, A. A.	M.D.	Dublin.
5.	Maunsell, T.	—	Dublin.
6.	White, G. F.	—	London, University Col.
7.	Wilson, F. R.	M.B.	Dublin.
8.	Jones, W. H.	M.D.	Cork.
9.	Alcock, N.	—	Dublin.
10.	Davidson, D. M'G.	M.D.	Glasgow.
11.	Heath, R. E.	M.D.	Dublin and Belfast.
12.	Adams, Robert	M.D.	Glasgow and Dublin.
13.	Lever, R. C.	—	London, King's College.
14.	Jazdowski, B. J.	M.B.	Aberdeen.
15.	Thompson, James.	—	Dublin.
16.	Wills, C. S.	—	Dublin.
17.	Riordan, R. B.	—	Dublin.
18.	Hope, Samuel	—	London, St. Mary's Hos.
19.	Baker, Thos. Y.	—	London, St. Bart. Hos.
20.	Bracken, J. H. N.	—	Dublin.
21.	Quinlan, P.	—	Dublin.
22.	Pent, Frank	—	London, King's College.
23.	Baxter, C. P.	M.B.	Dublin.
24.	White, S. G.	M.D.	Edinburgh and Belfast.
25.	Lamb, Henry	—	Dublin.
26.	Harvey, H. O.	—	London, St. Geo. Hos.
27.	Grant, E. B.	M.B.	Aberdeen.
28.	Wall, W. R.	—	Dublin.
29.	Flynn, T. P.	—	Dublin.

Portsmouth Commissioners.—At the monthly meeting of this Board which was held on Monday, Mr. E. Emanuel proposed, and Mr. Ogburn seconded, "That the thanks of this Board are due, and are hereby given, to Major-General Foster, Commanding Royal Engineer, on relinquishing his command of that department in the garrison, in acknowledgment of the consideration, attention, and courtesy given by him on all occasions to applications and recommendations of the Commissioners in support of public improvements." Carried unanimously. *It was also agreed that* the clerk should forward a copy of the resolution to General Foster.

SHORNCLIFFE CAMP.

During the past month working parties of the 90th Stirlingshire or Highland Borderers, and the 2nd Royal Cheshire Regiments of Militia, have been engaged in constructing a four-gun battery, and other field works, at the north-east corner of the camp, in rear of the C range, in the angle of and at the summit of the hill commanding the ravine running up from Seabrook.

The battery has been constructed under the directions of the 34th or Captain Gordon's Company of the Royal Engineers, now stationed at Shorncliffe. A noticeable feature in the construction of this battery is the use made of the new pattern gabions, the invention of Sergeant-Major Jones, R. E., now stationed at Chatham. As these gabions are of novel construction, a short description of them may not be out of place here. They are formed of 10 bands of sheet iron, about 6 feet long and 3¼ in. wide, and 10 pickets formed—at Shorncliffe at least—of ash; each band has two buttons at one end, and corresponding slots at the other, which when fastened together form a circle. The advantages arising from the use of these gabions are the following—facility and quickness of construction, also being very portable, and being applicable for the purpose of binding luggage together without unfitting them for their ulterior object; in forming gabions from these prepared bands, nothing further is wanting than to drive the ten pickets into the ground in a circular form and at a convenient distance apart, the circles of sheet iron are then slipped upon them, in and out of each alternate picket, and so on till the ten bands are fixed on the pickets, when the gabion is ready for use. Two men can thus complete one in about five minutes after some practice; whereas the old-fashioned wicker gabions take three experienced sappers three hours to complete one. The gabion bands are also available for the construction of suspension bridges for the transport of men and light ordnance across rivers, by merely hooking them together with the buttons and slots, doubling them, stretching them across the river by means of a windlass, and laying boards upon them for a roadway. Much credit is due to Sergeant-Major Jones for these novel and useful inventions. The battery is very substantially constructed on the most improved principles, having a magazine constructed in the embankment; it is also proposed to form a covered way connecting this battery with another one thrown up some two years ago at another angle of the high ground at this part of the camp.

General Mansel and staff inspected the works on Monday last, and stated himself to be highly pleased with their construction, expressing a determination to have guns placed in position in them for battery practice. Timber platforms are therefore being now fitted for the purpose of traversing the guns.

A detachment of the 9th battery of the 2nd brigade of Royal Artillery went to New Romney on Tuesday last, for the purpose of bringing to Shorncliffe the 18-pounders that have been in use for shell and shot practice at the Range at

Digitized by Google

Romney camp. The two Armstrong batteries returned to camp from Romney on the following day.

The 17th Regiment arrived in the camp on the 17th inst. The number of this regiment was omitted in the statement given in this journal last week.

A wrecked barque lying in the range of the gun practice at New Romney, it has been proposed by Colour-Sergeant Tucker, of the Royal Engineers, to remove it. The sergeant is sanguine of being able to effect this desirable object, and General Mansel is favourably inclined towards the project.

The detachments of the Royal Antrim Militia Artillery, left at the grand redoubt and Fort Twiss when the regiment marched for Woolwich, have been ordered to join headquarters forthwith.

COLCHESTER CAMP.

The following is a summary of the present total strength of the Camp :—Major-General Wood, Commandant. Staff-Officers, 9th Depôt Battalion—Colonel Dixon, C.B., Major De Morel, Major Westhead (in charge of Languard Fort), Captain-Adjutant Dunning, and Quartermaster Hendry. Staff-officers, 10th Depôt Battalion—Colonel Street, C.B., Major West, Captain-Adjutant Munro, and Quartermaster Anderson. Medical Staff, J. H. Ker Innes, C.B., chief medical officer. 9th Depôt Battalion—Assistant-Surgeons J. Smith Chartres, in charge, assisted by Assistant-Surgeons N. Avent and Wales. 10th Depôt Battalion—Assistant-Surgeon B. Lane in charge, with Staff-Assistant-Surgeon Brown, who will shortly leave the Camp for another station. The present strength of the battalions is—

NINTH BATTALION. Regiments.	Rank and File.	TENTH BATTALION. Regiments.	Rank and File.
1st Royals	87	5th Fusiliers	254
6th Regiment	167	34th Regiment	112
54th ,, ...	122	37th ,, ...	230
56th ,, ...	99	38th ,, ...	98
66th ,, ...	123	44th ,, ...	126
88th ,, ...	173	97th ,, ...	134
Total	771	Total	954

Giving an aggregate of 64 officers, 1725 rank and file, 191 women, and 254 children. There are only 128 in hospital, being at the present season of the year below the usual amount of sickness.

During the present week a few of the best behaved men in the Camp have been allowed by the authorities to engage themselves, after their ordinary parade, to a large farmer to assist in getting up his corn.

The heavy rains which have recently fallen, have by no means increased the comfort of the Camp, the drainage being inadequate for the purpose, and the ground being almost level. In the formation of the new Camp, and in laying down a more extensive system of sewerage, this will doubtless be remedied. The extensive site of ground purchased for the erection of the new barracks, is now being cleared of the growing crops, and the tenants, we understand, have notice to give up possession, and to place the property in the hands of Government by Christmas next.

The Army Gazette.

WAR OFFICE, PALL MALL, AUGUST 24.

11th Regiment of Light Dragoons—Lieutenant the Honourable James David Drummond to be Adjutant, vice Lieutenant McLoughlin, who has resigned that appointment.

14th Regiment of Light Dragoons—Lieutenant Edward Essex Digby Boycott, from the 21st Foot, to be Lieutenant, vice Beamish, who exchanges; Lieutenant Robert Cuninghame Cuninghame Graham, from the 78th Foot, to be Lieutenant, vice Jackson, who exchanges.

Royal Artillery—Griffith Evans, Gent., to be Veterinary-Surgeon; James Joseph Meyrick, Gent., to be Veterinary-Surgeon.

Grenadier Guards—Surgeon Charles R. Nicoll, having completed a period of twenty years' full-pay service, to be Surgeon-Major, under the Royal Warrant of 1st October, 1858.

4th Regiment of Foot—Major and Brevet-Lieut.-Colonel George Henry Tyler, from the 13th Foot, to be Major, vice Brevet-Lieut.-Colonel Thomson, who exchanges.

10th Foot—Captain William Cooke O'Shaughnessy, from the 2nd West India Regiment, to be Captain, vice Manners, who exchanges.

13th Foot—Major and Brevet-Lieut.-Colonel George Latham Thomson, from the 4th Foot, to be Major, vice Brevet-Lieut.-Colonel Tyler, who exchanges.

14th Foot—Captain and Brevet-Major Maxwell Lepper, from the 86th Foot, to be Captain, vice Fenton, who exchanges.

15th Foot—William Nangle, Gent., to be Ensign, by purchase, vice Garnett, promoted.

21st Foot—Lieutenant William Henry Slingsby Beamish, from the 14th Light Dragoons, to be Lieutenant (receiving the former difference between Cavalry and Infantry), vice Boycott, who exchanges.

26th Foot—Augustus Des Montiers Campbell, Gent., to be Ensign, by purchase, vice the Honourable George Grimston Craven, promoted in the Scots Fusilier Guards.

33rd Foot—The Commission as Lieutenant of Lieutenant James Maurice Shipton has been antedated to the 21st February, 1860.

39th Foot—Sergeant-Major Joseph Jobberus to be Quartermaster, vice Blurton, appointed Paymaster 2nd Foot.

46th Foot—Ensign William Gordon McCrae to be Lieutenant, by purchase, vice Carlow, who retires; William Long, Gent., to be Ensign, by purchase, vice McCrae.

54th Foot—John Simeon, Gent., to be Ensign, by purchase, vice Loveridge, promoted.

56th Foot—The third Christian name of Ensign Jones is Hillatt, and not Hillat, as stated in the *Gazette* of the 3rd August, 1860.

63rd Foot—Assistant-Surgeon John Henry Hunt, from the Staff, to be Assistant-Surgeon, vice Odell, who exchanges.

72nd Foot—Ensign Thomas Bedford Urquhart, from the 89th Foot, to be Ensign, vice Tanner, promoted.

73rd Foot—Ensign Hugh Francis Hacket Gibsone to be Lieutenant, by purchase, vice Greatrex, who retires.

78th Foot—Lieutenant Standish Radley Jackson, from the 14th Light Dragoons, to be Lieutenant (receiving the former difference between Cavalry and Infantry), vice Graham, who exchanges.

83rd Foot—Ensign Michael Murphy, to be Lieutenant, by purchase, vice Minhear, promoted; Ensign James Edmund Brymer to be Lieutenant, by purchase, vice Gore, promoted.

86th Foot—Captain Edward Dyne Fenton, from the 14th Foot, to be Captain, vice Brevet-Major Lepper, who exchanges.

88th Foot—Lieutenant Ernest Augustus Perceval, to be Captain by purchase, vice Riley, promoted, by purchase, to an Unattached Majority; Ensign Lewis Mansergh Buchanan to be Lieutenant by purchase, vice Perceval.

2nd West India Regiment—Captain Douglas Ernest Manners, from the 10th Foot, to be Captain, vice O'Shaughnessey, who exchanges.

Gold Coast Artillery Corps—Ensign James Thomson, to be Lieutenant, without purchase, vice Smyth, deceased; Robert Gilchrist Marshall, Gent., to be Ensign, without purchase, vice Thomson.

DEPOT BATTALION.

Captain William Clive Justice, from the 75th Foot, to be Adjutant, vice Brevet-Major Welman, promoted; Captain W. H. Peter Gordon Blaett, of the 10th Foot, to be Instructor of Musketry, vice Captain J. M. Lyle, promoted to a majority in the 29th Foot.

UNATTACHED.

Captain John Edward Riley, from the 88th Foot, to be Major, by purchase, vice Major and Brevet-Lieut.-Col. Edward Osborne Broadley, who retires; Lieutenant Henry Augustus Williams, from the Gold Coast Artillery Corps, to be Captain, without purchase.

MEDICAL DEPARTMENT.

Assistant-Surgeon Francis Odell, from the 63rd Foot, to be Assistant-Surgeon, vice Hunt, who exchanges.

BREVET.

The undermentioned promotions to take place consequent on the decease of General the Hon. Sir Henry Murray, K.C.B., Colonel of the 14th Light Dragoons, on the 29th July, 1860 :—

Lieut.-General Sir John Aitchison, K.C.B., Colonel of the 72nd Foot, to be General.

Major-General Everard William Bouverie, Colonel of the 15th Light Dragoons, to be Lieut.-General.

Brevet-Colonel John Thomas Hill, from Lieut.-Colonel half-pay, 80th Foot, to be Major-General.

Major and Brevet-Lieut.-Colonel Thomas Donovan, Cape Mounted Rifles, to be Colonel.

Major William Pym Young, 65th Foot, to be Lieut.-Colonel.

Captain Neil M'Innes Mackay, Royal Artillery, to be Major.

The undermentioned promotions to take place consequent on the decease of General Sir Henry Wyndham, K.C.B., Colonel of the 11th Light Dragoons, on the 2nd August, 1860 :—

Lieutenant-General William Jervois, Colonel of the 76th Foot, to be General.

Major-General the Honourable Thomas Ashburnham, C.B., Colonel of the 82nd Foot, to be Lieutenant-General.

Brevet-Colonel John Longfield, C.B., from Lieut.-Colonel half-pay, 8th Foot, to be Major-General.

Captain and Lieut.-Colonel Henry Frederick Ponsonby, Grenadier Guards, to be Colonel.

Major James Nugent, 36th Foot, to be Lieutenant-Colonel.

Captain Joseph Clarke Childs, Royal Artillery, to be Major.

The Commissions, as Brevet-Majors, of Captain and Brevet-Major George Gooch Clowes, 8th Light Dragoons, and of Captain and Brevet-Major Cecil Rice, 72nd Foot, have been antedated to the 7th December, 1858.

Memorandum—The undermentioned exchange, as stated in the *Gazette* of the 3rd August, 1860, has been cancelled :—

Military Train—Captain George Joy, from the 59th Foot, to be Captain, vice Wolrige, who exchanges.

59th Foot—Captain Henry Ridge Wolrige, from the Military Train, to be Captain, vice Joy, who exchanges.

CLERKS IN MILITARY STAFF OFFICES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—There are many staff clerks, as well as myself, who concur in the statement made by your correspondent "X. Y. Z.," in your impression of the 21st ult., and who anxiously look forward for a change in the Circular 321, dated War Office, 21st September, 1858, which regulates the position of clerks in military staff offices.

I was a staff sergeant of the second class with my regiment at the time the Circular above quoted came into operation, and regret to say offered myself as a candidate for a vacant clerkship, under the impression that all staff clerks would be recognised as staff sergeants, more especially as the minimum rank of all other military clerks is that of a second class staff sergeant; but judge of my utter disappointment in now finding myself obliged with my family to reside in lodgings, the cost of which, together with fuel and light, more than absorbs the extra pay allowed for the appointment I hold.

I am also given to understand that whilst there is a spare cot in a soldier's barrack room at stations where ordinary sergeants' quarters have not been provided, the staff clerk cannot even draw the minimum allowance of 1*s.* 2*d.* per week, usually granted to soldiers married with leave, and permitted to reside out of barracks.

I therefore trust that the publicity of these facts in your widely-spread journal will show the great necessity which exists for revising that portion of the Circular which fixes the rank of the lower grades of staff clerks; and will also be of service to other non-commissioned officers who may be under the foolish impression that they will benefit their position by leaving their regiments to obtain a military clerkship; whereas, in reality they will, under the present system, do so to their own detriment, as I did.

The classification of the soldier clerks in the commissariat corps, and military staff offices, depends upon the extent and importance of the duties upon which they are employed, but whether their rewards are equal the following statement will show :—

RANK OF SOLDIER CLERKS.

In the Commissariat Corps.			In Military Staff Offices.
1st class clerk	rank as	sergeant-major ...	sergeant-major
2d ,,	,,	quarterm.-sergeant ...	sergeant*
3d ,,	,,	2d class staff sergeant ...	sergeant*

I am, &c.,

AN UNFORTUNATE SCRIBE.

MILITARY STAFF CLERKS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I would beg to be allowed, through your valuable journal, to offer a few remarks on the subject of the Military Staff Clerks of the 2nd class, in the hope that the frequent agitation of the question, will, eventually, move the authorities to grant us a position equal to that of our brethren of the Commissariat Corps.

A Military 2nd Class Clerk generally has the responsibility of an extensive office upon him, and in many cases several clerks under him, holding the same rank as himself, and even senior to him as non-commissioned officers; it therefore becomes unpleasant, and I may add almost impossible for him to conduct the business of his department efficiently, as, being on an equality, they do not regard him in the light his responsible position demands; then arises the question so frequently mooted: Why not make him a Quartermaster-Sergeant, as are the 2nd Class Clerks of the Commissariat Corps? Has he not as much responsibility? Has he not been as long in office? In fact, many questions might be put, as to why he has not been placed on a par with the Commissariat Clerk.

Another, and an all-important feature presents itself in his case, *i. e.*, with regard to pension. He may, and many probably will, serve their time as 2nd Class Staff Clerks; and what are their prospects on retirement? They must retire on serjeant's pension; whereas, had they remained with their regiments, they might, in that time, have obtained the rank of quartermaster or ensign. But I do not wish to draw too many comparisons, or express discontent with my position, as I consider our pay to be very good; but would merely urge the propriety and justice of placing us on an equal footing with the 2nd Class Staff Clerks of the Commissariat Department.—I am, &c.,

A 2ND CLASS STAFF CLERK.

* These clerks are often placed in charge of extensive military staff offices, and are not even recognised as 2d class staff sergeants.

USELESS POUCHES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I wish, through the medium of your columns, to bring to the notice of those specially concerned the following circumstance.

A new description of pouch has recently been issued to the infantry as part of their accoutrements. Several of these pouches have been received in the garrison in which I am at present serving, accompanying the supply of new stands of arms.

The pouch in question is made of ordinary buff leather, the same material as the crossbelt and waistbelt, and like them is meant to be kept white and clean by pipeclay. It is carried on the waistbelt in front on the right side, and is intended to be used as a ball-bag or expense pouch, in which the cartridges when taken from the large pouch in rear are carried loose, so as to be handier for loading. From the size of the pouch, I fancy that it would hold two rows of cartridges, but the outer portion of each row would be in direct communication with the sides of the pouch.

Knowing that buff leather is not usually a very waterproof substance, and that pipeclay rather assists saturation by wet than otherwise, I was induced to put the pouch to the following test, to ascertain its capabilities for preserving the cartridges from the effects of damp.

I subjected the pouch for a period of 30 seconds to the fall of water beneath an ordinary shower-bath. I cannot state precisely the amount of water which fell, but I imagine that the shower was not heavier than a good thunder-shower in our own climate. I then examined the pouch and found that it was thoroughly saturated, the water having made its way through the seams, and having percolated through the material itself, so that the interior was completely damp and moist.

As, when campaigning, one is always at the mercy of the elements, and as a soldier may at any moment be exposed to a drenching shower of rain without a chance of shelter, how can he hope to keep his ammunition dry and ready for use in this porous and spongy receptacle?

In these days when waterproof substances of almost every description can easily be obtained, it seems a pity that the safety and efficiency of a man's ammunition should be sacrificed to the pretty appearance of a pouch clean and pipeclayed?—I am, &c.,

A. G.

THE FORTIFICATIONS BILL.

In the House of Lords on Monday, on the second reading of this bill, an interesting speech was made by the Earl of Ellenborough, who said that the measure was a very important one, inasmuch as it no doubt materially contributed to the security of the country—and it was also important, inasmuch as it showed the spirit in which Her Majesty's Government now contemplated the state of things in Europe. He viewed the introduction of the measure with the greatest satisfaction, because he had endeavoured during the last thirteen years to draw the attention of the House and of the country to the almost defenceless state in which they stood, earnestly desiring that they should not remain unarmed in the midst of armed Europe. He had to regret, however, that although the report on which the Government were now proceeding had been in their hands since the 1st of February, it was only now, at the end of August, that the House were called upon to give any opinion on this most important subject. They had lost four or five months of long days, during which the greatest amount of work would have been effected, and they were practically thrown back a whole year by the delay which had taken place. The works which were now contemplated had no doubt been rendered necessary by the improvement in artillery, but especially the alteration which the introduction of steam had effected in the old mode of warfare. It gave the greatest advantage to the power that took the initiative, and enabled an enemy to effect an invasion of the country at almost any point whatever. They should therefore take care that every bay or creek which could hold a fleet, or form a *tête de pont* for an enemy, was protected by a fort which could not be easily taken, and which would prevent the invading force from using the advantages which the coast might present. That was a principle, he considered, which ought universally to be acted upon; but it was not acted upon by this country. He voted for this measure most willingly, because he entertained that distrust of the French Government which Lord John Russell told the French Government months ago the whole world would entertain of it if the scheme for the annexation of Savoy and Nice were persevered in. He adhered to that statement of Lord John Russell, and he could not overlook the events which had since taken place. They now knew that before the expedition to Italy was undertaken there was a secret compact between the Emperor of the French and the government of Piedmont, by which compact the Emperor of the French was to receive Savoy and Nice upon the annexation to Piedmont of Lombardy and Venetia, there being at that time no quarrel whatever between Austria and Piedmont and France, the aggression of Austria having subsequently been provoked by Piedmont, instigated thereto and assisted by France. He could not forget these things, because when a man had once so committed himself by his conduct as to give reason to suppose that he did not act from pure or disinterested motives, those who believed him afterwards deserved the misfortunes that might follow upon their too great faith. There had been poets who had imagined a golden age in which the lion and the lamb should lie down together, peaceful and secure; but no poet whatever had at any time allowed his imagination to carry him to the extent to which the imagination of the Emperor of the French had carried him. No poet had ever imagined a state of things in which the lion would not lie down with the lamb, without first taking security for the good behaviour of the lamb. But that was what the Emperor of the French had done in the face of Europe, in insisting upon the annexation of Savoy and Nice as a protection against Sardinia. The result of that conduct on the part of the Emperor of the French had been the Volunteer movement in this country, and while the Government had done nothing, the people had added 70,000 to the rifle corps. That was the answer of the people of this country to the Emperor of the French, and he was satisfied that if the Emperor proceeded further, further answers of a similar kind would be given by them. They saw, also, the

Digitized by Google

esult which the conduct of the Government of France had produced on the rest of Europe. They saw, and most fortunately saw, the commencement of a good understanding between the Powers of Germany, so long separated from each other, and they saw also an indication of that distrust which, he admitted, prompted him to vote most cordially for the measure, on the part of all the powers, in the jealousy with which they viewed the forwardness of France in her armed preparations. Let him consider for a short time the measure itself and what it proposed to effect. There could be no doubt the Emperor of the French thoroughly understood the art of war, and they might depend upon it that he would never venture to throw an army in this country without first securing a *tête de pont* to cover his communications. Of all such positions the Isle of Wight was the best. Sandown Bay was the key of the Isle of Wight, and he had therefore seen with regret that the new fortifications there were not to be considerably stronger than those contemplated. He also regretted to see that Woolwich was omitted from the plan, not only because the defence of Woolwich would very materially affect the fortunes of the battle that was expected to be fought in front of London, but also because Woolwich was essential to the defence of London. They might regret that Woolwich should be where it was, but while it was there they should take advantage of it, and make it absolutely safe. It should be the citadel of London, and when so fortified and defended by an entrenched camp, no enemy would attempt London. The commissioners had asked the opinion of Lord Overstone as to what would be the effect of the presence of an enemy in London; but if London should ever be in the possession of an enemy, its sack would stand in history by the side of the sack of Rome by the troops of the Constable of Bourbon, and would equal, if not surpass it, in every horror and every outrage. It was to prevent that that he asked Government to avail itself of the means that were at hand, and to render Woolwich secure, in order that if they fell they might fall with arms in their hands, and with honour and dignity. There could be no doubt that the country had derived great benefit from the Volunteer movement. He trusted that they would have still greater numbers of Volunteers, and that they would attain still greater efficiency. It was impossible to speak too highly of the conduct of the parties who had carried forward the movement, or to overrate its immense importance. It was by far the most important event that he could recollect since the battle of Waterloo. It had added to the strength and the consideration of the country, but it was contrary to reason to expect that the Volunteers, however brave, could contend against regular troops in the open field. They would act admirably as light troops; but, after all, it was upon the regular army that ultimately the fate of this country would depend, in the event of that terrible misfortune occurring—the misfortune of invasion. He on that account regretted that the regular army was not much larger, because he felt that if an enemy remained but three weeks in the country, no matter how often that enemy might be beaten, it would be impossible for them practically to re-establish the constitution under which they lived. He believed that in such an event the people, indignant with the Government, would insist upon great and vast alterations, and whether those alterations would be on the side of revolutionary and republican institutions, or what was equally common, in the direction of the Crown, they would still be equally fatal to civil liberty and destructive to the constitution, which had made them what they were.

Earl de Grey and Ripon said it should be a natural source of satisfaction to Her Majesty's Government to find their measure supported by such high authority as that of the noble earl, and he assured his noble friend and the House that the interval between the report and the measure had not been wasted. He agreed with the noble earl that they should look to their regular troops in a moment of such danger as that contemplated; but while he did not wish to exaggerate the importance of the Volunteer movement, he believed that when the hour of peril came, the Volunteers would be found of the greatest service, and that many of their battalions would even meet the enemy in the open field. It should be remembered, however, that the sole object of those measures was purely defensive. They were made against no Government—they were directed against no country. They were founded on the changes which had taken place in the science of artillery and in the art of war. They were a threat to no other nation; they were purely for defensive purposes; and he believed they were not to be regarded so much as warlike measures, as measures which were best calculated to ensure and maintain the peace of Europe. The bill was then read a second time.

GARIBALDI'S YOUNG VOLUNTEERS.—It is an inexplicable mystery to me how these young soldiers can sleep so unconcernedly during the day on the sand, which, even as you walk over it, burns your foot—nay, that they can even sleep soundly beneath the fiery darts of the sun at full mid-day without any covering. A marvellous change has been wrought in their appearance; they are no longer the elegant and perfumed youths who were wont to lounge in the Corso of Milan, the Corso, of Rome; the Contrada and Portici of the Po at Turin; the Piazza Carlo Felice of Genoa, the Via Calzajoli, the Café Doney, of Florence; and the Square of St. Mark at Venice. A red or blue blouse, or rather a blouse that has once been red or blue, supplies the place of their former elegantly-cut coats. Thick, hobnailed shoes have come in lieu of the bright-polished boots; large pantaloons of brown holland, and a blue bonnet or felt hat complete their toilette. The cravat is a mere rag, generally a red cotton handkerchief; and this is by far the most striking article in the whole costume. At a first glance, one is apt to suppose that they all wear dark brown gloves, but it is only from their hands being so tanned that they have got that appearance. And their faces have precisely the same colour as the hands. Notwithstanding this extraordinary metamorphosis, which at one time would have been regarded as the greatest of all possible calamities, they never leave off singing—never, never. They awake singing, they breakfast singing, they walk singing, they march singing, they bathe singing, they sleep—no, they don't actually sleep—singing, but, excepting the hours when they are sound asleep, they are singing all day long.—*Letter from Messina.*

THE NAVY.

ADMIRALTY, AUGUST 21.

PROMOTIONS.

Commander to be Retired Captain.—Henry Lloyd, who entered the Navy Feb. 3, 1828, and has served on the North America and West India station; at Devonport; on the Coast of Africa; commanded the Triton and Wasp in the Mediterranean from May, 1852, to the close of 1855; and has served in guard-ships at Sheerness since August, 1856.

Acting Lieutenants to be Lieutenants.—George Rodolph Trefusis, who was mate of the Scourge, 6, in the Mediterranean from March, 1859, until promoted to Acting Lieutenant 24th April, 1860; Cottrell B. Powell, who was mate of the Vixen, 6, in the Pacific, from August, 1858, to August, 1859; Blair S. Hamilton, who became Acting Lieutenant in November, 1859; and Henry Fox, who was mate of the Vixen, 6, in the Pacific, from August, 1858, to August, 1859.

Mate to be Lieutenant—John L. Way.

Assistant Engineers to be Chief Engineers—W. L. Robinson, A. W. Buist, James Mangnall.

Second Masters to be Masters—Robert Brown, who has served in the Rolla, 6, brig, tender to the Victory since July, 1855; Charles Maurice Hughes, 1847, who has been employed in the coast-guard service at Devon since March, 1855, and was granted a pension for wounds, June 26, 1855; Augustus G. Whichelo.

Assistant-Surgeons to be Surgeons—James Johnstone, 1849, of the Monarch, 84; James Sproule, 1851, and William G. J. Ayre, 1851, of the Portsmouth Royal Marine Infirmary; William H. Woods, M.D., M.A., 1851, of the Plymouth Royal Marine Infirmary.

APPOINTMENTS.

Commander—Oswald Borland to the Cumberland.

Lieutenants—L. W. Peyton to the Pembroke, for service in the Coast-Guard; G. R. Trefusis to the Algiers; H. W. Mist to the Royal Albert; Reginald T. Clark and Charles J. Vidal to the St. George; Frederick Hammond to the Centurion; F. J. D'Aguilar, to Imaum.

Masters—Robert Brown to the Firebrand; George A. Stable to the Russell; Edward P. Bedwell (additional) to the Plumper; Frederick J. Ray to the Fisgard, for surveying duties; Augustus G. Whichelo to the Black Eagle.

Surgeons—James Long to the Firebrand; Henry Richardson to the Eagle.

Chief Engineers—John T. O'Bree to the Tartar; Archibald Bain to the Indus, for the Gibraltar; John M. Smith to the Cumberland, for the Meanee; Henry Newton to the Indus, for the Brunswick; William L. Robinson to the Cumberland, for the Orestes; A. W. Buist to the Cumberland, for the Goliath; James Mangnall to the Cumberland, for the Challenger.

Assistant-Surgeons — C. H. Slaughter to the Espoir; Henry Richard to the Cambridge; William E. Dillon to the Tartar.

Second Master—John G. O'Connell to the Rolla.

Naval Cadet—E. W. F. Boxer to Melpomene.

Clerks—Henry G. Barlow to the Formidable; William Nottidge to the Cambridge.

First-Class Assistant-Engineers — James Ross to the Curlew; A. M'Leod to the Indus.

Second-Class Assistant Engineers—Henry A. Henri to the Indus; George Thompson, John Osborne, and Alfred J. Mason to the Asia; John Lanksbury to the Orion; John Moir (acting) to the Algiers; William H. Tweedy to the Colossus; Charles Freeborne to the Espoir.

Third-Class Assistant-Engineers—George Paul and Thomas Russell (acting) to the Tartar; Albert R. Hersee and Edwin Jackson (acting) to the Espoir; John William Elliott to the Asia, for temporary charge of the machinery of the Grinder; John Gordon and John Robertson (acting) to the Curlew; John Austen Crawley (acting) to the Cumberland, for service in the Myrtle; Alexander Gillanders (acting) to the Indus, as supernumerary; Thomas M. Thompson (acting) to the Centurion; R. Ditchburn (acting) to the Conqueror; James Jack (acting) to the Aboukir; Hugh Aitkin (acting) to the Edgar; Angus M'Intyre (acting) to the Mars; John Pickles (acting) to the Mersey; Thomas S. Grice (acting) to the Amphion; Andrew Cornish to the Fisgard, as supernumerary.

COAST-GUARD OFFICE, AUGUST 23.

APPOINTMENTS.

Chief Officers—Lieutenant Lumley W. Peyton to command Penzance; Mr. Geo. A. Stabb, Master, Gorran Haven Station.

Assurance, 4, screw steam-sloop, Commander Charles M. Aynsley, left Malta on the 16th inst., for Beyrout.

Dee, 4, paddle steam-ship, Master-Commander Thomas C. Pullen, on her way from Woolwich to one of the western ports, was compelled, owing to the violence of the gale on Wednesday, to put back to the Downs.

Elk, 12, Commander H. Campion, was paid off on Tuesday at Chatham; the ship was cleared by 12 o'clock. Quartermaster Turner, for long service and good conduct, was presented by the commander with a medal and the gratuity of 10*l.* which had been awarded to him by the Admiralty. The Elk goes into the ordinary of the sailing division.

Exmouth, 90, screw liner, Captain James A. Paynter, was at Beyrout on the 8th instant, but under orders to leave for Candia, as the Mahomedan population of that island was in a very unsettled state. A court-martial was held on board to try Lieutenant the Hon. Frederick J. Boyle on a charge of being absent below while having the watch on deck. The proceedings were very short, occupying only an hour, when the sentence of the court was that he be dismissed the Service.

Firebrand, 6, paddle steam-sloop, Commander James M. Bruce, on her way from Harwich to Portsmouth, was obliged, in consequence of the heavy gale of Wednesday, to put back and anchor in the Downs.

Firefly, 4, paddle steam-vessel, Commander Arthur L. Mansell, employed on surveying duties, was at Beyrout on the 8th instant.

Greyhound, 17, screw steam-sloop, Commander F. W. Sullivan, arrived at Malta on the 13th inst., from Plymouth.

Herald, 8, surveying vessel, Captain Henry M. Denham, was at Sydney by the latest accounts. The subjoined letter in connection with the movements of this ship during her prolonged and useful commission, will be found to possess many points of interest:—"To the Editor of the 'Army and Navy Gazette.'—London, 20th August, 1860.—Sir,—Perhaps you may be pleased to insert the following extract from a letter received from Her Majesty's surveying vessel Herald from Sydney: 'I have solved the problem, a clear passage can now be made by postal steamers, even without lighting the reefs, upon three courses for the 1700 miles from Sydney to Torres Straits through the coral sea,—a channel free of current, and 150 miles wide, thus bringing Singapore or Point de Galle within 23 days by steamers one-third the size of those now employed to do it by the Cape Lewen route in 32 days. The colonists hail it as next to the gold discoveries in importance to commerce and and prosperity: thanks from all quarters!' A piece of intelligence of great importance to the mercantile world.—I am, &c. Charles G. Robinson, Captain R.N."

James Watt, 91, screw, Captain E. Codd. By recent advices from this ship she was at the island of Candia, on her passage to Malta, with damaged machinery. Her crank pin is broken, and it is expected that she can be repaired at Malta.

Jason, 21, screw corvette, Devonport. The coppering of this new vessel at Devonport is completed, and the crew are receiving spare spars, and rattling down the rigging.

Lapwing, 4, screw steam-sloop, Commander Montagu F. O'Reilly, was at Beyrout on the 8th inst., but under orders to leave for Alexandria.

Liffey, 51, screw frigate, Captain George W. Preedy, C.B., was at Beyrout on the 8th inst.

Marlborough, 131 screw, three-decker, Captain William H. Stewart, C.B., bearing the flag of Vice-Admiral William Fanshawe Martin, Commander-in-Chief of the Mediterranean fleet, was at Beyrout on the 8th inst.

Megæra, 6, iron steam troop-ship, Commander S. H. Henderson, left Malta on the 13th inst., with troops.

Mohawk, 4, screw steam-sloop, Commander Edward H. Howard, was at Beyrout on the 8th inst., but under orders to leave for Alexandria.

Neptune, 90, screw liner, Captain Frederick A. Campbell, was at Sidon on the 8th instant.

Orestes, 21, screw corvette, was launched on Saturday last from Sheerness dockyard, and notwithstanding the unfavourable weather, the wind blowing very strongly at the time from the south-west, the ceremony was witnessed by numerous spectators, among whom were the Commander-in-Chief at Sheerness, Vice-Admiral W. J. Hope Johnstone, Capt. Wise, aide-de-camp to the Queen, and superintendent of the dockyard; Captain Schomberg, chief of the steam reserve; Capt. Luard, of the flagship; and other officers of the Royal Navy. The vessel was christened by Miss Hope Johnstone, the daughter of the Commander-in-Chief. The following are the dimensions of the vessel:—Length between perpendiculars, 225 feet; length of keel for tonnage, 196 feet 8½ in.; extreme breadth, 40 feet 8 in.; breadth for tonnage, 40 ft. 4 in.; breadth moulded, 39 ft. 8 in.; depth in hold, 24 ft.; burthen, 172 tons; draught of water forward, 9 ft. 4 in.; aft, 15 ft. 11 in. Her engines will be of 400-horse power, and are being constructed by Messrs. Napier of Glasgow. She will carry 20 8-inch guns, 9 ft. long, each weighing 60 cwt., besides one 68-pounder 10-ft. pivot-gun, weighing 95 cwt., which can be removed at pleasure to either the forecastle or quarter-deck.

Racoon, 21, screw, Captain W. C. Chamberlain, left Malta for Beyrout on the 24th July last with a large quantity of provisions for the fleet. She sailed the whole distance, and arrived at Sidon on Saturday, the 4th of the present month at 6 p.m. She found at Sidon Her Majesty's ship Neptune, and a large Turkish frigate. The Racoon lay too all night, and on the following morning made sail for Beyrout, and anchored there at 8·30 a.m. on Sunday the 5th. At 10 a.m. on the same day, Her Majesty's ship Lapwing arrived at Beyrout with the mail for the squadron, and at noon a Dutch frigate dropped her anchor. On Monday, the 6th, a Sardinian sloop arrived. There were then at Beyrout the French ships of the line, Donawerth, Redoubtable, and Montebello; two large Turkish pirates, a Greek corvette, and two Sardinian frigates. It was expected that the Racoon would proceed to Sidon to relieve the Neptune. The following changes have taken place in the Racoon's officers: Lieutenant Charles R. Gayer to the Exmouth, vice George Medd, who exchanges; Silas Waymouth, assistant-paymaster to the Exmouth; Mr. Turner, carpenter to the Liffey, superseded by an officer recently promoted.

Victor Emmanuel, 91, screw liner, Captain Wm. J. C. Clifford, C.B., was at Jaffa on the 8th inst.

Violet, gun-boat. The trial of the machinery of this vessel having proved satisfactory, she has left Plymouth for her destination, Pembroke, where she does duty as tender to the screw steam-coast-guard ship, Eagle. The commander of the gun-boat, Lieutenant Eugene C. Batty, who burst a blood-vessel while on duty, and was obliged to go into the Royal Naval Hospital, is so far recovered as to be able to proceed on six weeks' leave of absence, after which he will rejoin the Violet. The Violet has since put into Falmouth for coals, and will proceed as soon as the weather moderates.

Wasp, 3, screw steam-sloop, Commander Charles Stirling, from Plymouth to the Cape of Good Hope, was spoken on the 17th of July, in 36° north latitude, and 27° west longitude.

In consequence of the rapid manner in which stout able-bodied boys have for some weeks past come forward to serve in the Navy, orders have been transmitted from the Admiralty to the dockyard at Woolwich to reduce the entry of candidates from fifty per week, as at present, to thirty until further orders.

The *Moniteur de la Flotte* of Sunday last has five of its columns occupied with the names of naval officers and others connected with the sea service, who have been decorated with the Cross of the Legion of Honour and with the military medal of 1852.

The *Moniteur de la Flotte* announces the death of Vice-Admiral Baron de la Susse, a distinguished officer of the French imperial navy.

NAVAL COURTS MARTIAL.—A naval court-martial assembled on Wednesday morning on board the Wellesley, 72,

Digitized by Google

guard-ship of ordinary at Chatham, for the trial of Lieutenant James Walter O'Grady, late second lieutenant on board Her Majesty's sloop Elk, 12, and Mr. John Burridge, boatswain on board the same ship. The court was composed of the following officers, viz :—Captain G. Goldsmith, C B., superintendent of Chatham Dockyard, president; Captain C. Wise, of the Monarch, 84; Captain C. F. Schomberg, of the Cumberland, 70; Captain J. M. Hayes, of the Tartar, 21; and Captain W. G. Luard, of the Formidable, 84. Mr. G. Essel, solicitor, Rochester, officiated as Judge Advocate. The court first proceeded to the trial of John Burridge on the following charges :—"1st. For that he, the said Mr. John Burridge, being boatswain of Her Majesty's sloop Elk, did, on or about the 24th day of October, 1859, refuse to do any more duty, and did persist in his refusal after three days had been given him to consider his conduct. 2nd. For that he was, on or about the 30th day of June, and on the morning of the 1st day of July, 1860, absent from his duty, and when called by Private Thomas Farrance, on the 1st day of July, 1860, did say that the first lieutenant might 'go to —— and all his fraternity,' or words to that effect." The prisoner, who was defended by Mr. W. W. Hayward, solicitor, pleaded not guilty to both charges. The court having heard the evidence for the prosecution, and also the prisoner's defence, read by his solicitor, found the prisoner guilty of both the charges and sentenced him to be deprived of his warrant, and to be reduced to the rating of an able seaman, in which rank he is to serve for three years. The court then proceeded to the trial of Lieutenant J. W. O'Grady on the following charges :—"1st. For that the said Lieutenant J. W. O'Grady, being a lieutenant of, and belonging to, Her Majesty's sloop Elk, did, on or about the 24th July, 1860, in the presence of his messmates, make use of the following expressions to Lieutenant George Robert Bell, first lieutenant of the said sloop :—'I consider your conduct blackguardly; that you are taking advantage of your position; and that you are a blackguard for so doing,' or words to that effect. 2nd. For that he, Lieutenant J. W. O'Grady, being in actual service and full pay in Her Majesty's fleet, and a lieutenant of, and belonging to, Her Majesty's sloop Elk, did refuse to apologise to the said Lieutenant G. R. Bell for making use of the said expressions when recommended to do so by Commander H. Campion, of the said sloop." After the evidence for the prosecution and the prisoner's defence, in which he admitted the first charge, but pleaded not guilty to the second, the court deliberated, and at its termination announced that the prisoner was acquitted on the second charge, and for the first was sentenced to lose two years' time as a lieutenant, and to be severely reprimanded.

Our Malta correspondent, writing on the 18th instant, informs us that several French ships with troops and horses had arrived there during the previous week from Toulon, *en route* to Beyrout. The following are their names, and the number of troops they are conveying :—August 9, Borysthene, M.I. steamer, 28 officers and 406 soldiers; August 11, Amerique, M.I. steamer, 39 officers and 1034 soldiers; August 13, Gange, M.I. steamer, 39 officers, 810 soldiers; August 14, Ceres, French line-of-battle ship, 28 officers and 817 soldiers; August 14, Mogador, French frigate, 13th Regiment, 13 officers and 399 soldiers; August 15, Simois, M.I. steamer, 15 officers and 567 soldiers; August 15, Asmodée, French transport, 17 officers and 483 soldiers; total infantry, 179 officers and 4516 soldiers. August 14, Yonne, French transport, 230 horses, 11 officers, and 250 soldiers; August 16, Aube, French frigate, 400 horses, 12 officers, and 241 soldiers; August 18, Finisterre, French frigate, 400 horses, 6 officers, and 400 soldiers; total artillery, 29 officers, 891 soldiers, and 1030 horses. Grand total, 208 officers, 5407 soldiers, and 1030 horses.

The Navy Gazette.

ADMIRALTY, August 23.

Corps of Royal Marines—Second Lieutenant Owen Thomas Jones to be First Lieutenant, vice Brookes, placed on half-pay.

THE MILITIA.

The Fifeshire Militia. This fine regiment embarked on Saturday evening last on board the Foyle, merchant steamer, for Glasgow. They reached Falmouth the same day, when the detachment doing duty at Pendennis Castle joined the head-quarters. It is impossible to speak too highly of the conduct of this regiment during the time they have been stationed in this garrison. The following general order, dated Government House, Devonport, August 17, was issued by General Hutchinson, commanding the western district, on their departure, prior to disembodiment :—"Under ordinary circumstances the Major-General commanding avoids expressing his opinion of a regiment on its quitting his district; but the Fife Militia Artillery leaves to-morrow to be disembodied in Scotland, and before its embarkation the Major-General is desirous of stating in orders that he greatly regrets their departure—and why? That it is efficient is shown by the fact that it has always furnished an unusual proportion of men for the duties of the garrison; that it is in a high state of discipline, by the fact that during the four months it has been stationed here it has only had one garrison court-martial, and that rarely has any man been taken up by the military police. The creditable conduct of all ranks in private life is spoken of by all who know them; and the Major-General willingly bears testimony to their professional attainments. He much regrets that such good soldiers do not all volunteer for the regular service."

Norfolk Militia Artillery. This regiment was disembodied at Great Yarmouth on Monday.

Tipperary Artillery Militia. Seven hundred men of this regiment, accompanied by their fine band and corps of trumpeters, are to go from Sheerness on Monday next, the 27th inst., to the Crystal Palace, where a grand banquet is to be given to them by their officers, as a mark of their estimation of the good conduct of the men, who have been now two years serving in England in a state of efficiency and freedom from crime almost unknown to military bodies. The physical appearance of the men will much please those who see them.

Rutland and Northampton Militia. With a view to the convenience of the Service, Her Majesty has been graciously pleased to direct that the quota of Militia now furnished by the county of Rutland shall be amalgamated with that of Northampton, and that the united establishment shall consist of the following numbers, viz. :—1 lieutenant-colonel, 2 majors, 12 captains, 12 lieutenants, 12 ensigns, 1 adjutant, 1 quartermaster, 1 surgeon, 1 assistant-surgeon, 1 sergeant-major, 1 quartermaster-sergeant, 1 sergeant-instructor of musketry, 1 bugle-major, 1 orderly-room clerk, 1 paymaster-sergeant, 1 assistant hospital-sergeant, 36 sergeants, 36 corporals, 12 drummers, 1083 privates.

The Militia Gazette.

WAR OFFICE, PALL MALL, August 21.

5th Regiment of West York Militia—Lieutenant John Whitacre Allen to be Captain, vice Sir C. H. Ibbetson, promoted.

1st Regiment of Royal Surrey Militia—Lieutenant William Henry Medley to be Captain, vice Sumner, resigned; Ensign Charles Anderson Pelham Bullock to be Lieutenant.

Northumberland Regiment of Militia Artillery—Captain Robert Cairnes Bruce to be Major, vice Reed, resigned; Second Lieutenant William St. Laurance Gethin to be First Lieutenant.

Memorandum—King's Own Light Infantry Regiment of Militia—Her Majesty has been graciously pleased to accept the resignation of the commission held by Captain George Alexander Warburton.

WAR OFFICE, PALL MALL, August 24.

Royal North Lincoln Militia—Lieutenant William Cosby to be Captain, vice Taylor, promoted; Ensign Charles William Joseph Taylor, to be Lieutenant, vice Cosby, promoted.

2nd Regiment of Royal Bucks Yeomanry Cavalry—Cornet Charles Seymour Grenfell to be Lieutenant, vice Leicester Hibbert, resigned; the Right Honourable Viscount Kirkwall to be Lieutenant, vice Matthew Samuel Grenville Knapp, resigned; the Rev. William Andrewes Uthwatt to be Honorary Chaplain.

Royal Cumberland Regiment of Militia—Fielding Trimmer, Esq., to be Captain, vice Western, resigned.

The Great Eastern.—The "gridiron" at Milford Haven, for the beaching of the Great Eastern, is now nearly completed. It has been in course of construction for the last two months, giving employment at such times as the tide permitted to about 200 men, both by day and night. It is formed on the northern shore of the haven, a few hundred yards from the terminus of the South-Wales Railway, fronts the Royal Dockyard, and lies as nearly due east and west as possible. The beach, to the distance of 550 feet, has been excavated and levelled to within a few feet of low-water-mark at spring-tides, which at high water will give a depth of 25 to 27 feet. The beaching place itself is composed of two "grids," 50 yards distant from each other. Each grid is 150 feet long, constructed of 40 strong transverse "baulks" (or beams) of 45, 35, 30, and 25 feet long by 13 inches square. They are laid down in four lots, ten of each length, with an interval between each beam of 3 feet. Each baulk of timber is firmly fixed in its place by three iron-shod piles, of from 3 to 4 feet long. The longest of these lots is laid nearest amidships, and the rest according to their length, thus tapering off to the stem and stern, so as in some degree to correspond with the beam of that part of the ship that will be immediately about them. Two "dolphins," 30 feet in height, made of four baulks, each 13 inches square, firmly clamped and belted together, strongly supported by back and diagonal struts, have been driven in at about 300 feet apart. These are for the ship's side to lie against, as well as to act as guides in the actual operation of beaching. One of these dolphins will be just forward of the starboard sponson, and the other near her starboard quarter. These, together with the mooring tackle and other necessary gear (all of which are provided) will keep the vessel in her position. It being intended that while beached the ship's head shall be to the westward, she will have to be swung before she goes on the gridiron, which, with a craft of her size, will be a delicate operation well worth seeing. The Great Eastern being 650 feet long, it will thus follow that when in position she will be supported for 550 feet of her length—viz., 300 on the two grids and 250 on the levelled beach, leaving only 50 feet of her bow and stern projecting beyond the timbers and excavations. The engineers of the South Wales Railway are also constructing a pier of loose stones (found on the beach, and forming part of those excavated in preparing the gridiron), to enable visitors to the big ship to have a ready mode of ingress and egress at all states of the tide. The whole structure has been made at the expense of the South Wales Railway Company, and will cost upwards of 1000*l*. Captain Ramsay, C.B., superintendent of the dockyard, has given all the facilities in his power to the proceedings.

Pembroke Defences.—It may not be generally known that the site selected by the War Department for the fortifications in the course of erection at Popton Point was probably an old encampment; as in making the excavations there the contractor found an old coin, dated 1571, *temp.* Elizabeth, bearing the fleur-de-lis and lion rampant.

A telegram confirms the intelligence of Garibaldi's disembarkation on the main land. He is accompanied, it is said, by 8000 men, and had already taken Reggio, on the south-west coast of Calabria, and about ten miles distant from Messina, the point of departure in Sicily. It is impossible to speculate on the result of this extraordinary enterprise; but though Garibaldi carries with him the *prestige* of success, and has a powerful ally in Bourbon tyrannny, the forces still at the disposal of the King of Naples are far from contemptible. The capture of Reggio is an important step, for it ensures him free communication with Sicily, supposing always that the Neapolitan men-of-war are content with firing at stranded vessels.

M. Peyrat, the well-known French journalist and the main support of *La Presse*, has published a paper on French and English armaments, in reply to that of M. Clarigny, on the same subject. M. Peyrat remarks that France has a considerable army because she is a great continental power, and that England has a powerful navy because she is the chief of the maritime nations.

In the House of Commons on Saturday last, on the vote of 7,000*l*. for the expedition under Captain M'Clintock, Lord Palmerston said that the question of the monument to be erected to the memory of Sir. J. Franklin was not yet decided. It was intended to consult the widow of Sir J. Franklin on the subject. The vote was then agreed to.

VOLUNTEERS.

METROPOLITAN.

London Rifle Brigade.—The Regimental Committee of the London Rifle Brigade has decided that the first of the annual Rifle gatherings, in connection with the corps, shall take place some time next October, when challenge medals and other prizes will be competed for. The completion of the butt at the Crystal Palace has been much retarded by the unfavourable weather; but it is now nearly finished, and ball practice by those members who have gone through the course of musketry instruction will probably soon commence. Every facility will also be given for private practice. In compliance with a wish very generally expressed, the commanding officer has sanctioned the formation of cadet companies, and as the subscription will be almost nominal and the cost of uniform moderate, it is expected the measure will be attended with the same success as in other corps. The concert in aid of the band fund realised a profit; and the commanding officers of the various regiments to whom invitations were sent have expressed much gratification at the attention shown them.

9th (West) Middlesex Rifles.—Mr. G. Marriner, the secretary, has been gazetted as supernumerary Lieutenant and Quartermaster, in recognition of his services to the corps, the members of which have practised assiduously of late in musketry and drill, with a view to the competition for medals, &c., which is to take place in October next. A large muster of the members forming the A and B Classes met in the Regent's Park on Monday last at 7 A.M., and commenced their course of musketry under first-class Hythe instructors. Nearly 300 members, in addition to the above, have now passed through the course, and the number of points made are considerably over the average made at Hythe. The members seem fully determined to qualify themselves for the prize meeting in October next, and from the sharp competition displayed already it is anticipated that the contest will be severe. The practice ground is now open at all times, and has been well frequented during the past week. Several companies are now forming in different parts to join the West Middlesex, the late liberal offer of the Council to abolish the entrance fee and receive the subscriptions half-yearly, has enabled many to join in a corps where all are on an equality, in preference to forming artisan companies. The ammunition is provided free, from the funds of the corps, the subscription covering every expense. The uniform, a strong Cheviot tweed, with scarlet and black trimmings, belts, gaiters, &c., complete for 3*l*. 15*s*.

11th Middlesex (St. George's) Rifles.—This admirable corps, which continues daily to increase in its numerical force, has lately been paying strict attention to the different branches of musketry instruction. Messrs. Sandford and Cocks, who proved themselves such skilful marksmen at the late competition at Wimbledon, together with one of the Hythe instructors, initiate the members in the several descriptions of rifle practice, who are divided into three classes, and under the careful supervision of their Adjutant, Captain Thompson, and their indefatigable commander, Lieut.-Colonel the Hon. C. H. Lindsay, are commencing to make steady progress.

26th Middlesex (Custom House) Rifles.—On Tuesday evening this corps left the quay of the Custom House and marched to the Tower under the command of Major Ralph William Grey, their commandant, where, by direction of the Secretary of State for War, they were inspected by Major A. A. Nelson, assistant-inspector of the district. At the conclusion he stated, that although an old inspecting officer in Scotland, this was the first Volunteer corps he had inspected in England, and that he should be perfectly satisfied if he found the other corps of his district equal in appearance and efficiency to the 26th Middlesex. He praised most highly the condition of the arms, and mentioned that the most important part of a soldier's duty was to keep his rifle always in a clean and efficient state, without which accurate firing was impossible. He further stated that, although there might be exceptional cases, no commanding officer was, as a general rule, justified in permitting the Government arms to be taken out of the authorised armoury of the corps, or to be kept by the men at their own homes. Major Nelson, after addressing a few words to the officers on their relative duties in a Volunteer corps, quitted the parade ground, the regiment marching off to head-quarters at the Custom House. It was a subject of much regret that the St. Katherine's company, lately united to Her Majesty's Customs Corps under Rule 2 of the War Office Circular, were unable to join their comrades, on account of the uniforms and accoutrements being still in the hands of the outfitters. This company has already attained great proficiency in drill under the able instruction of the sergeants of the 2nd battalion of the Scots Fusilier Guards.

29th (North) Middlesex Rifles.—On Saturday the members of this corps had a march out, accompanied by their band, to Tottenham, for field exercise with the 7th Middlesex (Islington). The two corps met at the Manor House, Green Lanes, and were loudly cheered on their route. The St. John's Wood, or Marylebone company of the North Middlesex, it is believed, will be in uniform by the 1st of September, from which day the Saturday half-holiday in the large West-end establishments commences. The whole of the fine company of Messrs. Brooks's pianoforte manufactory, one hundred strong, are also to be in uniform by Saturday week, when a march out of the entire corps is to take place, and it is expected that there will be a muster of something like five hundred strong on the occasion.

36th Middlesex (Paddington) Rifles.—A cadet company in connection with this corps is in progress of formation, composed of youths from 12 to 16 years of age. A handsome bugle has been presented to the corps by Mr. G. H. Penny, and subscriptions are received towards offering prizes for rifle practice. Drill takes place, as usual, at head quarters; and on Wednesdays the band is in attendance at seven p.m.; and on Fridays the corps proceeds to Wormwood Scrubs for skirmishing, &c.

Projected Field-day and Sham Fight.—A gathering of the various metropolitan Volunteer corps with a view to a field day and sham fight, is in contemplation for Tuesday, the 28th inst., to take place in the estate recently purchased

Digitized by Google

by the Muswell Hill Palace Company. Special train by the Great Northern Railway will, on that day convey the Volunteers and spectators to the scene of action, and the occasion is likely to be very attractive to all who take an interest in the Volunteer movement.

BUCKINGHAMSHIRE.

2ND (WYCOMBE) BUCKINGHAMSHIRE RIFLES.—This subdivision was inspected by Lieut.-Col. Ibbetson on Wednesday last, when, in spite of the unfavourable state of the weather, the rain pouring during the greater part of the time, the corps executed their movements most creditably. The general efficiency and soldier-like bearing of the members elicited high encomiums from the gallant colonel. The inspection took place in the park of Wycombe Abbey, the seat of Lord Carington, the Lord-Lieutenant of the county, who has, from the formation of the corps, most liberally granted its use for the drill of the members, together with a practice range in the grounds of 600 yards. A large gathering of the county Volunteers will take place at Wycombe early in October, to compete for three silver cups, of the aggregate value of fifty guineas, offered as prizes by his lordship, as well as to witness the presentation of a silver bugle, the gift of Lady Carington. Lieutenant Williams, the commanding officer of this corps, was the sole representative of the county in the contest at Wimbledon, and had the honour of being placed third in the competition for Her Majesty's prize.

DENBIGHSHIRE.

DENBIGHSHIRE RIFLES.—A silver bugle was presented to this corps on Tuesday evening by Lady Williams Wynn, in Wynnstay Park, near Wrexham. The proceedings terminated with a banquet at Wynnstay, given by Sir W. W. Wynn, at which about 200 were present.

DEVONSHIRE.

MUSKETRY INSTRUCTION AT EXETER.—A class for instruction in musketry has been recently assembled in Exeter, under the authority of the Devon Volunteer Association, consisting of 37 members of Volunteer corps from all parts of the county. The course of instruction followed was that prescribed by the Secretary of State for Volunteers, printed in page 75 of the "Volunteers' Manual," requiring a minimum of 15 hours, but the course at Exeter averaged 7 hours daily for 5 days:—15 members attended 35 hours; 10 members attended 30 hours; 10 members attended 25 hours. The object of the course was not merely to teach a few Volunteers to shoot, but more particularly to impart to officers the power of teaching others. Although, therefore, the principal attention was devoted to position drill, and to the correction of individual faults in aiming, several lectures were given by the Volunteer officer instructors, viz., Colonel Acland, Captain Courtenay, and Lieutenant Lillifant, officers in the Volunteer corps in the county of Devon, for the purpose of explaining the reasons and principles of drill. Owing to the want of a good range close to Exeter, the majority of the members of the class returned to their homes at the close of the first week, but 17 members went by railway to a range offered by Sir T. D. Acland for the use of the corps, and were able to complete their target practice in the 1st periods: 14 out of the 17 passed out of the 3rd class. Their shooting, as compared with the averages given in the "Hythe Papers," speaks for itself. Points gained by 17 Volunteers in the 1st period at the Exeter Musketry Class:—At 150 yards 100 points; Exeter average, 5·91; Hythe average, 5·94. At 200 yards 94 points; Exeter average, 5·52; Hythe average, 4·80. At 250 yards 78 points; Exeter average, 4·58; Hythe average, 3·72. At 300 yards, 64 points; Exeter average 3·76; Hythe average, 3·25. Total, 17 men, 20 shots per man. Average of Volunteers at Hythe in February, 17·18.

DURHAM.

3RD DURHAM RIFLE VOLUNTEERS.—On Friday evening week colours were presented to this corps by Lady Susan Vane Tempest. Her ladyship arrived in Sunderland from Seaham Hall, accompanied by the Marchioness of Londonderry, and drove to the Garrison Parade Ground in an open carriage drawn by four grays. The corps, under the command of major Lord Adolphus Vane Tempest, were drawn up in line, and after giving the salute and executing a few movements, the ceremony of presenting the colours was proceeded with, when her ladyship presented a spirited address, to which the major replied in suitable terms. The corps, headed by their band, afterwards accompanied the distinguished party for a short distance on their way to Seaham Hall.

ESSEX.

2ND BATTALION OF ESSEX VOLUNTEERS.—This battalion was officially inspected on the afternoon of the 20th by Lieut.-Colonel Ibbetson, Assistant-Inspector of Volunteers. The hour of inspection was 5·15 p.m., at which time exactly the gallant colonel arrived on the ground, where the battalion was drawn up in line in review order, under the command of the senior officer, Captain Birt, in the absence of Colonel Capper from illness to receive him. After the usual salute the inspecting officer was joined by Captain Birt, and accompanied by him made a minute inspection of the men and their equipments. This done, he took up his post in the centre of the ground, and the battalion having closed up was at his desire put through in the first instance the manual and platoon exercises, and then a variety of field evolutions, concluding by throwing out the first company as skirmishers, to all of which he paid the most marked attention. The men were then at his desire formed into an open square, when he came forward and addressed them. He said—"Second battalion of Essex Volunteers, I regret very much that your Colonel is prevented by illness from being present, that I might congratulate him on commanding so fine a body of men, and express how highly satisfied I am with the excellent and steady manner in which you have acquitted yourselves to-night. It shows to me that you have been properly drilled by competent instructors, and that the best system has been adopted. Practice alone is required to make you as perfect as any troops can be. I do not say you are perfection—nothing short of the utmost perseverance can make any one that; therefore I advise you to persevere with your drill, so that each man may not only be efficient himself, but able to instruct others who have not yet joined your ranks; for should the occasion call for it, remember that three times the present number of Volunteers will be required. It has afforded me great satisfaction to hear from your commanding officer, Captain Birt, the high character he gives of all the battalion, of your regular attendance at drill, and orderly conduct when there. I have to thank him for the attention he has shown me." The gallant Colonel, accompanied by Captain Birt, then left the ground, and the battalion was marched to its head-quarters.

NORTH ESSEX BORDERERS.—The company formed at Saffron-Walden is to be designated the "North Essex Borderers." The number of effective members already enrolled is 50.

COLCHESTER.—More than 50 members of this corps have entered the lists to compete for the prizes to be offered at the approaching shooting match at Wyvenhoe Park. There will be a preliminary competition, when the 12 members who score the greatest number of points will be entitled to shoot for the chief prize, an elegant silver cup, which will afterwards be presented to the successful Volunteer by Lady Georgina Rebow, at a grand entertainment to be given by J. G. Rebow, Esq., to a large party of military officers from the Camp and civilians from the town and neighbourhood.

EPPING.—On the 17th inst. a meeting of this corps was held in the town of Epping, under the auspices of Sir W. B. Smyth, Bart., a gentleman of considerable influence in the neighbourhood, when 40 members were enrolled, and the corps was declared duly formed, subject to the approval of the Lord-Lieutenant. The sum of 250*l.* has been collected; the uniform has been determined upon; the ground for ball practice selected; and a committee of management has been chosen to carry out all the details. There is little doubt the number of Volunteers will soon be increased to 60.

GRAYS.—On Tuesday the effective members of the 3rd Essex Volunteer Artillery Corps assembled for the election of officers. R. B. Wingfield Baker, Esq., was chosen captain, R. Meeson, Esq., first-lieutenant, and C. Asplin, Esq., of East Tilbury, second-lieutenant, and an influential committee was elected to carry on the management of the affairs of the corps. The dress, which is a very smart uniform, consists of blue tunic, with red cuffs and collar, with white grenade, blue trousers with red stripe, and the ordinary hat worn by the artillery corps. There is a prospect of a large increase in the strength of the corps from the numerous villages surrounding Grays.

HARWICH.—The corps of Volunteer artillery in this town, which we believe was the first of that branch of the Service formed in the county, has now risen into a most efficient body of men, and under the course of training with heavy guns to which the men are subjected, they are likely to become of great service in augmenting any force which may be formed for the important purposes of protecting Harwich Harbour, and preventing a descent upon that portion of the coast.

ONGAR.—In this quiet little inland town the Volunteer movement has progressed somewhat remarkably. Nearly 400*l.* has been raised in donations, and the annual subscriptions have reached 60*l.* Between 40 and 50 members are enrolled and are satisfactorily prosecuting their drill.

ROCHFORD.—The rifle corps in this town, near Southend, has been inspected by Major-General Wood, Commandant of Colchester Camp, and Lieut.-Colonel Ibbertson, Assistant-Inspector of Volunteers, the manner in which they executed their several manœuvres eliciting the approval of the gallant inspecting officers. There was a large concourse of spectators, and the artillery band of Captain Travers's battery at Shoeburyness was present on the occasion.

TENDRING HUNDRED.—Captain Goderich having declined the command, J. Cardinall, Esq., of Tendring Hall, has been elected Captain of the corps, which now numbers 70 members, with alternate drill at Bentley and Thorpe. An excellent range for rifle practice has been offered upon the estate of Mrs. Weeley, at Weeley, and having been officially approved by the military inspector, the necessary preliminaries for the formation of the butts have been proceeded with.

GLOUCESTERSHIRE.

BRISTOL AND GLOUCESTERSHIRE ARTILLERY.—This corps was inspected on Saturday afternoon by Col. M'Murdo, C.B., Inspector-General of Volunteer Corps, and Major Gustavus Hume, inspector, for the district. Each battery fired four shots and two shells. The firing was excellent; in fact, two of the shots were so good that Col. M'Murdo expressed warm approval, and in one instance went down from the position from which he viewed the practice and personally complimented the sergeants, who laid the guns, on their success. At the conclusion of the firing the detachments were drawn up, and, having been formed into three sides of a square, were addressed by Col. M'Murdo, who expressed his satisfaction with the proficiency they had attained.

HAMPSHIRE.

2ND HAMPSHIRE RIFLES.—An official inspection took place on Wednesday evening, in the Western Park at Southampton, by Lieut.-Colonel Luard, district inspector of Volunteers. In pursuance of a battalion order, the corps paraded at half-past six o'clock, and went through a variety of evolutions, which were all performed in a highly satisfactory manner. At the close of the inspection the gallant officer expressed his satisfaction at the efficiency to which the corps had attained, and was loudly cheered by the Volunteers. The ground was kept by the members of the 8th Hampshire (Bittern) Volunteer Rifles, who attended for the purpose, under their commanding officer, Captain Robert Richardson, accompanied by their splendid band. The band of the Southampton corps was also in attendance, and the inspection was witnessed by several thousands of spectators. Colonel Luard was assisted by Captain Rodney O'Shea, the Adjutant of the 2nd Hampshire, and Major Lacy.

1ST AND 3RD COMPANIES OF THE ISLE OF WIGHT VOLUNTEERS.—On Thursday last these corps assembled on the Esplanade at Ryde at half-past four o'clock, and from thence proceeded to Ryde House Park, kindly lent for the occasion by Miss Player, where a couple of very handsome silver bugles were presented to them, the gift of the ladies of Ryde. The Honourable Artillery Company, now stationed at Sandown Fort, as well as the Portsmouth and Gosport Rifle Volunteers, assembled to do honour to the occasion. The day was fine, but breezy, and the whole affair passed off very well. In the evening a grand ball came off at the Victoria Rooms, under the patronage of the Right Honourable Viscount Eversley, Governor of the Isle of Wight, at which the Rifle Volunteers were requested to attend in their uniform. The following are a few of the lady patronesses of the ball:—Her Highness the Princess Hohenlohe, Lady Lees, Lady Simeon, Lady Oglander, Lady Sterling, Lady Burleigh, Lady Pigott, Lady Keene, Her Highness the Princess Bariatinsky, Lady C. Harcourt, Lady Martins, Lady Montague, Lady Georgiana Pigott, Dowager Lady Bowyer Smith, &c., &c. A full quadrille band was in attendance, and dancing was kept up with great spirit.

5TH HANTS RIFLES.—A demonstration of Volunteers of the Portsmouth district took place on Wednesday afternoon on the Lieutenant-Governor's green, when the 5th Hants corps was presented with eight silver bugles, subscribed for by the ladies of Portsmouth. A large concourse of persons assembled on the green and the surrounding ramparts. The Volunteers present comprised four companies of the 5th Hants, two companies of artillery, one company of the Gosport corps, and detachments from Fareham and Havant, together with a division of the Hants Yeomanry Cavalry. The Volunteers were drawn up so as to form three sides of a square, and the bugles were then presented by Mrs. Vallancey, wife of Major Vallancey, the Captain-Commandant of the corps. Major-General Lord W. Paulet, the Lieut.-Governor of the garrison, attended by a numerous staff, was present; and at the conclusion of the ceremony the gallant general delivered a short address to the Volunteers, who afterwards marched past the staff in open and close column, and the proceedings then terminated.

HUNTINGDONSHIRE.

1ST HUNTINGDON RIFLE VOLUNTEERS.—This corps is to be shortly presented with a silver bugle, with banner attached, as well as camp colours, by the ladies of that locality.

KENT.

1ST BATTALION KENT RIFLES.—A review of the companies comprising this battalion took place on Saturday afternoon in the beautiful park of Sir Thomas M. Wilson, at Old Charlton. About half-past 4 o'clock, Viscount Sydney, accompanied by Sir Thomas M. Wilson (Colonel of the West Kent Militia) and other officers, arrived on the ground, and were received by a general salute from the whole of the battalion, which was drawn up in review order. At the termination of the proceedings, which occupied about two hours, his lordship complimented the officers and members of the battalion upon the efficient manner in which the evolutions had been carried out.

11TH (SANDGATE) KENT VOLUNTEER ARTILLERY.—This corps commenced firing blank cartridge on Tuesday last, at Nos. 6 and 7 martello towers, Shorncliffe, under the command of Captain Taylor. After the firing, the company, with the officers, adjourned to the Duke of York Hotel, where they spent a pleasant and harmonious evening together.

22ND KENT RIFLE VOLUNTEERS.—This corps proceeded to Queenborough from Sheerness, by train, on the afternoon of Saturday last, and having been exercised in skirmishing and firing blank cartridge, were afterwards entertained at dinner by Captain Comyn. The 4th Kent Artillery Volunteers under Captain Magnus, were drawn up as a guard of honour, when the rifles marched down the street towards the Castle Inn, where the dinner was prepared in Mr. Hall's usual good style.

LANCASHIRE.

1ST MANCHESTER VOLUNTEERS.—This corps has become very popular, in consequence of the admirable manner in which they acquitted themselves at the Newton review, and the applications from new Volunteers, and from Volunteers in other corps, for admission render it likely that the strength of the regiment will be much increased. They have now 11 companies, and on forming the 12th will be entitled to a junior, or second major. The 143rd Lancashire, or Rusholme, Volunteers, Manchester, which aimed from the first at becoming a "crack" regiment, is making very satisfactory progress. It is composed of gentlemen who have agreed to purchase their own arms and clothing, adopting the short Enfield. They have built their own butts, and had them certified by the appointed officials. They maintain their own drill sergeant, resident near the ground; are training up a band (fife and drum) composed of youths, with a competent instructor, at a rather heavy cost, and the corps is consequently rather expensive to its members. The obect, however, is to make it an efficient one. The young men admitted hitherto are tall, and of pretty uniform height. They spare no pains at drill, and attracted much attention by their soldierly bearing at Newton.

3RD MANCHESTER RIFLES.—This corps, which already musters about 750 rank and file, has received another strong company, and a tenth is being rapidly formed. One of the chief characteristics of this regiment is that its ranks are filled by both wealthy merchants and mechanics, who attend their drills with equal regularity. The regiment, under the command of Lieut.-Colonel the Hon. Algernon Egerton, M. P., has already gained a high state of efficiency. Besides the regular evening drills, there is always a strong muster for battalion drill once a week. Captain Brooks is now arranging a grand rifle contest, which is to take place in Lancashire about the 25th of September and the following days. As there is a large sum (the surplus of the fund received at the Newton Review) to offer for prizes, and the plans are already very complete, it is fully expected that the meeting (which is intended to be an annual one) will be second to none but that at Wimbledon. There will be liberal prizes offered to "All Comers."

The review in Knowsley Park on the 1st of September, promises to be a very successful affair. It will be strictly confined to the Lancashire Volunteers; but already the acceptances amount to 10,500 men. Lieutenant-General Wetherall will command.

Lieut.-Colonel Gladstone and Major Tinley, of the 2nd Battalion Lancashire Rifle Volunteers, are making arrangements for a county rifle contest on their ground at Highstown, near Liverpool. The meeting will commence on the 29th of October, and is likely to last three days. One day will be devoted to all comers. It is intended that on this occasion there shall be a prize for Artillery Volunteers, who will contest with carbines.

Lieut.-Colonel Bousfield's 1st battalion Lancashire Volunteer Rifles, are still encamped at Crosby, near Liverpool, and appear determined, notwithstanding the very bad weather, to remain there for some time to come.

LEICESTERSHIRE.

MELTON MOWBRAY RIFLES. — This corps had a field-day on Thursday last, and were inspected by Lieut.-Colonel Turner. The men were put through a series of movements, which they executed in an admirable manner, and the gallant colonel complimented them on their approaching efficiency. After the inspection the members of the corps were entertained at dinner by their officers.

LINCOLNSHIRE.

8TH (SLEAFORD) LINCOLNSHIRE RIFLES.—A few days ago the ceremony of presenting colours to this corps was gone through at Leasingham Rectory by the ladies of the above town. There was a large assemblage of ladies and gentlemen on the occasion to witness the presentation. The Volunteers received the hearty applause of all present on their soldierly appearance.

MIDDLESEX.

24TH (UXBRIDGE) MIDDLESEX RIFLE VOLUNTEERS.—This corps was officially inspected on Tuesday afternoon by Lieut.-Colonel Ibbetson, Assistant-Inspector of Volunteers, in the parade ground attached to the Royal Elthorne Militia Barracks at Hillingdon. After the usual salute, the inspecting officer (who was accompanied by Captain Hilliard), made a minute inspection of the men and their equipments. This done, he took up his post in the centre of the ground, and the members of the corps were at his desire put through the manual and platoon exercises, and, after marching past, went through numerous evolutions, such as forming square to receive cavalry, &c. They were then formed into line, and Lieut.-Colonel Ibbetson, after congratulating Captain Hilliard upon having the command of such a body of men as the 24th Middlesex, and expressing the pleasure he should receive in making a favourable report to the authorities, thanked the Volunteers for their attention, and urged them not to relax in their zeal and attention to their duties, and stated that he looked forward with pleasure to meeting the corps another time. The usual salute was given, and, by permission of the inspector, three cheers for the Queen, and afterwards three cheers for Lieutenant-Colonel Ibbetson. The band of the 5th Royal Elthorne Militia was in attendance, and played at intervals during and for some time after the inspection.

NORFOLK.

NORFOLK RIFLES.—The Earl of Leicester, Lord Lieutenant of Norfolk, has appointed Tuesday, the 18th of September, for a general review of this corps at Norwich. The review will take place on Mousehold Heath, and will commence at 3 p.m. Major-General Wood, commandant of the camp at Colchester, will be the inspecting officer, and the manœuvres will comprise both battalion and light infantry movements. About 1000 to 1200 Volunteers will probably be assembled on the occasion, as the Norwich and Yarmouth corps are 700 to 800 strong, and companies more or less numerous will also be present from Lynn, Fakenham, Aylsham, Swaffham, Reepham, Loddon, North Walsham, and other parts of the county. The proceedings altogether promise to be of an interesting character.

NOTTINGHAMSHIRE.

NOTTINGHAM (ROBIN HOOD) RIFLES.—This corps assembles twice a week for battalion drill, and the companies separately for ordinary and position drill every evening. In addition to the nine companies which at present constitute the corps, mustering nearly 800 members, it is proposed to embody a tenth, to be called the "Armstrong" company, in order to complete the regiment. The latter company is to be formed from among those who are not wholly able to equip themselves. Each member, however, will be called upon for 30*s.*, or one-third of the cost of the equipments, and a monthly subscription of 10*d.* The outfit, the cost of which is 4*l.* 10*s.*, is to be the property of the company, unless the Volunteer pays 3*l.* before the expiration of three years. A subscription has been commenced, and a number of gentlemen have already guaranteed to provide two-thirds of the funds necessary to equip 30 men.

SOMERSETSHIRE.

Lord Portman, Lord-Lieutenant of Somerset, is completing arrangements for placing the Volunteer corps of that county on a more complete military footing. For this purpose the county is to be divided into three districts—an eastern district, a western district, and a central district—and a colonel and adjutant will be appointed to each. It is intended to hold occasional divisional parades and reviews in each district.

SURREY.

19TH SURREY RIFLES.—This corps assembled in good force on Saturday last, at the head-quarters, South Place, Kennington Park, for the purpose of marching out, but the state of the weather being so unpropitious, it was deemed desirable to postpone it. On Sunday the battalion will march to St. Giles's church, Camberwell, when a sermon for the occasion will be preached by the officiating clergyman. We have also much pleasure in announcing that the Rev. Mr. Statham, of St. Peter's, Walworth (to which place of worship it is intended to pay an early visit) has kindly offered himself as chaplain to the corps; and that Dr. Ladd of Kennington and Brixton, has been appointed surgeon.

A very well-contested match took place between the 5th Surrey (Reigate) and 14th Surrey (Dorking) on Monday at Reigate. The terms were 12 men from each corps to fire 10 rounds each at 200 yards, and 10 at 300 yards. The aggregate score of Dorking was 225 points; Reigate, 221. The highest scores on the part of Dorking were made by Messrs. Shearburn and Fuller, 28 and 27 points; on the side of Reigate, Messrs. Porter and Blakeston made 26 and 25 points; Sergeant King, 24.

WORCESTERSHIRE.

1ST, 3RD, 4TH, 5TH, AND 8TH WORCESTERSHIRE RIFLES.—These corps, under Lieut.-Colonel Knight, M.P., commanding the 1st battalion, were assembled on Saturday in the grounds of Spring Grove, the seat of Mr. Walter C. Hemming, late High Sheriff of the county, for battalion drill and inspection by Lord Lyttelton, Lord-Lieutenant of the county. Each company was accompanied by its band, and upwards of 400 men were under arms. The battalion having gone through the manual and platoon exercise and marched past, went through several manœuvres with great steadiness and precision. At the conclusion of the review Lord Lyttelton and the Lieut.-Colonel addressed the men, and expressed their great satisfaction at the efficiency of the battalion.

The various Worcestershire Rifle Corps continue their daily and weekly drill with great regularity. Colonel Winn Knight, M.P., at the head of the Wolverley corps, the first that was established in the county, is most zealous in the movement, and has rendered great service to the Volunteer cause.

YORKSHIRE.

YORK RIFLES.—On Tuesday evening last there was a general parade of the members of this corps in the Guildhall, York. They were marched, preceded by the band, to the field known as the Railway Cricket Ground, situate without North Street postern, where they joined the recruits recently added to the corps, and a series of battalion manœuvres were gone through. At the conclusion of drill, the following regimental orders were read to the three companies by Capt. and Adjutant Preston:—1. The following announcements having appeared in the War Office *Gazette* of the 17th inst., are hereby notified: 1st battalion (West Riding) of Yorkshire Rifle Volunteers, Capt. Charles Edward Preston, half-pay 18th (Royal Irish) Regiment, to be Adjutant from the 25th of June last. 1st Corps (West Riding) of Yorkshire Rifle Volunteers (York)—Her Majesty has been graciously pleased to accept the resignation, by Major George Briggs, of his commission as Captain-Commandant of this corps. 2. Whilst notifying the second of the above announcements to the York Rifle Corps, it is desirable to explain that it does not appear in consequence of any resignation sent in by Major Briggs, but in consequence of an intimation from the Secretary for War, from which it seems that the acceptance of the command of an administrative battalion involves the resignation of the commission of Captain-Commandant of a corps. The York companies, though forming a distinct corps in their financial and internal arrangements, constitute also the head-quarter companies of the first battalion, and therefore, for all military and administrative purposes, remain as heretofore under the command of Major Briggs. 3. In consequence of a letter received from Lady Mary Thompson, the days of shooting for prizes will be the 11th and 12th of October, instead of the 9th and 10th as previously announced. The following promotions in No. 3 company were then notified:—To be sergeants, privates W. H. Howlden, Coney Street, and John Cope Richardson, Holgate Lane; to be lance-sergeants, privates William Taylor Dent, St. Clement's Terrace, and William Russell Brown, Fossgate; to be corporal, private E. Grayson, Belle Vue Street.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, AUGUST 21.

3d Administrative Battalion of Lanarkshire Rifle Volunteers—Walter Henry Gill, Esq., late Captain 2d Royal Lanarkshire Militia, to be Adjutant.

7th (late 11th) West Riding of Yorkshire Rifle Volunteers (Leeds)—Henry Leslie Hunt, Esq., late Lieutenant 67th Foot, to be Adjutant, from the 19th June, 1860.

Kent Rifle Volunteers, 1st Battalion—Simon Fitzherbert Jacson, Esq., to be Adjutant, from June 30, 1860.

Warwickshire Rifle Volunteers, 2d Battalion—Edward Edwards, late Sergeant-Major in the Scots Fusilier Guards, to be Adjutant.

19th Middlesex Rifle Volunteer Corps—John Fotheringham, Esq., to be Captain.

20th Middlesex Rifle Volunteer Corps—The Reverend Charles Henry Andrews to be Honorary Chaplain.

40th Middlesex Rifle Volunteer Corps—Robert Cuff, Gent., to be Assistant-Surgeon.

1st Lancashire Artillery Volunteers—George Daniel Bankes, Gent., to be Second Lieutenant.

20th Lancashire Artillery Volunteers—Samuel Peeling Brabner, Esq., to be Captain; John Bacon Stanley, Gent., to be First Lieutenant; George Francis Ihler, Gent., to be Second Lieutenant.

1st Battalion of Lancashire Rifle Volunteers—The Rev. Joseph Wilding Twist, M.A., to be Hon. Chaplain.

1st Lancashire Rifle Volunteers—Lieutenant Alfred King the younger, to be Captain, vice Bousfield, promoted; Ensign William Affleck Cookson, to be Lieutenant, vice King, promoted.

51st Lancashire Rifle Volunteers—John Gerrard, Gent., to be Lieutenant.

5th Cambridgeshire Rifle Volunteers—The Rev. John James Needham, M.A., to be Honorary Chaplain.

Dumbartonshire Artillery Volunteers—2nd Company—Second Lieutenant John Anderson to be First Lieutenant, vice William M'Cormick Fairie, resigned; William Lang, Gent., to be Second Lieutenant, vice John Anderson, promoted.

3rd Hampshire Artillery Volunteer Corps—Alfred Barnes Sturdee, Esq., to be Captain-Commandant.

10th Hampshire Rifle Volunteer Corps—James Kemp Welch, Gent., to be Honorary Assistant-Surgeon.

19th Hampshire Rifle Volunteer Corps—Charles Allen King, Gent., to be Lieutenant.

1st Corps of Berwick-upon-Tweed Artillery Volunteers—The Reverend George Hans Hamilton to be Honorary Chaplain.

12th Lanarkshire Artillery Volunteers—John Gammell Houston, Gent., to be First Lieutenant.

13th Lanarkshire Artillery Volunteers—George Brown, Esq., to be Captain; Walter Graham Blackie, Gent., to be First Lieutenant; John Richard Cochrane, Gent., to be Second Lieutenant; The Reverend Gustavus Kilpin Flindt to be Honorary Chaplain.

14th Lanarkshire Artillery Volunteers—John Grant Bulley Orrok, Gent., to be Second Lieutenant.

14th Lanarkshire Rifle Volunteers—Ensign Robert Maclean Black to be Captain, vice George Guttridge Gunniss, resigned.

30th Lanarkshire Rifle Volunteers—Dugald John Bannatyne, jun., Esq., to be Captain, vice Alexander Crum Ewing, resigned, appointed Major 4th Administrative Battalion of Lanarkshire Rifle Volunteers.

35th Lanarkshire Rifle Volunteers—George Wilson, jun., Esq., to be Captain, vice John Kerr Clark, resigned; Ensign Joseph Robertson to be Lieutenant, vice Robert Hope Robertson, resigned.

3rd Berwickshire Rifle Volunteers—Lieutenant David Poppelwell to be Captain; Ensign David H. Somerville to be Lieutenant; Joseph Rowat to be Ensign.

Memorandum—4th Aberdeenshire Rifle Volunteer Corps—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Ensign Robert Wilson.

Lord Grosvenor, the Marquis of Donegal, and other officers commanding metropolitan rifle corps, have issued a notice stating that they decline to lend their countenance to the various "Volunteer Friendly Societies, &c." which have recently been formed. They intimate that a general scheme, approved by the Minister of War, and entitled to the support of the public and the Volunteers, is now under consideration.

INTELLIGENCE FROM THE SEAT OF WAR IN ITALY.

[From our Own Correspondent.]

Naples, August 18th.—This has been a week of alarms and panics; it was ushered in with the reports of Garibaldi's forces having landed at no less than five different points in Calabria, of towns in full revolution, and whole garrisons having gone over to the people. One would have supposed that these were sufficient to occupy attention here for at least a week; not so however was it fated to be longer than Tuesday morning; when the staid, slow-going of the inhabitants were startled first with the sound of cannon in the direction of Castellamare, and afterwards by an account of the cause—the attempted "cutting out" of the Neapolitan ship Monarca. It appears that the ci-devant Veloce, now called the Tukari, steamed into the bay of Naples at about 12·30 a.m. on the morning of the 14th inst., and proceeded to Castellamare, where the Monarca was moored to the pier, with the intention of cutting her out. The sentry on board the Neapolitan ship, observing a strange steamer approaching, hailed her to keep off, and perceiving that she paid no attention to his warning, gave the alarm. The Tukari meanwhile was fast drifting athwart the hawse of the Monarca, and soon fouled her, smashing one of her own boats in the contact. As a fire was now opened upon the daring little steamer from the Monarca, the pier, and the fort, she was forced to retire, and did so cleverly by steering so as to get the British ship Renown between her and the enemy's fire. Whether she suffered any loss of life is not as yet known here, but the casualties on the Neapolitan side were one seaman killed and another wounded. The second captain of the Monarca, named Acton, was wounded, and has since been decorated by the king with the cross of valour.

Various proclamations, decrees, and public notices incident upon the recent attempt on Castellamare have been published, amongst others one sings the praises of the troops, and compliments the national guards, paying at the same time a tribute to the courage, &c., of Captain Acton. A goverment manifesto announces that the king is determined to distribute a further supply of 12,000 muskets to the national guards, and makes known that during the continuance of the present state of siege the fidelity and good sense of that force are much depended on. A proclamation has just been issued from the government, which, after the usual preamble as to the city being in a state of siege, &c., proceeds to denounce in six articles the following offences against the state:—1st, All public assemblies in the streets of more than ten persons, such to be, after the second warning, dispersed by force of arms. 2nd, All secret meetings, under pretext of being reunions of societies or clubs. 3rd, The carrying of arms, whether fire-arms or swords. 4th, The carrying of heavy sticks. 5th, denounces the throwing of stones; and the 6th, brings up the rear with a general denunciation of all seditious expressions and attempts to excite the people to acts of violence. A decree for the establishment of a new police force has also been published. This describes the force as consisting of 14 capo squadra, 38 sotto capo squadra, 296 guardie, and 52 guardie lanterniere, 1 capo marinaio, and 8 guardie marinai; in all, 409. Prince Luigi Conte d'Aquila has at last left Naples, and although the avowed cause of his departure, that published in the government journals, is a mission to London, yet report says, and not without very considerable appearance of truth, that the real cause of his highness's departure is the discovery of a reactionary conspiracy of which he is said to have been the head, and to have circulated money and procured arms in furtherance of its object; to seize upon the person of the king and declare himself dictator. Treason, however, as is proverbial, never flourishes; the appointed signal, the firing of a pistol in the Strada Toledo was made, but the conspirators did not rise; nor did the disappointments end here, for an accomplice, with the usual prudence of such high-principled individuals, resolved to communicate the whole circumstances to the government. The consequence of the information thus received was, that a quantity of revolvers, carbines, and pistols, consigned to one whom the newspapers cautiously describe in periphrasis as an "*altissimo personaggio*," has been discovered and seized; the whole plot is now exploded, and is said to have had for its object the seizure of the person of the king, the proclamation of Prince Luigi, Conte d'Aquila, as dictator. Altogether, if true, and few here seem to doubt its authenticity, it was about as pretty a scheme as could well be hatched by an uncle against his nephew at such a juncture, and will show that the position of the King of Naples is surrounded with more difficulty than might at first sight appear. It is stated that the Bourbonne, a Neapolitan frigate, was lately ordered to repair to the Calabrian waters, but on discovering that the crew were disposed to go over to Garibaldi if opportunity offered, the order has since been countermanded. Amongst the current reports is one to the effect that Garibaldi has visited Naples in person, and had an interview with the local committee. Romantic as it may appear, this report has much more foundation than several of its cotemporaries. The authorities are in the utmost fright, and a landing is said to have been attempted from a Sardinian vessel yesterday. One steamer, with Sardinian colours, which arrived in the bay on Thursday night, seems to be the principal object of their suspicions, and three military officers who landed at 2 p.m. yesterday in full uniform, swords, &c., were not permitted to enter the town, but were conducted back by a guard to the landing place.

The internal state of Sicily is already exhibiting evidence of a healthier tone, in proof of which the establishment of an hospital for invalids (military), with a revenue of 12,000 ducats per annum, and the transfer of 18,000 from the revenue of the suppressed orders of Jesuits and Liguorini may be quoted. The Sicilian Committee at Genoa presents a noble example of sympathy with their suffering *fratelli*, and without relaxing their exertions for the raising of reinforcements, they have opened a subscription for the relief of the children and friends of those slain or still combating for Italian liberty. There can be no doubt but that the Sicilian question is universally regarded in the light, not of a particular and isolated struggle, but as a part of the great struggle which must sooner or later terminate in the freedom of the whole of Italy from foreign rule as well as from that of the Bourbon dynasty. The National Society has contributed already to the seven Sicilian expeditions, as follows:—To the first (Garibaldi's), L.36,000; to the second (Agnetta), L.120,000.; to the third (Medici), L.261,045.; to the fourth (Malenchini), L.800; to the 5th (Cosenz), L.66,000; to the sixth (Lanzi), L.15,000; to the seventh (Siccoli), L.7,610 In addition, L.1475 have been spent by the Committee on the transport of arms, postage, telegraphs, &c., as well as on subsidies, expeditions of volunteers, enrolments, &c. In all, the expenditure amounts to L.520,930, and the receipts to L.454,128. Notwithstanding which, the Committee, nothing daunted, are unremitting in their exertions to raise funds and forward fresh supplies.

THE ARMY AND NAVY GAZETTE
AND
JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)
The subscription is 7*s.* 7*d.* per quarter, or 30*s.* 4*d.* per annum, payable in advance, postage included (excepting abroad, which varies according to the route and destination). All Editorial Communications should be addressed to W. H. Russell, Esq., and business letters and advertisements to Mr. Archibald Graham, to whom post-office orders, &c., are payable. Advertisements received up to Thursday evening. The Paper is published every Saturday in time for the Morning Mails.
Office, 16, Wellington Street, Strand, London, W.C.

Catalogues sent on application.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*
Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C.
Established 1749.

ELSTOB'S RIDING BELTS,
Hunting Drawers, Breeches, Knickerbockers, Elastic-seated Riding Trousers, 32*s.*; Bedford Cords, best quality, 42*s.*; Belts and Drawers, 21*s.* each.—12, Avery Row, Brook Street (exactly opposite Ford's Hotel in Brook Street), New Bond Street, W.

DAY'S PATENT CHAIR-BED, a perfect combination of Easy Chair, Couch, and Bedstead, adaptable to either purpose by one simple motion, without screw, nut, rack, or complication of any description. An illustrated and descriptive circular for one stamp. W. Day & Son, Portmanteau Manufacturers and Military Outfitters, 353 and 378, Strand, London, W.C.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

RIFLE & ARTILLERY DUTY-BUGLES, TRUMPETS, &c.
—Volunteer Corps are respectfully informed that the patterns approved by Her Majesty's War Department can now be had of the Makers, Messrs. RUDALL, ROSE, CARTE, & CO. Price, with Lines and Tassels complete, Two Guineas.
SILVER BUGLES, for Presentation, from Twenty Guineas.
ELECTRO-PLATED BUGLES, in Case, Four Guineas.
BUGLE and TRUMPET-MAJOR DUTY-BOOKS, 3*s.* each, giving instructions, and all the regulation sounds.
DRUM MAJOR DUTY-BOOK, 4*s.* FIFE-MAJOR DUTY-BOOK, 3*s.*
PERCIVAL HUNTING-HORNS in Copper and Sterling Silver.
RUDALL & CO.'S PRICE LIST, with Guide for the Formation of Bands, and Corps of Flutes and Drums, and Estimates of Cost, sent free per post.
Military Musical Instrument Manufactory, 20, Charing Cross, London, S.W.

NOTICES TO CORRESPONDENTS.

A Victoria Rifleman is thanked for his correction, of which we should have been happy to avail ourselves, had it reached us in time to prevent a repetition of the inaccuracies copied from a contemporary.

A Lieutenant of a Militia regiment has no right, on retiring, "to wear the uniform, or assume the rank of Captain."

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the Editor.

It is particularly requested that applications for copies of the Army and Navy Gazette, &c., and advertisements be sent to the Publisher, Mr. Archibald Graham, and not to the Editor.

Army & Navy Gazette.

LONDON, SATURDAY, AUGUST 25, 1860.

Mr. Gladstone has fought a tough battle throughout this session. We are not about to add to the number of his assailants, as finance is not exactly our business; but we may be permitted to say—apart from the merits of his varied struggles with the Opposition benches, with nominal supporters below the gangway, and alleged tussles in the Cabinet—that we cannot help admiring the perfect mastery he has shown both of the art of self-defence and of attacking all comers offensively. We must say also that there has been great unfairness exhibited towards him by some of the umpires of the press. The Estimates have been excessively heavy, there is not a doubt; and the Chancellor of the Exchequer's business is to provide the ways and means. But he cannot very well have been both the most extravagant and stingy of Chancellors. The French treaty cannot be laid at his door exclusively. He had the misfortune to be obliged to carry out its financial requirements; and if he hesitated to add to his budget also what would be wanted for fortifications and for India, this at least shows that he felt a tenderness, for which he does not now get credit, as to breaking all at once to the country the whole story of our wretched financial condition. On the other hand, he gave early notice to the House of Commons that our enormously increasing expenditure requires some check; in consequence of which there has not been a vote of money asked for or proposed, but some liberal member of Parliament, or equally liberal public writer, has alleged that more might and should have been given for this or that, "had it not been for Gladstone."

Perhaps in none of Mr. Gladstone's brilliant oratorical displays this session—and as to the merits of his eloquence, at least, there is no question—did he pour forth such a concentrated fire, than in his twenty-line speech of Thursday last week. It was delivered against the inconsistent "advocates of retrenchment." At the beginning of the session a committee was appointed, on the motion of Mr. Wise, to consider the estimates for civil contingencies, in order to reduce them if possible. The result was, as usual—a Blue Book! At the end of the session, when these estimates are passing through the House almost at the rate of a vote per minute (and only a few thousands knocked off them through the vigilance of Sir James Graham), the chorus of inharmonious grumbling, with Mr. Williams as contralto, was suddenly rendered more discordant by Mr. Butt and Mr. Coningham calling out for an increase of salaries to the officials of the British Museum. Of course, after all the votes that have passed the House this session, even to double the salaries of the officers of the British Museum would add comparatively little to our aggregate expenditure. But it is all these littles that make up heavy totals. The proposal was like the last straw that breaks the back of the overloaded camel. Mr. Gladstone has had his shoulders heaped up like any dromedary's; but he could not stand this:—

"The Chancellor of the Exchequer complained that the advocates of retrenchment were now showing themselves favourable to large augmentations of expenditure for salaries. The clerk in a public office was hard at work during the day; the officers at the Museum had to a great extent only to give their attendance. At all events their labour was much less exhaustive than that of clerks. There was hardly an officer in the British Museum who was not now receiving a higher salary than that he had a right to expect at the period when he sought his engagement. The whole of these departments, however, required reform. They were worked with indecision, inefficiency, vacillation, costliness, extravagance, meanness; all the most conflicting vices were mixed up together. There was a total want of authority in the departments. Reference had been often made from departments to the House of Commons, thence to committees and commissions; years passed away, the public were disappointed, and the public money wasted. The whole matter was arriving at such a state that some revolutionary movemement would be necessary in order to put these various museums of art and science and interest in a proper state of efficiency."

It is manifest that all this fire was not expended merely upon "museums of art and science and interest." The parish-vestry system of attempting to govern a great nation and manage its affairs by means of irresponsible committees of the House of Commons and commissions must cease. What a picture Mr. Gladstone has drawn of the administrative system generally of England in the present day! "There is a total want of authority in the departments." Our readers will remember what the Duke of Somerset testified as to the Board of Admiralty making it the duty of the Surveyor of the Navy to visit the Dockyards, but leaving him without any authority to interfere. Sir James Graham's Committee on Army Organisation has unfolded a similar picture of "How not to do it" goes on in the War Department. "The whole of these departments require reform. They are worked with indecision, inefficiency, vacillation, costliness, extravagance, meanness: all the most conflicting vices mixed up together. Reference is made to the House of Commons, thence to committees and commissions; years pass away, the public are disappointed and the public money wasted." Perhaps our readers will recollect having read something very like this before in the Army and Navy Gazette. We are afraid, however, to follow Mr. Gladstone to his conclusion. What "revolutionary movement" he can mean we do not know. We hope he had not an eye to the House of Lords; for we verily believe that in the matter of ineffectual committees and commissions they are less guilty than the House of Commons.

But the remedy for this lamentable state of things is not a revolution—but responsibility. Ministers should be held responsible as a whole for their general measures. The open question system does not do as a rule. A squeezable Government must always be contemptible, even if the state of parties saves it from immediate dissolution. The Minister for War must be held responsible for failures in war matters, else why are all the departments placed under his control? The Board of Admiralty, or First Lord as its head, must be held responsible for the Naval

Digitized by Google

Administration in *all* that relates to the Navy. These two departments will this year spend nearly forty millions between them—more than half our whole enormous expenditure. *How will they do it?* "With indecision, inefficiency, vacillation, costliness, extravagance, meanness?" That will be their easiest course. They can follow precedent and routine;—obstruct improvement; discourage zeal and intelligence; bolster up the merest shams in persons and things;—and in nine cases out of ten they will be able to fall back upon some sub-authority, some opinion, some committee or commission, to justify, as they may call it, all they do or leave undone. But, as sure as England is England, this kind of thing in in matters of war, in matters of life and death; with a Napoleon on the throne of France, and the politics of Europe and of the East such as they are; with our very existence, probably, and the liberties of the world at stake,—this kind of thing, we say, cannot go on in England for another year, and the doers escape with impunity. We do not talk of impeachment. Our politicians are not so sincere. The very word has become one of our shams. But we do say, that if our expensive system of government fails, in the very least, to give us security in the coming struggle, for which we pretend to be preparing, Mr. Gladstone's "revolutionary movement" will speedily follow; not to raise up a Bright to snivel over us and make degrading terms with the enemy, but to give us rather another Cromwell to lead us in arms, and to re-establish a Government that will be worth the name.

A medical witness was once interrogated as to the effect upon a man's health of spending several hours up to his neck in water. He replied that it very much depended upon the previous habits of the patient; if he had been all his life accustomed to be so placed, it was impossible to say how long he might remain immersed without harm. From the representations received during the past week from the Curragh Camp, it would appear that the authorities are trying the question practically upon Her Majesty's Dragoons now quartered in that well-watered locality. It is not however just, humane, or economical, to have such a cavalry brigade as the Greys, and 3rd and 4th Light Dragoons, made a *corpus vile*, and we trust to hear soon that there is an end of the experiment. We can easily understand that, up to a certain point, the Government has not been so much to blame in the matter. The calendar has registered the months of June, July, and August; but the weather steadily declines to be influenced by any arrangement of the kind, and March and November have alternately usurped the place of the months composing the summer quarter. Every one of us has been day after day, and week after week, fondly but vainly expecting the summer which comes not, and we cannot blame the Government for picketing Dragoons in a manner which, in an ordinary season at this time of the year, would afford no room for complaint. However, we have now arrived at a period when it is idle to expect matters to mend for more than a brief period, and it is high time to stop these experiments upon the capability of human life to stand the most severe hardships. We trust that the next week will have witnessed a break-up of the Curragh Camp, so far as those regiments are concerned which cannot be hutted after the winter fashion, and that we shall have no further repetition of the painful details with which the columns of our contemporaries have been incumbered during the present week. If voluntary enlistment should continue to be the means of supplying our Army with recruits, we must not wantonly expose men to disease and death. Already perhaps we have suffered to some extent from the isolation to which the men are subject, who are left for so long a time in these military back-settlements, away from the enjoyments associated with quarters in England under the old system; and it may perhaps be worthy of the consideration of the authorities, whether we might not with advantage confine these monster encampments to the few summer months, during which only manœuvres on a large scale can with advantage be carried on.

A correspondent, a field-officer, sends us the following proposition of a very simple reform in the present system of officers purchasing Unattached Promotion, that is, a step of rank on half-pay, by the retirement of officers by colonisation. The case stands thus—"Major A. of the —— Regiment wishes to purchase an Unattached Lieut.-Colonelcy (that is, a Lieutenant-Colonelcy on half-pay). His only means of so doing, is by finding a lieut.-colonel who wishes to retire and colonise—a most tedious matter. When he has found one, the War Department allows the promotion to take place. In the same way a captain wishing to purchase an Unattached Majority, a lieutenant an Unattached Company, the simple solution to this "vexata questio" would be to allow half-pay officers to retire without the insuperable nuisances of colonising or waiting for an opportunity of being brought into a regiment to sell. In 1851 my proposition was followed in the case of Major Biddulph, late 1st Life-Guards, on his being appointed Manager to the Queen's Household. He was allowed to obtain a lieutenant-colonel to retire without colonisation, or without waiting to be brought in to sell (vide *Gazette*, October, I think, 1851). Colonel Toovey was the officer. I have never seen a case since. In carrying out my suggestion I should suggest this 'proviso,' that the purchasing officer should be older than the retiring officer, thus assisting the half-pay list, and I am sure it would clear the half-pay list of many young lives. In addition to this advantage to the half-pay list, the boon to half-pay officers would be very, very great to be thus allowed to retire quietly, without a trip over some ocean, or the tiresome delay of waiting for an opportunity of being brought into a regiment to sell. The original intention was to obtain officers as 'settlers' in our colonies; and the Colonial Office in those days, to encourage the then so desirable an object, granted land free to these officers; but now that our colonies are so prosperous, the Colonial Office have backed out of their part of the agreement, and make officers pay for the land, though at a lower rate. What I propose is simply this—'Major A., from the —— Regiment, to be Lieut.- Colonel vice B., who retires'—a simple way of settling a most tiresome regulation."

We would suggest to the Lords of the Admiralty the propriety of appointing to the Rhadamanthus, Dee, and other vessels of the class, which are continually at sea, a certain number of naval cadets, who would there learn more of their duties in one month than when boxed up in guard-ships for a year. We know that an antiquated prejudice prevails at the Admiralty against such a step being taken; but we hope that its days are numbered, for it must be admitted on all sides that to give our young officers every opportunity of acquiring not only the rudiments of their profession, but experience in its details as early as possible, is of great importance. We are aware that the charge of these young gentlemen would add to the responsibilities of the masters commanding; but we have too high an opinion of the feeling possessed by these officers to suppose that they would throw any difficulty in the way of giving a fair trial to an experiment, which in our opinion must result in great advantages to the lads themselves and to the Service generally.

Another iron-plated frigate, the Pallas, was successfully launched on Saturday last at Lorient. She is to mount 34 rifled guns, and her engines are to be 600 horse-power. France now has three of these formidable engines afloat. One of them, La Normandie, is fitting out at Cherbourg; the second, La Gloire, is now on her experimental cruize, and the Pallas is to be got ready with the utmost dispatch. The French have got the start of us, but we shall not suffer for the delay, as we shall be able to take advantage of all the improvements which have been made recently, not only in the manufacture of iron plates, but in the mode of placing them on the ships' sides.

The Lords of the Admiralty will, according to present arrangements, leave town by railway on Friday, the 31st inst., for Holyhead. The Osborne, their Lordships' yacht, Master-Commander Bower, has been ordered round from Portsmouth to meet them, and will be in attendance to convey them to Queenstown, should they decide upon visiting that port. The Osborne will afterwards proceed to Plymouth, their Lordships returning to London to hold a Board; which duty being performed, they will proceed to make their annual inspection of all the Dockyards.

We mentioned some weeks since that the military authorities were determined to put a stop to the system of officers exchanging for the purpose of selling out of a new regiment at a greater pecuniary advantage than they could do from their own corps. Like our monitions upon the subject of the high prices paid above regulation in the cavalry with which the Government will before long interfere in a way that will rudely shock those who still heedlessly pay large sums, we are afraid our remarks were disregarded. We find, however, that an instance has already occurrred to which it would be well for officers to pay attention. An officer recently exchanged into a corps from which he could retire more advantageously as regards the price of his commission than in the corps in which he had been serving. After the exchange he asked permission to retire, but was told if he did so he must retire from his old regiment. Accordingly the exchange is cancelled, the officer is put back to his old regiment, in which the step will probably go at the regulation value, no doubt much to the disgust of the officer in question, and to the caution of others, who will find a transaction of this kind anything but a "good thing."

It is very probable that Colonel Gordon will be succeeded as Deputy-Quartermaster-General at head-quarters by Colonel Percy Herbert, who, both in the field and in the elucidation of questions of Army Administration in Parliament, has shown himself eminently qualified for the office. We believe that, upon the expiration of Sir Richard Airey's term of service, a consolidation of the offices of Quartermaster-General and Deputy-Quartermaster-General is likely to take place—a commendable piece of administrative reform. There is no difficulty in the way of Colonel Percy Herbert's retention of his seat in Parliament as Quartermaster or Deputy-Quartermaster-General. But two or three years since Captain Laffan was, if we mistake not, on the head-quarters' staff while he was a member of the House of Commons. Although Colonel Herbert does not share in the political views of the present Government, doubtless his namesake, the Secretary of State for War, would be glad to have his assistance in administrative matters, respecting which the want of a more military element in the House has been made matter of official complaint.

We understand that on relinquishing the office of Deputy-Quartermaster-General, Colonel the Hon. A. Gordon will be appointed to the command of the troops at Colchester, vice Major-General R. B. Wood, who vacates it on promotion. The camp at Colchester is a camp of instruction for young officers and soldiers, and Colonel Gordon's fitness for the post may fairly be questioned, considering that his highest regimental experience has been acquired as captain of a company. If he must be "provided for," surely it would be better to place him in some office where he might be more appropriately employed than in teaching men that which he himself has yet to learn.

Colonel J. W. Armstrong, C.B., of the 4th Depôt Battalion, and formerly of the 49th Regiment, has been appointed to succeed Colonel Stewart Wood as Assistant-Adjutant-General of the Aldershot Division.

The offices of Assistant-Quartermaster-General at the Horse Guards, and Assistant-Quartermaster-General at Cork, are vacant; the former by Colonel O'Brien's appointment to the Ceylon command, and the latter by the lamented death of Colonel Pack.

Lieut.-Colonel Burnaby, of the Grenadier Guards, has been appointed British Military Commissioner at the head-quarters of the French Army in Syria.

It is probable that Lord Frederick Paulet, C.B., of the Coldstream Guards, will be the new Inspector of Militia, in succession to Major-General Douglas.

Lieut.-Colonel Kirby, 94th Regiment, has been appointed Military Secretary to Sir William Mansfield, Commander-in-Chief at Bombay.

Colonel Owen, C.B., now Deputy-Inspector-General of Fortifications, has been appointed Commanding Royal Engineer at Devonport, in succession to Major-General Wright, resigned on promotion.

Major-General Foster has been appointed Deputy-Inspector-General of Fortifications.

Colonel Chapman, C.B., has been appointed Deputy-Adjutant-General to the Royal Engineers at the Horse Guards, in succession to Colonel Gordon.

Colonel J. W. Gordon, C.B., will succeed Major-General Foster, as commanding Royal Engineer at Portsmouth.

Colonel Harness has been appointed Director of the Royal Engineer establishment at Chatham.

Major Eagar, Major Buchanan, and Major Yonge, all from Depôt Battalions, have been appointed Assistant-Inspectors of Volunteers. We believe that Major Eagar will be stationed at Swansea, Major Buchanan, at Liverpool, and Major Yonge, at Glasgow.

We have received several inquiries respecting the movements of the cavalry regiments from Aldershot. We believe that the final arrangements are not yet made respecting all the regiments. The 9th Lancers are to move from Exeter to the camp at Aldershot, and it is probable, though not certain, they will be replaced by the 10th Hussars. The 4th Dragoon Guards in all likelihood will go to Birmingham, succeeding the 11th Hussars gone to Manchester, and the three Lancer regiments, the 5th, 9th, and 16th, will remain at Aldershot.

The Himalaya was to have left Portsmouth to-day with drafts for various regiments in the Mediterranean, taking the 2nd battalion of the 2nd Royals from Corfu to Gibraltar, and the 1st battalion of the 25th Regiment from the latter garrison to Dublin. We believe however that a countermand to the order has been given, and it is now a matter of doubt if the moves in question will take place.

THE ACCIDENT AT DOVER.

(From the Daily News.)

The public will be disposed, so far as the evidence tendered enables it to form any opinion, to agree in the main with the verdict of the inquest upon the late fatal accident at Dover. The history of the gun by which it was caused was traced in the records of the Dockyards and Arsenals with great minuteness and accuracy. It was cast in the year 1805, and immediately placed in His Majesty's ship Edgar. After going through an amount of service which required that it should twice be searched for defects, it was transferred in 1812 to the Barham. It was put on board another man-of-war before it was again examined on shore, and in 1835 it was placed in the Asia and despatched on foreign service. In 1845 it was returned to Woolwich, and found to have been so much enlarged at the vent that reventing was necessary. After this had been done it was issued to Dover in 1853. Of the number of rounds which had been fired from it during this long period of service no information, however, could be given. Captain Noble, the assistant-inspector of artillery at Woolwich, could only conjecture that it could not have borne more than 600 rounds before it was ordered to be re-vented, as that operation became necessary when 500 rounds had been fired. But he stated that he observed small cracks near the vent which, to an experienced eye, indicated that the gun was going, and that these must have arisen since the gun was revented, else they would have been seen at the time. This evidence seems rather inconsistent with the theory that a gun ought to stand it least 1000 rounds without the slightest danger. But it is not improbable that both propositions are reconcileable by the fact of the great age of the gun. In the present state of our knowledge on the diminution of the cohesive force of metals under repeated blows, it is quite conceivable, though it has not yet been scientifically established, that mere lapse of time may aid the tendency to crystallisation which concussion develops, and to which the loss of strength is due. It may be that a gun which, when tolerably new, could safely bear its thousand rounds, may, if laid aside for long intervals, become dangerous at the eight hundredth round. As no peculiar flaw appeared in the gun at the place where it gave way, and as it was conclusively established that no carelessness in the matter of loading was attributable to the Volunteers by whom the gun was used, the jury were unquestionably right in drawing attention to the great age of the piece as at least one of the elements which might have contributed to the melancholy result.

But in a case in which the public interests are so closely involved it is certainly unfortunate that no better evidence was adduced than that from which the Dover jury were left to draw their conclusions. The obscurity of the cause of the accident is exactly the circumstance which makes an investigation most necessary. Till we know, or at least can form some tolerably fair guess, what was the circumstance which made this gun burst at Dover, neither our regular artillery nor our Volunteers can have any confidence that a similar mischance may not at any moment befall them. It was suggested by the various witnesses examined at Dover, that the cause lay in the hardness of the iron, in the number of rounds fired, or in the due recoil being prevented by the bad state of the platform. Any one of these suppositions may possibly furnish the true explanation. But the data upon which they rested were not clearly established, and the inferences were deduced by no higher authorities than an operative chemist and a practical engineer living at Dover, neither of whom had ever before seen a like accident. In such a case as this the country had a right to require that the highest knowledge and the largest experience it can furnish should be brought to bear on the inquiry. We are perilling our defence and the lives of our defenders in the use of weapons, of which one has just given way under circumstances which, for aught we know, may already have made hundreds of others equally unsafe. It might at least have been expected that if the true cause could not be discovered, it should have been searched for with more care than the science of a country town can be trusted to supply. We sincerely hope that the matter will not be suffered to rest where it is, and that Government will be compelled to institute an inquiry, at the hands of persons in whom confidence can be placed, into the sources of an accident which has given us so terrible a warning.

The practical conclusion of the Dover jury is, however, in any view one which is plainly correct. It appeared from Capt. Noble's evidence that inspection by an experienced eye would have detected indications that the gun, whatever might be the cause, was becoming unsound. That provision for such an inspection at frequent intervals should therefore be made, is obviously a very important means of greatly diminishing the chance of a similar misfortune again occurring. If anything has been thoroughly established by what has taken place it is that within a very short period, whether counted in lapse of time or in service done, after a gun has been pronounced sound, it may present indications of being unsound, and, if these are neglected, may burst. It may be that we shall be able to discover other circumstances which shall give us notice of impending danger. It is possible that we may find that a peculiar quality of iron is untrustworthy, and that this quality can be detected even in old guns. Science may demonstrate that after a certain number of years a gun made of the best iron becomes as surely dangerous as a railway girder is known to become from the lapse of time and exposure to use. It may be put beyond a doubt that after a definite number of rounds, whether fired at once or at long intervals, reliance can no longer be placed in a gun, and a more accurate mode of recording the number than by guessing from the state of the vent may be devised by the authorities. But in the meantime we have possession, on the authority of a government officer, of the fact that inspection would have discovered that this gun was going, at a very short time after inspection had warranted it as sound. We have, therefore, a right to demand that this one fruit of our sad experience shall not be thrown oway, and that means will be found for establishing at brief intervals an inspection which would have saved us this loss at Dover, and which may be the means of saving us from a loss for the future which at present no man can venture to calculate.

THE VOLUNTEER FORCE.

In the House of Lords this week the Earl of Malmesbury called attention to the expense and inconvenience of calling out detached corps of Volunteers in rural counties to a distance from their head-quarters for the purpose of inspection during times of peace. He took occasion to say that he thought everything which would tend to cool down the noble ardour which the Volunteer force had displayed or to discourage the movement, would be extremely to be regretted. It was, in his opinion, of the utmost consequence that the movement should not be a mere temporary or feverish effort, but that it should assume a solid and permanent character, reflecting, as it had hitherto done, the highest honour upon the country in the eyes of Europe. Now, it appeared to him that, in order that it should maintain that character, the exhibition of the greatest tact and judgment, not only on the part of the commanding officers of the various corps, but also on the part of the Government, was demanded—a tact and a judgment which his noble friend opposite (Earl De Grey and Ripon), to whose superintendence the movement had been more especially committed, had in an eminent degree displayed. It was supposed by some persons, and not unnaturally, that the various Volunteer corps were of a uniform character, but while that might be true of the metropolitan corps and those which were raised in larger and populous towns, which were composed for the most part of the sons and relations of our richest tradesmen, and of gentlemen possessing a certain amount of fortune, to whom the expenditure of time and money in devoting themselves to the Service were matters of comparatively little consequence, it was not the case with the detached corps in the rural districts, which were formed from among the sons of small tradesmen and farmers, to whom their time was invaluable, and the expenditure of anything over a certain amount of money a question of importance. In rural districts, where the population was not large enough to form any body of men beyond a company, each corps was several miles distant from another, and if it were attempted to bring them together and battalionise them at a central point—say the capital of the county—those who were most distant would be put to a considerable expense in marching to and from that central point. He had recently received a letter from the Lord-Lieutenant of his county, informing him that after some correspondence between the War Office and the Horse Guards, the authorities were of opinion that it would be a great advantage if the detached corps were brought together and inspected as battalions. No doubt if it could be done conveniently and without expense to the corps, that course would be most advantageous; but still it must be recollected that these companies had never met together, that they could not act in battalions, and that when inspected they would have to be inspected as so many separate companies. If it were meant that the corps should meet together several days before the inspection, so as to practice together in battalions, it would be impossible that the plan could be carried out without great expense and inconvenience to the men. For instance, it would cost every man of the company to which he belonged some 25*s.* or 30*s.* to march to Winchester and back — that was a considerable sum to tradesmen in a small country town, particularly after they had just gone to the expense of clothing and equipping themselves. He should be glad to hear whether the Secretary for War had the power of ordering these corps out in times of peace. His impression was that he had not, except in times of disturbance. He understood that the War Office had appointed a very competent staff of inspectors; they would fulfil all the purposes for which they were appointed by inspecting the various detailed corps at their own head-quarters. That was all that was required at the present moment.

Earl De Grey said the Government had no desire to compel these small rural bodies of Volunteers to take steps which, in many cases, would be extremely inconvenient and expensive; nor, if they had that desire, was it in their power to compel those corps in ordinary times to attend at a distance from their head-quarters. It was only in case of invasion, actual or impending, that this body became part of the regular military force, subject to martial law and treated as any other military body. The origin of the correspondence to which the noble earl had alluded was very simple. A considerable number of Volunteer Corps, not only in the metropolis and in large populous districts, but even in some parts of the rural districts, had expressed a great desire to be inspected, and some of them had intimated what a great satisfaction it would be if they could have the advantage which the corps in London and Edinburgh had enjoyed, that of being reviewed by Her Majesty. It was impossible, of course, with the demands on the Royal time, that all these requests could be complied with. The reviews which had already taken place, so far from checking the progress of the movement, had, on the contrary, been a great encouragement to it. They had been the means of bringing the corps together, and making them acquainted with each other, and they had brought prominently before the public eye the great progress which these corps had made. Under these circumstances, feeling that the assistant inspectors, though very efficient officers, were not of that rank which would enable them to review large bodies of Volunteers, he had written to the Commander-in-Chief, requesting him to take such steps as would enable commanders of districts to hold reviews of Volunteers: but it was distinctly laid down in the correspondence that there was no power by law to compel corps to attend. If there were corps which desired to come together to be inspected, opportunities were to be afforded them for the purpose, and commanding officers of districts were desired to inspect them. Since that arrangement there had been a large review in the county of Lancaster, and he was informed that Lord Derby intended to have a review at Knowsley on the 1st of September, which he had no doubt would be most successful. Certainly it would be a much more agreeable occupation than any other which gentlemen were likely to have this year on the 1st of September.

A Manual of Military Law, by Colonel Pipon and Mr. J. F. Collier of the Inner Temple, is about to be published by Messrs. Allen. It appears to comprehend almost every subject comprised under the title, and we have little doubt that it will prove useful and acceptable to the military profession.

A BIOGRAPHICAL SKETCH OF GARIBALDI'S EARLIER LIFE.

It may without exaggeration be asserted, that there is no man who at this moment attracts more universal attention, or is regarded with more general interest, than the illustrious dictator of Sicily. Amiability of character, the possession of high intellectual gifts, and great personal bravery, all combine to place Garibaldi in the most exalted position before the eyes of the whole world. It cannot be unprofitable under such circumstances to give a brief outline of that part of this victorious general's life which, being antecedent to his appearance in Italy in 1848, is less generally known. Joseph Garibaldi was born at Nice, July 4th, 1807. His father is variously described by biographers as descended from an ancient honourable family, and as being a fisherman. Either or both of these accounts may be true, and will harmonise with the fact that his earlier years were spent on the seashore, and in the companionship of seafaring people. It is said that even as a boy the future dictator gave promise of future greatness in the exhibition of ability, a high sense of justice and personal courage, a combination which, at that early age, enabled him to obtain considerable influence over his youthful playmates, and whether at school or at play he was always distinguished as the protector of the weak against the injuries or injustice of their stronger companions. As is the case with most boys of an active, stirring disposition, study did not present much attraction to the youthful hero, and mathematics are said to have been the object of his special aversion. Fortunately, minds as great as his are capable of much application at a later period of life, and by this means, during a season of inactivity in his subsequent career, he applied himself diligently to his neglected studies, so as to master them. A good knowledge of practical seamanship, however, before the period just alluded to, obtained for him the grade of an officer in a Sardinian ship, which, although confined to cruising on the Italian coasts, did not prevent his exhibiting both courage and ability sufficient to mark a consistency with the promise given by his boyhood.

In 1834 Garibaldi was at Genoa when "Young Italy" raised the banner of independence; but having been concerned in an abortive conspiracy, he was obliged to seek an asylum in France. He crossed the mountains which separated Genoa from Nice at night and on foot, and was, on his arrival in the latter city, concealed during two days in the house of his friend, M. Geaume, through whose kindness he was subsequently supplied with a peasant's dress, by means of which disguise he safely passed the Var and reached Marseilles, where he resided two years. Inactivity, however, soon became so irksome to him, that he embarked on board an Egyptian corvette, and went to serve as an officer in the navy of the Bey of Tunis. Being immediately placed in command of a small vessel, Garibaldi found it necessary to increase the labours of his crew, in order, if possible, to overcome their habitual indolence; and a mutiny resulting, he was forced to shoot the ringleader before order was finally and permanently restored. After a service of some months, failing to find field for his active spirit, he quitted the service of the Bey and sailed for South America. Rosas was seriously menacing the independence of the South American states at the time of *the young adventurer's* arrival; so that he at once determined to make an offer of his services to the Military Governor of Uruguay. This offer was accepted; and Garibaldi soon afterwards married at Rio Janeiro a beautiful Brazilian lady named Annita Leonata, who nobly shared his subsequent dangers, and whose melancholy death from fatigue and suffering after the siege of Rome will be still fresh in the recollection of many. At Montevideo, Garibaldi was received with enthusiasm, and appointed commander-in-chief of the squadron directed against Buenos Ayres. The contest lasted for two years, during which period, by prodigies of valour, he succeeded, although with a greatly inferior force, in keeping the enemy in a state of rout and confusion, in consequence of which the natives of the country were wont to exclaim, "that he was not a man, but a devil!" Superstition extended his fame; and the singular good fortune that for a considerable time protected his person from wounds obtained for him the reputation of being invulnerable.

Throughout all South America, the name of Garibaldi proved, as it did lately at Palermo, a terror to his enemies. Nor were his resources and intrepidity overrated, as will abundantly appear from the following incident recorded by M. Anatole de la Forge:—One day whilst Garibaldi was on board a little fishing smack with twelve men, he set about making a recognizance of the enemy's squadron. The fog, which had at the first protected his enterprise, suddenly cleared away, and left him in a manner surrounded by his enemies. Being closely pursued by an armed brig of six guns, he took refuge in a little bay, trusting that, as it was then evening, he would soon be protected by the darkness of the night. The brig closed the entrance of the bay, and was contented to await the arrival of the following morning before completing the capture. The bay into which the fugitives had retired was bounded on one side by a long, narrow promontary of about a quarter of a league in breadth, on the further side of which was the open sea. The only means of escape was by crossing this piece of land; but how then to proceed was a question the answer to which soon suggested itself to the fertile brain of Garibaldi, who with the aid of his twelve men transported the little vessel to the opposite side of the promontory. A common adventurer would have been satisfied with this, but not so our hero, who, after allowing his men a few moments' repose, proposed to them to take the brig by boarding whilst the darkness of the night still remained to favour their undertaking. Not a moment's hesitation ensued before this plan was put in execution, the audacity of which electrified the little crew and no less surprised the enemy, who were made prisoners almost without thought of resistance; whereupon Garibaldi, on board the vessel that was to have proved his captor, returned to his own squadron in triumph. Subsequently, at the head of a small body of troops, he attempted to surprise a strong detachment of Rosas' army, but was severely wounded at the commencement of the action, a misfortune which spread dismay amongst his followers; some devoted officers meanwhile hastily placed their wounded leader upon a horse, and holding him on the saddle, conveyed him without loss of time to Guateguay, in the province of Entre Rios. Here Garibaldi found himself under a most arbitrary and tyrannical

Digitized by Google

rule; resolving, in consequence, to make his escape his design was unfortunately made known to Leonardo Millan, the chief officer of police, who had him arrested, and condemned to two hours' suspension by the wrists upon the public piazza, where he was exposed to the insults of the populace. After which he was subjected to the imprisonment of eight months.

At length the day of his deliverance arrived, and he returned to Montevideo, where his reappearance was enthusiastically hailed. Soon after these events, and following the Anglo-French intervention, Garibaldi sustained an obstinate contest on the shores of the Uruguay, near Goyaz, when, worsted by the squadron of Admiral Brown, he had to give way before a force so much superior to his own; but yet succeeded in landing his crews, with the wounded and the dead, and then with his own hands burned his own vessels, to prevent them falling into the hands of the British Admiral.

Meanwhile, as there were at this time many Italian exiles in Montevideo, and an especially great proportion were refugees from Nice, Garibaldi, in a few days, collected a force of 630 men, of whom he formed the nucleus of the famous Italian legion that was soon to become so celebrated. At the head of this handful of men he gained several important actions. Amongst which may be mentioned Las Tres Cruces and La Bayada. One of the greatest of his victories was that achieved on the plains of St. Antonio, where, with four small companies, he fought for twelve hours, and in the end put to flight the forces of General Servando Gomez, consisting of 1200 men. At Salta he was, when only accompanied by 300 men, surrounded by a hostile force of three thousand. He stood the fire of the enemy without moving, until they had advanced close to the spot occupied by his apparently devoted band; and then, suddenly charging with the bayonet, he completely routed them. The Government of Montevideo, in consequence of this heroic act, decreed that "the Italian Legion had deserved well of the country, and was ever afterwards, and under all circumstances, to take the right of the country's troops." Grants of money and lands were offered, but the latter only were accepted by the followers of Garibaldi. He, however, declined both; so that his disinterestedness was as remarkable as his intrepidity was proverbial. The real state of matters was, that Garibaldi, from the formation of the Italian Legion, regarded his native land as their ultimate destination, and saw in the distance that Italy itself would furnish a field for their brilliant achievements, to the fulfilment of which purpose nothing could have been more favourable than the warlike training they were receiving in America. Still mindful, however, of his ultimate purpose, he at once offered his services to the Pope's Nuncio, Monsieur Bedini, at Rio Janeiro, as soon as that pontiff's liberal intentions had become generally known. The Nuncio received Garibaldi in a most complimentary manner; but, before any answer arrived from Rome, the revolution broke out in Lombardy, and with it commenced the war between Sardinia and Austria. Garibaldi in consequence quitted Montevideo on the 1st of April, 1848, and returned to his native country, to which point in one of the most eventful careers of modern times it was our purpose to conduct the reader. The Austrio-Sardinian war, and the brief but exciting history of Rome during the year 1848, are of too recent date to need detailed mention; whilst the still later invasion of Sicily bids fair to form by far the most interesting and important chapter in the history of a man who has seen more hard fighting than perhaps any other man living.

THE NAVAL DISCIPLINE BILL.

On Tuesday evening, in a Committee of the House of Commons on the Naval Discipline Bill, Lord Clarence Paget expressed his regret at the late period of the session in which the bill was brought forward, considering its very great importance. He congratulated himself and the House on the presence of Sir John Pakington, so that they might have the benefit of his advice and assistance. The noble lord, after stating the object with which the bill had been framed, proceeded to say that one of the greatest defects in the old Act was the difficulty which existed of forming courts-martial under it, for it was necessary in order to constitute one, that five ships should be in presence, consequently the public Service frequently suffered, as a fleet was sometimes detained when its presence was required elsewhere. Another defect was this, that supposing twenty line-of-battle ships were actually attached to one fleet, it was impossible to hold two courts-martial simultaneously, for as the law existed, one case could only be tried at a time, and a second offender would have to wait till the first was disposed of. It was now proposed to remedy this by reducing the required number of ships to three, and to extend the privilege of sitting on courts-martial to lieutenants. It had also been resolved to classify crimes. Lord Clarence, after referring to the cruel execution of Admiral Byng, said that they intended to deal with the class of offences before the enemy by dividing it into three categories. To treachery, death would be awarded, and no one would be bold enough to oppose this. For cowardice, it was proposed that the offender should suffer death, or be imprisoned and dismissed from Her Majesty's Service; and for neglect of duty, which may arise from remissness, carelessness, drunkenness which may incapacitate a man from discharging his duty, or for a variety of other causes, it was intended to inflict punishments of a less degree. An anomaly had existed in the former Articles of War which would now be abolished: a court-martial could inflict death, but it had no power to mitigate a sentence to penal servitude or imprisonment. The bill would remedy this. In alluding to flogging, Lord Clarence dwelt upon the unwillingness which officers exhibited to have recourse to this degrading mode of punishment, which was only retained in deference to the positive necessity which the Service, as at present constituted, demanded, for such means of maintaining discipline. He contended, notwithstanding the disturbances which had taken place in different ships, that the state of efficiency and discipline reigning in the fleet was perfectly marvellous, and great credit was therefore due to its officers. In referring to the courts of inquiry which would always precede the infliction of corporal punishment, he made the extraordinary announcement that it was intended that the decision of such courts should not be binding upon a captain, but that he might abide by it or not as he pleased. Lord Clarence made the admission that this was not strictly in accordance with the usage of courts of justice, but still contended for the construction of the clause with this strange reserve. He concluded his speech by favouring the House with the following flogging statistics. In 1856 there were in the Navy 55,000 men liable to corporal punishment; of these, 1397 were flogged, being in proportion of one in 39. In 1857 the proportion of those flogged was one man in 42; in 1858, it was one in 48; and in 1859, with 64,000 men liable to the lash, 957 were flogged, being in proportion to one in every 67. He said he was positive that the decrease would keep pace with the improved condition of the men, especially if the House would support the Government in its endeavours to train up a large number of boys, who, if entered at an early age, would become attached to the Service, and, in the majority of instances, turn out skilled and valuable seamen.

Sir John Pakington after, in a good-natured manner, having replied to some taunts of Lord Clarence Paget, bore testimony to the value of the bill, and to the tone with which the previous speaker had brought it before the notice of the House; he also expressed his conviction that a gallant admiral who had served under him when at the Admiralty (Sir Richard S. Dundas) must have given Government the benefit of his lengthened experience, for he had himself given that gallant officer directions to draw up an altered and revised scheme to be submitted to the Board for the amendment of our system of naval courts-martial, and he could therefore not be taunted with having made no attempt during the fifteen months he was in office to deal with the question. Sir John expressed his satisfaction that the present Admiralty had thought proper to grapple with so important a subject.

Mr. Williams expressed his regret that a measure involving matters of such grave consideration should be brought under notice of the House at so late a period of the session, and contended that the proposed courts of inquiry were useless, as there would be no protection afforded to the men when a captain was inclined towards the exercise of severity.

Sir Charles Napier said that twenty years ago he called the attention of a deaf House to the Articles of War. He was resolved to speak the truth, and he would therefore give a most distinct contradiction to the statement made by Lord Clarence, that the discipline of the Navy had very much improved. The information which he had received from various officers led him to a very different conclusion. At no time since the termination of the last war had there been so much drunkenness, irregularity, and insubordination. The vice of drunkenness had in his opinion increased very much. The amount of this which had gone on in the Edinburgh was perfectly abominable. He complimented the Admiralty for bringng forward the bill, and expressed his opinion that the discipline of the Navy would be much benefited by it. Sir Charles, assisted by Mr. Williams, made a struggle to abolish the punishment of death for cowardice. The former contended that it was unjust and contrary to religion to hang a seaman for cowardice. The House thought differently; it also differed from Sir Charles Napier when he was desirous of retaining the punishment of death for a person deserting his post, or sleeping upon his watch, &c. Sir Charles was likewise defeated in an attempt to punish absence without leave by penal servitude. Several propositions by different members were favourably received by Government; and among these was one which suggested that "In any case of corporal punishment not more than 48 lashes shall be inflicted."

Sir James Graham took part in the deliberations of the Committee, and expressed himself as deeply interested from the position he formerly held at the Admiralty in all that concerned the Navy; he gave his support to the Government measure, but at the same time he expressed his anxiety in reference to one or two points on which he looked for explanation from the professional members of the House, more especially Sir Charles Napier and Sir Michael Seymour.

These gallant officers having given utterance to their opinions on a few minor points which did not tend to any alteration in the bill, the whole of the clauses were agreed to, and the bill was ordered to be reported.

On Wednesday at the early sitting of the House the Report on the bill was brought up, and in reply to Mr. Henley, Sir George Lewis stated that the operation of warrants signed by officers authorising a search for supposed deserters would be limited to the case of persons who were under the Act, and that the words protecting persons from liability for damage to life and property in executing such warrants would be struck out; the power would not extend to breaking into a house, or using force, but only to apprehending seamen who had deserted and were found in the streets. Mr. Henley was satisfied, and the Report was agreed to.

On Thursday the bill was read a third time, and passed.

THE FATAL OCCURRENCE AT DOVER.

The coroner's inquiry into the circumstances attending the melancholy death of Lieutenant G. T. Thompson and Sergeant J. Monger, of the Dover Volunteer Artillery Corps, by the explosion of a gun at Archcliff Fort while the corps were engaged in ball practice, on the evening of Thursday, the 9th inst., was resumed at the New Sessions House on Tuesday morning.

The proceedings were regarded with an interest not at all inferior to that which was excited in the earlier stage of the occurrence; and this feeling there can be no doubt is shared in throughout the country, not only by Volunteer corps, but by the regular artillery force, who are not less interested in the points which the present investigation is calculated to determine.

Captain Wollaston, the captain commanding, and other officers of the Volunteer Artillery Corps, were in attendance, and Major Field was present on behalf of the Royal Artillery. Mr. E. Knocker, the town clerk, attended at the request of the Mayor on behalf of the town authorities.

Before the proceedings were commenced, the coroner read a letter from Colonel Stotherd, stating that Captain Noble, Inspector of Artillery, from Woolwich, would attend to give evidence, instead of Captain Hardy. The following witnesses were then called:—

John Gange examined—I was lately military storekeeper in the War Department, at Dover. Two guns were issued from my store on the 13th September last, but I cannot say whether that is one, as the Artillery had the arrangement of them. The age is sometimes placed on the trunnions of guns; but I cannot say whether it was so in the case of the gun which exploded. The initials "G. R." were upon it, and I have no doubt that this, and most of the 32-pounders at Dover, were cast in the reign of George III. I do not obtain any record of the age of a gun on receiving it into store. The gun in question had certainly been used before it was issued by me in September last, as it had been re-vented with an iron vent.

By the Foreman—I apprehend it was then "re-proved." No doubt it was fired a great many times before requiring re-venting; but as it was then re-proved it must have been perfectly sound. This gun was vented with iron, and marked "I. V." Guns are usually re-vented with copper, and then they are marked "C. V."

The Coroner—Do you consider the age of the gun deteriorated it?

Witness—No, I do not. There are thousands of guns in use cast at the same period as the gun in question.

By Mr. Knocker—I know nothing about the gun carriage. That was not given out of store by me. It is a teak carriage, and quite a new one. It was the new pattern, with elevation screw, which works with a lever. The carriage must have been very recently made.

Captain Andrew Noble, Assistant-Inspector of Artillery, and a captain in the Royal Artillery, said—I have been directed by the Commander-in-Chief to attend and inspect the battery at which this explosion took place. I have looked at the exploded gun. From the fact of the gun having burst in the way it did, the metal could not have been very suitable for a gun. I know the age of the gun exactly. It was cast by Walker and Co., and was proved at Woolwich on the 18th of May, 1805. The present mode of testing is by a double charge of powder and a service projectile, firing two rounds. Formerly, I believe, guns were put to a rather severer proof. I have ascertained the date of the gun from reference to the records. After the gun was proved, it was issued in the same year to Her Majesty's Navy, and placed in the ship Edgar. The gun was searched at Plymouth in 1808, when it still belonged to the Edgar. It was again searched and painted in 1809, at Porsmouth, and it still belonged to the Edgar. It was put on board the Barham at Chatham, in 1812. It served again in the Navy before it was put on shore. It was placed in Her Majesty's ship Asia, at Chatham, in 1835. That ship must have gone on foreign service. It was returned from Portsmouth to Woolwich in the month of September, 1845, and passed the examiners on the 8th of October, 1845. The vent was found 2·75—rather full, and the gun was sentenced to be re-vented. It was selected to be issued at Dover on the 21st of June, 1850, and reported to the principal military storekeeper for that purpose on the 26th of August, 1853.

The Coroner—Is there any time when a gun would be thought unfit for service?

The Witness—Oh, yes; but examination is the general test. A gun is not re-tested by gunpowder; examination alone is sufficient.

The Foreman—That examination, I suppose, is by surveying?

The Witness—We can always tell when a gun is in a dangerous state.

Examination resumed—Proper provision for recoil is always made in the construction of platforms. Stone platforms are considered best, because most durable. I do not consider the recoil of the gun is in any way connected with the explosion.

By the Foreman. The carriage used on this occasion was of the usual description for this kind of gun.

By the Jury—I consider the metal of this gun was not suitable, because, first, if it had been the gun would not have burst, considering the stage it is in; and, in the second place, the fracture is not such as usually takes place in a gun made of good metal. The bursting of all cast-iron guns is only a matter of time. Exposure to different climates would have no effect on the metal.

A Juror—Then, if a gun would burst sooner or later from necessity, how is it the charges are not registered?

Witness—From the condition of the vent of a gun, we can say very closely the number of rounds that has been fired from it; but both the Adjutant-General and the Inspector of Artillery have some time had under their consideration increased means of obtaining a more accurate register of the number of rounds each gun fires. It is my opinion that this gun has not fired many rounds. It has not fired 1000, I am certain. 500 rounds is the usual number a gun fires before being re-vented; but, as this was a hard iron gun, it might have fired 600. It has not fired more than 800 altogether.

By Mr. Knocker—There is great conflict of opinion as to the suitableness of hard or soft metal for guns. I do not find this gun perfectly sound. I find indications of its going. I observe small cracks near the vent which only an experienced eye would detect. We find that all guns go in the same way, and upon examination we can tell within a few rounds what a gun will bear. If the cracks I have spoken of had existed at the time the gun was examined at Woolwich they would have been detected. They must have arisen since. Examinations of ordnance vary very much with the requirements of the service. During war, guns will fire perhaps 2000 or 3000 rounds without being examined; but when put on board men-of-war they are always examined at the outports.

By the Jury—If this gun had been tested at Woolwich within six months I have no doubt this defect would have been discovered.

A Juror—You have said that guns are examined on being placed on board men-of-war: are guns so examined when placed in forts?

Witness—Guns placed in forts are very little fired from, and they are therefore examined as the officers in command think requisite.

By Mr. Knocker—No record is kept of the number of rounds fired from a particular gun, but the condition of a gun is an index to the number of rounds it has fired. Recently iron guns have been re-vented with copper, but the new vent of the gun in question was of iron. Gunpowder has much less effect on copper than on iron. The state of

Digitized by Google

the vent does not give a decisive indication of the number of rounds fired, but it indicates within limits sufficient for practical purposes. My opinion is that if the shot were very much removed from its seat by defective loading it would tend to cause a gun to burst; but a few inches I should think would make no difference. The cartridge could not have been pricked unless the charge was pretty well home. I think if it had been any great distance from the seat of the cartridge the ball would not have reached where it did, and the gun would have exploded at a different part. It would have exploded where the shot was, and not at the breech. If the cartridge had not been pretty well home, the fuse would not have fired it, and the gun would not have gone off; therefore, in my opinion, the charge must have been home.

James Pell, grocer, and a gunner in the Dover Volunteer Artillery Corps, examined—He was at No. 2 gun on the evening of the accident, and was No. 2 at the round of the explosion. He was certain the cartridge was rammed home. He saw the pricker checked.

Alexander Bottle, practical chemist, residing in Townwall Street, Dover, said he had examined the pieces of the gun, and believed from what he there observed, and from the evidence he had heard that morning, that the explosion of the gun arose from the absence of recoil. He differed from Captain Noble, that the recoil had nothing whatever to do with the gun bursting. The same amount of force equal to that expended in the propulsion of the ball is exercised on the bottom of the bore of the gun, which in fact produces the recoil, and if recoil does not take place that force would expend itself in bursting the gun or removing it from its carriage. He was led to infer that such was the case in this instance by the unusual circumstance of the gun being split at the trunnion, the part by which the gun would be held to the carriage, and the point at which the carriage was held by its sinking on the platform. He knew the platform, and three months ago it was in a very shaky condition.

By the Jury—He found no indication of flaw in examining the fragments of the gun. He attributed the explosion to the platform preventing recoil. Immediately he heard of the accident it occured to him that it arose from the defective platform.

John Thomas, an engineer and worker in metal, living in Dover—Had examined the wreck of the gun, and considered the metal of which it was composed of middle quality. He detected no signs of flaw.

This concluded the evidence, and the coroner summed up.

Before retiring one of the jurymen asked Captain Wollaston if any complaint had ever been made to him as to the condition of the platform from which the exploded gun was fired.

Captain Wollaston—I have received no complaints. I have observed from the first that these platforms have been very springy; but I do not consider that that was a cause for complaint. Of course the authorities would be left to exercise their proper discretion in renewing the platforms. But this platform could not have been rotten because it was elastic.

The juror—Then you do not consider it was unsafe?

Captain Wollaston—No. When the trucks of the guns went from one plank to another the planks they passed over would sink down; but they did not break. Had they been rotten they would not have sprung, but broken. The platform of one battery (No. 3) was bad, but that was not fired from.

The coroner having summed up, the jury retired for about an hour, and on their return into court the foreman handed in the following verdict:—"The jury are of opinion that the death of Lieutenant George Thompson and Sergeant John Monger was caused by the bursting of a gun at Archcliff Fort, on the evening of the 9th instant, while at ball practice, and that the said accident was accelerated by the long use of the gun, and from the metal not being of a quality suitable for the casting of guns for artillery practice. The jury are unanimously of opinion that a periodical inspection of all guns used in forts should take place."

We are glad to state that the sufferers by the accident are progressing favourably. The injuries to the young gentleman who has hitherto been described as Mr. Harris (but whose real name, as it appears, is Mr. Hoel Pattisson), and which at the time of the occurrence were thought to be extremely dangerous, are subsiding in the most satisfactory manner. Mr. Pattisson is a cousin of Captain Wollaston, with whom he was spending his vacation at the time of the shocking occurrence by which he had been so severe a sufferer.

It is not thought that any application will be made to the Government for assistance to the survivors. Such an application was not at all contemplated in the case of Lieutenant Thompson, but in that of Serjeant Monger it has been ascertained that some pecuniary aid would be of service to the widow and family. The Volunteer Artillery Corps, however, seem anxious to carry out the Volunteer principle in its integrity, and have resolved that whatever funds are raised for the purpose in question shall come from voluntary sources alone. A circular has therefore been issued by the captain commanding, and addressed to the different Volunteer corps in England, suggesting that in this and all future cases of a similar nature, should any such unfortunately occur, each Volunteer should contribute a sum not exceeding sixpence for the relief of the families of those whose lives may have fallen a sacrifice, and of those who may have received injuries while in the performance of their duty. In reply to this appeal a large number of letters have already been received, all heartily concurring with the suggestion; and it is believed that a sum sufficient for the purposes aimed at will in this manner be collected. Several subscriptions have also been received from the general public.

PARLIAMENTARY INTELLIGENCE.—Friday.

Nothing connected with the Services transpired in either branch of the legislature to-night. After a conversation on the subject of foreign affairs—in the course of which Mr. Kinglake referred to circumstances which would warrant the inference that recent events in Syria had been fomented by a continental potentate, and Lord Palmerston declared his opinion that the conduct of France and Sardinia relative to the cession of Savoy, had given just cause of dissatisfaction to the rest of Europe—the House of Commons was counted out at a quarter past 7 o'clock. The House of Lords, after transacting some routine business, adjourned at half-past 8 o'clock.

THE FRENCH AT CHERBOURG.

A letter from Cherbourg, printed in the *Times*, indicates (as we did in this journal some weeks since) that there is no warlike activity at Cherbourg, and no warlike preparations:—

"For two weeks past I have resided behind those stupendous fortifications which make Cherbourg alike the marvel of the empire and a wonder of the world. Daily perambulations over forts, piers, docks, and breakwater have familiarised me with the doings—military and otherwise—of this great naval station; and some of your readers may, perhaps, like to know the position in which things stand. To use the words of a Marine officer with whom I spoke the other day, 'we are surprisingly quiet in Cherbourg, Sir, but that doesn't show our weakness.' I have counted all the war ships in the docks. Of these, numbering in all 15, only one, the Arcole, is equipped and ready for active service, and while I write this vessel is cruising in the Rade, experimenting with some newly-invented machinery, preparatory to leaving the port. They say she is 'Partant pour la Syrie,' but my information on this point is not authentic. The Arcole, as you may be aware, is of second rank only, and carries 90 guns. The remaining naval forces here consist solely of second or lower rate vessels, and not one of these is armed, though it is said that two days' notice would suffice to place them all upon a war footing. We have in the arsenal arms and ammunition, rifled guns and conical ball included, sufficient to supply the entire navy of the empire. The armoury alone contains 30,000 stand of arms. At present we have few troops in Cherbourg. The infantry of the Line numbers about 1500, and the Marines upwards of 3000 men, but I need not say that, if occasion required, 50,000 men from the stations of the interior could with facility be collected in the town before to-morrow's sunset. The Marines, from what I have seen of them, are an inferior set of men, badly selected, and lacking both that activity and solidity which characterise our British tars. Even the inhabitants of the town are apt to indulge in contrasts unfavourable to the Marines when they see half-a-dozen English merchant sailors pass by. That great marine terror (as foreigners imagine), La Normandie, is, speaking temporarily, a good year from completion. She has not only to be coated with iron plates, but between her decks there is an immense amount of carpentering yet to do, and not one of her masts is fixed or ready for fixing. I cannot give an opinion as to her bearing in a heavy sea. This, of course, will depend upon the thickness of her plates, and the amount of ironwork in her interior; but I am assured by naval men here, who have given some attention to the capabilities of La Normandie, that she will be perfectly manageable in rough weather. They express doubts, too, as to the vessel ever being able to do much damage in battering, and some officers of the marine have informed me that there is no intention of fixing any steel blade or pointed horn to her prow. She will be armed with the new rifle cannon, and this circumstance, added to the fact that the plates are to render her ball-proof, will be quite sufficient to make her an ugly opponent. The Normandie exceeds only by a few yards the length of the Arcole, and her lines are extremely sharp and symmetrical. Altogether, she appears at the first glance not adaptable to rough service, but on close inspection the stranger cannot fail to be much impressed with the great strength and care with which every inch of her planks is knitted together. In the dockyards, access to which is only to be obtained by a written pass from the office of the Port-Admiral, or personal introduction by an officer of the marine, there is no perceptible activity. The great steam-hammers, rivalling in power those in the foundries of South Staffordshire, are mostly silent; and when I last visited the extensive workshops, only one was in operation. The only department where you find an appearance of pressing business is the plank-cutting hall, which, like all the port establishments, is constructed on a vast scale. But one vessel is on the slips, and the three other sheds, whose gigantic proportions and massive masonry strike the visitor with wonder, are totally deserted. There appeared to be somewhere about 1000 men working in the dockyard in the various departments; and, in passing, it may interest your readers to learn that upwards of 9500 men are receiving daily or monthly pay from the government in the dockyards, forts, and offices of Cherbourg. The *ouvriers* in the dockyard and arsenal commence work at half-past seven, a.m., dine on the spot at half-past twelve, and leave in the evening shortly before seven. The Digue, or breakwater, that magnificent and marvellous construction, reposes in silent majesty nearly two miles away from the shore. I visited it yesderday. As you approach, the long white line of granite, which at intervals is relieved by towering forts bristling with guns, its dimensions become most imposing, and while walking through the vaulted corridors of the largest fort, it is with difficulty that you can imagine you are on a breakwater situated in an angry sea, full sixty-five feet deep at low water. There were only about twenty men, including several officers, on guard, but there are spacious barracks within each of the four great ports, possessing accommodation for several hundreds of men. The walls of the Digue forts are of inconceivable thickness, and, indeed it is said by some old 'Cherbourgeois' who know the history of this work from the beginning, that it would have been well to have spent more time and care upon an artificial foundation upon which so stupendous a weight of stone was placed. I met an old Marine pensioner on the Digue, who showed me through the barracks; a veritable 'Pickwickian' in face and form. He showed me, with pride, the Napoleon Helena medal, with the great Emperor's 'last thoughts' written thereon, and said he had been kept prisoner at Plymouth in the last war. I remarked that English prison fare had not severely injured his health, and the sturdy old veteran replied that he had had good fare, and been better treated than he could have expected, but that the English gave him only rations 'for an ordinary man,' and it was of this that he complained. 'You will not make me prisoner again, monsieur,' he iocosely added, pointing to the fort in whose Herculean protection he stood. I may mention that there are very nearly 100 guns in position on the Digue; but counting the cannon of the forts, there are altogether more than 300 pieces. Of this number not one is rifled. The lengthening of the breakwater at the east end is in rapid progress, and also some extensive additions are being made to one of the forts on the west. *Apropos* of new undertakings at Cherbourg, another huge battery is being constructed on the west, midway between the Digue and Fort Querqueville; but the foundation, or artificial isle, is far from completion. I cannot say whether this will add to the impregnability of the station. My opinion is that Cherbourg, as a defensive port, is compact and formidable enough, and needs no further increase of strength. The Armstrong and Whitworth guns, whatever damage their long ranging shot might do to the shipping in the docks and the material in the arsenal, would assuredly be harmless against those Titanic works, the granite brows of which frown defiance from every point.

"This morning, in presence of the Port-Admiral and several military and naval officers, some experiments took place with the cannon on the breakwater, to test the accuracy and length of range, but I have not had an opportunity of ascertaining the results or the precise nature of the experiments. The thunder of the repeated discharges has perfectly astonished the natives, who, though accustomed daily to hear salutes from the military port, are at a loss to account for the 'noises loud and ruinous' which have boomed over Cherbourg all the morning from the seaward.

"In conclusion, I may state that there is positively nothing, or next to nothing, doing in this great stronghold. There are no war preparations; nothing but daily reviews of the troops in the redoubts, or reviews of the Marines in the grounds of the long naval *caserne*, which lies 'many a rood extending' behind the huge Napoleon dock. Neither is the talk here of war. Every evening I dine with a dozen jovial good-humoured officers, who are all ready to say a word in favour of England, French soldiers though they be; and the general theme of table conversation over their Bordeaux and nuts, is not as to when the fleet will receive orders to assemble in the Manche for a French campaign in Albion, but as to the excellency of the music played the yesternight in the Place d'Armes, in view of the forts and the great sea, for the amusement of the good citizens and their English or German guests."

THE INDIAN NAVY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

Bombay, 23rd July, 1860.

Sir,—With reference to the almost inevitable "amalgamation," I would beg to offer a few remarks on a small service generally but too little known in England to be appreciated, and that is, the "Indian," or more properly, the "Bombay Navy." The vessels composing that small but important Service are frequently employed in various parts of the Indian and China seas on warlike and political duty, and the officers commanding have from their long and unbroken experience invariably shown themselves to be second to none, either in ability, courage, education, or zeal. Why, then, I would wish to inquire, have they been so long passed over, and their little service remained year by year so underpaid and so badly managed? During the former China war a squadron of the vessels of the Indian Navy were placed under the orders of the gallant old Admiral Sir W. Parker, who throughout the expedition never tired of sounding the praises of Commanders Ormsby and Ethersey, and Lieutenant Harry Hewett, with others also I could name. A few years subsequent to this, a sloop-of-war belonging to the Indian Navy, under the command of a very talented officer (now, alas! no more) was sent to New Zealand to assist Her Majesty's ships in quelling the rebellion which had broken out, headed by the three celebrated chiefs, Houi, Heké, and Cowati. For the brilliant manner in which the gallant commander, James Young, his officers and seamen discharged their duty on this occasion, I would refer you to the Bombay Government letter, No. 552, of the 30th September, 1846, and Extract, paragraph 6, from a dispatch from the Honourable the Secret Committee, dated August 18, 1846.

In the late Burmah War a squadron of Indian naval vessels was dispatched from Bombay under the command of Commodore H. B. Lynch, I.N., C.B., to co-operate with the British naval force under Commodore Lambert, R.N., who had each a good word to say for the officers commanding and belonging to the Feroze, Moozuffer, Sessatris, and others. Still much more recently during the Persian War, in which happily not a single vessel belonging to the Royal Navy was engaged, how ably were the operations (both military and naval) carried out under the auspices of the gallant Outram and Commodore Young, C.B., respectively. From the very commencement to the cessation of hostilities, all would have been well had it not been for the absurd and disgusting piece of bombast at the taking of Bushire, where the Indian Naval Fleet was under the immediate command of Sir Henry Leeke, who, by the bye, as a reward for all his mismanagement, was created a K.C.B., and brought on the strength of the active list of admirals. Had I not been for this piece of "bombast," to call it by no harsher term, which caused the officers of the Indian Navy to blush with shame for the veracity of their chief when comparing the fire from a trumpery three or four-gun Persian battery to a small Malakoff, or something similar, all, all, I repeat, would have been well done.

The gallant manner, however, in which Commodore Young disposed of his ships and shelled Mohamrah, or Commanders Rennie and Selby dashed up the Aluvaz, and with their little combined force put to flight the whole Persian Army, plainly showed that Indian naval officers are well competent to hold the chief command in time of action. Why, then, in the name of all that's just and rational, should they not be granted relative rank with their brother naval officers in the Royal Service?

For the scientific or surveying qualifications of Indian naval officers I would refer you to the beautifully elaborate and correct charts of the Red Sea by Moresby, and to those compiled from the labours of Jones, Selby, Grieve, Constable, Taylor, Sweeny, and a host of other talented and devoted officers, some of whom have lost their lives while actually in the discharge of the above arduous duties. Are not such men in every respect fit to take rank with the officers of the Royal Navy? I need scarcely inform you, as you are doubtless already aware, how that every Indian naval lieutenant, commander, and captain ranks with, but junior to those of the respective grades in the Royal Service.

Some of the lieutenents of the Indian Navy are men of

Digitized by Google

two or three-and-twenty years' standing; how very absurd and unjust is it therefore that such officers should, when in service, be obliged to obey the orders of mere boys, who perhaps may have entered the Royal Navy at a time when the former had attained to their present rank? This is a point I would bring to your especial notice; another is, the paucity of officers in the Indian Navy, and also the very slow promotion. It is a common occurrence in this Service to find a vessel entitled to a captain, three lieutenants, master, &c., officered by a lieutenant-commanding, and three mates appointed as acting-lieutenants. In fact, at the present moment, scarcely a ship in the Service has her proper complement of officers; and, unless the Service is largely augmented (say by the addition of 4 captains, 8 commanders, and 32 lieutenants), even the present number of ships in commission cannot be efficiently officered. Owing to a report, still in circulation, that the Indian Navy is shortly to be abolished, and its officers pensioned, promotion has been at a dead stand ever since the government of this country fell into the hands of Her Majesty's Ministers. It is unnatural to suppose that officers will retire under ordinary circumstances, when perhaps by holding on a few months longer they may, at the breaking up of the Service, do so under more favourable terms. But is the Indian Navy to be abolished? Is it to be amalgamated with the Royal Navy? Or, is it to be largely augmented, and kept up as a local marine force? Either the former or the latter should be done, and that very speedily. Indian naval officers very naturally are somewhat discontented and annoyed at all this unnecessary delay and uncertainty with reference to their future prospects. To wait for the great question to be decided, "*In Re* Local Indian Army *versus* British Line and Horse-Guard Rules and Regulations," is simply absurd, as the "To be or not to be" of a local Indian naval force does not in the slightest degree bear on the former question, and could be settled between the Admiralty and Council for India in a very few days, if the gentlemen composing those honourable boards would only be good enough, "just for once," to interest themselves in this little overworked, underpaid naval service. Should the government of India be at all desirous of retaining the services of men accustomed to the climate, hard work, and an intimate acquaintance with the Indian seas, the best thing that they can do will be to make the Indan Navy what many years since it should have been, namely the Navy *par excellence*, of the Eastern hemisphere, and no longer remain as the Navy of Bombay, under the yoke of the Bengal Government, which knows nothing, and, if possible, cares still less for the Service, as Indian Naval vessels, until latterly rarely if ever visited the "City of Palaces." At present, the sum total of the expenses of the Indian Navy are debited to the Bombay Presidency; but, as that unfortunate "younger brother" is obliged to refer to Bengal for sanction to any improvement, suggestion, &c., entailing an extra outlay, the Indian Navy, as might be supposed, has fallen into a chronic crippled state. We have our old-fashioned tubs of 35 and 40 years of age, and if new vessels are recommended to be built, the reply from Bengal is, "Make the best you can of those you have!" Thus matters go on year after year, and it is high time it was put a stop to. If the Service is to be kept up it must be (as I would repeat over and over again) made the "Indian," and no longer remain the "Bombay Navy." The head-quarters should be Calcutta, at which place the Indian naval commander-in-chief should reside and occupy a seat in council. A commodore of the second class should be under him, and have the whole of the seas to the eastward of Cape Comorin under his careful and immediate surveillance.

Bombay should remain the Naval Port of India and a division of the Indian Navy under a first-class commodore there stationed, who should have the entire charge of the seas westward of Comorin, and eastward of the Cape of Good Hope. The vessels composing the Indian Navy should be divided into two branches—the fighting and the transport. For the former duty I would recommend two 50-gun screw frigates, one at Calcutta and one at Bombay, as sea-going flag-ships, and the remainder need not be larger than from 12 to 22-gun screw corvettes, with a few screw gun-boats for service on the rivers and creeks. None of these vessel's armaments should be of less calibre than from 8 to 10-inch. When, however, we receive our batch of Armstrongs, that now proposed may be modified.

The other branch of the service required, and above alluded to, is a class of good strong roomy, and in every way efficient auxiliary screw transports. They should be built so as to be made capable of mounting a few long range heavy guns in time of war, though while building it should be remembered that the duties required of them will be rather to run away than to fight. Let us have a goodly number of these stately ships as soon as possible. "But what in the world are we to do with them in the piping time of peace?" I imagine will be exclaimed by many. "Nous verrons." We should keep them actively employed carrying stores of every description, troops, &c., &c., between India and England, and in five years I will engage, provided the vessels have fair play and are properly worked, they will more than pay their expenses; and when war does break out, which there is every reason to fear will be long before the five years alluded to have expired, we shall then have a class of armed transports ready for any duty connected with India which may be required, and not be as at present entirely dependent on the merchant service for ships, and saddled with an enormous outlay for the hire of our transports connected with the China expedition.

There is one more point I will touch upon before closing, and that is, the whole system of the Service relating to pay and accounts must be thoroughly broken up or broken into. First, the secretaries to the governments of Bengal and Bombay in the marine departments must not, as at present, be military men; neither must it be the military auditor-general who is to audit and pass the naval cash and store accounts; nor yet is there any necessity for the military paymaster to have anything to do with the payment of the vessels, and the branches on shore connected with the service. All this will still remain wrong if this system is continued, as the jealousies and heart-burnings now existing will remain. The above appointments should be filled up by qualified naval men, and they will as easily be found, as if search were made from among the military. Should, however, my latter proposal be reckoned in some cases inexpedient, let the posts adverted to be held rather by uncovenanted civilians, and all connection between the Army and Navy of India in this respect be at once and for ever dissolved, as it has never yet been found to work well, and what is more, it never will.

"Spero Meliora si Fortuna Juvat."

Obituary.

We regret to announce the death of Colonel Arthur John Reynell-Pack, C.B., which took place on the 17th inst., at Cork, after a few hours' illness, at the early age of 43. The deceased officer served in the Eastern campaign from February, 1855, and was present at the siege of Sebastopol with the 7th Fusiliers, and was severely wounded when commanding that regiment at the assault of the Redan on the 18th of June, for which he received the medal and clasp, was created a C.B., Knight of the Legion of Honour, and 5th class of the Medjidie. His commissions bore date as follows:—Ensign, Aug. 9, 1833; Lieutenant, May 5, 1837; Captain, June 23, 1843; Major, June 20, 1854; Lieut.-Colonel, June 19, 1855; and Colonel, Aug. 16, 1858. He was the eldest son of the late Major-General Sir Denis Pack, K.C.B., and at the time of his death held the post of Assistant-Quartermaster-General of the South-Western District of Ireland.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

Aplin—August 17, at Grove House, Hammersith, the wife of Philip Aplin, Esq., late Captain 3rd (the Buffs) Regiment, of a son.

Bennett—August 18, at Keil House, Campbeltown, Cantyre, N.B., the wife of John Bennett, Esq., late of H.M.'s 21st and 80th Regiments, of a son.

Biddle—June 7, on board the troop-ship Seville, on her homeward passage from Calcutta, the wife of Assistant-Surgeon T. J. Biddle, 8th (the King's) Regiment, of a daughter.

Craven—August 18, at Beauchieff Abbey, Derbyshire, the residence of her mother, the wife of the Rev. C. A. Assheton Craven, Chaplain to the Forces, of a son.

Drake—August 12, at Malta, the wife of Captain Mervin Drake, Royal Engineers, of a son.

Forbes—August 17, at Inverernan, Strathdon, Aberdeenshire, the wife of Lieut.-Colonel Forbes, C.B., 3rd Bombay Cavalry, of a daughter.

Granard—August 21, at 4, Rutland Square, Dublin, the Countess of Granard, of a daughter.

Gregory—August 15, at The Mount Hanbury, Worcestershire, the wife of Lieutenant William Filmer Gregory, R.N., of a daughter.

Harvey—August 22, at 2, Windsor Terrace, Plymouth, the wife of Frederic Harvey, Esq., Surgeon R.N., H.M.S. Hero, of a daughter.

Kippen—August 19, at 11, Napier Street, Stoke, Devonport, the wife of Horatio N. Kippen, Esq., Captain 2nd Battalion 12th Regiment, of a son.

Odell—August 17, at No. 10, Manchester Terrace, Liverpool Road, Islington, the wife of the late Brevet-Captain W. Odell, of a daughter.

Pollexfen—August 16, at the residence of H. W. Hall, Esq., H.M.'s Dockyard, Portsmouth, the widow of the late John James Pollexfen, Esq., of the 15th Native Regiment, Bombay Army, of a son.

Sangster—July 11, at Indore, Central India, the wife of Thomas Henry Sangster, Esq., H.M.'s 4th Bombay Rifles, of a daughter.

Urquhart—August 21, at Camberwell, the wife of Captain Urquhart, Bengal Artillery, of a daughter.

Ward—August 20, at Devonshire Street, Portland Place, the wife of Captain James Ward, of a son.

Wyatt—August 20, at Woolwich, the wife of Major J. H. Wyatt, Military Train, of a daughter.

MARRIAGES.

Crutchley—Bellew—June 9, at Abbotabad, East Indies, Robert Logan Crutchley, Esq., Captain H.M.'s 24th Foot, and in temporary command of the 4th Sikh Regiment, to Emily, fourth daughter of Captain F. J. Bellew, Retired List H.M.'s 30th, and grand-daughter of the late Robert Bellew, Esq., Castle Martyr, Ireland.

Dawn—Blane—August 16, at St. Mary's Church, Bathwick, Bath, by the Rev. John Abbiss, W. J. McGrigor Dawn, Esq., late 1st Royal Dragoons, to Cecilia Elizabeth, second daughter of the late Archibald William Blane, Esq., formerly Deputy-Governor of the Australian Agricultural Company, member of Council and Collector of Customs in the Island of Mauritius.

Gilling—Gilbert—August 23, at St. Mary's, Bathwick, Bath, by the Rev. George Robert Gilling, brother of the bridegroom, J. Gilling Gilling, Esq., M.A., Wadham College, Oxford, and of H.M.'s 22nd Regiment, to Fanny Jane, second daughter of the late Thomas Gilbert, Esq., of Cotton Hall, Staffordshire.

MacDonell—Wilmington—June 2, at Victoria, Vancouver's Island, by the Rev. Dr. Evans, Ranald J. MacDonell, Esq., late H.M.'s 28th Regiment, to Sarah Mary Shorland, eldest daughter of William Wilmington, Esq., late of Yeovil, Somersetshire.

M'Corquodale—Begbie—August 18, at St. Paul's, Edinburgh, by the Rev. Leonard Shafto Orde, Alexander M'Corquodale, Esq., to Eleanor Stirling Begbie, eldest daughter of Colonel Thomas Stirling Begbie, late 24th Regiment of Foot.

Pearson—Furness—August 14, at St. Andrew's Church, Rugby, by the Rev. Assheton Pownall, rector of South Kilworth, Leicestershire, assisted by the Rev. W. Ridding, rector of Meriden, Wm. Pearson, Esq., Lieutenant 45th Regiment, eldest son of the late W. Pearson, Esq., of South Kilworth, Leicestershire, to Mary St. Clair, youngest daughter of the late Rev. J. Robson Furness, vicar of Dinnington, Northumberland.

Quill—Howe—July 31, at St. John's, Newfoundland, by the Right Rev. Dr. Mullock, Roman Catholic Bishop, assisted by the Right Rev. Dr. Dalton, Roman Catholic Bishop of Harbor Grace, Arthur S. Quill, Esq., Royal Newfoundland Companies, to Mary Josephine Howe, niece of the Hon. L. O'Brien, President of Her Majesty's Council of St. John's.

Spurgeon—Burgoyne—August 22, at New Park Street Chapel, by the Rev. C. H. Spurgeon, the Rev. James Archer Spurgeon, minister of Portland Chapel, Southampton, to Emily Georgina, youngest daughter of General Sir John F. Burgoyne, Bart.

DEATHS.

Carter—May 27, at the General Hospital, Calcutta, seventeen days after his arrival, Robert Carter, Assistant-Surgeon, Bengal Establishment, only son of Rich. D. Carter, Esq., county Leitrim.

Colomb—August 14, at H.M.'s Dockyard, Devonport, Philip George Fanshawe, aged 10 months, the beloved son of Lieutenant P. H. Colomb, R.N.

Fuge—August 13, at 3, Alma Place, near Plymouth, Commander Edward P. Fuge, R.N., aged 43.

Jekyll—August 20, while on a visit to his cousins, the Misses Leir, of Weston, near Bath, Joseph Henry Storie Jekyll, Esq., of York Terrace, Regent's Park, London, the youngest child of the late Captain Jekyll, R.N., of Roundhill, Somerset.

Johnson—August 2, at St. Mary's Terrace, Walworth, George Johnson, Esq., of the War Office, Pall Mall, aged 54.

Kennedy—August 15, at Apedale Hall, Staffordshire, Anna Maria Kennedy, daughter of the late Hugh Alexander Kennedy, M.D., and sister of the late Sir Robert Hugh Kennedy, Commissary-General-in-Chief under the Duke of Wellington in the Peninsula.

Knox—August 12, at his residence, South Street, Greenwich, of consumption, the Rev. John Henry Knox, curate of St. Gabriel's and St. Margaret Pattons, Rood Lane, Fenchurch Street, City, and Chaplain to the Honourable Artillery Company, City Road, London, aged 33.

Morrison—August 16, at Claremont Terrace, St. Helier's, Jersey, Vice-Admiral Isaac Hawkins Morrison.

Pack—August 17, at Cork, aged 43, after a few hours' illness, Colonel Arthur John Reynell-Pack, C.B., the eldest son of the late Major-General Sir Denis Pack, K.C.B., and Assistant-Quartermaster-General of the South-Western District, Ireland.

CONTRACTS FOR SALT BEEF AND SALT PORK.

Department of the Comptroller for Victualling,
Somerset House, 18th August, 1860.

THE COMMISSIONERS for executing the office of Lord High Admiral of the United Kingdom of Great Britain and Ireland, do hereby give Notice, that on THURSDAY, the 27th SEPTEMBER next, at half-past One o'clock, they will be ready to treat with such persons as may be willing to contract for supplying and delivering into her Majesty's Victualling Stores at the undermentioned Ports, the following quantities of SALT MEAT, all of the cure of the present season, viz.:—

	Navy Beef.		Navy Pork.	
	Tierces.	Barrels.	Tierces.	Barrels.
Deptford...	2,500	2,300	10,000	10,500
Gosport	1,000	1,000	2,500	2,500
Plymouth	1,000	1,000	2,500	2,500
Haulbowline	1,500	1,500	3,000	3,000

When to be delivered.—The Beef and Pork to be delivered into the respective stores as follows—viz., one-third of each quantity for each place by the 31st day of January, 1861; another third thereof by the 20th day of March, 1861; and the remainder thereof by the 15th day of May, 1861; or any greater portion, or the whole, at any earlier period, if preferred by the party tendering, and to be paid for by bills at seven days after date, which will be sent to parties as usual.

Their Lordships reserve to themselves the power, when the Tenders are opened, of contracting either for the whole, or for such part thereof only as they may deem fit, or for a greater quantity, or of not contracting for any, and also an unlimited power of selection.

A separate Tender must be given for the Beef, and a separate Tender for Pork, and every Tender must specify where the meat is intended to be cured.

Tenders for Pork of the cure of the United States of America will not be admitted.

Persons tendering for more than one port must give a separate Tender for each port.

Parties tendering are desired to take special notice that the use of wooden hoops is abolished, and that iron hoops only will be required for the casks in accordance with the conditions of the contract.

A Form of the Tender may be obtained, and the conditions of the contracts, to which particular attention is called, may be seen at this office, at the Victualling Yards at Gosport and Plymouth, or by applying to the Agent Victualler at Haulbowline; or to the Collectors of her Majesty's Customs at Bristol, Limerick, Belfast, Waterford, and Newry; or to the Secretary to the Postmaster-General at Dublin; or to the Commander conducting the Packet Service at Liverpool; or to the resident Agent for Transports at Leith.

No Tender will be admitted for a less quantity than 100 tierces, or 100 barrels.

No Tender will be received after half-past one o'clock on the day of treaty; nor any noticed unless made on the printed form provided for the purpose; but it will not be necessary that the party tendering, or an agent appointed by him, should attend at this office, as the result of the offer received from each person will be communicated to him and his proposed sureties in writing.

Every Tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner of the envelope the words, "Tender for Salt Meat," and "Comptroller for Victualling," and must also be delivered at Somerset House.

THE ROYAL INSURANCE COMPANY,
29, Lombard Street, London, E.C., and Royal Insurance Buildings, Liverpool.
Chairman in Liverpool.—CHARLES TURNER, Esq.
Chairman of London Board.—SAMUEL BAKER, Esq.

At the Annual Meeting of the 10th inst., the following highly satisfactory results were shown:—

FIRE DEPARTMENT.

Notwithstanding the large accessions of business made annually through a long series of years, which obviously increase the difficulty of further advances, yet the Fire Premiums of the year 1859 rise above those of the preceding year by a larger sum than has been obtained by the increase of any single year since the formation of the Company, excepting the year 1853—disclosing an advance of 50 per cent. in three years. To this circumstance must be attributed the gratifying announcement that the accounts for the year show a profit of 42,488l. 3s. 4d.

The following figures exhibit the progress of the whole fire branch running over the last ten years:—

	Total Premuim received.	Increase of the Year above each preceding one.
1850	£44,027 10 0	£9557 19 8
1851	52,673 5 11	8645 15 11
1852	76,925 4 2	24,251 18 3
1853	112,564 4 4	35,639 0 2
1854	128,459 11 4	15,895 7 0
1855	130,060 11 11	1601 0 7
1856	151,733 9 6	21,672 17 7
1857	175,049 4 8	23,315 15 2
1858	196,148 2 6	21,098 17 10
1859	228,314 7 3	32,166 4 9

Placing the Company among the very largest offices in the kingdom. Indeed, it is believed that there are now only three offices in existence which equal it in fire revenue.

LIFE BUSINESS.

The Directors desire to call the especial attention of the Proprietors to the statements of the Life Branch of the establishment.

The Actuary's Report on this subject is accompanied by an appendix containing the fullest particulars of the investigation made, and is illustrated by two coloured diagrams, which make plain to the unprofessional eye the mortality experienced by the Royal, as indicated by curved lines, which contrast most favourably with the former averages of mortality, also displayed on the diagrams.

It is expected that these elucidations will attract a deep and profitable attention to the subject of Life Assurance in the minds of tens of thousands who have hitherto given no heed to its principles and advantages, and it is evident that this Company, as well as others, will not fail to reap much of the favourable consequences to be anticipated.

The bonus apportioned to the asssured, with participation, amounts to 2l. per cent. per annum, to be added to the original sum assured of every Participating Policy effected previously to the 1st of January, 1858, for each entire year that it had been in existence since the last appropriation of bonus thereon, and is one of the largest Bonuses ever declared.

PERCY M. DOVE, Manager and Actuary.
JOHN B. JOHNSTON, Secretary to London Board.

NOTICE OF REMOVAL FROM 3, OLD BROAD STREET, TO 64, CORNHILL, E.C.

THE RAILWAY PASSENGERS ASSURANCE COMPANY insures against all Accidents, whether Railway or otherwise. An Annual Payment of £3 secures £1000 at death from Accident, or £6 weekly from Injury. One Person in every Twelve insured is injured yearly by accident. No Extra Premium for Volunteers. For further information apply to the Provincial Agents, the Railway Stations, or to the Head Office. This Company, without union with any other, has paid for compensation £65,000.

W. J. VIAN, Secretary.

Railway Passengers Assurance Company,
Office, 64, Cornhill, E.C., August 25, 1860.

TO VOLUNTEERS.—The late melancholy accident at Dover has induced the suggestion of a Fund to meet similar casualties. It is, however, evident that no provision can be so complete, or cover so many various risks, as that offered by Life Assurance.

The Directors of THE PROVIDENT CLERKS' ASSOCIATION call attention to the fact that this Office was the first to offer the advantages of Assurance to Volunteers, free of all extra charge, whether employed on military service or not, within the United Kingdom. W. T. LINFORD, Secretary.

Chief Office, 15, Moorgate Street, London, E.C.,
August 17th, 1860.

THE MIDDLESEX HOSPITAL MEDICAL COLLEGE.—The INTRODUCTORY LECTURE will be delivered by Dr. CHARLES COOTE, late Fellow of Pembroke College, Oxford, at Eight o'Clock on Monday Evening, October 1.

French Brandy as imported, 50s., 55s.

The Company's own Port and Sherry, 24s., highly recommended.

EAU-DE-VIE.—This Pure PALE BRANDY, though only 18s. per gallon, is demonstrated, upon analysis, to be peculiarly free from acidity, and very superior to recent importations of veritable Cognac. In French bottles, 38s. per doz.; or securely packed in a case for the country, 30s.—HENRY BARRY & Co., Old Furnival's Distillery, Holborn, E.C. To be obtained only at their Distillery.

KINAHAN'S L. L. WHISKY *v.* COGNAC BRANDY, advanced only 1s. per gallon at present.—This celebrated OLD IRISH WHISKY rivals the finest French Brandy. It is pure, mild, mellow, delicious, and very wholesome. Sold in bottles, 3s. 8d. each, at most of the respectable retail houses in London, or wholesale, at 8, GREAT WINDMILL STREET, HAYMARKET, W.—Observe the red seal, pink label, and cork branded, "Kinahan's L. L. Whisky."

ALLSOPP'S PALE ALE, in Bottle, recommended by Baron Liebig and all the Faculty, may now be had in the Finest Condition of Messrs. HARRINGTON PARKER, & CO., who have REDUCED the Price of this highly esteemed beverage to
4s. 6d. per dozen Imperial Pints.
2s. 9d. ditto Imperial Half-pints.
Address, HARRINGTON PARKER, & Co., 5½, Pall Mall, London, S.W.

TO PRESIDENTS OF MILITARY MESSES.

BAVARIAN TONIC BEER.—This highly popular Tonic Beer is now in its highest perfection; it is pure and refreshing, and is patronised by most of the leading members of the medical profession. Price, for cash, 4s. per dozen quarts, delivered to all parts of London free. Best Devonshire Cider, quarts 2s., pints 4s. Hereford Rough, quarts 3s., pints 4s. 6d.
C. SPIKINS & Co., Sole Agents for London, 9, Duke Street, Portland Place, W.

CYDER AND PERRY IN THE GREATEST PERFECTION.—Devonshire Cyder, 3s. qrts., 4s. 6d. pts.; Cockagee Somerset Cyder, 14s. qrts.; Old Field Perry, 18s. qrts., 10s. pts.; the real Taynton Squash Perry, 25s. qrts., 15s. pts. Hampers and bottles, 3s. per dozen extra, or can be returned at BENJAMIN VICKERS'S Stores, Hay's Lane, Tooley Street, S.E., and 8, Spring Terrace, Wandsworth Road, S.—Post Office Orders, 196, Tooley Street, S.E.

NOTICE.—"BEWARE OF IMITATIONS."

LEA & PERRINS' "WORCESTERSHIRE SAUCE" is pronounced by Connoisseurs to be a most agreeable addition to every variety of dish.
*** See the names of LEA & PERRINS upon every Label, Bottle, and Stopper.
Sold by Messrs. CROSSE & BLACKWELL, London; and by Dealers in Sauces generally.
Sole Manufacturers—LEA & PERRINS, Worcester.

SOYER'S SULTANA SAUCE, RELISH, SUCCULANTE, AROMATIC MUSTARD, &c.—These excellent Preparations, of which the *Lancet* in its sanitary analisation of Articles of Food reported so favourably of their Purity and Wholesomeness, are to be obtained of all Grocers and Italian Warehousemen in the United Kingdom. They are indispensable with Fish, Meat, Game, Poultry, Hashes, Stews, and all made dishes; impart also to Chops, Steaks, and Cutlets a most delicious flavour. Wholesale, CROSSE & BLACKWELL, Purveyors to the Queen, 21, Soho Square, London, W.

THE HABANA CIGAR COMPANY (Limited).

DIRECTORS.
Rear-Admiral Sir WILLIAM DICKSON, Bart., Chairman.
The Right Hon. Lord Garvagh. | Col. T. C. Hamnill.
Rear-Admiral Duntze. | Alfred Hanson, Esq.
Louis SILBERBERG, Manager and Honorary Director.

The above Company invite public attention to their stock of real imported Habana Cigars, being the largest and choicest in Europe; also to their celebrated cut Tobaccos, and their newly-patented Pipe Cigars. Offices and Warehouse, 49, Pall Mall, St. James's, London, S.W.

RE-OPENING OF THE NATIONAL ASSEMBLY ROOMS, HIGH HOLBORN.—The Proprietor begs to announce the completion of the alterations, decorations, &c., of the above popular and splendidly appointed BALL-ROOM, which, during the recess, has undergone a complete renovation; it is embellished in the most elaborate and elegant manner, including a new and beautifully painted ceiling, is also furnished in a novel and costly style, and is now RE-OPENED for the SEASON. The justly celebrated Band, conducted by Mr. W. M. Packer, will perform a new selection from Wallace's "Maritana," Jullien's last Waltz, &c. Doors open at eight o'clock, and close at twelve punctually. Admission, One Shilling.

RIFLE REGULATION GLOVE.—W. TENT begs to inform those Gentlemen who have joined the different Corps, that he has had made for them expressly the BLACK BUCK REGULATION GLOVE that is being worn by the 7th Surrey and other Corps. To be had only of W. TENT, Shirt Maker, &c., 4, Birchin Lane, Cornhill, E.C. N.B. The Dress of the 7th Surrey to be seen on application.

RIFLE VOLUNTEERS AND THE PUBLIC.—The E. I. O. WATERPROOF will make Boots pleasurably soft for Summer wear, healthily impervious to wet, and improve the polish. Price 6*d*., 1*s*., and 1*s*. 6*d*. E. I. O. Royal Crimean Waterproof Company, 124, Aldersgate Street, E.C.

RIFLE CORPS CAPES AND KNEE PADS.—WARNE'S PATENT TUBULAR INDIA-RUBBER CUSHIONED KNEELING PADS, non-absorbent of moisture; also, the new make WATERPROOF RIFLE CAPES, permitting perfect ventilation and entirely free use of arms. Mineralised India-rubber Waterproof Sword and Bayonet Covers, Patent Tubular India-rubber Mattrasses for Voyagers, for the East Indies, and for Camping out. Wholesale of W. WARNE & Co., India-rubber Manufacturers, 9, Gresham Street West, E.C.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, HILL & MILLARD, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

WOOLF & SON'S PORTABLE FURNITURE.—ALLEN'S PATENT NEW PORTABLE BEDSTEAD, the greatest improvement ever effected in strength and lightness, invaluable for either barracks or campaigning, and approved of by the highest military authorities. Particulars and price forwarded post free; also their Illustrated Priced Catalogue of Portable Furniture of the newest description, Desk, Dressing Cases, &c. Estimates for Uniform of any branch of Her Majesty's Service, post free from Messrs. WOOLF & SON, Army Contractors and Portable Furniture Manufacturers, 59, Piccadilly, W., opposite St. James's Street, and 45, Old Bond Street, W., one door from Piccadilly.

THE INCOMPARABLE BEDS, FOR AIR OR HOT OR COLD WATER (AYCKBOURN'S PATENT).—These Beds may be filled with air or hot or cold water, they require no tossing about (or making as it is termed), are easily washed, are light and portable, may be packed in a carpet bag, and therefore invaluable to EMIGRANTS, YACHTSMEN, NAVAL AND MILITARY OFFICERS AND TRAVELLERS. They form in an instant Six or more Swimming Belts, and will stand any climate. No Emigrant should leave his country without one or more of these Beds.

Beds, 6 feet long by 3 feet wide, price 3*l*., and 7*s*. 6*d*. extra for every 6 inches additional width. Pillows, 20*s*. Inflating Apparatus, 2*s*. 6*d*. Will be forwarded on receipt of Money Order by BENJAMIN GEORGE, corner of Ware Street, near the Canal Bridge, Kingsland Road, N.E.

OFFICERS IN THE ARMY will find the best assortment of PORTABLE MILITARY FURNITURE, and Articles for Barrack and Camp Service generally, at HILL & MILLARD'S Portable Military Furniture and Outfitting Warehouse, 7, Duncannon Street, Trafalgar Square, W.C. Illustrated catalogues on application. Manufacturers and Patentees of the Army Chair, Square-mouth Travelling Bag, Despatch Box, Writing & Dressing Case, &c., &c.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that one, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to seventeen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured to Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary defining power. Sliding case, 3½ guineas. Sent free on receipt of post office order to W. & J. BURROW, Great Malvern, Worcestershire.

CABIN FILTERS.—The Last Improvement.—Dr. Ward says "I would strongly recommend any family going a distant voyage to take one of SCOMBE'S SELF CLEANSING CHARCOAL CABIN FILTERS; it will be found invaluable." The Patent Filters can only be obtained of LIPSCOMBE & Co., Temple Bar, W.C.

EDWIN KESTERTON, COACHBUILDER, 93 and 94, LONG ACRE, LONDON, W.C. Inventor and Builder of the AMEMPTON, and the AMPTON SOCIABLE, each forming a complete and close carriage, well adapted for the colonies, being roomy, light, and airy. Sociable Driving Phaeton, forming the light driving Phaeton and the Waggonette. Patent two-wheeled Dog Cart, strong, and giving entire freedom from the rein of the horse. E. K. invites inspection of the same, also to his light Sociable Landaus, Broughams of various sizes, Cabriolet and Park Phaetons, &c., &c.

DAVIESON'S EVERLASTING TEETH.

THE LATEST DISCOVERY.

MR. EDWARD DAVIESON, SURGEON-DENTIST, has introduced a material for the construction of ARTIFICIAL TEETH so extraordinary that nature appears to have made good the ravages of TIME, DISEASE, or ACCIDENT, and when fitted detection is impossible, even though the wearer's mouth be closely examined. The price is so moderate that it is within the reach of all, and it is fitted without springs or other unsightly fastenings. The removal of stumps is unnecessary, and thus all pain is avoided. MR. EDWARD DAVIESON invites one visit of inspection to his establishment, which will convince the most sceptical of the truth and straightforwardness of this statement. The LIQUID ENAMEL, for Stopping Decayed Teeth, is ENAMEL WHITE, keeps its colour, and lasts for ever. It is invaluable for Front Teeth. Attendance daily from Ten till Six. Consultations free. MR. EDWARD DAVIESON, Electric Telegraph Office, 448, West Strand, London, W.C. The Descriptive Pamphlets free for two stamps.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Gloves and Belts*),
172, NEW BOND STREET, LONDON, W.,
And Sold by all respectable Chemists throughout the Empire.

NERVO-ARTERIAL ESSENCE, prepared only by Dr. WM. BATCHELOUR, M.R.C.S.E. 1835, and M.L.A.C. 1834. It strengthens the vitality of the whole system without reaction, and speedily removes nervous complaints. In bottles, at 2*s*. 9*d*., 4*s*. 6*d*., 11*s*., and 33*s*., at Goodyer's, 31, Regent Street, W.; Butler & Crispe's, 4, Cheapside, E.C.; Sutton & Co., Bow Churchyard, E.C.; Barclay & Sons, Farringdon Street, E.C.: 12, Finsbury Place South, City, E.C., and all Chemists.

RUPTURES. — HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—circumference two inches below the hips. Price single, 12*s*.; double, 18*s*.; postage 10*d*. and 16*d*. Illustrated circulars on application to Mr. E. HUXLEY, 12, Old Cavendish Street, Oxford Street, W.

BY HER MAJESTY'S ROYAL LETTERS PATENT. (GRANTED 1860.)

MR. A. ESKELL, SURGEON DENTIST, 8, Lower Grosvenor Street, W., Sole Inventor and Patentee of an Invention which has for its object the Perfect and Painless Adaptation of ARTIFICIAL TEETH upon a novel principle, whereby one set of teeth lasts a lifetime, and a second, or reserve set, is unnecessary. Changes take place in the mouth from absorption of gums, removal of stumps, teeth, &c., and ordinary sets would, under these circumstances, be comparatively useless, or only rendered available at some cost, but upon Mr. Eskell's patented process they are not impaired in the slightest degree. Residents abroad or in the country have it in their power to adjust their artificial teeth at all times without the aid of a dentist. Mr. Eskell does not grant licences to use his patent, which can only be obtained at his residence, 8, Lower Grosvenor Street, where the medical profession, the nobility, gentry, and the public may see specimens, and obtain every information. Teeth stopped, &c. All consultations free.—8, Lower Grosvenor Street, S.W.; and Bennett's Hill, Birmingham.

VOLUNTEER RIFLE CORPS.—NOTICE. In consequence of the heat and fatigue experienced by gentlemen after exercising and review, many have been induced to try OLDRIDGE'S BALM OF COLOMBIA, which invariably has produced such a peculiar refreshing coolness to the head, that it has become a most valuable toilette requisite. It also nourishes and strengthens the roots and body of the hair, prevents it falling off or turning grey, and causes a beautiful appearance, with wave or curl, at the same time cleansing it and removing the scurf. 30 years' celebrity has proved there is no wash equal to it for improving and producing new hair, whiskers, and moustache. Price 3*s*. 6*d*., 6*s*., and 11*s*. per bottle. Wholesale at C. & A. OLDRIDGE'S, 22, Wellington Street, Strand, W.C.

KEATING'S PERSIAN INSECT DESTROYING POWDER.—FLEAS IN DOGS, POULTRY, &c., are instantly destroyed, as also Bugs, Beetles, and every other insect, by this Powder, which is perfectly harmless to animal life; sportsmen particularly will, therefore, find it invaluable. Sold in Packets, 1*s*., 2*s*. 6*d*., and 4*s*. 6*d*. each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79, St. Paul's Churchyard, London, E.C. Take notice, each genuine packet bears the above name and address. Sold by all druggists.

PHARMACIE FRANÇAISE, 57, PRINCES STREET, LEICESTER SQUARE, W.C.—LE MAOUT, Chemist, from Paris.—Medicamens Spéciaux—Remèdes Raspail—Capsules Le Maout—Ricord's Medicines, Plants, and all French Medical Articles.—Prescriptions accurately prepared. Chloroform Capsules for Sea-sickness.

SAVARESSE'S PATENT FLEXIBLE CAPSULES, by which Castor Oil and nauseous Balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with Gelatine. These Capsules may be obtained of BELL, 338, Oxford Street, W.; SANGER, 150, Oxford Street, W.; HOOPER, Pall-Mall East, S.W.; KEATING, St. Paul's Church Yard, E.C.; and medicine vendors throughout the kingdom.
EVANS & LESCHER, London, Patentees.

NATURE'S GREAT REMEDIES, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c. Dr. BUCHAN'S celebrated DOMESTIC MEDICINES consist of the PATENT SUGAR-COATED VEGETABLE PILLS, UNIVERSAL VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, never-failing remedies, affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates. Sold by Buchan & Co., Patentees, 22, Newman Street, Oxford Street, London, W., and all chemists in town and country. Just published, gratis, or post free for one stamp, Extracts from Dr. Buchan's Work, entitled, BUCHAN'S DOMESTIC MEDICINE, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child. Prices:—Pills, per box, 1*s*. 1½*d*., 2*s*. 9*d*., and 11*s*.; Ointment, per pot, 1*s*. 1½*d*., and 2*s*. 9*d*.; Essence, per bottle, 11*s*., or family bottle containing four times that quantity, 33*s*. Agents:—Barclay & Sons, 75, Farringdon Street, E.C.; J. Sanger, 150, Oxford Street, W.; Hannay & Co., 63, Oxford Street, W.; Butler & Crispe, 4, Cheapside, E.C.; Bartlett Hooper, 43, King William Street, London Bridge, E.C.; R. Howden, 78, Gracechurch Street, E.C.; Prout & Harsent, 229, Strand, W.C.; Darby & Gorden, 140, Leadenhall Street, E.C., London.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., No. 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

MILITARY FIGURES, for the Explanation and Practice of the "Exercise and Evolutions of the Army," according to her Majesty's Regulations; arranged for the Company, Battalion, and Light Infantry. By Major HOPKINS, K.H., 43rd Regiment.
"These ingenious figures teach an officer practically, as it were, to handle troops well, from a company to a regiment. The author, a pupil of Moore's at Shorncliffe, and practised in war and in command, is a master of his subject."—GENERAL SIR W. NAPIER, Author of "History of the War in the Peninsula."
T. & W. BOONE, Military Publishers, 29, New Bond Street, W.

1860.—Just published, post free, three stamps.

"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.
Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.
"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald*.
Liverpool, 134, Duke Street.

Just published, sent post free in a sealed envelope for six stamps.

ROYAL NAVAL ESTABLISHMENT,
EASTERN PARADE, SOUTHSEA.

MRS. EASTMAN continues this Establishment, with the able assistance of the Head Master, Mr. SPICKERNELL, and the other Masters, so many years with the late Mr. Thomas Eastman, R.N.

In addition to special instruction for Naval Examinations, Pupils receive a Classical and sound General Education, in preparation for the Army and other Professions.

Applications to be addressed to Mr. SPICKERNELL, the Head Master. Prospectuses, and other information, may be obtained at Messrs. Booth's Library, 307, Regent Street, W.

ROYAL NAVAL ACADEMY.—Of the many pupils prepared at the Academy conducted by MR. C. F. COOPER, R.N., not one has failed to pass, and eight have taken 1st, 2nd, and 3rd places at the Royal Naval College.—Address, Beresford Place, Southsea.

NAVAL AND MARINE CADETS ETC.

THE REV. THOS. KNIGHT, B.A. Hon. St. John's, Cam., receives PUPILS for the Royal Navy, Army, Woolwich, and Addiscombe. NINE out of ELEVEN of Mr. Knight's Pupils PASSED at the Royal Naval College, 12th June, 1860, taking 1st, 2nd, 3rd, 6th, 7th, 11th, 11th, 17th, 19th places in the respective divisions of 99 candidates, of whom 62 passed and 37 failed.—St. Mary's Hall, Southsea, Hants.

ROYAL MILITARY ACADEMY, WOOLWICH, S.E.

At the recent Competitive Examination for admission into the Royal Military Academy, Woolwich, commenced on the 30th ultimo, the following gentlemen passed directly and on first trial from Mr. R. B. DE BURGH'S MILITARY ESTABLISHMENT, Dublin:—

Mr. G. C. Bayley,	5th Place.	Mr. F. B. Knox.	
Mr. T. Fraser,	9th ,,	Mr. C. W. E. Murphy.	
Mr. H. M. Hayes,	13th ,,	Mr. C. F. B. Grey.	
Mr. R. G. Scott,	17th ,,	Mr. W. H. Rathborne.	

The number of successful candidates direct from Mr. De Burgh being greater than that from any other Establishment in the United Kingdom.

At the Examination held in January, 1860, the following gentlemen (the only candidates direct from Mr. De Burgh's) passed on first trial:—

Mr. W. J. Galway.	Mr. R. A. Livesay.
Mr. J. L. Morgan.	Mr. C. Greer.

Mr. Galway obtained 4432 Marks and the Tenth Place; and Mr. Morgan 4108 Marks and the Fourteenth Place. These high Marks were obtained without the aid of Classics, their Marks for Mathematics alone having been 2555 and 210 respectively.

ROYAL INDIAN MILITARY COLLEGE, ADDISCOMBE.—At the late Competitive Examinations for admission into the Royal Indian Military College, held in January, 1860, and May, 1860, the following gentlemen (the only candidates direct from Mr. De Burgh's) passed on first trial:—

Mr. H. Hardinge	2nd Place.
Mr. L. F. Boileau	12th ,,
Mr. T. R. Disney	25th ,,

At the above Examinations, the successful candidates direct from Trinity College, Dublin, had been under Mr. De Burgh's tuition.

Mr. De Burgh's references to the Parents of present and former pupils include the following:—The Right Hon. and Right Rev. the Lord Bishop of Meath, the Right Hon. Joseph Napier, Venerable the Archdeacon of Meath, Colonel Lake, C.B.; Colonel Knox, J.P.; Colonel Morgan, R.A., Swansea.

No. 6, Harcourt Street, Stephen's Green, Dublin.
July 30th, 1860.

ARMY EXAMINATIONS.—Candidates for the Artillery, Line, and Cavalry, are rapidly and efficiently prepared at an establishment, the pupils of which have, within the last two years, come out eight times first, five times second, and three times third on list. Apply to Captain LENDY, Sunbury, S.W.

THE ARMY, WOOLWICH, ADDISCOMBE, DIRECT APPOINTMENTS.—An OXFORD GRADUATE, very successful in the above examinations, has VACANCIES for TWO resident or non-resident PUPILS. Able tutors attend, and the pupils receive an amount of individual attention not obtainable in large establishments. Terms moderate and inclusive. References of a high order.—Address B. A., 28, Queen's Road, Haverstock Hill, N.W.

SELECT CLASSICAL AND MILITARY ESTABLISHMENT, HOLLAND HOUSE, BLACKHEATH, by T. KIMBER, M.A., Author of "Vaughan's First System," &c. References:—The Rev. Dr. Jelf, King's College, London; the Rev. Canon Hey, York, &c. Prospectuses can be obtained from Rivington's, Waterloo Place, S.W.; Parker & Son, 445, West Strand, W.C.; Ponsonby, Dublin; The Library, Cheltenham; Stotheran, York.

*** Arthur E. Havelock, who gained the highest number of marks at the examination in June for admission to Sandhurst, passed from Holland House.

ARTILLERY EXAMINATIONS.—Candidates for the Competitive Examinations are individually prepared at an establishment which receives six pupils only for that branch of the Service. Four resident professors. Apply to X., care of Messrs. PARKER, 445, Strand, W.C.

SPECIAL MILITARY TUITION, including Geometrical and Military Drawing, Hindustani, Fortification, Military Surveying and Reconnoitering. By Lieut.-Colonel MORLAND, who also continues the preparation of candidates for Addiscombe and the Military Competitive Examinations.—At 20, Norland Square, Notting Hill.

STAFF EXAMINATIONS.—Twenty-four Officers have already joined the Military College of Sunbury this year, to read either for the Staff College, or for direct appointment on the Staff. Apply to Captain LENDY, Sunbury, S.W.

HIGH MILITARY EDUCATION.

THE CEDARS MILITARY COLLEGE, PUTNEY, for Gentlemen preparing for the Line, Cavalry, Artillery, Engineers, Staff, and Addiscombe. Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to OSWALD HUNTER, Esq., The Cedars, Putney, S.W.

EDUCATION IN FRANCE.—TWO GENTLEMEN, one an English and the other a French Protestant, with the assistance of five highly-qualified Masters, PREPARE 14 YOUNG GENTLEMEN for the Competitive Examinations for Woolwich, Sandhurst, Addiscombe, the Indian Civil Service, and direct appointments in the Army. Terms, 50 to 60 guineas. Address, B.A., Post-Office, St. Pierre, Lés Calais.

H. J. & D. NICOLL'S Establishments for Gentlemanly and Moderate-priced Clothing, REGENT STREET, CORNHILL, & MANCHESTER.

THE CAPE PALETOT, INVERNESS CAPE, or SLEEVED CAPE, used in private life, as well as for Volunteer Corps.

H. J. & D. NICOLL, 114, 116, 118, 120, Regent Street, W.; 22, Cornhill, London, E.C.; and 10, St. Ann's Square, Manchester.

CLOTHING FOR YOUTH.—The KNICKERBOCKER, the Highland Dress, Ladies' Travelling Mantles, Riding Habits, and Pantalons de Dames à Cheval, with much novelty and general excellence, H. J. & D. NICOLL have for the remainder of this season at WARWICK HOUSE, 142 and 144, Regent Street, W. In the autumn this branch will be removed to the rear of the old Establishment.

VISITORS TO THE SEASIDE AND TOURISTS will find much ease and comfort in the NEUTRAL-COLOURED LOOSE COAT, fastened by one or more buttons, with Trousers and Vest, all of one material, as originally introduced by Messrs. NICOLL, of Regent Street, W., and Cornhill, E.C.; they recommend also a Black Velvet Coat, and for gentlemen seeking a kind of half-dress morning coat a fine black cloth is specially prepared; this garment is edged with braid and cut somewhat as a riding-coat, and is getting into general use.

J. B. JOHNSTONE,
MILITARY TAILOR & OUTFITTER,
34, SACKVILLE STREET, LONDON, W.
AND
50, DAWSON STREET, DUBLIN,

Respectfully informs his Patrons that he has transferred the management of the Dublin business to his Son, from whom the most careful attention to commands may be expected; and J. B. J. takes the present opportunity to return very earnest thanks for the favours he has hitherto received. Books, measures, and patterns having been carefully retained, orders (by letter or otherwise) can be executed in London or Dublin; and all accounts due to the house are payable to J. B. JOHNSTONE, at either address:

34, SACKVILLE STREET, LONDON, W.
OR,
50, DAWSON STREET, DUBLIN.

Avoid counterfeits and base imitations.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of
GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.
Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.
Gun Factory Established 1780.

THOMAS WILSON'S BREECH-LOADING RIFLE.

Mr. Thomas Wilson begs to call the attention of the public to his new BREECH-LOADING RIFLE, and to state that he has committed the working of the patent to Messrs. Rabone, Brothers, & Co., of 47, Broad Street, Birmingham, to whom all inquiries or other communications may be addressed.

This Rifle is well adapted for all branches of Her Majesty's Service, and is pronounced by the highest authorities to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—

1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.

2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.

3rd. It is easy to manufacture, and can be made entirely by machinery.

4th. It is so constructed that accident from careless loading, or otherwise, is impossible.

5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly, for firing, without the aid of tools. This facility would be occasionally valuable in rendering the Gun useless to an enemy, or to mutinous troops.

6th. The action is always in good order, requiring no adjustment in use.

7th. The action is equally applicable to single and double-barrel Guns, and may be used for sporting as well as military purposes.

8th. The principle can be applied to all ready-made Enfield guns, at an immense saving to the country.

Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.

A pattern may now be seen at Mr. Lancaster's, No. 151, New Bond Street, W.; and at Mr. Pritchett's, No. 86, St. James's Street, London, S.W.; as well as at Messrs. Rabone, Brothers, & Co.'s, 47, Broad Street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 568 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60*s.* per 1000; blank, 33*s.* per 1000.

[COPY.]

"Ordnance Select Committee, Royal Arsenal, Woolwich, April 17th, 1860.

"Sir,—Since I last addressed you on the subject of your Waterproof Cartridges, I have to inform you that 60 of them have been exposed in an atmosphere saturated with moisture, at a temperature of 90 degrees, for a fortnight. The result has been favourable, as far as this test is concerned, to their Waterproof qualities.

"I have, therefore, to request you will be good enough to state, for the information of the Committee, the nature of the lubrication you employ; whether it is in any way connected with the Waterproof properties of the Cartridge, and whether, in the event of their being adopted, the Service lubrication, which is wax, might not be employed.

"I have the honour to be, Sir,
"Your obedient Servant,
"J. H. LEFROY, Colonel, R.A.

"Mr. Thos. H. Anthony,
"37, Broad Street, Birmingham."

Waterproof Cartridges for Westley Richards', Wilson's, Calisher & Terry's, Leetch's, and other breech-loading Rifles, for foreign service.

ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

THE question put almost on the last day of the Session respecting the intention of the Secretary for War, of carrying out the recommendation of the Royal Commission on the Purchase System, to the effect that lieut.-colonels of regiments should be appointed by selection, was hardly necessary. But Sir De Lacy Evans is a strenuous opponent of purchase; and, though the modification in question falls far short of his desires, he is determined that the authorities shall not sleep upon their resolves. He will not allow them merely to add to the pavement of that place where good intentions are supposed to supply the place of footpaths. The object of the gallant general no doubt was to remind Mr. Sidney Herbert of his promise, and lead him to expect that next Session he would be taken to task respecting the progress made in effecting the change in the mode of appointing to regimental commands. The Secretary for War is indeed deeply pledged to carry it out. He was one of the Commissioners with whom the recommendation originated; and, as the Minister responsible for its practical embodiment, he has more than once undertaken that it shall be done. On this occasion Lord Palmerston answered for his absent colleague that no doubt he would fulfil his promise. The last time an interpellation took place upon the subject, Mr. Herbert himself said that he was only waiting for the establishment of a more effective system of inspection to carry out the change. For good or for evil, therefore, the Army must make up its mind to see one of the most important of the many important modifications of late years carried into effect very probably in the early part of 1861.

We have more than once in this journal expressed our views upon the policy of the selection system as regards lieutenant-colonels. Distasteful as it may be to the Service, violating as it does all the traditional ideas of regimental promotion, we fear we must consider it on the whole as beneficial and even requisite. The great failing of the Horse Guards appears to us to be the want of moral courage, and to this failure we are forced to attribute the desirability of the change. The Horse Guards has the power of stopping the promotion of an unfit or incompetent officer to the position of commanding officer of a regiment, but it has not — of late years at least — had the courage to exercise the power. The consequence is that some regiments—they are not, we are proud to say, very many—are badly commanded; and the Horse Guards, which avoided the ungracious duty of preventing an unfit officer obtaining command, has had within so many years the still more repugnant duty cast upon it of publicly turning three commanding officers out of their regiments. With such a state of things before us — with such evidence of the helplessness of the governing powers of the Army, we are forced to look with favour upon almost any alternative suggested which is likely to insure that a grossly improper man will not be placed in a position so delicate and important, so fraught with either the happiness and efficiency, or the discontent and disorganisation of so many men, as that of lieutenant-colonel commanding a regiment. We own that is all we expect from the adoption of the principle of selection. We can hardly hope it will obtain us the best man; but we do hope it will prevent us having a bad man for the position. The Duke of Cambridge at one time said he could not possibly carry out the scheme, but His Royal Highness has since expressed his willingness to do so. We are inclined to think the Commander-in-Chief's second views upon the subject are the more sound, looking to the large exercise of the power, not only of selection, but of rejection, he has already exercised during the four years he has been engaged in the administration of the Army. He has, as we have stated, turned away some three or four commanding officers, we believe for most cogent reasons, and he has selected some thirty officers to command regiments, upon what we consider to be on the whole excellent grounds. With this experience in the matter of selection, His Royal Highness will no doubt exercise the new powers with which he will shortly be invested, very much to the good of the Service. We are perhaps wrong in describing them as new powers, considering that to a great extent they already exist; but the area of selection will no longer be confined to officers having the means of purchasing; and the Commander-in-Chief will have to pick out good men, instead of vetoing bad men—a task that will be much more grateful to His Royal Highness. That he will have no difficulty in securing efficient commanding officers we can have no doubt, when we call to mind the many most accomplished and excellent officers from among whom the choice will lie.

We are afraid, however, that in carrying out his own recommendation, the Secretary of State for War will have to encounter some serious difficulties. The existing lieutenant-colonels will have to be compensated as they retire, and the country must make up to them in fairness the difference between the sums they have severally invested, and that which will accrue to them on resigning their commissions. Inasmuch as they will be succeeded (without purchase) by majors selected from they know not what regiment, all they can calculate upon is the regulation price of a majority, which will be contributed by the officers of the regiment gaining promotion, by the removal of its major to the lieut.-colonelcy of another regiment. Between this and the amount of their investments, therefore, the country will be bound to supply the deficiency. The Reserve Fund, we fear, cannot bear so heavy a charge. A vote of Parliament will doubtless be requisite to make up the sum; and thus, at the outset, the question of the recognition of extra payments beyond regulation price will be raised. As regards the equity of compensating for these extra and irregular investments, one of our leading military authorities has given an opinion before the Royal Commission on Purchase. Lord Grey said that, in the event of the abolition of the system, compensation ought, in justice, to be given, not merely for the money lost in the shape of regulation purchase, but of those extra sums which it has become customary to pay in addition, and which have been paid notoriously with the connivance of the authorities. Estimated, as we think it ought to be, on this principle, the claims of the existing lieut.-colonels would form in the aggregate a very considerable amount. Taking a moderate standard of these extra sums, we find the following results in the Line. Of the 34 lieut.-colonels of Cavalry, there are 12 who have purchased all their commissions. They have paid an average of 12,000*l.* each, and they would receive 3200*l.* each on retiring. The Government should therefore give them in equity 8800*l.* each, or 105,600*l.* altogether. Then there are 21 lieut.-colonels who, though not having purchased all their commissions, are yet in the position of having expended upon their steps various sums in excess of 3200*l.* each, and amounting in the aggregate to 106,500*l.* more. There is but one Cavalry lieut.-colonel—Seymour of the Bays, who had the rare luck of getting a regiment in eleven years without purchasing a step beyond his first commission—who would not have a large demand of this kind to make. In the Infantry the case is not financially so bad in proportion, but yet it is formidable enough. Of the 181 Infantry lieutenant-colonels, 113 have purchased so small a number of steps that the regulation price of a majority may be considered as fair compensation for their outlay. Ten of them indeed have attained their position without investing a shilling. These officers would of course have no demand upon the public on retiring from the Service, but there remain 78 lieutenant-colonels of infantry, who are in a different position. Of these latter 17 have purchased all their steps, and assuming the rate to be 6500*l.* a-piece, they would have each to receive 3300*l.* from the public, or over 56,000*l.* in all. The remaining 61, though not purchasing every step, may be considered as having invested to an amount in the whole exceeding by 84,000*l.* the sum they would have to receive at the hands of the officers promoted by purchase in succession to the majors appointed to their places. The total demand upon the national purse therefore will be something like 350,000*l.*, and this sum the House of Commons will have to vote as an earnest of its desire to modify the purchase system.

NAVAL AND MILITARY MOTIONS FOR NEXT SESSION.—The following are the notices of motions relating to the two Services, which appear on the order book of the House of Commons for "next session:"—Sir De L. Evans.—Fortifications, &c. — That an humble address be presented to Her Majesty, praying that she will be graciously pleased to direct to be carried into effect the recommendations of the Royal Commission on the National Defences, in Paragraphs 156 and 158 of the Report to Her Majesty, for the construction of a fortified work on Shooter's Hill, calculated for a garrison of 1500 men, to assist in the protection of Woolwich Dockyard and Arsenal, and as an important element in the means of defence for the Metropolis; also praying that Her Majesty will be graciously pleased to direct that a Royal Commission be appointed to examine and report to Her Majesty on the lines of march available to an invading army advancing against London; on the obstacles or positions which may be occupied or prepared to obstruct or defeat an enemy on these lines of advance; and on the points d'appui or support of the national forces in their operations or manœuvres in the vicinity, and for the defence of the metropolis of the empire. Colonel Lindsay.—Colonels—That an humble address be presented to Her Majesty, praying that she will be graciously pleased to take into consideration the present position of the officers promoted to the rank of colonel for distinguished service in the field during the Crimean war, who, when the list of colonels was re-adjusted under the recommendations of the Royal Commission of 1858, were unfortunately overlooked, by which omission these officers have had their prospects in the Service seriously injured; and praying that Her Majesty will be graciously pleased to restore them to a position approximate to that which they had held for upwards of three years before the alterations adverted to took place. Mr. A. Mills.—Colonial Military Expenditure—Select Committee to inquire and report in what proportions colonial military expenditure should be defrayed from imperial and colonial revenues respectively. Mr. McEvoy.—Army and Ordnance Corps—To call the attention of the House to the unsatisfactory system which at present prevails of denying to the combatant officers of the Army and Ordnance Corps promoted from the ranks the same advantages of retirement given to paymasters and quartermasters; and to submit a motion to the House thereon. Sir F. Smith.—War Department—Select Committee to inquire into and report upon the manner in which the financial accounts and correspondence of the War Department are conducted, with a view to effect such improvements as will conduce to greater efficiency, greater dispatch, and greater economy in that branch of the public service. Sir F. Smith.—Defence of Commercial Harbours—That an humble address be presented to Her Majesty, praying that she will be graciously pleased to direct that a royal commission, composed of experienced naval and military officers and other competent persons, be appointed to inquire into and report to Her Majesty the best means of rendering the commercial harbours of the United Kingdom secure against attack, having reference to the power of manning, either by Her Majesty's regular forces or by local Volunteers, such works and vessels as may be considered necessary for that purpose.

The number of Volunteers in Glasgow for Garibaldi, up to Wednesday night, was 205. A committee was elected, and drill commenced yesterday. About 400 persons attended the meeting in Glasgow on Wednesday night.

THE ARMY.

2nd Life Guards. We have to record the death of Cornet Entwisle, of this regiment, which occurred on the 27th ult. at Southport. He entered the regiment on the 31st of December, 1858.

1st (King's) Dragoon Guards. Major Slade and Lieutenants Sidney and Hubback, and 62 men, have arrived at Hong Kong from Madras.

3rd Dragoon Guards. Colonel Smith is on leave to Sept. 30, on medical certificate. Cornet Dawson is ordered to join the detachment at Poonah from Kirkee.

7th Dragoon Guards. Colonel Forrest's leave is extended from July 14 to August 10. Cornet Goldsmith is on leave to Murree, to October 13, on medical certificate.

1st Dragoons. Three troops have moved from Dubin to Newbridge and the Curragh.

2nd Dragoons. The regiment has arrived at Island Bridge Barracks, Dublin, from the Curragh, to be quartered for the winter.

3rd Light Dragoons. The regiment has moved from the Curragh to Dundalk, detaching to Belfast and Belturbet, to be stationed.

4th Light Dragoons. This corps, whose bad condition at the Curragh, in consequence of the wet, has been the subject of much remark, was moved last week to Dublin, and is now more comfortably located in Portobello Barracks.

5th Lancers. Major Portal is on leave to September 30.

6th Dragoons. Lieutenant Inge has passed the required colloquial examination in Hindostanee.

10th Hussars. Cornet Bulkeley is on leave to the 14th instant from Aldershot.

15th Hussars. Has moved from Newbridge to Cahir to be stationed.

Royal Engineers. The following has been issued to officers commanding Royal Engineers: — "War Office, August 23.—Mr. Secretary Herbert having had under his consideration the allowance of foreign service pay granted to clerks of works and clerks of Royal Engineers, serving on the West Coast of Africa, in Schedule B of the Warrant of 28th April, 1858, Circular No. 274, and the regulations affecting service in those settlements, issued for the information of the Military Store Department on the 25th of January last, Circular 539, has decided, after consultation with the Lords Commissioners of Her Majesty's Treasury, that the provisions of Circular 539, as to pay, length of service, and leave, shall be extended to members of the civil staff of the Royal Engineers, and in accordance with this decision: 1. All civil officers of the Royal Engineer Department volunteering and being appointed for service on the West Coast of Africa shall be allowed to draw double the ordinary pay of their respective ranks during their stay on the coast, in lieu of the pay fixed for this service by the Royal Warrant of the 28th April, 1858. 2. A civil officer shall not be required to serve on the coast for a longer period than two years from the date of arrival to the date of departure. 3. Such two years' service on the coast of Africa shall be allowed to reckon for increased pay and superannuation as three years of an ordinary service, and if the officer should be permitted at his own wish to prolong his stay on the coast, his service shall be allowed to count in proportion. 4. The officer shall be entitled either to a tour of home service, on his return after two years' duty on the coast, or to six months' leave of absence for each two years he shall have served there. 5. Commanding Royal Engineers will make known these regulations to the officers under them, and transmit from time to time to this office the names of any clerks of works of the 2nd or 3rd classes who may be desirous of service on the West Coast of Africa on the above-named conditions.—B. Hawes." Captain Smith, Deputy-Assistant-Quartermaster-General at Aldershot, is on leave to September 15. Captain A. R. Lempriere, who has recently returned to England from the North American boundary expedition, under Lieut.-Colonel Hawkins, R.E., has been ordered to join head-quarters at the Royal Engineer establishment at Chatham.

Military Train, 3rd battalion. Captain M'Farlane is on leave to October 25th, on private affairs.

6th Regiment. A letter from Barrackpore, dated 2nd July, states that the 1st battalion of Her Majesty's 6th Royal Regiment had been inspected from half-past twelve to three o'clock, by the new Commander-in-Chief. His Excellency appeared much pleased, and praised the commanding officer, Colonel Robertson, for the appearance and discipline of his men. The Commander-in-Chief was accompanied by General Sir John Hearsay and the station staff; every barrack house was visited, and His Excellency appeared gratified with the regularity and system observed in the regiment, and the dinner tables spread with white cloths, covered with delf of the same colour, and very substantial food, to say nothing of the bouquets of flowers in honour of the occasion. This fine regiment has two hundred men in hospital with fever, but up to the present time without any casualties.

7th Regiment. Lieutenant Harrison has sailed to join the 2nd battalion at Gibraltar.

8th Regiment. The 1st battalion detachment, whose arrival from India we have already reported, is quartered at Parkhurst Barracks, awaiting the head-quarters, daily expected from India. Assistant-Surgeon Jay has sailed to join the 2nd battalion at Gibraltar.

9th Regiment. The 2nd battalion is about to be moved from Corfu to Santa Maura and Cephalonia, relieving the 2nd battalion, 2nd Royals.

10th Regiment, 1st battalion. Ensign Dickinson is on leave from Aldershot to the 30th of September.

15th Regiment. Assistant-Surgeon Hinton has sailed to join the 2nd battalion at Malta.

16th Regiment. The 1st battalion, under Lieut.-Colonel Peacocke, has removed from Aldershot to Shorncliffe to be stationed. The other officers who accompanied the battalion were, Majors Audain and A. R. Garrett; Captains Bostock, C. J. Magnay, G. C. Hogge, G. H. Twemlow, R. C. Healy, L. S. Rooke, A. Gibson, W. R. W. Lea; Lieutenants W. H. Carter (Adjutant), B. H. Westby, L. Le Fevvre, A. P. Powys, F. J. Rogers, C. J. Horne, F. Jefferson, C. T. Sheringham, P. McCann, C. H. Woodmass, B. C. Westby, L. B. A. Poynter, R. W. Robinson, J. R. P. Coffin; Paymaster Higginson; Second Master Dent; Surgeon W. G. Swan, M.D.

18th Regiment. The 2nd battalion left Aldershot yesterday for Shorncliffe, to be stationed. Lieutenant Noblett is on leave to the 29th instant.

19th Regiment, Captain St. John Griffiths has obtained sick leave to England; Ensign Dickenson (2nd battalion) is on leave to September 20th.

24th Regiment. 1st battalion. Lieutenant Scott has two months leave to Calcutta, to study Hindostanee.

25th Regiment, 2nd battalion. Lieutenant Lewis is on sick leave from Aldershot to December 14.

28th Regiment. Colonel Adams is raised to the rank of 1st class Brigadier, and appointed to the command of the Belgaum brigade.

33rd Regiment. Lieutenant Statham is appointed paymaster of the new general depôt at Colaba.

35th Regiment. Captain Ballingall is acting as Instructor of Musketry during the absence on leave of Lieutenant Lloyd.

51st Regiment. Lieutenant H. Steuart Thompson has come home from Bombay by the overland route, in charge of various detachments of men whose period of service has expired. This was, we believe, the first time men were sent home by this route, and the result is very satisfactory.

55th Regiment. Lieutenant Harrison is on leave to September 29.

57th Regiment. Captain Brown is appointed commandant of the Sanitarium at Colaba.

58th Regiment. Has moved from Aldershot to the northern district, and is quartered as follows:—head-quarters, with 15 officers and 250 men at Burnley; 9 officers and 300 men at Manchester, and 9 officers and 300 men at Preston.

61st Regiment. This regiment may now be daily expected to arrive at Plymouth, where it is to be stationed. It embarked from Cork in June, 1845, for India, where it remained until the summer of last year, when it was sent to the Mauritius, as it was considered necessary to increase the force in that island, and from whence it embarked for England in the Donald Mackay, on the 18th June last.

75th Regiment. From Allahabad we regret to learn that numerous deaths have occurred in Her Majesty's 75th Regiment, principally attributable to cholera. Lieut. Row's death is announced.

79th Regiment. Lieutenant S. G. Jones has three months' leave to Calcutta to study Hindostanee.

83rd Regiment. Captain Baumgartner has been appointed Brigade-Major at Neemuch.

86th Regiment. Is held in readiness to move from Aldershot to Ireland. Lieutenant Churchill is on leave to the 30th of September, Quartermaster Lane to the 14th, Ensign Jackson to September 30, and Surgeon Sawyer to October 30.

92nd Regiment. Lieutenant G. E. Campbell is about to retire from the Service.

93rd Regiment. A beautiful piece of sculpture has just been erected on the wall of the north aisle of the Cathedral, Glasgow, opposite the south entrance, to the memory of the officers and men of the 93rd Highlanders who fell in the Crimea. The memorial has been erected by the regiment, and bears the following inscription on the base:—"To the memory of Major Robert Murray Banner, Brevet-Major John Anstruther, Lieutenants William Lear Macnight, William Turner, James Wemyss, Robert Abercromby, Edward Alfred Ball, Franklin Knight Kirby, 13 non-commissioned officers, 4 drummers, and 298 privates of the 93rd Sutherland Highlanders, who fell in action, or died during the Crimean campaign of 1854-5-6." The monument was designed and executed by Mr. John Steel, R.S.A., Edinburgh, sculptor to Her Majesty for Scotland; and is (says the *North British Mail*) one of the most appropriate, elegant, and beautifully executed pieces of sculpture to the memory of departed worth which we have seen for many a day. It is 6½ feet from the base to the top, and 4½ feet in breadth. It is formed of the purest Carrara marble, cut in alto-relievo, the design being an allegorical representation of the fate of the heroes whom it is intended to commemorate. A dying soldier, in full Highland costume, is represented as having just fallen in battle, and behind is Fame, in the figure of a female, with outspread wings, who with her right hand supports the hero's head, while with her left she holds a trumpet, with which she is proclaiming victory. The dying soldier still firmly grasps the standard of his regiment, on which are inscribed its number and the names of the several actions in which it has been engaged—Cape, Alma, Balaklava, and Sebastopol—while the colours have been crowned by Fame with a laurel wreath. Projecting behind the folds of the colours is seen a portion of a gabion, and at the soldier's feet a Russian helmet, indicating that the enemy has submitted. The monument is alike creditable to the generous and patriotic feeling which prompted its erection, and to the talent and art displayed in its design and execution. We understand that permission has been obtained from the proper authorities to place the actual colours of the regiment on the monument, and which it is expected will be done in a few days. Paymaster Blake is on leave to Cashmere to October 10th.

95th Regiment. Lieutenant Bacon has passed the required colloquial examination in Hindostanee; the death of Captain Wield is announced, and Lieutenant Budgen obtains the vacant company.

100th Regiment. Captain Clery, Lieutenant Davidson, and Ensigns Lawrell and Tanner, have sailed to join head-quarters at Gibraltar.

Rifle Brigade, 1st battalion. Assistant-Surgeon De Chaumont is on leave to 28th September.

Ipswich Barracks, which have been recently occupied by brigades of the Royal Artillery, are now being completely renovated and cleansed, preparatory to receiving a body of cavalry. It is stated that the 10th Hussars will be stationed here, with head-quarters at Norwich. There does not appear to be any foundation for the recent rumour, that these barracks were to be immediately abolished, and the troops removed to Colchester.

Major-General Lawrence, C.B., commanding the 1st Infantry Brigade at Aldershot is on leave to the 11th inst.

In consequence of the amalgamation of the Indian with the Royal Army nearly all the recruits have left Warley Barracks, near Brentwood, and a draft of the 6th will leave, only the staff remaining.

COLCHESTER CAMP.

On Thursday week a rifle match took place at Landguard Fort between the sergeants of the 10th Depôt Battalion. The project, which originated with the rifle instructor, Sergeant Reid, was most cordially acquiesced in by the men, and handsomely supported by the officers, who contributed 13*l.* towards the prizes contended for. Without being at all invidious to the other officers, special mention ought to be made of Captain Chapman of the 34th regiment, who in carrying out the arrangements for the match, and in acting as umpire, evinced a strong desire to do all in his power to perfect the efficiency of those men upon whom the training of the young soldier so much depends. The principal prize was a very beautiful silver cup, which cost eight guineas, given by the officers of the battalion; 2nd, a time-piece, valued at 3*l.*; 3rd, a gold Albert chain, value 2*l.* 10*s.*; 4th, a gold signet ring, value 2*l.*; 5th, a gold pencil and pen case, with gold pen, value 1*l.* 10*s.*; 6th, a writing desk, worth 1*l.*; 7th and 8th prizes of three guineas each by the officers of the 10th Battalion, to the file who made the best shots in skirmishing, firing five rounds; 9th and 10th, two guineas each to the second best *ditto*.

The ranges varied from 400 to 600 yards, and each man was supplied with 20 rounds of ball cartridge. Unfortunately there was a very strong irregular breeze blowing, which militated against precision of aim, and prevented some of the men scoring as many points as might have been expected; upon the whole, however, the firing was satisfactory, especially at the longer range. The firing whilst skirmishing was very superior, and in this department the successful competitors proved themselves no novices. The proceedings were watched with considerable interest by a body of officers from the camp, under whose special auspices the match had been arranged, and at the close the following were the returns of each competitor:—

Names.	400 yds.	500 yds.	550 yds.	600 yds.	Total.
Sergeant-Major Fitzgerald	5	1	3	1	10
2nd-Class Instructor, Sergeant Reid	4	4	3	0	11
Colour-Sergt. Phelan, 5th	4	2	2	3	11
Colour-Sergt. Lloyd, 34th	6	4	2	0	12
Colour-Sergeant Rodgers, 37th	5	4	1	2	12
Colour-Sergt. Rowe, 44th	2	4	3	2	11
Colour-Sergt. Sweeney, 97th	3	2	0	1	6
Sergeant Brittles, 34th	2	1	3	1	7
Sergeant Hopkins, 97th	2	3	3	1	9
Sergeant Moran, 38th	1	1	4	2	8
Sergeant Eaton, 34th	2	0	0	2	4
Colour-Sergt. Jarrett, 38th	2	4	1	4	11
Sergeant McAuliffe, 37th	3	1	0	1	5
Sergeant Brady, 37th	4	0	1	1	6
Sergeant Woodcock, 34th	3	2	2	0	7
3rd-Class Instructor, Sergeant Johnstone	6	3	2	3	14
Colour-Sergeant Illing	0	0	2	0	2
Colour-Sergt. Corcoran, 5th	0	0	1	0	1
Colour-Sergt. Pratt, 44th	1	0	1	3	5
Sergeant Paul, 38th	5	0	4	1	10
Sergeant O'Keefe, 97th	3	1	2	0	6
Sergeant Dogherty, 37th	5	1	2	1	9
Sergeant Moore, 44th	4	0	4	2	10
Sergeant Walsh, 37th	7	4	3	2	16
Sergeant Edlow, 44th	5	1	3	0	9
Sergeant Ward, Militia	1	1	0	1	3
Sergeant Handcock, 5th	0	0	1	1	2
Sergeant McGinlay, 97th	2	2	1	1	6
Sergt. Cunningham, 44th	1	0	1	0	2
Sergeant Fisk, 5th	0	0	2	0	2

The ties were then shot off, and the following were declared the winners:—The silver cup, Sergeant Walsh, 37th, 16 points; the time-piece, 3rd Class Instructor, Sergeant Johnstone, 14 points; the gold chain, by Colour-Sergeant Rodgers, 37th, 12 points; the gold ring, Colour-Sergeant Lloyd, 34th, 12 points; the gold pencil case, Colour-Sergeant Rowe, 44th, 11 points; the writing-desk, Colour-Sergeant Phelan, 5th, 11 points; three guineas (skirmishing), Sergeants Moran, 38th, and Cunningham, 44th, 9 points; two guineas, ditto, Colour-Sergeant Sweeney, 97th, and Sergeant Eaton, 34th, 7 points.

The affair was looked upon as making quite a gala day; and on their return the Sergeants were met by the band of their battalion, which escorted them through the town.

The prizes, except those given by the officers, were distributed at a supper in the evening, which terminated with a ball. The officers' prizes, however, were not presented till Friday morning, when that duty was undertaken by Colonel Street, C.B., commandant of the battalion, who highly complimented all the men for their efficiency and excellence of aim.

It is intended, if possible, to make this contest an annual trial of skill; and it is hoped some arrangements will be made for the use of a practice ground much nearer than that of Landguard Fort.

DOVER AND SHORNCLIFFE CAMP.

On Sunday last, a private soldier in the Royal Engineers, stationed at Dover, being in custody for some petty offence, escaped from the guard, and rushing towards the steep acclivity of Shakspeare's Cliff, succeeded in throwing himself over the edge; he then scrambled down the face of the cliff, which in that part is almost perpendicular. After some little time ropes were procured, and by means of them the guard descended, and found the prisoner sleeping very comfortably on a projecting ledge on the face of the precipice; 250 feet of rope were required to release the foolhardy man from his perilous position.

On Monday last Major-General Bloomfield arrived at Dover by the 2·30 p.m. train, and was received at the station by Colonel Cuppage, commanding the Artillery in the south-eastern district, and staff. Immediately on quitting the station the gallant general, who was not in uniform, proceeded to the citadel, and made a minute inspection of the guns, &c., &c. The inspection of the Artillery at this fortress by the general was continued on the following and subsequent days.

Shorncliffe Camp. — On Wednesday last the first division of the 90th Stirlingshire or Highland Borderers'

Digitized by Google

Regiment of Militia, consisting of three companies, left Shorncliffe *en route* to Weedon. One field officer, 3 captains, 2 subalterns, 1 assistant-surgeon, and 280 rank and file, composed the strength of the regiment. The next day (Thursday) the 2nd and 3rd divisions marched, the former *en route* to Liverpool and the Isle of Man, and the latter to Chester. Two field officers, 3 captains, 5 subalterns, 3 staff, and 243 rank and file composed the first division; the detachment to Liverpool consisted of 1 captain, 1 subaltern, and 60 men; that to the Isle of Man, 1 subaltern, and 45 rank and file. The whole force of the regiment leaving Shorncliffe was 3 field officers, 7 captains, 9 subalterns, 4 staff officers, 34 non-commissioned officers, 12 buglers, 583 rank and file. The Stirlingshire Militia have, during their stay in Shorncliffe, by their exemplary behaviour, secured the esteem and respect of every class of the community in the neighbourhood, and they leave Shorncliffe with the best wishes of all who have become connected with them during their stay in the camp.

The 2nd Royal Cheshire left camp on Tuesday last in three divisions—the 1st, under the command of Major Legh, for Bradford, 3 captains, 4 subalterns, and 280 rank and file were in this division. The 2nd, under the command of Major Stuart, for Ashton-under-Lyne, with 3 captains, 2 subalterns, and 270 rank and file; and the 3rd, under Lieut.-Colonel Davenport, 3 captains, 6 subalterns, and the head-quarters with about 400 rank and file, for Bury. It is rumoured that these regiments are for disembodiment. The 2nd Royal Cheshire have earned, and most particularly deserve, the thanks of the inhabitants of Folkestone, as they, in conjunction with the Stirlingshire, have at all times made themselves most particular in giving the aid of their band, &c., to forward any philanthropic object on foot in the neighbourhood of the camp, and this public acknowledgment is due to both of those regiments.

Captain Chambers, of the 19th (or Rotherham) Company of Rifle Volunteers, is at present on the camp attached to the 17th Regiment, for the purpose of going through a course of company and battalion drill.

The 16th Regiment from Aldershot, under the command of Lieut.-Colonel George Peacocke, marched on the camp on Thursday afternoon; the strength of the regiment was as follows:—3 field officers, 9 captains, 10 lieutenants, 7 ensigns, 6 staff officers, 42 non-commissioned officers, and 805 rank and file.

The Army Gazette.

WAR OFFICE, PALL MALL, AUGUST 28.

5th Dragoon Guards—Major-General the Hon. Sir James Yorke Scarlett, K.C.B., to be Colonel, vice Major-General the Earl of Cardigan, K.C.B., removed to the 11th Light Dragoons.

11th Light Dragoons—Major-General the Earl of Cardigan, K.C.B., from the 5th Dragoon Guards, to be Colonel, vice General Sir Henry Wyndham, K.C.B., deceased.

Royal Regiment of Artillery—Second Captain Frederick George Baylay to be Adjutant, vice Morris, promoted.

Corps of Royal Engineers—Brevet-Colonel John Chaytor to be Colonel, vice Williams, removed as a General Officer; Brevet Major George Clement Baillie to be Lieutenant-Colonel, vice Chaytor; Second Captain Henry Schaw to be Captain, vice Baillie; Lieutenant William Butler Gossett to be Second Captain, vice Schaw.

BREVET.

In consequence of the death of General Gustavus Nicholls:—

Colonel Montgomery Williams to be Major-General on the Fixed Establishment of the Royal Engineers.

General Sir J. F. Burgoyne, Bart., G.C.B., Supernumerary on the list of General Officers in the Royal Engineers, to be placed on the Fixed Establishment.

Colonels Thomas Coryndon Luxmore and William Faris, retired full pay of the Royal Engineers, having been senior to Colonel Williams on the effective list of the corps at the date of their retirement, to be Major-Generals.

NOTICE.

The undermentioned days have been fixed for the examination of candidates for direct commissions in the army, to be held at the Royal Hospital, Chelsea, viz., the 29th of October, 1860, and the 28th of January, 1861.

STATIONS OF THE BRITISH ARMY.

THE NAVY.

ADMIRALTY, SEPTEMBER 1.

PROMOTIONS.

Commanders to be Captains on the retired list—William Robinson, who entered the Navy November, 1811; William Maxwell, who entered the Navy in May, 1810; and John James Keeling, who entered the Navy May, 1804.

Acting Lieutenant to be Lieutenant:—Charles Johnson Vidal, who was mate of the Lyra, 9, screw sloop, at the Cape of Good Hope from 1st of February, 1859, until promoted to Acting Lieutenant, 10th August, 1859.

APPOINTMENTS.

Commanders—O. M. Crewe Read, to the Cumberland; W. C. F. Wilson, to the Spiteful; J. R. Alexander, to the Ariel; E. Field, to the Landrail; Frederick Thomas Chetham Strode, to the Eagle, 50, at Portsmouth, commissioned as a training ship.

Lieutenants—Lumley Woodyear Peyton, to be chief officer in command of the Penzance Coast-guard station; Francis Hewson, to be additional of the Hogue, 60, at Portland, for service in the Harpy tender; Alexander Thistlethwayte Collier, to the Cæsar, 90, in the Mediterranean; Charles St. Vincent Lake, to the Spiteful; Stanhope G. Price, to the Cambridge; W. J. Stevenson, to the Espoir; Henry Fairfax to the Ariel; W. A. de V. Brownlow, to the Tartar; F. M. H. Blair, to the Trafalgar; Charles G. M'Gregor, to the Wellesley; Richard B. Foster, to the Colossus; John B. Telfor, to the St. Vincent; Alexander Henderson to the Hogue.

Masters—George Arthur Stabb, to be chief officer in command of the Garran Haven, Coast-guard Station; Augustus J. Burmiston, to the Foxhound; R. T. N. Pearce, to the Spiteful; G. A. F. Day, to the Ariel.

Paymasters.—George Barnes to the Ariel; Charles W. Tuke to the Spiteful; John Burke (additional) to the Wellington; Edward W. Gordon (additional) to the Edinburgh; and Frederick O. L. Patch (in charge) to the Landrail.

Mates—R. M. Lloyd to the Terrible; R. H. Andoe to the Mars.

Assistant-Surgeon—William Roche (b) confirmed to the Falcon.

Second-Masters—Colman Mark Hammond to the Avon, 1, paddle, at Devonport; Thomas Henry Hayman to the Lizard, 1, paddle, at Sheerness; John Williams to the Rhadamanthus, 2, paddle, at Woolwich; John H. Tully to the Landrail.

Midshipman—Charles S. Broome to the Diadem.

Masters'-Assistants—Percy C. Smith to the Emerald, 51, at Portsmouth; John M. Lloyd to the Diadem, 32, Channel Squadron; Thomas J. Burghes to the Tartar.

Clerks—Edmund G. Ellis to the Blenheim; Augustus A. Syme to the Centurion; Thomas Mitchell to the Cornwallis.

Third-Class Assistant-Engineers—Thomas P. Potts to the Hornet; Albert Jolliffe (acting), to the Hannibal, 91, at Naples; Robert Winfield (acting), to the Neptune, 90, at Sidon; Robert H. Horne (acting), to the London, 90, in the Mediterranean; Georgo Duncan (acting), to the Cressy, 80, at Malta; Robert B. Turner (acting), to the Doris, 32, in the Mediterranean; Henry Darroll (acting), to the Scylla, 21, at Messina; Mark Hawkins (acting), to the Alacrity, 4, in the Mediterranean; James Butchart (acting), to the Gannet, 11, in the Mediterranean; James Warren (acting), to the Mohawk, 4, at Alexandria; Thomas G. Punnett (acting), to the Argus, 6, in the Mediterranean; G. Brewer (acting), to the Lucifer.

Alacrity, 4, screw steam-sloop, Commander John K. E. Baird. A letter from Corfu, dated August 18, says:—"Her Majesty's gunboat Alacrity arrived here from the Adriatic on the 13th inst. His Excellency the Lord High Commissioner left Corfu at 3 p.m. on the 15th in the Ionian government steamer for a trip to the islands."

Anson, 91, screw, building at Woolwich. Workmen are employed over time on board this splendid ship in order to complete the arrangements for her launch on the 15th inst.

Ariadne, 26, screw frigate, Captain Edward W. Vansittart, was, by the last accounts, in company with the Hero, to which ship she had rendered good service by tugging her off a rock in Gaspé Harbour.

Ariel, 9, screw steam-sloop, has been commissioned at Portsmouth by Commander John R. Alexander, 1858.

Bustler, steam-vessel, with a party of riggers, has returned to Woolwich from Greenhithe, having been engaged in assisting to adjust the Pioneer, steam-sloop, which was to leave the river yesterday to join Dr. Livingstone's exploring expedition in the Zambesi. The Pioneer, on Thursday, tested her machinery, manufactured by Messrs. Penn, of Greenwich, at the measured mile, and the result was in every respect satisfactory.

Cressy, 80, screw, Captain the Hon. Charles G. J. B. Elliot, C.B., left Malta on the 24th ult.

Cruiser, 17, screw steam-sloop, Commander John Bythesea, V.C., was on shore on the 30th of June, a little below Shanghai, but was expected to be got off again without damage.

Dee, paddle, Master-Commander Pullen, has discharged her cargo of boilers and machinery at Portsmouth Dockyard, and has returned to Woolwich.

Desperate, 8, screw steam-sloop, is now coaling alongside the jetty in Keyham basin, Plymouth.

Devastation, 6, paddle steam-sloop, is now undergoing extensive repairs at Woolwich, and is to be brought forward for service.

Doris, 32, screw frigate, Captain Edmund Heathcote, left Corfu on the 15th ult., in company with the Lord High Commissioner of the Ionian Islands, who was about to proceed on a trip to Cephalonia, Zante, &c. The cruize would occupy some three or four weeks.

Doterel, new screw gun-boat, at Devonport, has been dubbed for examining her plank, which was found perfect. The artisans commenced coppering her on Thursday.

Dove, screw gun-boat, tender to Actæon, Lieutenant Charles J. Bullock, had been ashore on the north coast of China, but had been got off again without receiving any damage.

Duncan, 101, screw, has unshipped her Griffith's propeller

Digitized by Google

alongside the sheer jetty in Portsmouth Harbour, and has shipped her spare one—Maudslay's shifting blades—at the same pitch. The "Griffith" will be stowed below, and the ship will then be placed at moorings up the harbour as one of the second-class steam-reserve.

Emerald, 51, screw frigate, Captain A. Cumming, left Spithead at 9 a.m. on Monday, by the western passage, for Alderney, with reliefs of Royal Artillery, and returned on Wednesday with two batteries of Royal Artillery on board, under the command of Major Lennox. They were disembarked by steam-tug, and joined the head-quarters of the 15th brigade, stationed in Portsmouth garrison. The Emerald will have to be placed in dock, having on Tuesday morning, while getting under way in Alderney harbour, and in charge of a pilot, struck on a rock on the ebb-tide, where she hung until released by the returning flood. Her discharge-pipe is broken by the ship's straining while on the rock, but her other damages are not thought to be very serious. Hawsers were got out, and every precaution taken by Captain Cumming and the officers of the ship to prevent her receiving any more injury than was unavoidable while she lay in her perilous position. A correspondent from this ship says, "We expect to be at least a month or six weeks in dock."

Encounter, 14, screw steam-ship, Captain Roderick Dew, was at Talien-Wan Bay on the 23rd of June. On her way up she seized 24 junks laden with various articles of more or less value, including fur coats, tea, rice, beans, oil, cloth, and some bales of silk. They are now at anchor in the bay, and carry the "arms" of the commissariat department upon them, for whose special use they were brought here.

Flying Fish, 6, screw steam-sloop, Commander Charles W. Hope, was, by the latest accounts, within a few miles of Quebec, in company with the Hero and Ariadne. The Flying Fish has been actively occupied assisting the Hero, which ship had unfortunately grounded with His Royal Highness the Prince of Wales on board, on more than one occasion.

Forward, 2, screw gun-boat, Lieutenant-Commandant Chas. R. Robson, had, by the latest accounts from British Columbia, safely arrived at Esquimalt, last from Chili.

Grappler, 2, screw gun-boat, Lieutenant-Commander Alfred P. H. Helby, had, by the last advices from British Columbia, safely arrived at Esquimalt.

Harrier, 17, screw sloop, in No. 2 dock at Portsmouth, is painting up on the completion of her repairs at the hands of the shipwright department, and is ready for immediate commission.

Hero, 91, screw, Commodore George H. Seymour, C.B., has been on shore more than once, owing, it is said, to the set of the tides, but more probably to defective pilotage. The last accounts left her within a short distance of Quebec.

Hind, screw steam gun-boat, from Falmouth, tender to the Russell, 60, blockship, arrived at Plymouth on Wednesday.

Hogue, screw steam coast-guard ship, Captain Reginald J. J. G. Macdonald, has been put out of No. 3 dock at Keyham steam-yard, and placed under the sheers, and has received her bowsprit.

Hornet, 17, screw sloop, Commander Elphinstone, was swung for the adjustment of her compasses on Monday in Portsmouth harbour, prior to going out to Spithead.

Immortalité, 51, screw frigate, in the steam basin at Portsmouth is getting up her lower and topsail yards, and will it is expected early next week test her speed at the measured mile.

Impérieuse, 51, screw frigate, Captain Rochfort Maguire, flag-ship of Rear-Admiral Lewis T. Jones, C.B., was at Talien-Wan Bay on the 23rd of June. The following is an extract of a letter from this ship:—"We arrived on the 17th, with Sir Robert Napier on board, from Shanghai, and the Alfred, with Sir John Michell, both looking as well as ever. The bay is really most beautiful; it is almost surrounded with hills, which, laid out in terraces, are cultivated to the very tops; here and there, in the valleys and nooks and corners, the villages, peeping out from fine clumps of trees; notwithstanding all this, however, it does not seem to be thickly populated, and the fact of there being great scarcity of water confirms my opinion. Great efforts are being made to supply tools to the working parties which are sent on shore to dig wells. Some forty or fifty junks have been detained; they were making all sail towards the Gulf of Pecheli, where they would, I have no doubt, have given a pretty fair account of the whereabouts of the 'barbarians' to the Emperor. The rendezvous of the French troops is at Che-Fow-Taou, a large town to the west of the promontory of Shan-Tung, and due south of Ta-Lien-Hwan Bay. There is good anchorage and a plentiful supply of water and provisions—of course this gives rise to the old story, 'There are those Frenchmen getting the pull of us again.' To listen to these grumblers one would think that the French were always right and we always wrong; if they will only wait they will see with their own eyes who will be best provided with comforts and necessaries during the coming campaign, we or the French."

Industry, Master-Commanding Balliston, having had her defects made good at Woolwich, was undocked on Saturday last, and is ordered to proceed to Deptford, to ship stores for Ascension and Rio de Janeiro.

Landrail, 5, screw gun-vessel, has been commissioned at Woolwich by Commander Edward Field, 1859.

Megæra, 6, iron screw troop-ship, Commander Samuel H. Henderson, arrived at Corfu on the 15th ult. from Malta, with troops, and reached Malta again on the 20th. She left the latter island for England on Friday the 22th ult.

Melpomene, 51, screw frigate, Captain Charles J. F. Ewart, arrived at Malta on the 24th ult. from Gibraltar. She had previously landed the Moorish Ambassadors at Tangiers.

Nile, 90, screw, Captain E. K. Barnard, flag-ship of Sir Alexander Milne, K.C.B., had by the last advices from the station proceeded to Quebec, in order to be in attendance on His Royal Highness the Prince of Wales.

Osborne, 1, paddle steam-yacht, Master-Commander H. K. Bower, has left Portsmouth for the Irish Channel, to be in attendance on the Duke of Somerset and his colleagues.

Pioneer, screw steam-sloop, 350 horse-power, Mr. May master in command, left Woolwich on Wednesday morning, on the engineer's trial of machinery after repairs. The Pioneer has been fitted with peculiar care to join Dr. Livingstone's expedition in the Zambesi, and has been freighted at Woolwich with a heavy cargo of victualling and other stores for the use of Dr. Livingstone and the exploring party who accompany him. The Pioneer anchored at Greenhithe for the adjustment of her compasses, &c., under orders to sail immediately for Plymouth, whence she will proceed in tow or under convoy as far as Madeira, and will be there cast adrift to make her own way towards her destination. Before leaving Woolwich basin she underwent a most rigid examination and thorough survey, to ascertain her capabilities for the long and trying voyage the little ship is about to undertake. Mr. May, R.N., who has taken the command, and who has already served five years with Dr. Livingstone, came home from the Zambesi expressly to take out the Pioneer.

Pluto, paddle steam-vessel, built at Woolwich in 1831, and since employed on the slave-preventive service on the west coast of Africa, has been towed from Woolwich to Sheerness, to be fitted for service as a tug-vessel at that port.

Princess Royal, 91, screw, in the steam basin at Portsmouth, is getting aloft her lower and topsail yards.

Retribution, 28, paddle steam-frigate, Commodore Harry E. Edgell, was at Trincomalee on the 20th July, completing her fitting for the voyage to England. The commodore had made himself very popular during his stay in the port. It was intended to lay the first brick of a new lighthouse to be erected on Foul Point about the end of July, and Commodore Edgell was to perform the ceremony.

Rhadamanthus, paddle, Master-Commander Sturdee, put into Portsmouth on Tuesday to replenish her stock of coal. She has a heavy cargo of machinery on board from Woolwich yard, for ships fitting for the steam-reserve at Devonport. Her topsides are much strained from the effects of the late heavy weather in the Channel. She proceeded on her voyage on Wednesday, and has safely arrived at her destination. We noticed last week that the Dee had been compelled to put back to the Downs, after having in vain contended with the heavy sea running in the Channel; and here again is another vessel of the same class, employed on a similar duty, also forced to bear up for shelter. The officers and men of these particular ships have no easy berth of it. They are out in all weathers, and perform their duties in a manner worthy of all commendation.

Rochester, naval transport, Mr. Dyer, master-commander, having had her defects repaired, has sailed from Chatham with a full cargo of stores for Portsmouth and Devonport Dockyards.

Speedy, new gunboat, from Workington, in tow of the merchant-tug Rescue, has arrived at Plymouth, and has been delivered to the authorities of the Devonport Dockyard.

Spiteful, 6, paddle steam-sloop, has been commissioned at Woolwich by Commander W. C. F. Wilson, 1858.

Supply, steam-vessel, Master Commanding Balliston, left Woolwich on Wednesday for Deptford, to receive a cargo of provisions and other stores for the fleet at Malta and Gibraltar.

Termagant, 25, screw frigate, Captain Robert Hall, had, by the latest accounts, safely arrived at Esquimalt from Chili.

Torch, 5, screw, Commander Smith, which arrived at Plymouth last week, is ordered to fill up stores for foreign service. She has a few dry defects to make good, which it is supposed will detain her three or four days. This vessel has now been in commission ten weeks, and is still in the hands of the dockyard people. There must be "a screw loose" somewhere in reference to her equipment, and the delay which has taken place in her departure for her station should not be passed over without due inquiry.

Valorous, 16, paddle steam-frigate, Captain William C. Aldham, had according to accounts received by the last North American mail, proceeded to Quebec, there to await the arrival of His Royal Highness the Prince of Wales.

The Navy Gazette.

ADMIRALTY, August 28.

It is intimated in this *Gazette* that the distribution of proceed received and tonnage bounty awarded for the schooner Angeline, of Prospect, captured on the 13th of June, 1858, by her Majesty's ship Conflict, will commence on Tuesday next, the 4th of September. The following are the shares due to an individual in the several classes:—

Flag share ...	... £38 12 2		Sixth class	... £6 16 11	
Commander ...	... 91 13 11		Seventh class	... 4 11 2	
Third class ...	... 21 5 9		Eighth class	... 2 5 8	
Fourth class ...	... 13 13 8		Ninth class	... 1 10 5	
Fifth class ...	... 7 12 1		Tenth class	... 0 15 2	

STATIONS OF THE ROYAL NAVY IN COMMISSION.

A piece with the title of "Les Riflewomen, ou Les Volontaires femmes d'Angleterre," has been received at the Théâtre Beaumarchais, Paris.

THE MILITIA.

Anglesea and Carnarvon. Her Majesty has been pleased to direct that, with the view of increasing the efficiency of the service, the Anglesey regiment of militia shall be united to the Carnarvon regiment, so as to form one battalion. The title of this battalion is the Royal Carnavon and Anglesey Rifles, and its strength is as follows:—1 lieut.-colonel, 2 majors, 8 captains, 8 lieutenants, 8 ensigns, 1 adjutant, 1 quarter-master, 1 surgeon, 1 assistant-surgeon, 1 sergeant-major, 1 quartermaster-sergeant, 1 bugle major, 1 sergeant instructor of musketry, 1 paymaster-sergeant, 1 orderly-room clerk, 1 hospital sergeant, 22 sergeants, 22 corporals, 8 buglers, and 644 privates. This change took effect from the 1st ult., but the two wings, Carnarvon and Anglesey, will be called out for training at present separately. The Carnarvon wing of the regiment is under orders to assemble at Carnarvon on the 10th of September for 27 days' training. Several officers and soldiers are at present attached to the head-quarters' staff for a course of preliminary drill, under the command of the adjutant of the regiment.

The following Circular has been issued from the WarOffice to officers commanding regiments of militia:—"War Office, Aug. 25.—Sir, I am directed by Mr. Secretary Herbert to refer you to the fifth paragraph of the Circular 570, dated March 19, 1860, and to that part of the Circular of May 1, 1860, 585, which authorise a charge against the public of ½d. for marking each article of clothing and necessaries, and to inform you that it is not considered advisable that the boots, shirts, and socks which are taken away at the end of the training should be marked in the manner laid down in those Circulars, and that therefore no charge will be allowed for this service for the future.—I have, &c.,—De Grey and Ripon."

The Militia Gazette.

WAR OFFICE, PALL MALL, August 28.

1st or Royal East Middlesex Regiment of Militia—Henry Levett Boscawen Ibbetson, Esq., to be Captain, vice Northey, promoted.

Memorandum—The Queen has been graciously pleased to accept the resignation of the commission held in this regiment by Ensign Edward Steele.

The following appointment is substituted for that which appeared in the *Gazette* of the 24th of August inst.—viz.:

Royal Cumberland Regiment of Militia—Fielding Trimmer, Esq., to be Captain, vice Weston, resigned.

WAR OFFICE, PALL MALL, August 31.

Royal Glamorgan Light Infantry Regiment of Militia—Erasmus Vaughton, Gent., to be Quartermaster from the 29th of June, 1860.

4th or Royal South Middlesex Regiment of Militia—Ensign George Robert Harriott to be Lieutenant, vice King, resigned.

Memorandum—Ensign Robert Fair Sproule, absent without leave from the last training, has been removed from the strength of the Regiment.

Brecknockshire Royal Rifle Regiment of Militia—Crawshay Bailey, junior, Esq., to be Lieutenant.

Northumberland Artillery Regiment of Militia—Frederick Stephen Steele, Esq., to be Captain, vice Stanhope, resigned.

Memorandum—Royal Cumberland Regiment of Militia—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Captain William Henry Weston.

VOLUNTEERS.

METROPOLITAN.

Hon. Artillery Company.—The detachment of this corps stationed at Sandown, Isle of Wight, during the last fortnight left for London on Saturday afternoon. They left Sandown about noon, having sent their baggage on before with an advanced guard. Their splendid band played a march as they left, and again as they entered the old "Towne of Bradinge," where they halted in front of the Bugle Inn, and fell out for 15 minutes. The march being resumed, the band again struck up, and continued to play at intervals during the whole route. Arrived at the Esplanade, Ryde, they halted opposite the Royal Eagle Hotel, and fell out to refresh for half an hour. When the bugle sounded, about 3 p.m., they fell in, and marched down the pier to the strains of the Grenadier's March, discoursed by their band. Having reached the pier head they embarked on board the Princess Royal steamer that had been specially chartered for their transport. As they left the pier for Portsmouth they gave three cheers, which were most lustily and heartily taken up by the numerous crowd who had accompanied them down. During the sojourn on the island there was every evidence of its being an agreeable one. On Tuesday, the 21st inst., they patronised the Theatre Royal, Ryde; and on Thursday last gave an amateur performance at the same place for the benefit of the manager, Mr. J. H. Delafield. The piece selected for their efforts was "Charles II.," and the characters were cast as follows: *Charles II.*, Surgeon Skey; *Earl of Rochester*, Mr. Tapner; *Captain Copp*, Captain Field; *Edward*, Mr. Tingle. On the same evening many of the corps attended a ball given by the Ryde Volunteers, in honour of the 1st and 3rd companies of the Isle of Wight (Ryde) Rifles being presented with silver bugles by the ladies of the town. On Friday evening they gave a concert at Sandown, some of their own band being among the performers. The troop of Horse Artillery attached to the Hon. Artillery Company proceeded to Woolwich on Thursday, under the command of Captain Jay, to draw from Government stores two six-pounder guns, with harness, &c., which have been granted for the use of the troop. The gun division of the Hon. Company, under the command of Lieutenant Blockley, paraded at the Armoury House, Finsbury, on Sunday, and after attending Divine service at the church of St. Mary-le-Bow, Cheapside, returned to head-quarters, and fired a royal salute in honour of the birthday of His Royal Highness the Prince Consort, the Captain-General and Colonel.

London Rifle Brigade.—The butt at the Crystal Palace, erected for the London Rifle Brigade, having been found to require some additions before it will be available for practice, the commanding officer is making arrangements for the use of another butt, at a convenient distance from town, where ball firing can commence without further delay. The exertions of the adjutant to organise a Volunteer bugle band have been attended with the most gratifying success. The band played for the first time at the head of the battalion, on Tuesday last, at the Regent's Park, and when it is considered that, three months ago, few of the Volunteers composing it were acquainted with their instruments, their performance of a few popular marches reflected the highest credit upon them. The brigade prizes will be competed for during the month of October; several of them are of considerable value. The members of this corps have already evinced much interest in, and given encouragement to, rifle shooting. It will be remembered that a handsome silver cup, value 50 guineas, was presented by them to the National Rifle Association, and was shot for at the Wimbledon competition. In addition to this, a sum of 40*l.* was subscribed for, and paid to the general fund of the Association.

2nd City (Spottiswoode's) Rifles.—On Sunday afternoon, shortly before three o'clock, this corps, Captain G. Spottiswoode, Commandant, marched to Westminster Abbey, preceded by their band, to attend Divine service. The abbey was very crowded, especially in the transepts, and the service was altogether one of great interest.

1st (Victoria Rifles) Middlesex.—This corps still manages to keep up a very creditable muster, the crack of the rifle being heard all day long, and under every variety of weather, in their spacious practice-ground at Kilburn. The evening parades are now chiefly devoted to the bayonet exercise, in which the men take the greatest interest. A strong desire exists among the Victoria Rifles to develope the study of this most formidable weapon upon the principles of the fencing school, whereby the musket and bayonet become capable of being wielded with nearly the same skill and *finesse* as the foil itself.

20th (Euston Square) Middlesex.—This corps will parade in full dress this afternoon, at the Euston Station, and, if the weather is fine, will, under the command of Lieut.-Colonel Bigge, march from thence at 4·30, accompanied by its band, to Hampstead. The progress which the corps has made, and is still making, is highly satisfactory. Its present numerical strength is 600, which is daily increasing. From Sir William Cubitt's establishment there has been an increase of 90 men, 70 of whom have already been sworn in by the lieut.-colonel. There is at the present time a company forming from the following districts: Hampstead Road, Camden Town, Regent's Park, and Haverstock Hill, from which a great increase is expected. This company will be allowed to elect its own officers. Mr. M'Sweney, has already been appointed the lieutenant.

22nd (Queen's Westminsters) Middlesex.—Earl Grosvenor and the officers of this corps, having left town, it has been considered expedient to discontinue the meetings of the Volunteers for the present season, and the members, therefore, will not re-assemble for regular drill for several weeks.

29th (North) Middlesex.—Captain Wallen Jones, late of the 84th Regiment of Foot, has been nominated by the council of this corps, for recommendation to Her Majesty, as the Adjutant of the regiment. Sergeant Moreton has also been appointed as the permanent Sergeant-Major of the North Middlesex Rifles, and new head-quarters have been taken at Kent Lodge, Park Village, East Mornington Road, in close proximity to the new drill ground in the Mornington Road, Regent's Park. The Marylebone and St. John's Wood company is fast progressing towards completion. They drill on Tuesday and Thursday evenings in the spacious carriage factory, Lisson Grove. This corps having, in consequence of the Saturday half-holiday movement, recently received an accession of two most effective companies, namely, the Marylebone and St. John's Wood company, composed of the young men attached to several West End linendrapery firms, and Messrs. Brooks and Co., pianoforte manufacturers, intend to c lebrate this day, which is the first day on which the Saturday half-holiday movement commences amongst the large West End establishments, by a march out with their two new companies, in full uniform, to Cricklewood, where refreshments will be provided. The regimental orders are that the corps shall assemble at its present head-quarters, at four o'clock on Saturday afternoon, and march to the new drill ground.

36th (Paddington) Middlesex.—This corps is progressing very favourably, new additions in members being of daily occurrence. Classes are now being formed for rifle practice, under the tuition of an experienced musketry instructor; and from the assiduity with which the members attend to the drill, it is confidently expected that the corps will take a very prominent part in the next competition for prizes given by Her Majesty and the National Rifle Association. A series of prizes are being formed by the committee. G. J. Penny, Esq., has offered one of 5*l.* 5*s.*; and R. Boden, Esq., an Enfield rifle, value 5*l.* 5*s.*, to be competed for in the usual manner. Considering the advantages which will accrue from training the youth of the Metropolis to the use of arms, and the physical good to themselves by undergoing a course of strict drilling, the committee have decided upon forming a cadet company, to be attached to the corps, the annual subscription to be 1*l.* 1*s.*, and the uniform not to exceed 3*l.*

Tower Hamlets Rifles.—On Wednesday evening numerously attended public meeting was held at St. Peter's School-room, Essex Street, Mile-end Road, for the purpose of furthering the objects of the Tower Hamlets Rifles, No. 2 company, and more especially to increase the effective strength of the 3rd company. The proceedings created great interest in the district in which the meeting was held, a large body of the 2nd company having marched to the place of meeting headed by the band of the Scotch Fusilier Guards. Captain Hammart in the chair. The chairman expressed his gratification at the efficiency attained by the members of the corps. It was a capital thing for young men willing to undergo a course of military training. Lieutenant Gole proposed the first resolution, "That this meeting is of opinion that the vast district comprising the Tower Hamlets is, in point of numbers, inadequately represented in the Volunteer movement, and is therefore extremely desirous of promoting all efforts to increase the numerical strength of the 2nd Tower Hamlets Volunteer Rifle Regiment." The Rev. Mr. Igard seconded the motion, which was supported by the Rev. Mr. Barry and unanimously agreed to. Captain Towy then moved the next resolution, "That, in order to furthur the objects of the foregoing resolution, this meeting earnestly invites the young men of Mile-end at once to enrol themselves effective members of

Digitized by Google

the 3rd Company of the 2nd Tower Hamlets Volunteer Rifles." Mr. King seconded the motion, which was carried with great cheering. Several young men having enrolled themselves, the proceedings closed with a vote of thanks to the chairman.

WORKMEN'S VOLUNTEER BRIGADE.—This corps is rapidly increasing. It has already an amateur band of drums and fifes, who have attained great excellence under Bandmaster Farley. Nearly 250 men have enrolled their names within the last ten days. The head-quarters of the brigade are in Great Tower Street, City. The first drill takes place this day, September 1st.

LONDON VOLUNTEER FUSILIERS.—A circular has been issued inviting co-operation in the formation of a Volunteer corps under this title, the specific object of its promoters being to afford to gentlemen of the various professions, as well as those engaged in business occupations, means of joining in the laudable object of defending the interests of their common country at as small a pecuniary outlay as is compatible with military exterior. The uniform of the proposed corps, scarlet cloth tunics with blue facings, blue cloth trowsers with red stripes, has a most martial appearance; the cost of the whole is guaranteed not to exceed five guineas, while the annual subscription being one guinea, places it within reach of the many. From the preliminary arrangements now being carried out by the honorary secretary, an officer of twenty years' experience on active service, it is anticipated that this corps will rank with the most efficient of the Volunteer force. The minimum height is stated in the circular to be five feet six inches, and the temporary office is 36, George Street, Hanover Square.

CHESHIRE.

MACCLESFIELD RIFLES.—On Saturday, the first and second companies were each presented with a handsome silver bugle —one a present from the mayor of the borough, and the other a graceful token of the interest taken in this great national movement by the ladies of Macclesfield. The presentation took place in the Public Park, and in the presence of a large concourse of the inhabitants of the town and neighbourhood. In addition to the two companies forming the Macclesfield corps, there were on the ground the corps from Congleton, Captain Sir Charles Shakerley; Leek, Captain Badnall; and the Alderley and Wilmslow corps, Captain E. H. Grey. Captain Pearson, 1st company of Macclesfield Rifles, commanded the corps, and put them through a variety of evolutions, including skirmishing and firing, the whole of which were performed in a most creditable manner. At the conclusion of the manœuvres, the corps formed three sides of a square in front of a raised platform, and Mis E. Clarke, in the name of her grandfather, the Mayor, presented a silver bugle to the first company of Macclesfield Volunteers. Captain Pearson, on behalf of the officers, and non-commissioned officers and members of the company, briefly acknowledged the gift; and, after a few remarks from the Mayor, Miss Marienne Brocklehurst, the daughter of the member for the borough, presented to the second company, on behalf of the ladies of Macclesfield, a handsome silver bugle. Captain T. A. Brocklehurst, having received the bugle, briefly responded on behalf of the company; after which hearty cheers were given for the Queen, the ladies of Macclesfield, for the Mayor, and for the officers and members of the Congleton, Leek, and Alderley and Wilmslow Rifle Corps.

DEVONSHIRE.

PLYMOUTH RIFLES.—*The Horse Guards* have appointed a board, before which Major Duperier has to pass prior to his undertaking the office of Adjutant of the Plymouth battalion. Colonel Ayles of the Royal Marines is nominated chairman of the board. Major Duperier has been very active in the formation of the Plymouth corps. It is not generally known that the Lord-Lieutenant of the county offered the colonelcy of the battalion in the first place to Major Duperier, and that after he had declined the appointment it was offered to Lord Valletort, who holds the command. The battalion includes the corps connected with Plymouth, Devonport, Stonehouse, and Tavistock.

ESSEX.

COLCHESTER RIFLES.—The Colchester Volunteers will compete next Thursday in Wyvenhoe Park, near Colchester, for a prize cup given by Mr. J. Gurdon Rebow. The ranges will be at 600 yards, five rounds to be fired; and ties will be shot off (two shots each) at 900 yards. The cup will be presented by Lady Georgiana Rebow, at three p.m., and the grounds are to be thrown open to the general public, for whom various amusements will be provided.

GLOUCESTERSHIRE.

THE BRISTOL AND GLOUCESTERSHIRE ARTILLERY AND THE CITY OF BRISTOL RIFLES.—These corps were to have been inspected on Saturday last by Colonel M'Murdo, C.B., Inspector-General of Volunteers. Great preparations had been made for the event. The Duke of Beaufort dispatched the Stapleton and Doddington troops of the Royal Gloucestershire Hussars to keep the ground. The ladies of Clifton and the vicinity had subscribed for some handsome silver bugles, which were to have been presented to the two corps by the Mayoress (Mrs. Bates) and Mrs. General Whish. The weather proved so unpropitious that the inspection was abandoned. The great Rifle Volunteer review, to take place at Gloucester on the 18th of September, is likely to be remarkable as a military display. Already about 40 corps have intimated their intention of attending, and to this number an addition of 40 more is expected. They will come chiefly from the county of Gloucester and surrounding counties. The Government has appointed Major Dick, Assistant-Inspector of Volunteers, to superintend the details; and excursion trains on the Great Western, Midland, South Wales, and Hereford, Ross, and Gloucester Railways will be run. The Gloucestershire Hussars will attend the review. The Duke of Beaufort has intimated his intention of "franking" the Badminton troop to and from Gloucester on the occasion.

CHELTENHAM RIFLES.—This corps was inspected by Colonel M'Murdo, Inspector-General of Volunteers, and Colonel Dick, assistant-inspector of the district, on Wednesday, in the College-grounds, kindly given for the occasion by the directors. The day being unusually fine, a very large number of visitors were present. All the four companies mustered, to the number of 250. Colonel Parnell, C.B., commanded, and put the companies through the movements, all of which the Volunteers executed with a quickness and military precision that surprised every one present, not excepting the Inspector-General, who at the conclusion of the evolutions addressed the companies, saying how very much pleased he was to find such a very fine body of Volunteers so well drilled and such good soldiers. He was pleased to see all the four companies together, and strongly recommended them to form themselves into a separate battalion.

HAMPSHIRE.

THE 1ST (SOUTH) HANTS ARTILLERY.—This corps assembled at Woolston on Saturday afternoon, and placed their guns in a position in a battery they have erected on a piece of ground the use of which has been kindly granted them by Mr. H. Buchan, of Southampton. The weather was very unfavourable, but this did not prevent the Volunteers mustering in good force under their respected captain, Mr. S. M'Naghten, of Bitterne Manor. The corps afterwards dined together at the Cliff Hotel to celebrate the event, and at the same time to make a wedding present to their drill instructor, Sergeant William Spinks, of the 10th brigade of the Royal Artillery, which consisted of an elegant tea and coffee service, spoons, &c., bearing a suitable inscription.

3RD HANTS (CIVIL SERVICE) ARTILLERY CORPS.—A. B. Sturdee, Esq., having received his commission from the Lord-Lieutenant of the county, read it to the corps, which had been drawn up for the occasion in the dockyard, previous to drill, on Tuesday evening. The efficiency of the men is progressing very rapidly, as they are very attentive, and exhibit a great desire to become proficient in the various drills. Tuesday and Thursday evenings are appointed for that purpose, although many of the artisans attend on other nights, which are voluntary drills. Four captains have been elected and were sworn in before Dr. Garrington, who is mayor of Portsmouth, and whose appointment as surgeon to the corps, gave the greatest satisfaction, and was carried by acclamation. The Rev. J. Phelps, chaplain to the dockyard, has been elected chaplain to the force. Candidates have been proposed for lieutenants, and Thursday last the requisite number of sergeants was elected. On the occasion of electing officers for the corps, the drums of the old dockyard Volunteers of 1803 were displayed, recalling recollections of that period when a dockyard brigade of great efficiency was raised. We hope very soon to see the present corps in their uniform, as the Lord-Lieutenant has approved of the slight addition proposed to adapt it to the Civil Service.

5TH HANTS RIFLES.—A general meeting of the effective members of this corps was held on Monday evening at the Guildhall, Portsmouth, for the purpose of electing officers for the 4th company, which has just been completed. The captain-commandant is now entitled to rank as a major, by which means a vacancy occurs for a captain in the first company. Lieutenant Ford was elected to supply this vacancy, and the senior ensign was elected to supply his place as lieutenant. The new officers elected were Messrs. Payne (of the National Provincial Bank), Palmer, Lush, and Sayer, all of whom will be ensigns, the previous ensigns rising to lieutenants by seniority.

KENT.

2ND KENT ARTILLERY VOLUNTEERS.—On the occasion of the opening of a public recreation ground at Faversham, a few days ago, the ladies of that town and neighbourhood presented a set of drums and fifes to this corps. The presentation, which consisted of ten fifes, three small drums, and one large drum, was confided to the Hon. Mrs. Milles, who expressed the pleasure of herself and the other lady subscribers at the day's proceedings, their hope being that, whether in peace or war, the instruments would serve the corps in its duty. Captain Hall having acknowledged the gift, in a brief but suitable speech, the instruments were played upon; after which the mayor of the town proposed three cheers for the Hon. Mrs. Milles, Mrs. Captain Hall, and the ladies generally, which were heartily given, and the interesting proceedings terminated.

4TH (WOOLWICH) KENT RIFLES.—This corps has commenced target practice, which will be carried out at the Government practice range, Plumstead Marshes, on Monday and Wednesday evenings, in accordance with the regulations of the Hythe School of Musketry—viz., the ranges to be 150, 200, 250, and 300 yards.

9TH (PLUMSTEAD) KENT ARTILLERY.—The members of this corps have made rapid progress in drill and gunnery practice at the new battery erected on Plumstead Common, under the direction of an experienced non-commissioned officer of Royal Artillery.

13TH (GREENWICH) KENT.—The commanding-officer of this corps has intimated his intention of raising a company of cadets, formed of youths between the ages of 12 and 16. Already 20 names have been received, the annual subscription being fixed at 10*s.* 6*d.* A similar company is also now forming for the Hatcham (New Cross) Rifle Corps, the ages of the young gentlemen being fixed at between 14 and 16, and the annual subscription to be 5*s.*, with a cost of 1*l.* 18*s.* for clothing. When formed, this company is to be attached to the 1st Surrey Rifles.

ROYAL ARSENAL RIFLES.—In accordance with arrangements stipulated between the commanding officers of the corps and Viscount Sydney, Lord-Lieutenant of the county, a strong body of the Royal Arsenal Volunteers at Woolwich mustered on Saturday at three o'clock, for the purpose of a general inspection by his lordship. At half-past four o'clock Lord and Lady Sydney arrived at the Arsenal, and the inspection commenced shortly after. The men were drawn up in line to the number of about 1500 of all ranks, and extended the entire length of the avenue from the paper factory to the archway at the entrance of the royal gun factories. The Artillery Brigade was commanded by Capt. Ellis, in the absence of Colonel Fullom on leave, and the battalions of Rifles were in command of Colonel Parkyn and Colonel Anderson. His lordship, accompanied by Colonel Tulloh, brigadier of the corps, Colonel Morris, Colonel Luard, and Major Oram, rode up to the front of the column, upon which the men fell into open order, and presented arms. The three bands united and struck up the national air. His lordship and staff then rode down the front of the line, and went through the inspection, carefully examining the appearance and bearing of each man; and, having assembled the commanding officers, he desired them to make known the satisfaction which he had derived from the inspection of the corps, established for the protection of the Royal Arsenal, and to assure them he was confident that the trust which Her Majesty had so willingly confided to them would never be misapplied or disgraced by one among them. He could, he said, but admire and extol their ready and persevering loyalty, even under the adverse state of the weather, when so many were assembled, which was a good guarantee for their honesty of purpose. The corps then marched past, and proceeded up Wellington Street, along the front of the Artillery Barracks, and returned by the old Charlton Road, when they again asembled in the Arsenal and were dismissed.

The Kentish Volunteer *fête*, announced to take place in the park of Sir T. M. Wilson, at Old Charlton, on the 5th inst., has been postponed until the 12th.

LANCASHIRE.

LANCASHIRE RIFLES.—On Saturday the 1st battalion, under command of Lieut.-Colonel Bousefield, which, for the last month had been encamped at Blundell Sands, Crosby, near Liverpool, received orders to break up the camp and return to quarters. The day was fine, and the novelty of "striking the tents" attracted a large number of spectators. Before breaking up, the corps was addressed by Colonel Bousefield, who in a few words complimented the men on the uniform steadiness and aptitude they had evinced in discharge of the duties of camp life. They had shown, he said, an example to their fellow-Volunteers which every corps in the kingdom might with propriety follow. The advantages of such a course of training, he said, were numerous. It was in discharging the duties of the camp that an important portion of their military training must necessarily be acquired; and in camp they qualified themselves for the performance of outpost and sentry work. Considering that they had had extremely bad weather, it must be regarded as something to speak, if not to boast of, that they, civilian soldiers, had voluntarily left their comfortable homes to rough it under canvas; a fact which of itself was sufficient to prove that the Volunteer force is composed of men who in the hour of need were prepared and resolved to do their duty.

Lieut.-Colonel Gladstone and Major Tinley, of the 2nd battalion Lancashire Rifle Volunteers, are vigorously exerting themselves to render the Hightown Shooting-ground a model establishment. Already they have erected 15 perfect ranges, from 300 to 1100 yards in length, and they purpose erecting 15 more. If necessary the range can be increased to a mile with safety. In order to enable Volunteers to render themselves competent to shoot for the prizes at the county meeting in October next, the terms for the privilege of practising at Hightown have been arranged on a very liberal scale. Honorary members pay 2*l.* 2*s.* per annum; honorary effective members (that is, persons connected with any corps) pay 1*l.* 1*s.* only. Members of the 2nd battalion pay 10*s.* 6*d.* per annum. The object is to make the ranges as generally useful as possible. Very comfortable and healthy arrangements have been made for the early encampment of the 2nd battalion at Hightown.

On Saturday upwards of 800 Volunteers from Lancashire and Cheshire accepted the invitation of the Manchester, Sheffield, and Lincolnshire Railway Company, who gave them free and comfortable conveyance to Hull and Grimsby and back, with most hospitable entertainment during their visit.

LINCOLNSHIRE.

HOLBEACH RIFLES. — This corps assembled for ball practice a few days ago, when the result was most satisfactory, the number of points obtained by the three successful competitors being 30, 19, and 18. The average number of each member was 15½. There were also present detachments of the Boston, 11th Gloucestershire, Cirencester, and Westminster Rifle Corps on the ground.

NORTHAMPTONSHIRE.

PETERBOROUGH RIFLES.—In a short time this corps will be presented with a silver bugle. The ceremony of the presentation is to be performed by Lady Vernon and the Hon. Mrs. C. W. Fitzwilliam. A butt is being erected for rifle practice at the expense of the Hon. G. W. Fitzwilliam (captain of the corps) on the Caistor Fields, in the neighbourhood of Peterborough.

NOTTINGHAMSHIRE.

NOTTINGHAM (ROBIN HOOD) RIFLES. — This corps has advanced to a very efficient state with respect to drill. The ladies of Nottingham have commenced a subscription for the purpose of presenting the nine companies of the corps with a silver bugle each, with banneret and colours; also with a horse for the use of the Adjutant. The amount of the funds raised now exceeds 130*l.*, but no specific date has yet been named for the presentation to take place.

STAFFORDSHIRE.

5TH (WOLVERHAMPTON) STAFFORDSHIRE RIFLES.—On Tuesday evening the 1st company was inspected by Lieut.-Colonel Vernon, Commandant of the 4th battalion of Staffordshire Rifle Volunteers, with a view to the company being authorised to commence rifle practice. Mr. Bernard Walker, a member of the company, who has undergone a course of training at Hythe, and has superintended the musketry instruction, reported 32 members of the company as having passed through the necessary preliminary drills, and they were called out, and went through the loading and firing practice with a promptness and accuracy which drew from Colonel Vernon a warm encomium on the men and their instructors. Owing to some delay in the official inspection of the Staffordshire Volunteers, the War Office has authorised Colonel Vernon to pass any companies in his battalion for rifle practice, and this was the first, being No. 1 of the battalion, so passed. In about a fortnight the number who passed will be increased by fully one-half. The practice-ground is at Wightwick, three miles from Wolverhamptom, and the range is only 250 yards, great difficulty having been experienced in finding a ground for safe practice in the vicinity of the town.

SUFFOLK.

3RD (WILFORD) SUFFOLK RIFLES.—On Friday last this corps was inspected by Lieut.-Colonel Ibbotson. Although the day was very unfavourable, the corps in their regimental great-coats marched to their practice ground on Bromeswell Heath, nearly three miles from Woodbridge, and were put through a variety of evolutions by Captain Brooke, the commanding officer. Colonel Ibbotson expressed himself

Digitized by Google

extremely pleased at the progress made by the corps, who have only been up since January last.

SURREY.

1ST SURREY.—The 1st Surrey Rifles assembled on Thursday evening in the grounds of the Surrey Cricket Club, Kennington Oval, for the purpose of marching out. Owing to the extreme fineness of the weather there was a very numerous attendance of members. Prior to the assembling of the corps, the newly-formed band of the regiment, under the direction of the eminent composer, Mr. J. G. Callcott, bandmaster, delighted the company present by playing numerous popular selections, one being a new march, composed by the bandmaster on the patriotic song of "Britons to arms!" At half-past six o'clock the command "Fours right" was given, and the regiment, under the command of Major W. P. Jones (late 5th Fusiliers), headed by the band, with the cadet company in the rear, marched through the Clapham Road, &c., to Clapham Common. A short halt here took place, after which the corps returned through Brixton, &c., to their place of starting, and were there dismissed.

19TH (LAMBETH) SURREY RIFLES.—This corps paraded at 10 o'clock on Sunday morning last, and marched to St. Giles's, Camberwell, to attend Divine service, and hear a discourse from the Rev. W. Cable. The text chosen for the occasion was the 3rd chapter, 17th verse of the 2nd Epistle to the Corinthians, "And where the spirit of the Lord is, there is liberty." The main argument of the speaker was to draw attention to the liberty enjoyed by the people of this country, morally, socially, and politically. That such liberty was only to be retained by a perfect sense of justice, right, and honour, and this must be defended with an exceeding jealous heart and ready hand. He drew strong attention to the body of Volunteers then before him, and strongly advocated the necessity of those who were unable to devote the time to learning the art of "defence not defiance," to assist the movement—as he said, a peace movement—pecuniarily. He observed that if this had been made the means of forming a body of men into a force for the purpose of aggression and destruction, he as a minister of the Gospel should certainly have set his face against it; but as he saw nothing but peace in the great national feature of the day, he went with it in every way. After an exhortation to the battalion not to forget their duty to God, to the Queen, and their country, the Volunteers marched back to head-quarters, amidst immense crowds of the populace. Major Roupell commanded the battalion in person on this occasion.

SUSSEX.

BRIGHTON RIFLES.—It is announced that several prizes are shortly to be given to the Brighton Volunteers in rifle competion. Mr. White, the new M.P., has offered a ten-guinea cup to be shot for. The vicar, the Rev. H. M. Wagner, promises two prizes—a twelve-guinea and a six-guinea rifle. Mrs. Lushington offers a five-guinea rifle, and Mr. E. Bright intends giving a silver cup.

On Saturday a rifle contest took place near the village of Rottingdean, Sussex, on the property of Mr. Eliot Macnaghten, of Her Majesty's Indian Council, who kindly gave permission for the erection of targets. The prizes competed for were two silver cups, presented by Mr. Richard Ravenhill, the engineer, and Mr. James Allan, a managing director of the Peninsular and Oriental Steam Navigation Company, respectively. The competitors were members of various Volunteer corps, West Kent, Middlesex, Queen's Westminster, Cambridge University, Surrey, and Sussex, under the command of Lieut.-Colonel Hillyard, of the 3rd Kent Corps. The weather was extremely unpropitious, but the shooting was on the whole satisfactory. Mr. Ravenhill's cup was won by private Hackett, of the 1st Kent battalion, and Captains Rucker and Morris, also of the 1st Kent battalion, tied each other for Mr. Allan's cup, the deciding shot being in favour of Captain Rucker. A second prize in the latter match, consisting of a beautiful statuette, presented by Captain Vacher, of the Queen's Westminsters, accordingly fell to Captain Morris. The ranges shot at were 200, 300, and 400 yards. About 50 picked men of the Naval Reserve, by permission of Captain Willoughby, R.N., kept the ground, and during the day shot for a handsome rifle, which was carried off by William Page, the wearer of several medals, who was lustily cheered and afterwards chaired by his gallant comrades. This interesting meeting was organised by Messrs. Olding and Bayley, members of the 3rd Kent Volunteers (Blackheath and Lee), who gave a similar entertainment about a month since in the same neighbourhood.

WARWICKSHIRE.

WARWICKSHIRE RIFLES.—The first official inspection of the Birmingham battalion took place on Monday evening in Calthorpe Park by Major Dick. Eleven companies mustered, under the command of Major Mason. The inspection and review in the park having terminated, Major Dick addressed the corps. He said:—"I have pleasure in expressing my congratulation to-day, for you have undoubtedly performed the movements in a very satisfactory manner. Your conduct in line has been admirable, your manual and platoon exercise has been very excellent, and quite calculated to prepare you for that firing practice to which I consider you equal. This is the first occasion on which I have had the honour of inspecting a corps in the district which has been allotted to me, and I shall be glad to find every corps under my inspection equal to you. I hope that you will go on as you have begun, in which case you will become a most efficient corps." This address was received with much applause, and the battalion immediately afterwards marched back to Bingley Hall. Adjutant M'Innis, who was thrown from his horse just previously to the arrival of the inspecting-officer, received severe injuries. Although not absolutely in danger, he lies in a precarious state.

WORCESTERSHIRE.

WORCESTERSHIRE RIFLES.—The Worcestershire Volunteers, which consist of eighteen companies, have been constituted two battalions—No. 1, consisting of 10 companies, under the command of Lieut.-Colonel Knight, M.P.; and No. 2, consisting of eight companies, commanded by Lieut.-Colonel Scobell. On Saturday a meeting of captains was held at Worcester to take steps for acquiring some proficiency in battalion drill, preparatory to the review at Glocester, at which the two battalions will attend. The Stourport company have commenced rifle practice at targets placed on Hartlebury Common. The other Worcestershire corps continue steadily their regular drills.

STOURPORT RIFLES.—On Monday the members of this corps had a general muster for the purpose of being "officially" inspected by Lord Lyttelton, the Lord-Lieutenant of the county. At 7 o'clock his lordship came on the ground, accompanied by Lieutenant-Colonel F. W. Knight, M.P. for the western division of the county, when the company was drawn up in line in review-order to receive them. After the usual salute, the lord-lieutenant and the lieutenant-colonel went down the ranks and closely inspected the men and their equipments. The company were then put through their manual and platoon exercises, and some field evolutions, concluding with skirmishing, which was performed most admirably, and showed how much attention the men had paid to this part of their drill. At the conclusion the lord-lieutenant and lieutenant-colonel addressed the men and complimented them on their proficiency.

YORKSHIRE.

THE YORK RIFLES.—Some short time after the formation of the rifle corps at this place, Lady Mary Thompson, the wife of Leonard Thompson, Esq., of Sheriff Hutton Park, enrolled herself as an honorary member, and being the first lady who had done so, she consequently became the lady patroness of the corps. To mark their appreciation of this chivalric conduct on the part of the above estimable lady, the non commissioned officers of the first company presented her on Thursday last, at her residence, with a beautiful set of cross and waist belts, pouch, &c., made of blue silk velvet, trimmed with silver lace, and mounted with sterling silver emblems of the corps, manufactured by Mr. Cooper, saddler, of York. Her ladyship expressed herself highly pleased and gratified at the feelings that had prompted so munificent a mark of their approval of her conduct, and she then presented to the corps a large silver cup to be shot for at the ensuing rifle contest to be held in York in the month of October next. After a photographic picture had been taken of the party present, by Mr. Draffyn of York, they were all invited to dine at the hall. The repast was a most sumptuous one, and evinced the most generous liberality on the part of the worthy host. Earl Fitzwilliam, the brother of Lady Mary Thompson, and the Lord-Lieutenant of the West Riding, was present, and during the course of the evening he expressed his desire to have a review of the Yorkshire Volunteers at York. The hint will be acted upon, and energetic measures have been taken to hold the gathering about the third week in September.

THE 3RD WEST RIDING OF YORKSHIRE (BRADFORD) RIFLES.—This corps has been engaged in sections in ball-practice at Spring Wood, Bowling; and there is every reason to believe that as the members of the corps have displayed great diligence in learning their drill exercise, so they will not relax in their efforts to become good shots. A scheme of competitive prize shooting has been arranged for the battalion upon the following bases:—The five best shots of each company (there are six companies) to shoot for three prizes, value respectively,—1st, 25*l.*; 2nd, 15*l.*; 3rd 10*l.* The best shot of each company to get a prize, value 3*l.*; also a silver medal, the size of a florin, to be attached to the breast with scarlet riband, and having on one side the Queen's effigy, and on the other the Bradford arms. Medal to be held by the winner while best shot of his company. Badges as follows:—1. Best shot of regiment,—crossed muskets embroidered in gold with gold crown above. 2. Best shots of companies,—crossed muskets, embroidered in gold. 3. Those men who get seven points in the first class to be called marksmen,—crossed muskets embroidered in silver. The first and second prizes to be shot for at 600 yards, five rounds each man. Should the winner of the first, second, or third prize be the best shot of his company, the third prize to go to the second best shot of his company—the medal to the best shot. The best shot of each company to challenge the best shot of each company in any regiment in the West Riding for a sweepstake, to be subscribed for as follows:—By officers, non-commissioned officers, and privates of each competing regiment—captain, 1*l.*; subalterns, 15*s.*; best shot, 10*s.* At the above rate the sweepstakes amount to 3*l.* a company. The first, second, and third prizes, amounting to 50*l.*, have been given by Mr. Titus Salt, M.P. for Bradford, who has promised a similar sum to be shot for next year. Major S. C. Lister, Commandant, presents the prize for the best shot of each company, and the medals and badges are given by the officers of the companies. In addition to the nine prizes to be shot for in October, as already stated, J. P. B. Westhead, Esq., M.P., has announced his intention of adding another prize, consisting of a silver cup of the value of 20*l.*

The Volunteer Gazette.

WAR OFFICE, PALL MALL, AUGUST 28.

The following is substituted for what appeared in the *Gazette* of the 21st of August, 1860:—

Warwickshire Rifle Volunteers—2d Battalion—Edward Edwards, late Sergeant-Major in the Scots Fusilier Guards, to be Adjutant, from the 15th of May, 1860.

1st Manchester or Lancashire Rifle Volunteers—Lieutenant Robert Bridgford to be Captain, vice Samuel, resigned; Ensign Andrew Stirling to be Lieutenant, vice Glover, resigned; Ensign Thomas Walker Nelson to be Lieutenant, vice Bridgford, promoted; Henry Hartwright, Gent., to be Ensign, vice Stirling, promoted; James Abraham Wilson Teale, Gent., to be Ensign, vice Nelson, promoted.

3rd Oxfordshire Rifle Volunteer Corps—John Caparn, M.D., to be Hon. Assistant-Surgeon.

2nd Kincardineshire Artillery Volunteers (Johnshaven)—Hercules Scott, Esq., to be First Lieutenant.

Wiltshire Volunteer Rifle Corps—3rd Company—The Rev. Charles Pitt, Clerk, to be Hon. Chaplain.

19th Middlesex Rifle Volunteer Corps—Kingston George Woodham, Gent., to be Lieutenant; Alfred Allnutt, Gent., to be Ensign.

20th Middlesex Rifle Volunteer Corps—James Brewster, Gent, to be Ensign.

38th Middlesex Rifle Volunteer Corps—Francis Carr Beard, Gent., to be Assistant-Surgeon.

The following is substituted for the notice which appeared in the *Gazette* of the 24th inst., with reference to the appointment of Captain Fotheringham:—

Lieutenant John Fotheringham to be Captain.

Kent Artillery Volunteers—9th Corps, 1st Brigade—William George Dawson, Gent., to be First Lieutenant, vice Tongue, promoted. 1st Corps, 1st Brigade—Captain William Rosher to bear the title of Captain-Commandant; First Lieutenant George Edward Sharland to be Captain; Second Lieutenant Medhurst Albert Troughton to be First Lieutenant, vice Hilder, transferred from the 2nd to the 1st Company.

Kent Rifle Volunteers—1st Corps, 3rd Battalion—Captain William Moore to bear the title of Captain-Commandant. The Christian names of Ensign Cutbush, commission gazetted 21st of August, should have been "Horatio Richard," instead of "Horace."

4th Battalion of Staffordshire Rifle Volunteers—30th Company—Ensign James Prior to be Lieut., vice Stubbs, promoted; Thomas Evans, Gent., to be Ensign, vice Prior, promoted; the Rev. Edward John Wrottesley, Clerk, to be Hon. Chaplain.

1st Hampshire Mounted Rifle Volunteer Corps—William James Jamieson Higgins, Esq., to be Lieut.; Charles Sartoris, Esq., to be Ensign; George Joseph Perry, Gent., to be Hon. Assistant-Surgeon.

15th Derbyshire Rifle Volunteers—Lieut. Robert Edward Wilmot, to be Captain; Ensign Lawrance William Reynolds, to be Lieutenant; William Thomas Edward Cox, Esq., to be Ensign.

1st Surrey or South London Rifle Volunteer Battalion—The Rev. Daniel Moore to be Honorary Chaplain.

The following appointment is substituted for that of Captain John "Ouchterlorry," which appeared in the *Gazette* of the 19th of June last:—

20th Company of Surrey Rifle Volunteers—Capt. John Ouchterlony (Royal Madras Engineers), to be Captain.

The following appointment is substituted for that of Nathaniel "Charles" Alexander, Esq., which appeared in the *Gazette* of the 14th inst.:—

8th Surrey Rifle Volunteers—Nathaniel Combermere Alexander Esq., to be Ensign.

Wrentham 15th Suffolk Rifle Volunteer Corps—Octavius William Hoffman to be Hon. Assistant-Surgeon.

WAR OFFICE, PALL MALL, AUG. 31, 1860.

Honourable Artillery Company of London—Lieutenant John Blockley to be Captain; Ensign Joseph Eglese to be Lieutenant.

Memorandum—The 1st Battalion of Essex Rifle Volunteers, of which Sir Claude William Champion de Crespigny, Baronet, was Gazetted Lieutenant-Colonel on the 5th of June last, consists of the 1st, 2nd, 3rd, 4th, 6th, 7th, 10th, 11th, 17th, and 18th Companies, and the 2nd Battalion, of which Major Charles Capper was Gazetted Lieutenant-Colonel on the 22nd of June last, consists of the 5th and 9th Companies.

11th Middlesex Rifle Volunteer Corps—John Hamilton Thompson, Gent., to be Adjutant from the 14th May, 1860.

20th Middlesex Rifle Volunteer Corps—Ensign Charles Sole to be Lieutenant, vice Houghton, promoted.

36th Middlesex Rifle Volunteer Corps—Lieutenant-Colonel John Ward, late 91st Regiment, to be Captain.

1st Gloucestershire Artillery Volunteer Corps—Henry William Barlow, Esq., to be Captain, vice Egerton, resigned.

4th Brecknockshire Rifle Volunteers (Hay Sub-Division)—The Reverend William Latham Beavan, Clerk, to be Honorary Chaplain.

1st Newcastle-upon-Tyne Rifle Volunteers—John Watson, Gent., to be Honorary Assistant-Surgeon.

Memorandum. The Queen has been graciously pleased to accept the resignation of Assistant-Surgeon Thomas Fothergill McNay, in the 1st Newcastle-upon-Tyne Rifle Volunteer Corps.

7th Berks Volunteer Corps—William Walker, late Captain 69th Regiment, to be Lieutenant; Edward De la Motte to be Ensign.

20th Cornwall Rifle Volunteers—Samuel Borlase, Esq., Major in the Cornwall Rangers Militia, to be Captain.

Kent Artillery Volunteers—1st Brigade—Captain-Commandant William Braham Robinson, to be Major.

1st Corps—1st Brigade—Edward Bryant, Gent., to be Second Lieutenant, vice Troughton, promoted.

19th Lancashire Artillery Volunteers—John Isaac Mawson, Esq., to be Captain.

2nd Manchester or 28th Lancashire Rifle Volunteers—Robert Fleming Denham, Gent., to be Ensign, vice Langton, resigned.

3rd Manchester or 40th Lancashire Rifle Volunteers—Lieutenant Isaac Hall to be Captain.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Assistant-Surgeon Ellis Jones, in the 39th Lancashire Rifle Volunteers.

19th Surrey (or Lambeth) Rifle Volunteer Battalion—John Plews, Gent., to be Lieutenant.

Memorandum.—The Queen has been graciously pleased to accept the resignation by Captain Thomas Eman, of the Commission held by him as Captain-Commandant of the 4th Surrey Rifle Volunteers.

Warwickshire Rifle Volunteers—2nd Battalion—The Reverend Thomas Sheepshanks to be Honorary Chaplain.

3rd Company of Cheshire Rifle Volunteers—Isaac Byerley, Gent., to Honorary Assistant-Surgeon

Staffordshire Rifle Volunteer Corps—2nd Battalion—24th Company—The Reverend Philip Hayman Dod, Clerk, to be Honorary Chaplain.

3rd Battalion—17th Company—The Reverend William James Heale, Clerk, to be Honorary Chaplain

1st Peeblesshire Rifle Volunteers—Robert Hay, Esq., to be Captain; James Wolfe Murray, Esq., to be Lieutenant; John Gracie, Esq., to be Ensign.

2nd Peeblesshire Rifle Volunteers—James Tweedie, Esq., to be Captain; John Tweedie, Esq., to be Lieutenant; John Pretsell, Esq., to be Ensign.

3rd Peeblesshire Rifle Volunteers—Charles Tennant, Esq., to be Captain; George Watson Muir, Esq., to be Lieutenant; Robert Gill, Jun., Esq., to be Ensign.

City of Edinburgh Rifle Volunteer Corps—Christopher James Connell to be Ensign, vice Peterkin, resigned. The Queen has been graciously pleased to accept the resignation of the Commission held in this Corps by Captain Allen Dalzell.

1st Inverness-shire Artillery Volunteer Corps—Mr. William Wells to be Second Lieutenant.

A RIFLE VOLUNTEER SUMMONED FOR NON-PAYMENT OF SUBSCRIPTION.—At the Manchester City Police-court on Tuesday, James Kelly, a private in the 10th company of the 2nd Manchester Rifle Regiment, was summoned under the 51st section of the General Volunteer Act, for neglecting and refusing to pay on demand a certain sum of money, subscribed or required by the rules or regulations of the corps. Lieutenant Furniss produced the written contract of the defendant to pay 21*s.* as a subscription to the regimental fund, and 9*s.* to the company's fund, and explained that the defendant had paid 6*s.* towards this amount, leaving a balance of 24*s.*, which was now demanded. The defendant admitted his liability, but said that in consequence of having been out of work for a time it was not in his power to pay the money. Captain Percival, who commanded the company, had sent for his (defendant's) uniform and accoutrements, and as he had given them up, he did not think that he should have been pressed for payment. Mr. Ellison said there was no reason why the law should not be put into operation. The defendant had become liable to a double payment (48*s.*), and it must be levied upon him. Eventually on the defendant pleading for a little time, Mr. Ellison said the Bench had considered very seriously what the defendant had said, and they would go so far as not to allow the warrant of distress to issue for fourteen days. In the meantime Captain Percival would have an opportunity of deciding whether this was a fit case for mitigation of penalty, and if he thought it was, the Bench would mitigate it in some degree.

GLASGOW.—A meeting of the central committee was held on Wednesday, in the Council Chambers, Glasgow, Sheriff Bell in the chair. A report by the sub-committee was read and agreed to. It recommended the distribution of a portion of the funds to four artillery and a few rifle companies which had applied for assistance. No steps had been taken with regard to appointing a military staff for Glasgow, or the further equipment of artisan corps, as it was understood that Government would appoint adjutants, and that the extension of the movement among artisans would be discussed in the next session of Parliament. There is still the sum of 900*l.* in the Glasgow Central Fund.

THE ARMY AND NAVY GAZETTE
AND
JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)
The subscription is 7*s.* 7*d.* per quarter, or 30*s.* 4*d.* per annum, payable in advance, postage included (excepting abroad, which varies according to the route and destination). All Editorial Communications should be addressed to W. H. Russell, Esq., and business letters and advertisements to Mr. Archibald Graham, to whom post-office orders, &c., are payable. Advertisements received up to Thursday evening. The Paper is published every Saturday in time for the Morning Mails.
Office, 16, Wellington Street, Strand, London, W.C.

WILLIAM O. MITCHELL,
MILITARY BOOKSELLER AND PUBLISHER,
39, CHARING CROSS, LONDON, S.W.
Catalogues sent on application.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*
Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C.
Established 1749.

ELSTOB'S RIDING BELTS,
Hunting Drawers, Breeches, Knickerbockers, Elastic-seated Riding Trousers, 32*s.*; Bedford Cords, best quality, 42*s.*; Belts and Drawers, 21*s.* each.—
12, AVERY ROW, BROOK STREET, NEW BOND STREET, W.,
(Exactly opposite Ford's Hotel in Brook Street).

DAY'S PATENT CHAIR-BED, a perfect combination of Easy Chair, Couch, and Bedstead, adaptable to either purpose by one simple motion, w thout screw, nut, rack, or complication of any description. An illustrated and descriptive circular for one stamp. W. Day & Son, Portmanteau Manufacturers and Military Outfitters, 353 and 378, Strand, London, W.C.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

RIFLE & ARTILLERY DUTY-BUGLES, TRUMPETS, &c.—Volunteer Corps are respectfully informed that the patterns approved by Her Majesty's War Department can now be had of the Makers, Messrs. RUDALL, ROSE, CARTE, & CO. Price, with Lines and Tassels complete, Two Guineas.
SILVER BUGLES, for Presentation, from Twenty Guineas.
ELECTRO-PLATED BUGLES, in Case, Four Guineas.
BUGLE and TRUMPET-MAJOR DUTY-BOOKS, 3*s.* each, giving instructions, and all the regulation sounds.
DRUM MAJOR DUTY-BOOK, 4*s.* FIFE-MAJOR DUTY-BOOK, 3*s.*
PERCIVAL HUNTING HORNS in Copper and Sterling Silver.
RUDALL & CO.'S PRICE LIST, with Guide for the Formation of Bands, and Corps of Flutes and Drums, and Estimates of Cost, sent free per post.
Military Musical Instrument Manufactory, 20, Charing Cross, London, S.W.

NOTICES TO CORRESPONDENTS.

In reply to several Correspondents who inquire respecting the publication of the details of the amalgamation of the Indian and the Royal Armies, we have to say that we are not able to add anything to what we have already stated generally upon the subject. We can well understand the anxiety of our Correspondents, but no undue delay has certainly taken place on the part of the Commission, considering the variety and importance of the details they have to settle. We trust, however, before long to be able to give all the particulars.

Our correspondent Steel Pen must excuse us answering his question. It would be presumption on our part to attempt to define what, as he says, "the legislature have been unable to define, even when assisted by the best legal advice in the land."

An Englishman in Paris is requested to communicate more particularly with us upon the important subject referred to in his letter.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the Editor.

It is particularly requested that applications for copies of the Army and Navy Gazette, &c., and advertisements be sent to the Publisher, Mr. Archibald Graham, and not to the Editor.

Army & Navy Gazette.

LONDON, SATURDAY, SEPTEMBER 1, 1860.

The last words of the Secretary of the Admiralty to the House of Commons before the prorogation were, "that the French are building ten iron-cased ships, while we are only building four iron-cased frigates." We trust that when Parliament meets again his lordship may be able to announce that, at the very least, our armour-plated vessels equal those of France in number. Of our four which it appears are building, only two, however, are yet known to public fame—the Warrior and the Mars. But the former, though now well advanced, is yet far from being ready for launching, while the Mars is still less complete.

In noticing in last week's Gazette the successful launch of the Pallas at Lorient on the Saturday previous, as the third of the *frégates blindées* which France has already afloat, we drew such consolation as we could, considering this fact, that France is thus again a-head of us, by reflecting upon the important experiments which have recently taken place at Portsmouth, and are still going on, for the purpose of ascertaining whether the force of projectiles cannot be overcome, not as hitherto attempted, by positive resistance and the mere strength of a ship's sides, but by diverting their force by means of obliquely-placed metal surfaces. We may hope that the vessels we do build will now be invulnerable. Enough has already been done to show that the inventor has got hold of a right principle in his "angulated armour-cased sides for ships of war," the superiority of which over the wall-sided plates of the Trusty and Warrior has been already demonstrated, and we ought thoroughly to test and apply the principle by every means in our power. But let us not be too sure when we have done so, that the French will be far behind us. The following paragraph, taken from *Galignani*, appeared in the *Times* of February, 14, 1859.

"The intended transformation of the steam line-of-battle ship Jemmappes into a floating battery is the commencement of a new and important application of the system of floating batteries. The French Government has it in contemplation to fit out several of these steam fortresses, destined for the defence of the different naval ports, which they will shelter from all aggression. These enormous naval constructions will be, like the floating batteries which were used with such formidable effect against the fort of Kinburn, covered with a sheathing of wrought iron. Instead, however, of being like those batteries, wall-sided, a form which allows the new cylindro-conical balls thrown by the formidable Paixhan and Armstrong guns to penetrate the iron and to explode in the side of the vessel, causing thereby enormous damage, the new floating forts will have their sides built in a curve, and fluted at intervals, so that the shot will not one time in twenty strike on a flat surface, and will, consequently, fly off without doing any injury."

That was eighteen months ago, and yet it is only now that experiments have been authorised to be made in England, with a view to the same results. We shall watch with the greatest interest all further experiments at Portsmouth.

In the meantime, we must again refer to the great advance already made by France in building armour-clad vessels. La Gloire is at sea, making her experimental cruise; the Pallas has been launched; and La Normandie is fitting out at Cherbourg. We have heard nothing further of the Jemmappes; but in the daily papers of November last there was a description of the two iron-cased rams, Magenta and Solferino, on the stocks at Brest and Lorient, which shows that these vessels were then in a forward state, though only laid down some four months previously. The description is very interesting, though not so minute or definite as one might wish:

"Their hull below water is similar to that of ships in the old model; their scantling is that of our 80-gun ships. The novelty in their build consists in the form of the cutwater. It forms a straight line up to the surface of the water, forming an acute angle with the keel; it then recedes with a backward curve, and joins the bows, to which it is firmly attached, both above and below the water, by stout iron-cased timbers. The angular extremity of the cutwater, which is something like fifteen feet distant from the bows of the vessel, is a knee of well-seasoned oak-timber, which is to be fitted with a large conical spur in wrought iron."

Let us now consider some of the uses to which our neighbours intend to apply these formidable vessels. We resume our quotation from *Galignani:*

"These floating citadels, mounted with guns of the largest calibre, and manœuvring under steam at the entrance of a port or roadstead, will, when two or three are together, keep off the whole of an enemy's squadron, and protect the arsenals and towns from the reach of any projectile. They will, moreover, render powerless the fortifications which command certain important maritime straits. Two of those vessels, placed on the coast of Ceuta, would completely paralyse the guns of Gibraltar, and would be masters of the pillars of Hercules."

We need add nothing to that.

There is still another lesson we may profitably learn from what France is about, in the shape of an *aide mémoire*, derived from the names she has given to her first three iron-cased vessels. We fear the lesson may be wanted, when we remember the Emperor's letter to Count Persigny, and His Excellency's recent speech. Some excellent moral lessons, and no end of "wisdom of the ancients," have been extracted from mythological fables; and whatever they may have signified originally, the lessons have been worth the learning. The success, too, of industrious critics, of Shakspeare as well as of the Bible, in importing new meanings of great significance into passages never intended to bear such constructious, encourages us to indulge this fancy, not idly, but for a useful end. When we are informed that *pax in bello* and *bellum in pace* mean just the same thing, and that although the Emperor never intended to abolish war—of which, we believe, he was never suspected—yet the military *rôle* of France in Europe is now at an end, we may be apt to forget the existence of Brest, of Toulon, and of Cherbourg.

When we read therefore in future of La Gloire, it should keep us in mind that Glory is the great goddess across the Channel; that France is ever ready to go where Glory waits her, to make war merely "for an idea," and that an idea may mean, when the truth is known, a tract of your neighbour's territory, described as "provinces essentially French."

The name of Pallas is also appropriate to the second of these French armour-coated vessels. Pallas was the offspring of Jupiter's own brain, brought into existence with the aid of Vulcan. Would that England, too, had a Jupiter to devise many such a Pallas for us, and give employment to many a Vulcan. Pallas was also the goddess of wisdom and arms; and in sober truth it is impossible to deny either the politic wisdom or skill in war of the real author of the Pallas of France.

Last of all we have La Normandie, a name for us more pregnant still in signification. We cannot hear it and not think of invasion. Let us keep it well in mind.

But can we extract no moral from our own ships' names? Let us try first, Warrior. Well, that's generic. It may be applicable to every man-of-war; but still we may suppose it signifies—We mean to fight, and think it not unapt. Mars sounds well too, being the god of war; but when we recollect that his chariot was drawn by two furious horses, Terror and Flight, and that he is commonly represented as an old naked man, we can only regret to be reminded of recent panics, that old England's shores are unprotected, her capital not free from anxiety, and her chief arsenal actually on the move to Cannock Chase.

While the discussion upon Artisan Volunteer Corps still continues apparently without any satisfactory solution being arrived at, we are glad to find that two of our contemporaries who pay a good deal of attention to military affairs—the *Globe* and the *Spectator*—are thoroughly in accord with our view, that the real way of settling the difficulty is by adapting the Militia to those who are unable to equip themselves as Volunteers. Our contemporaries think as we do, that the peculiar distinctive mark of the Volunteer Army should be, that each member of it should be able to supply his own wants as regards clothing and equipment. When we reach a stratum of society in which this cannot be done, the expense clearly must be paid by somebody else, and the somebody should be the country. As has been said, the question is really one not so much of social position as of means; and if Mr. Sidney Herbert were to carry out to their full extent the reforms in the Militia system which he indicated during the past session, he would adopt the readiest and most feasible means of making available for national defence the class who find a difficulty in paying for their outfit as Volunteers. In another part of our impression of to-day we print an admirable speech, delivered by Colonel M'Murdo at Bristol, in which he said what he wanted in the force was not so much increased numbers as permanence. He is satisfied with 150,000 Volunteers, provided only that number be maintained. We are afraid, however, that the Inspector of Militia could not express himself in equally satisfactory terms respecting the numerical condition of the force under his care, and we know of no better way of filling the gaps in its ranks than by localising and adapting it to the tone and habits of the artisan class.

Our Telegraphic Communication with India, which at one time promised to be very complete and satisfactory, is now in a most disorganised state. The wires between the various presidencies appear to be in excellent working order, and the traces of the ravages committed by the mutineers on the inland stations are gradually disappearing, but the cable laid down in the Red Sea has for the moment failed us. We say for the moment, because we are firmly persuaded that the mechanical genius of this country will not be defeated by the provoking *contretemps* which has occurred, but will ultimately provide such means as will render an accident of a similar kind improbable. The event, however, has given rise to many opinions adverse to the policy of any Government which would encourage only one line of telegraph between England and India. It would be too much to calculate upon the strength of any cable, however cunningly manufactured, to resist for a series of years the wear and tear to which it must be exposed when submerged in an Indian sea, and we must therefore calculate upon being subjected to the annoyance which now exists. We need, therefore, only say that the value of such a mode of correspondence can only be estimated by the rapidity and regularity with which messages are transmitted.

The importance of a telegraph from London to Calcutta cannot be gainsaid. To the officials immediately connected with India, and to military men interested in that portion of our empire, the subject must be one of very deep interest. It consequently behoves us to secure a route independent of the one which has been tried by the Red Sea. Some years since a company was formed for the purpose of constructing a railway from Seleucia on the Mediterranean, by the plains of the Euphrates and Tigris, to Bussorah at the head of the Persian Gulf. The facility of carrying the wires along the line of railroad cannot

Digitized by Google

be questioned, and the other portion of the task would be comparativhly free from difficulty. Mr. W. P. Andrew, the chairman of the company, who has had a more intimate acquaintance with Indian railways than any other man living, says:

"Placing India and England in hourly telegraphic communication is a first necessity, and this with a railway 800 miles in length, of singularly easy construction, would give England the first strategical position in the world.

"On behalf of this route I would remark:—

"1. It would save 1000 miles in distance, and half the time now occupied.

"2. That both its termini being on open seas, are easily defensible by England.

"3. That the Euphrates Railway throughout its whole length is far removed from the Asiatic frontier of Russia.

"4. This railway, taken in conjunctian with the system of steam transit, now being established in the valley of the Indus from Kurrachee to Lahore, the large force stationed in the Punjaub and Upper India would be rendered of incalculable importance by steamers in the Persian Gulf uniting the line of the Indus with that of the Euphrates, for in that case any hostile force advancing towards the Indus would not only be met on the line of that river, but would be threatened along the seaboard of the Persian Gulf and the line of the Euphrates and Tigris in the flank and rear.

"5. The Indus and Euphrates thus united, the dangerous isolation of Persia would be at an end, and the invasion of India by Russia or any other power would cease even to be speculated upon.

"6. By the Euphrates Railway, Persia would be afforded a short, cheap, and easy outlet on the Mediterranean for her trade with Europe, in place of the existing long, expensive, and difficult route to the Black Sea by the borders of Russia, and which is entirely at the mercy of that power.

"7. The resources of England being made promptly available on any emergency, Chatham and Southampton would become the basis of operations as easily as Kurrachee or Bombay, and would enable this country to anticipate or repel, whether in Europe or Asia, any attack with the rapidity and advantages of an irresistible force.

"8. On an emergency in India, troops could be landed at Kurrachee in two weeks, and in little more than another week at Lahore.

"9. The route proposed is at once the shortest and the easiest between England and India; the whole length of the Valley of the Euphrates is so free from impediment, that it would seem as if Providence had especially ordained it to be the great highway of nations between the East and West."

Without possessing the sanguine temperament which appears natural to a railway chairman, we must admit that Mr. Andrew has made out a strong and interesting case, and he further observes:

"An alternative route to India, always important, is now a pressing necessity. The navigation of the rivers Euphrates and Tigris may be made available pending the completion of the railway from sea to sea. From Seleucia to Jabor Castle on the Euphrates is 150 miles in length, and would cost 1,500,000*l*. All the physical difficulties on the route are between Seleucia and Aleppo, and the navigation of the Euphrates is very inferior to that of the Tigris below Bagdad. From Seleucia to Bagdad is 600 miles, and would cost four millions. From Seleucia to Bussorah, at the head of the Persian Gulf, is 800 miles, and would cost six millions. There is good reason to believe that there would be no difficulty in establishing steam communication between Seleucia and England, and the Indian Government are understood to be favourably disposed to granting the necessary support to the establishment of steam communication between Bombay, Kurrachee, and Bagdad, *viâ* Bushir and Bussorah. A railway from Bagdad to Seleucia, 600 miles in length, would at once give us a new and alternative route to India, far removed from the intrigues and interference of either our friends or enemies."

We do not anticipate any difficulty about steamers; these would ply under the auspices of that great thriving company, the Peninsular and Oriental, with the same ease as they go to and from Alexandria at present; and as regards the money, should the Government express their intention to support a route of the kind, it would be raised with ease. There exist ample means both in England and India to produce a much larger capital than the promoters demand for bringing to completion a work which, sooner or later, will bring into almost instantaneous communication our great Asiatic empire, and the seat of central authority from which it is ruled.

Just now when it is doubtful whether the defences of London or our chief naval arsenals are commanding most attention, it is interesting to know what is actually doing at Portsmouth in the way of fortifications. It will be in the recollection of many of our readers, that while describing in a former number of this journal the works at Hilsea, on the northern portion of the Isle of Portsea, we strongly advocated the necessity of taking advantage of Portsdown Hill, and throwing up a chain of forts to command the extensive line of bastions below that eminence, and also to protect the ships in the harbour, the dockyard, and at the same time to prevent this elevated plateau falling into the hands of an active enemy. Within the last few days the tents of the engineers have been pitched on Portsdown, and men are engaged stumping out the areas for the proposed redoubts. From what we can gather from a rapid scramble over the scene of operations it is intended to construct five forts upon the ridge of the hill, which is from five to six miles long, and overlooks the northern defences of the Isle of Portsea, and commands Portsmouth harbour and its dockyard. The areas stumped out indicate that a fort will be constructed in the locality of "The Fir Clump," another at Nelson's monument, one at the "Mill," one at or near Wallington, and one at Belmont. The forts will be near enough to support each other, and will, when armed, render Portsdown Hill a strong position.

The five redoubts above mentioned are, however, only a portion of the defensive scheme intended for the defence of Portsmouth. To the westward, on the Gosport side, the most western fort on the hill will be near enough to cross the fire of a similar one at Blackhouse, which will be in connection with one at or near Roome, and this last with one at Lee Farm, and so bring the chain of forts down to the neighbourhood of the new defences in the locality of Stoke, and thus entirely surround the harbour and dockyard on the northern and western faces.

This rapid sketch of the proposed works in the neighbourhood of Portsmouth would be very incomplete without noticing the sea defences on the southern extremity of the Island of Portsea. But before doing so, it should be mentioned that the littoral boundary in this locality has for many years been comparatively neglected, to the great loss of the land proprietors as well as the destruction of two old forts, one at Lumps, and the other at Eastney. It is now intended to raise two new batteries at these places; indeed the former is nearly finished, and the latter will be commenced in a few weeks.

The new fort at Lumps will mount 17 heavy guns, having 14 embrasures for 68-pounders, and three elevated circular bastions rising over all, upon which it is proposed to mount 10-inch, or Armstrong guns, as the case may be. The circular bastions have a very extensive range. From the eastern one the line of beach up to Cumberland Fort will be within its fire, while the one in the centre of the fort, as well as that at the western end commands the beach as far as Southsea Castle. The three guns in the circular bastions will have a sweep of 320 degrees, and will not only defend the entrance of the fair way into Spithead, but can be turned about to bear almost upon the land-side of the fort. There is accommodation for 40 men and officers, and the fort is surrounded by a deep and wide moat, in which there will be at low water spring-tides seven feet. At Lumps the sea front does not form the sea boundary without a ditch intervening; and it has been surmised, notwithstanding the sea-wall raised for its protection, that extraordinary gales may seriously affect it. And Fort Monckton, on the Gosport shore, has been instanced as a case in point where the natural beach is the boundary. However, upon this subject it is not our intention to enter at present, and we conclude our brief summary of this important addition to the sea defences of Portsmouth with the pleasing task of praising the admirable manner in which the earthworks, the masonry, and the men's quarters are constructed.

The French are adopting the recommendations which we have made to our own Board of Admiralty in reference to the construction of roomy and powerful transports. We are informed by the *Moniteur de la Flotte* that a large vessel for transport service is about to be built at Rochfort, and that her dimensions will exceed those of L'Aube and the Finisterre.

The *Moniteur de la Flotte* states that its correspondent at Toulon, writing on the 23rd ult., gives a most favourable account of the experimental trials made by the iron-cased frigate La Gloire, and he adds that further and more complete trials would be made in a few days. The frigate is intended to make part of the squadron ordered to escort the Imperial yacht to Algiers, and would as soon as ready proceed to Marseilles to await the arrival of the Emperor and Empress. The correspondent of our French contemporary, in a subsequent communication, says that the definitive trials of La Gloire were not only satisfactory, but surpassed all expectation. The ship had made 13¾ knots, and her stability had proved to be of the most perfect character. She rolled a little, but easily. M. Dupuy de Lome, the constructor, left Toulon on Monday for Paris.

The Lords of the Admiralty left town on Thursday on an official visit to Holyhead. Their Lordships after making an inspection of the works going on at that important port intended to cross over yesterday to Dublin to pay a short visit to His Excellency the Lord-Lieutenant of Ireland. They would then embark at Kingstown in the Osborne, and proceed to Cork, from which place they would go to Pembroke, where they are expected on Wednesday. The official duties at this place would consume two days; and Friday next will probably see their Lordships in London again. They will remain in town till Saturday next, and then will commence inspecting the different yards in the Thames, Medway, and Channel.

Vice-Admiral the Hon. Sir Richard S. Dundas, K.C.B., Captain Charles Frederick, and Mr. Romaine, C.B., the permanent secretary of the Admiralty, remain in London to form a Board for the dispatch of business in the absence of the Duke of Somerset and the other members of the Admiralty.

Rear-Admiral Sir Baldwin Walker, Bart., the Comptroller of the Navy, will join the Lords of the Admiralty at Pembroke on Wednesday next, and will accompany them on their tour of inspection of the various dockyards.

Although it be somewhat late in the day, we are glad to observe that in devising some of the railways now placed before the public, regard has been had to considerations of national defence, and the facility for transporting troops. We have before alluded to this in reference to projects for connecting the metropolitan lines, and we now find the Cork and Macroom Company making prominent mention in their prospectus that their scheme has been submitted to the Duke of Cambridge and Sir John Burgoyne, and favourably viewed by them upon national considerations.

As in opening the Session of Parliament Her Majesty expressed her gratification at the institution of a Volunteer Army, so she has closed it by a graceful testimony to the progress and efficiency of which she has personally witnessed two such grand and signal instances. At the prorogation on Tuesday the Royal Commissioners, in the name of the Queen, expressed "the gratification and pride with which she has witnessed the rapid progress in military efficiency which her Volunteer forces have already made, and which is highly honourable to their spirit and patriotism."

The last mail from China has not brought us intelligence of any collision. Our active allies, it appears, are still backward in their preparations, and Sir Hope Grant is polite enough, or prudent enough, to wait for them. This is doubtless right and proper, but we should be glad to know how they would act if we were the laggards. We fear not so accommodatingly. The British portion of the expedition is in excellent health, and, as yet, has been singularly free from casualties.

As we led our readers to anticipate in our impression of the 11th ult., Sir James Scarlett has been appointed to the colonelcy of the 5th Dragoon Guards, vice Lord Cardigan, transferred to the 11th Hussars. The number of cavalry generals whose services would give them the first claim to the command of regiments is now very small. Of those who have been actively engaged there remain, we believe, only the following, whom we enumerate as they stand on the list:—Major-General Marten, late of the Royal Dragoons, who was at Waterloo; Major-General Lockwood, late of the 3rd Light Dragoons, distinguished in the Affghan and Punjab campaigns; Major-General Gough, of the same corps, who has served in China and in the Sutlej and Punjab campaigns; Sir Hope Grant, who, after an Indian career of extraordinary brilliancy, is now, we trust, reaping fresh laurels in the scene in which he first saw active service as Brigade-Major to Lord Saltoun; Major-General Robertson, who commanded the 7th Dragoon Guards in the last Kaffir war but one; and Major-General Lawrenson, the Inspector-General of Cavalry; and Major-General Parlby, each of whom served for a short time in the Crimea.

In announcing last week the appointment of Colonel Percy Herbert as Deputy-Quartermaster-General, in succession to Colonel Gordon, we expressed a hope that the appointment would not interfere with his retention of his seat in Parliament. We regret, however, to find that our hope is not fulfilled. Colonel Herbert accepted the Chiltern Hundreds before the close of the session. Notwithstanding the great interest now attaching to questions of military administration, the Members of the House of Commons who are able to bring useful information and ability to bear upon their discussion, are unfortunately so very few that we can ill afford a diminution of the number.

The Government of India has been pleased to allow officers serving in India, who may, under instructions from the Horse Guards, be ordered to England to join the Staff College, to be provided with a contract passage in one of the mail steamers.

Colonel Haythorne, 1st Royals, assumed the duties of Adjutant-General of Her Majesty's British forces in India on the 3rd of July.

The office of Quartermaster-General of Her Majesty's British Troops in India has become vacant by the promotion of Major-General Congreve to his present rank.

Captain W. Heywood, 2nd battalion 14th Regiment, has been appointed Major of Brigade at Sydney.

Captain G. E. Phipps Trent, of the 26th Regiment, has been appointed Aide-de-Camp to Brigadier-General Hemphill, commanding the 1st Infantry Brigade of the Dublin Division.

Captain W. R. Williamson, of the 48th Regiment, is acting as Aide-de-Camp to Major-General the Hon. A. A. Dalzell, commanding the Cork district.

Ensign Hill, 65th Regiment, is acting as Aide-de-Camp to Colonel Gore Brown, C.B., Governor of New Zealand.

A VISIT TO CHALONS.

[From a Correspondent.]

There is rather a disposition at present on the part of English officers to "do" Chalons; with the vaguest ideas about its locality, never stopping to inquire as to its facilities for sight-seeing, whether accommodation, and of what nature, is to be had there; whether, in short, Chalons is or is not practicable. Captain Jones packs up his portmanteau, and sets off to see a French Aldershot and a French review, about as comfortably and as easily as if he were going to see a field-day in the Long Valley.

It is to future Captain Joneses, proposing to themselves such a trip, either this autumn or next, that, presuming upon the experience which I have gained rather painfully during the last week or so, I would offer a little advice, and give a few hints which they may find of service in their wanderings. I may at once frankly and honestly tell our friend Jones, that in paying a visit to Chalons he will find things very far from *couleur de rose*; it may damp his ardour somewhat, perhaps, to be told at the outset that the camp is situated nearly 18 miles from Chalons itself, at a little village called Mourmelon, which may be reached by a two-hours-and-a-half drive, or by an hour's travelling on probably the slowest and worst-conducted railroad in Europe. Woe betide the traveller who, having taken up his abode at Chalons, as the nearest habitable town to the camp, places his reliance upon the Mourmelon branch of railway, and depends upon any particular train to convey him to the camp in time for any particular review; the chances are, said train will be half an hour late in starting, and about an hour behind its time in arriving; and then our unfortunate will find himself deposited at a distance from three to four miles from the review ground, which may with difficulty be reached just as the battle is won, and the troops, having fired their last shot, are returning homewards. To go by an earlier train is impossible, for the manœuvres commence at 7 a.m., and there is no train professing to arrive before 7½ a.m. "Why not sleep at Mourmelon, then?" My dear Jones—you—well, well, do as you like; but before you make up your mind to sleep at Mourmelon, have the kindness to listen to what I have to say, and then judge for yourself whether the prospect of a night there is a pleasant one; and yet there is really no help for it, for on ordinary occasions, when the Emperor is not there, the reviews commence at 5 a.m., before the trains think of stirring, thus involving starting from Chalons between 2 and 3 o'clock in the morning, if you adopt the only other means of transit, viz., driving over; but, although under these circumstances, passing the night at Mourmelon becomes the only other alternative, I think it is but fair to let those who contemplate it know what they are about to undertake.

It is about 11 a.m. We have arrived at Chalons from Paris—a party of three or four—two of the party are detached to proceed on to Mourmelon, to inquire about beds, &c., and make preparations to enable us to see the review, which we understand is to take place on the morrow; they are to send us back word this afternoon what they advise, whether remaining at Chalons, or joining them at Mourmelon, whether beds are procurable, and the like. In the meantime we must kick our heels about Chalons, and wile away half-a-dozen hours as best we may. Chalons is a clean, proper little town enough, with a grand old cathedral, rich in coloured glass, carved archways and windows, and marble altarpieces, but decaying and uncared for withal; while its once beautiful doorway bears the indelible marks of the hammers of the destroying and godless revolutionists. Not far from it stands another church, large enough and beautiful enough for a cathedral also; and one may well spend an hour in strolling about the aisle of these two grand old houses of prayer, down which the warm rich light comes pouring in from the coloured windows, dancing rainbow-hued upon the walls, and playing about the altars and the glittering little chapels, which are set like gems in the building's massive sides; and from the solemn organ gushes a stream of solemn music, which disperses itself through the building like a heavy, scented breeze. The day looks pale and cold as we issue forth once more into the little streets of Chalons. What next to do or see? A very different sight, certainly, but one which should not be missed—the celebrated wine-vaults of M. Jacquesson, from ten to twelve miles of under-ground caverns, excavated in the soft chalky soil, and wherein are stored — list, oh ye bibbers! — four million bottles of Jacquesson's well known champagne, while the vines from which it is manufactured are growing overhead. But it is not my intention to give you a description of M. Jacquesson's establishment; were it so, I should have a great deal to say about his aviary, and his pheasants, and his two black swans, which cost him 100*l*., and his kennel of hounds, of every size and variety, from a mongrel terrier to a ditto mastiff. They were for pulling down boars, these hounds, and upon occasion they would hunt a fox. Whether with a view of whetting their appetites or not I do not know, but just within sight and scent of their kennel was caged a captive boar.

However, although M. Jacquesson does things which Mr. Assheton Smith would scarcely approve, he is evidently inclined to spend his money liberally, and do things on a better and a grander scale than Frenchmen generally have an idea of, and as a "sporting" gentleman he deserves the approbation of Englishmen.

Well, well, we have seen the wine vaults, and the "raræ aves," and the hounds, and the cathedral—what next? It is time for luncheon, so we go into the old Hotel de la Cloche d'Or, and make mincemeat of some cutlets, which we wash down wit a flask of M. Jacquesson's best; then for a cup of coffee and a cigarette, which we half fall asleep over, till it is time to go to the station to see if any message has arrived for us from Mourmelon. The train comes in, but brings us nothing, neither a message nor our detachment; so we wander about the town again, uncertain whether we ought to go on to Mourmelon, or remain here, only sure about one thing, that some message or another has been sent and miscarried.

It is difficult to know how to kill the time now hanging on our hands; we endeavour to accomplish it by wandering about the little streets once more, and admiring the Hotel de Ville, and leaning over the old grey bridge, watching the pretty little river Marne as it winds away between green wooded banks, till it is lost in the vine-clad plains beyond; and there is the avenue of trees which forms the promenade, pleasant and shady enough; and there is a clean, large market-place, and a canal, and a small steamboat upon it, belonging of course to M. Jacquesson, who reminds one of the "Sparrow Hawk" in Mr. Tennyson's "Idylls," or the Marquis of Carrabas. "M. Jacquesson" is always the answer to every question as to who is the owner of this, that, and the other, and to this moment I am not quite sure that he does not possess the whole of Chalons, —cathedral, river, promenade, shops, hotels, and all, complete.

Clean and quiet and pleasant as Chalons is—"diablement triste," a French officer whom we met there called it—it begins to pall upon you after you have walked about it for six hours; and we began, too, by this time to feel impatient about going on to Mourmelon. No message had come, no news of our detachment; and as we had all their baggage with us, they ran a good chance of passing a sufficiently uncomfortable night, unless we joined them this evening. So we decide upon doing so; but the last train has gone, and we may just as well have our dinner comfortably, and drive to Mourmelon afterwards. We will give the Hotel de la Haute Mère Dieu a turn this time. It is situated in the market-place, and is, I think, the cleanest, nicest little hotel I was ever in.

At 8 p.m. the machine (for I can dignify it by no better name), destined to take us to Mourmelon is at the door, and the operation of loading it with baggage commences; how this was accomplished at last must for ever remain a mystery; that the baggage and the machine, or any of us, ever arrived at Mourmelon at all is nothing short of a miracle. Cocher sacré'd and broke all his finger-nails, and the whole resources of the establishment were called into play to get a truly English allowance of portmanteaus into a space calculated to hold with difficulty a couple of carpet-bags. Eleven (I blush to say it), eleven packages in all, were at last, however, stowed away into that rickety old trap; the coachman, a jolly old fellow with a husky voice and a blouse, climbed up on to the top of the pile, and took what I imagine to have been the most uncomfortable and perilous seat that coachman ever occupied. He was a dear old man, that cocher; but of this more anon; his worth did not discover itself until later; at present we merely looked upon him in the light of a sordid old rascal, who was ready to risk his neck for the prospect of an extra franc.

It is a long, moonlight drive, and somewhat chilly; luckily the road is good and straight, and, thanks to a *petit verre* or two, the coachman keeps up his spirits wonderfully, considering his position and his horses, considering the state of their knees, and spins us along at a pace which I should have imagined they were incapable of attaining. Some lights are visible at last; we rattle on; there to the left is the Imperial pavilion; to the right stretches away the long, dark line of huts and tents which form the camp; a few hundred yards further and we are in Mourmelon. Here my powers of description fail me, and here our spirits failed us too. A straggling, filthy street of tawdry, mushroom cabarets and cafés; a dense crowd of French soldiers issuing from some place of amusement; a din which would awaken the dead; a smell which would send them to sleep again; smoking, singing, quarrelling, swearing; strange, dim, coloured lights flickering in the wind; flags, garlands, and other devices of welcome to the Emperor, who has arrived to-day, suspended from the windows and against the walls. Kadekoi gone mad; Algar's booth at Epsom delirious; St. Giles's more drunk than usual—such is Mourmelon, as we drive into it at 11 o'clock at night; and I may mention, *en parenthèse*, that our ideas about sobriety among French soldiers were somewhat altered by the scene we here beheld.

To one of these be-garlanded and tawdry cafés we drove up; beneath an awning are seated some fifty Frenchmen, soldiers and officers mixed up indifferently, drinking absinthe and *petits verres*, and vowing eternal friendship and no secrets; while from the interior of the building comes the sharp click of the billiard balls, as they rattle about the half-dozen pocketless tables, which we can catch a glimpse of through the windows. A lively, buxom, little hostess bustles out; she is *au désespoir;* she has no beds, not a hole or corner; she cannot even suggest where we may find a resting-place. No news of our detachment; we are pretty nearly *au désespoir* also; but, luckily our coachman is a grand old fellow, whom no difficulties can daunt; he lit another pipe (how he did smoke, that man!), cheered us up with the hopes of beds further on, and mounting once more into his uncomfortable seat, sets off through the noisy streets, through the same singing, half-drunken crowd of soldiers, till we get to a café, more noisy, more tawdry, more full of the absinthe-drinking crowd of *gens militaires* than the last. A fat old lady, driven nearly distracted by the excitement and confusion, comes out, and we have a consultation with her. Yes, we can sleep here if we wish; she makes a favour of it, and only consents to accommodate us because we are strangers; she will make up three beds for us on the floor, and charge us (good, moderate soul!) only ten francs; also, I suspect, because we are *étrangers*. Wearied as we are, and sleepy, we close with her offer; and, stowing away our baggage in the stable—where our coachman remains in company with two goats and seven horses, to take charge of it—enter the café to inspect our quarters. Anything to equal the scene in this place I never saw: four billiard-tables, at which French officers were playing and swearing; a bar, where more officers were drinking, and paying compliments to two pretty girls, who kept up the conversation and the supply of liquor in a sufficiently animated manner. An inner room—a very Hades, if we may judge from the glimpse which we catch of it through the thick veil of smoke hanging over the half-opened doorway. We ascend a staircase of the most ricketty description, but the defects of whose construction are thoughtfully concealed by a tricoloured flag wrapped tastily round the banister; and, arrived at the top, we are shown our rooms. Up to this moment they have been used as supper-rooms, and the *débris*, in the shape of chickens' legs and withered leaves of salad, is lying about the tables and under them; but it is no use quarrelling with one's bread-and-butter, though the former is very thick and hard, and the latter very thin and stale; and, as to clearing away the supper-table, that in the present disorganised state of the establishment is out of the question; so we pensively superintend the laying down of one or two of the dirtiest mattresses, and one or two pairs of the dampest sheets I ever saw, on the dirty supper-strewn floors, fortify the inner man with a glass of cognac, take off our hats, and gloves—nothing more—and go to bed.

I have dwelt minutely upon the troubles and miseries of a visit to the Chalons camp, because I hope, as I said before, that my worthy friend Jones, who is kicking his heels about the steps of the "Rag," may profit by my experience, and so lay his plans as to avoid undergoing the discomforts that fell to the lot of my friends and myself. It is *but fair*, however, to Mourmelon and its cafés to state that on ordinary occasions, when the Emperor is not there, better accommodation may be procured; but it would always be well to write beforehand for rooms, in which case the so-called Hotel de France is the best of the wretched cabarets of which Mourmelon is chiefly composed; but a sojourn there must always be an unpleasant one; and it will be for Jones to decide whether he will put up with all the disagreeables inseparable from a visit to the camp, or remain at home and be thankful with newspaper accounts of it.

Devonport Dockyard.—Mr. W. Thring, acting first-class clerk, has been confirmed to that class, and appointed to the accountant's office vice Allen, appointed accountant at Sheerness. The following superannuations have taken place:—W. Austen (millwright), on 59*l*. 19*s*. 10*d*.; J. Coggens (smith), on 52*l*. 3*s*. 4*d*.; B. James (sawyer), on 36*l*. 10*s*. 4*d*.; and P. Frost (shipwright), on 23*l*. 9*s*. 6*d*. per annum.

The Metropolitan Police (Dockyards) Bill, which received the royal assent on Tuesday last, and will immediately come into operation, provides for a uniform system of police supervision throughout the whole of the Government dockyards. A large number of the R division of Metropolitan police, who have for many years been on duty at the dockyards of Woolwich and Deptford, and at Woolwich Arsenal, will therefore be transferred to other Government establishments; and it is stated that the entire force will be placed under the command of Mr. Mallalieu, the present superintendent of the R division, who was (previous to the introduction of the Act) specially employed to visit the royal dockyards, and report as to existing police regulations.

A Correspondent writing from Talien-Wan Bay on the 23rd of June remarks:—"Talien-Wan Bay, which has been selected for the rendezvous of the English fleet, is situated in lat. 39° N., and long. 122° E., in the province of Lian-Tung or Ching-King, distant from the Peiho about 200 miles due W. The bay is admirably adapted in many respects for a large fleet, extending as it does, some eight miles from N. to S., and eight miles from E. to W., and is well protected from all winds except those ranging from S. to E. It was at first thought that scarcity of water and fresh provisions would form a serious disadvantage, but now there is no fear for a supply of water, and the absence of cattle is very likely to form a disagreeable necessity wherever you choose your anchorage. I am aware that some persons think the Miau-Tau Straits would have been an anchorage preferable to that of Talien-Wan; they say that there is plenty of fresh water easily obtainable, and a good supply of fresh provisions close at hand; however, the few cattle on the islands would probably dwindle down very considerably on our arrival there, and certainly would be insufficient to supply such a fleet as there will be here shortly, with fresh meat. In the chief point, that of good anchorage, it is doubtful if a better place could be chosen in the Yellow Sea, or the Gulf of Pecheli than Talien-Wan affords."

INTELLIGENCE FROM THE SEAT OF WAR IN ITALY.

[From our Own Correspondent.]

Naples, 25th August.—The course of the past week has been as eventful as the most ardent lover of the novel could possibly wish for. Everyday has brought news of fresh landings of Garibaldi's forces. *Il Giornale Costituzionale* of the 21st inst., announces landings at Bognara, and other neighbouring localities; that "130 boats appeared on the coast of Calabria, of which 24 were captured, and the remaining 106 put to flight." Of this latter intelligence I am by no means certain, seeing that the journal in question saw fit lower down to apologise for the fact of other landings having taken place without molestation, owing to the impossibility of guarding the entire extent of the Italian coast. The provinces are, to judge by report, fast getting into a disturbed, or, as it might be more correctly styled, a revolutionary state. Accounts from Basilicata, Salerno, Cosenza, Catanzaro, Capo dell' Armi, all mention landings, and successful progress. Salerno is reported in full revolution, the troops gone over to the people; the telegraphs were cut, and the railway broken up; the 6th regiment of the line has refused to march against their fellow-countrymen, and every hour brings news of fresh deserters from the Royal troops to the standard of the invaders. The crowning event of the week is the capture of Reggio; as usual there was hard fighting, and many feats of personal daring were performed. Garibaldi, with his usual good fortune, cut off a battery of artillery, ammunition, carts, mules, and all appertaining to it. General Türr is once more with the army, and fighting bravely; he and Carini were both engaged in the recent struggle, as was also Bixio, who unfortunately in endeavouring to wrest a musket from a Neapolitan soldier, and whilst holding it by the bayonet was wounded in the arm by its discharge. Naples is in a state of the utmost excitement; heavy patrols traverse the streets in all directions. Whether the government distrusts the National Guards or deems their force not sufficient to protect the town, I cannot say, but merely note the fact, as also that several batteries of artillery have been again brought out; and to judge from these, and the forts being protected by sand-bags, an attack is regarded as imminent. The Caffé d'Europa is the centre of attraction for politicians and lovers of the latest news. Here in some altogether unaccountable way the latest and most reliable accounts, the publications of the republican committees, the most recent telegraphic messages and extracts from private letters, are all to be met with; and one has but to exercise an ordinary activity to become possessed of many pieces of intelligence that the government either does not know, or is unwilling to communicate. News arrived yesterday that a French merchant-steamer engaged in carrying the Neapolitan troops from Reggio, which they were vacating, was fired on by the Garibaldians from the Torre di Farro. The Imperial, line-of-battle ship, of the French navy left the Bay of Naples yesterday afternoon for the purpose of investigating the circumstances. The Neapolitan force is computed at 80,000 men, of whom about 25,000 were in Calabria, and 40,000 in or near the city of Naples, the remainder being in different other parts of the kingdom. The force in Calabria has lately been increased, it is said, to 40,000. Garibaldi's army is said to amount to 20,000 men, which, although inferior in numbers to that of the enemy, is wonderfully large when compared with the force that landed at Marsala, or, still more, with the handful of men that attacked and captured Palermo. If the past be a fair criterion for the future of this war, even 20,000 Garibaldians, already reinforced by 3000 Calabrians, will, through the desertions and cowardice of the enemy, as well as by their own bravery, and the impetuosity of their favourite bayonet charge, carry the day in Calabria as they did in Sicily. The loyal (?) subjects, the inhabitants of the city of Naples, are anxiously looking forward to the arrival of their deliverers; and although there is a royalist party here and there, there will, without doubt, be much harder fighting in Naples than there was in Palermo, yet Garibaldi will find many friends here. The lazzaroni, strange to say, are in favour of the king, as they would be of his conqueror to-morrow, did they expect to be better paid by him; whether the soldiers will continue to fight in case of the city being attacked is, I confess, a question that I can neither answer myself nor obtain a well-founded answer from anyone. As far as appearance and boasting go, one would be inclined to answer it in the affirmative; but having seen their force and great numerical superiority at Palermo, as well as heard the boasting of the officers who spoke of Garibaldi's force as a band of robbers already routed, and having afterwards seen 700 of these so-called routed robbers drive upwards of 20,000 disciplined men before them, I confess I stand rather in doubt of how their brethren-in-arms will behave when the dreaded hour and man arrive. The foreign ships in harbour are perhaps more numerous than they were when I last wrote, and amongst the additions are one or two Sardinian steamers with troops on board. The arrival of these was regarded with great jealousy by the authorities here; and although the explanation given by the Sardinians is that the men in question have arrived for the protection of their fellow-countrymen residents, in case the city being attacked, yet at the same time the possibility of their being here with a view to co-operate with the attacking party by a simultaneous landing has occurred to the authorities. The Sardinian officers who first landed from the ships in question were not permitted to proceed further than the landing-place, and, in consequence, had to return on board. This order has since been rescinded, as I opine, from the number of officers wearing the Sardinian military uniform, and to judge by their air and bearing, one would suppose the place belonged to them. The Neapolitan dislike to the Piedmontese exhibited itself in an unmistakeable way on the evening of the 21st, when some twenty Neapolitan soldiers set upon four bersaglieri (sharpshooters), Piedmontese, and attacking them with their drawn swords, quickly overcame them. The bersaglieri, having strict orders not to draw their swords when on shore, warded off the blows as well as they could with their arms, but were severely wounded, from the effects of which one has since died, and but for the opportune arrival of the National Guard, they would in all probability all have shared the same fate. The Marquis di Villamarina, the Sardinian minister, has already applied to the Neapolitan government demanding satisfaction; an answer regretting the occurrence and promising an inquiry into the circumstances will of course be returned, and the promised inquiry instituted; but cui bono? Similar events have occurred before, and will no doubt, ever occur, while troops so hostile to each other meet under the guise of a neutrality. Further discoveries connected with the late abortive plot of the reactionary party have been lately made here, and several well-known personages have had notice to quit—amongst others the Canon Caruso, whose opinions have been long identified with the most extreme on the side of arbitrary power. General Minziante having gone over to Garibaldi, the government intimated to the Duchess of Mignano, his wife, that she was to quit the country immediately; to which she spiritedly replied that she would not leave before she was compelled to do so by the gendarmes; hoping thus to prove the sincerity of the attachment to liberal principles professed by the executive. News reached Naples last night of an engagement at Piale, near Reggio, but further into the interior, in which 25,000 Neapolitan troops were defeated by the Garibaldians: no mention of the strength of the latter. The "Regi," as the King's troops are called here, are said to have been completely routed and driven from all their positions, which the victors are described as now holding. Whilst I write large bodies of military are passing *en route*, I suppose, to Calabria. It would be impossible to give an idea of the state of armed excitement existing in the city. The British line-of-battle ship Renown left this morning for Messina. The news from Sicily is satisfactory. All the old functionaries of 1848 are recalled to office. The only vestige of the Neapolitan rule is the continued occupation of the fortress at Messina; the evacuation is proceeding, however, although not as rapidly as might be. By next mail I shall have, I expect, some stirring intelligence to communicate.

PURCHASING OUT IN THE INDIAN ARMY.

To the Editor of the Army and Navy Gazette.

Sir,—In reference to the above heading I would beg to annex, for the information of many concerned, if you will kindly give it a place in your journal, a copy of a notification by the government of India on the subject, with an extract from a letter from the late Court of Directors relative thereto, by which you will oblige, yours, &c., Qui Hi.

"Simla, May 2, 1838.—The Right Hon. the Governor-General of India has much pleasure in publishing to the Army the following paragraphs of a letter from the Hon. the Court of Directors, in the Military Department, to the address of the Governor-General of India in Council, dated the 29th November last.

"Reply to Military Letter, dated 14th February, 1837:—Submit for court's favourable consideration, five memorials from officers of the Bengal army, praying that, for the reasons stated, the court will recall their orders of the 6th June, 1798, requiring from an officer, about to retire on pension, a declaration on oath, that he had not received, and would not receive, any pecuniary or other gratification or compensation for so retiring. Government consider, that the practice which has for some time obtained, although now for the first time brought to notice, of inducing time-expired officers, under the rank of lieut.-colonel, to retire from the Service, must conduce to the contentment of the officers, and to the efficiency of the Army.

"2nd Paragraph. . . . . and in reply to the remainder of this memorial, that we see no necessity for interfering with the arrangements which the junior officers of a regiment may make in individual cases, for adding to the comforts of a senior officer on his retirement from the Service, upon the pension to which he may be entitled."

ORGANISATION OF GOVERNMENT STEAM-TRANSPORTS.

To the Editor of the Army and Navy Gazette.

Sir,—The great advantages to both Services and the country which would be derived from the system which you so ably advocate in your columns (of August the 18th), for the organisation of government steam-transports is too convincing to admit of any doubt. The advantages to the Navy, and importance of this to the country, is perhaps even greater than you can imagine; for, besides this great benefit that you describe, of supplying the Navy with 2000 trained able seamen in time of war, there would be the great experience gained by officers during peace time of handling ships under steam. At present, we have little or insufficient opportunities of doing so, as the expense of fuel is considered too great to admit of our fleets manœuvring at full speed under steam.

In future, all actions will be fought under steam; it will not be as it was in former days when victory was ensured to that fleet best handled under sail, but it will be that fleet the best and most rapidly handled under steam. I venture to affirm that there is more experience gained with regard to managing a ship under steam, and the duties of a steam captain, in the Himalaya and six steam transports we now have, than in all our fleets in commission. A comparison of the ships' logs would prove this fact.

One of the present and greatest evils is that in peace time captains and officers cannot get sufficient employment to keep up their professional knowledge, and to gain further experience; consequently, when called upon to take the responsibility and command of these gigantic engines of war, they are not so *au fait* as they should be. Then as the efficiency and success of our fleets must mainly depend upon the captains and those in command, is it not prudent that the attention of the authorities should be called to this point? attention of the authorities should be called to this point particularly in these times when we know that our ally across the water is leaving no stone unturned to ensure the efficiency and skill of his officers in manœuvring a steam fleet.

With regard to the 2000 men who would be employed in the transport service, I must add it is a well-known fact that the transport is a favourite service with Jack; so that you would have ready for emergencies 2000 picked men, such as it would be difficult to find in our present manned fleet.—I am, &c. A Post Captain.

One who has in vain been seeking employment to keep his hand in, after 25 years' continuous foreign service up to the end of the Russian war.

RIFLE SHOOTING IN THE NORTH.

On Monday Horatio Ross, Esq., of Netherley, and his son, Mr. Edward Ross, the champion shot of England; Captain Keith Stewart Mackenzie, of Seaforth; Captain Moir, Stirling, and others, shot at two distances—900 and 1800 yards—the targets being casks placed in cobles in the Montrose basin. A large number of gentlemen collected to witness the practice. The shooting of Mr. Edward Ross with the Whitworth rifle gained by him at Wimbledon was very precise, hitting the cask in regular succession seven times, and missing very seldom. He sits while he shoots, and although firing before many experienced shots, took it remarkably cool. His firing with the Whitworth at the long range was not so good, but with the Lancaster rifle he made some good shots at the 1800 yards' distance. Mr. Horatio Ross, his father, the celebrated deerstalker, made beautiful practice with the Lancaster at the furthest distance, and for many times struck the cask, while the shots invariably were in close proximity to the boat. His practice with the Whitworth and Westley Richards (breech-loader) at the same distance always fell short. His shots with these latter at 900 yards were, however, very accurate. Captain M'Kenzie's practice was very good, although not to be compared to that of the Messrs. Ross. Captain Moir, Stirling, made some good shots with the rifle won by Mr. Edward Ross, the prize of the ladies of Northamptonshire, which has subsequently been furnished with sights on Lord Elcho's principle, and seemed to be much appreciated by Captain Moir and the owner. The shooting became general towards the close, and some good shots were made. The firing clearly showed the Lancaster rifle to be the best adapted for long ranges; but the arrangement of the sights on the barrel seems to have something to do with this, and it was the opinion of many on the ground that, were the sights of the Whitworth, &c., further forward on the barrel, the defect would be removed.

Tuesday was the first regular day of the great Volunteer gathering of rifle competitors at Montrose. There was a numerous attendance of spectators, and great enthusiasm was manifested. The umpires were Lord Elcho, Colonel Kinloch, and Horatio Ross, Esq. Among the non-competitors present were: Edward Ross, Esq., "Champion of England"; John Duncan, Esq., of Parkhill; George Keith, Esq., of Usan; Colonel Orr, of Brigton; H. Scott, Esq., of Brotherton; Captain Fisher, of the London Scotch Brigade; Mr. Nicholson, younger, of Glenbervie; Dr. Renny, C.B.; George Taylor, Esq., of Kirktonhill; the Provost of Montrose, &c. The only two prizes competed for during Tuesday were: 1st. The "Scotland's Cup" (value 50*l.*), open to all Scotland, Volunteers or non-Volunteers. Shot for with any description of rifle not exceeding 10lb. in weight, from any position, but without any artificial rest. The entry money was 10*s.* A first-class rifle (Westley Richards), value 21*l.*, fell to the lot of the second best; and a first-class Lancaster rifle, value 10*l.* 10*s.*, presented by Mr. Lancaster, to that of the third best shot. The other competition was for "the ladies' cross," presented by the ladies of those burghs; competition open to all Volunteers in Montrose, Arbroath, and Brechin. There were 67 competitors for the cup, and the stipulations were five shots at 700 yards, five shots at 800, and five shots at 900. The result of the shooting was that Captain Moi (Stirling), A. Irvine (Aberdeen Highlanders), and J. Blackburn (Edinburgh), each gained 12 points. Two other competitors made 10 points. Moir, Irvine, and Blackburn being equal, shot off one round for the prize, with the following result: Captain Moir (Stirling), 1; A. Irvine (Aberdeen Highlanders), 0; R. Blackburn (Edinburgh), 0. Moir was therefore declared the winner of the cup. Irvine and Blackburn then shot off for the second prize, which was gained by Irvine, Blackburn taking the third prize. Moir used a Whitworth rifle, Irvine a Lancaster, and Blackburn a Whitworth. The ladies' cross was gained by Mr. John Gibb, of the 7th Forfarshire (Brechin) Company, who made 13 points. Six of the competitors made 11 points.

The rifle contest for prizes was resumed on Wednesday morning. The attendance of spectators was much more numerous than on Tuesday, and amongst those present were: The Earl of Camperdown; Lord Elcho; Horatio Ross, Esq.; Colonel Kinloch, of Kilrie; the Earl of Southesk; the Hon. Charles Carnegie, M.P.; Captain Fothringham, of Fothringham; Lady Charlotte Fothringham; Mrs. and the Misses Fothringham, &c.; Sir David Baird; Colonel Orr, of Brigton; Sir John Ogilvy, Bart., M.P.; Sir John Stuart Forbes, Bart., of Fettercairn; Sir Charles Forbes, Bart., of Newe. The programme for the day embraced the Counties' cup for skirmishers, open to all Volunteer Rifle Corps in the two counties; the Angus gold medal, open to all riflemen in Angus; the Mearns gold medal, open to all riflemen in the Mearns; the Angus and Mearns cup, open to all Volunteer Rifle corps in the two counties; the "ladies' cross" for the Mearns, presented by the ladies of Kincardineshire, open to all Volunteer Riflemen in that county; and the Montrose Cup, open to all Scotch Volunteers, rifles or artillery. The shooting commenced with the competition for the Angus gold medal, the Mearns medal, and the Montrose cup. For the latter there was a very large number of competitors. These were divided into nine squads, three shooting at a time. Captain M'Gregor, of Leith, was the winner, having made 15 points; Sergeant Walker, of Montrose, was the next, having made 12 points. The Mearns gold medal was gained by Mr. William Thomson, 5th Kincardine; and the silver medal by Mr. James Georgie, Banchory. The winner of the Angus gold medal was Mr. James Paton, Brechin; and the winner of the silver medal, Mr. Edward Boase, Dundee. The Counties' cup for skirmishers was gained by Mr. W. A. Mill, Arbroath; the second prize, a Westley Richards rifle breech-loader, value 12*l.*, being won by Major Renny, Tailyour. Sergeant Francis, Dundee, won the Angus and Mearns cup. William Brown, of the 5th Kincardineshire, won the ladies' cross for the Mearns. At the close of the competition on Wednesday there was a general parade of all the Volunteers, for the presentation of the prizes. The Countess of Kintore presented the ladies' cross for the Mearns to the successful competitor, William Brown. Lady Charlotte Fothringham presented the Montrose, Arbroath, and Brechin Cross. Lord Elcho presented Scotland's cup to Captain Moir, of Stirling, in a brief address. His lordship

Digitized by Google

said they wished to make the rifle the familiar weapon of the British people, and they believed that such meetings as had been held on that and the preceding day would infallibly lead to that result. He recommended the training of cadet Volunteers, and urged the necessity of economical arrangements by the various Volunteer corps as the only means of placing the institution on a stable basis. Sir John Ogilvy, M.P., presented the Angus gold medal and remaining prizes.

COLONEL M'MURDO ON THE VOLUNTEER MOVEMENT.

Saturday last was set apart for an inspection of the Bristol Artillery and Rifle Corps by the Inspector-General of Volunteers, Colonel M'Murdo, but the rain poured down almost continuously throughout the entire day, and, as a necessary consequence, the proceedings were reluctantly postponed till to-day. In the evening a grand banquet was given by the Mayor in the Victoria Rooms, Bristol, at which a large number of the aristocracy and gentry residing in Bristol and vicinity were present. The rooms were splendidly decorated for the occasion. Immediately after the removal of the cloth a large number of ladies entered the room and occupied seats allotted for them. From the moment that the fair sex had taken their seats the gathering might be said to be complete. At least 600 were present, and as a very large proportion were in uniform, and the ladies were in full evening dress, the appearance presented was at once gay, varied, and elegant.

In the course of the evening the Mayor proposed, "The Health of the Inspector-General of Volunteers, and the Volunteer Forces of Great Britain," coupling with the toast the name of Colonel M'Murdo.

Colonel M'Murdo, on rising, was loudly cheered. He said: Gentlemen, I rise to thank you for the honour you have done me. You have little to thank me for, for as regards myself personally I cannot deserve your praise, but I rise proudly to answer for the Volunteer service of Great Britain, and to express to you the honour you have done me this night, and the great satisfaction I have in seeing before me the Volunteers of Bristol, for whom I have, from old associations, a very great regard. Gentlemen, the Volunteer service of Great Britain comprises an army of 130,000 of the *élite* of England and Scotland—comprising in themselves all that is noble, all that is intelligent, and physically and morally excellent. It has been said, over and over again, and put forward, that we want increased numbers, but I say, "No," gentlemen, we have got enough if we have permanency—*permanency*. I say we have enough, if we have 100,000 men, and I will give you my reason. I want it as a nucleus of a large force which shall be self-supporting, not depending upon the pockets of our countrymen. I want them to be self-supporting and to be trained riflemen, and I know that in the hour of need, if that hour should ever come, that the numbers of the population will give in the proportion of one in ten of males capable of bearing arms, and that will give us upwards of 500,000 men. Having, as I said before, 100,000 trained riflemen, we should have one trained rifleman to four recruits; and who are these recruits, what are they to be? The National Prize Association and the National Rifle Association shall train them for war time, and bring them forward to the use of the rifle, though they do not belong to the Volunteer corps, so that when the time of need comes they shall know the use of the rifle, and little more is to be taught. Gentlemen, I need not dwell here on the objects of the Volunteer service, they are perfectly well understood and thoroughly appreciated, not only by our friends at home, but our enemies abroad. It is only on the relation that our Volunteers have with our Army—our gallant Army—that I would say one or two words. I have heard it in another place stated almost in explanation, and again almost an apology given—they thought it necessary to explain that it was to supplement the Army. But I have thought, why was such an explanation necessary? When I look around me, and see not only professional men but respectable merchants who have their daily occupations, I would ask how could they do otherwise than supplement the Army in the time of need? They cannot take the place of the Army, but if the Army is required abroad—we have comparatively few of the Army in this country—they would be required in the time of need to supplement them. Gentlemen, there is another point I wish to speak upon, that is, the efficiency of the Volunteers. I have had much experience of late. I have seen many corps separately and collectively. You, gentlemen, I had the honour of seeing some time ago at the Hyde Park review — the assemblage of 20,800 Volunteers of Great Britain. That was a grand national and historical fact. I have been to a later demonstration in Edinburgh, where a thousand more Volunteers were collected together under circumstances infinitely more difficult than you encountered in Hyde Park—difficult in this way, that they had no ground to move on like that on which you were reviewed in Hyde Park, and the evolutions were necessary to be improvised to keep the thing going, and prevent a check in the machinery, and such as the Volunteers before they came on the ground had no idea of. I knew, then, from the steadiness and composure with which the Volunteers moved in new and necessarily intricate evolutions, the science of the principles on which they moved, that they had acquired their drill solely on their own intelligence — that it was their intelligence which had brought them forward, and not the drill-sergeant. An hon. speaker, Mr. Hill, mentioned just how the intelligence of the Lawyer Corps brought them forward; and that reminds me of a friend of mine who is in the Inns of Court, and belongs to the "Devil's Own Corps." When drilled by the sergeant, being of an inquiring mind, he asked the meaning of the evolution he was being taught. The sergeant couldn't tell, but said, "You just do it; never mind what it is for, you just do it; I cannot give the explanation." And so it is the intelligence of the Volunteer jumps at the conclusion before the drill-sergeant of the line. But now comes the standard by which your efficiency is to be estimated. There are commanders, there have been great commanders, who have been content to win important victories by inexperienced and raw levies. I need not go back into history, but only point at the glorious career of Garibaldi in Italy. [The reception which greeted the mention of this Italian patriot's name was perfectly overwhelming; the vast assembly rose to their feet *en masse*, and hurrah'd for several minutes.] It is not necessary for me to mention any other instance to show you that with raw levies even, where a leader can inspire them with enthusiasm, and with perfect confidence in his leadership, they would go to victory. But I must not tire you. Where no such commander exists, if we have not the spirit of a Cæsar, of a Napoleon, of a Wellington, or of a Garibaldi as leaders, a higher standard of operation is necessary in the levy of volunteers; and this, I take it, must be our case, and we must progress to more than what raw descriptions of Volunteers would be. We must go on with our drill, and then I am assured we shall lead to victory. But I do hope that the standard will not be judged by the standard necessary and the rules and principles for standing armies, for nothing is more opposite in the constitution of things than the Volunteer service and that of the standing Army. Gentlemen, you would look very much surprised if I required that you should have a button stick, a brush and pipeclay, a sponge and blacking-ball, if I should require your buttons perfectly bright and glancing, or require you to mount guard, to troop colours, or a hundred other intricate manœuvres belonging to a regiment of the line. These are not necessary for the Volunteer service; you would almost smile if I required you to do them; but if I saw any soldier, or any number of soldiers, with buttons not bright, and in going through small and simple manœuvres in an unsoldierlike manner, I should say that the regiment to which these soldiers belonged was not in good order. But, I believe, gentlemen, that we should not be judged through the medium of the system of established standing armies, but ought to be judged by a standard of our own. I am prepared to mention from what I have seen of the Volunteer service in England and Scotland that if they were consolidated into battalions they would now be able to meet an enemy in the field. Gentlemen, I thank you for the honour you have done me.

The gallant colonel resumed his seat amid much cheering.

Our latest advices from China are Shanghai, 30th June, and Hong Kong the 7th of July. At the departure of the mail the following were the stations of the various British men-of-war:—The Acorn, Commander Pearse, Amoy; Actæon, Commander Ward, in the Gulf of Petchelee; Adventure, Commander Lacy; Algerine, Lieutenant Arthur, in the Gulf of Petchelee; Arracan† (ships marked thus † belong to Her Majesty's Indian Navy), Commander Brett; Australian†, Boon; Banterer, Lieutenant Knevitt; Beagle, Commander Hay; Bentinck†; Berenice†; Bouncer, Lieut. Owen; Bustard, Lieutenant Hallowes; Cambrian, Captain M'Cleverty; Camilla, Commander Colville; Centaur, Commander Alpin; Chesapeake, Captain Willes; Clown, Lieutenant Lee; Cockchafer, Lieutenant Holder, at Hong Kong; Coromandel, Lieutenant Symons, at Shanghai; Cruiser, Commander Bythesea, at Shanghai; Dove, Lieut. Bullock, in the Gulf of Petchelee; Drake, Lieutenant Blane; Encounter, Captain R. Dew; Esk, Captain Sir R. M'Clure, in Deep Bay; Feroze†, Commodore Tronson, at Shanghai; Firm, Lieut.-Commander Boulton; Flamer, Lieutenant Bingham; Forester, Lieutenant Innes; Furious, Captain Jones, at Shanghai; Fury, Commander Wilson; Grasshopper, Lieutenant Tucker; Hardy, Lieut. Bogle; Haughty, Lieutenant Broad, at Hong Kong; Havoc, Lieutenant Fairholme; at Hong Kong; Hesper, Master-Commanding Harris; Highflyer, Captain Heath, at Whampoa; Imperieuse (flag ship of Rear-Admiral Jones, second in command), Captain Maguire, at Kintang; Inflexible (temporary flag-ship of Vice-Admiral Hope, Commander-in-Chief), Commander Brooker; Insolent, Lieutenant Seymour, at Hong Kong; Janus, Lieutenant Davidson; Kestrel, Lieutenant Robinson, at Shanghai; Leven, Lieutenant Hudson; Magicienne, Captain Commerell; Melville, Mhor†, and Minden, all at Hong Kong; Nimrod, Commander Wynniatt, at Shanghai; Odin, Captain Lord John Hay; Opossum, Lieutenant Brine, at Shanghai; Pearl, Captain Borlase; Pioneer, Commander Reilly; Pilot; Prince Arthur†, Commander Twynam, at Hong Kong; Princess Charlotte, Master Commander Thomsett, at Hong Kong; Renard, Commander Goodenough; Ringdove, Commander Craigie; Roebuck, Commander Marten, at Shanghai; Sampson, Captain Hand; Scout, Captain Corbett; Simoom, Commander Cooke; Snake, Commander Harvey, at Chusan; Snap, Lieutenant Butler; Sparrowhawk, Commander Byng; Starling, Lieutenant Whitshed; Staunch, Lieutenant Pollard; Slaney, Lieutenant Bevan, at Kintang; Sphinx, Commander Day; Sydney†, Captain Neblett; Tonze†; Urgent, Commander Hire; Vulcan, Commander Strode; Watchful, Lieutenant Inglefield; Waterman, Master-Commander Phillips; Weazel, Lieutenant Howorth, at Hong Kong; Woodcock, Lieutenant Bosanquet, at Shanghai.

We have seen a breech-loading rifle, the invention of Mr. Thomas Wilson, which appears to be very simple in construction, but yet possesses several great advantages. The cartridge can be placed instantly in the barrel, and, there being no screws or complicated machinery, the rifle may be fired eight or ten times in a minute. Indeed it is stated that 20 rounds have been fired in about three minutes. It is impossible for an accident to take place with this rifle, because, although the charge may be inserted, the lock cannot act until another operation is effected, which can be done instantly. The barrel can be easily cleaned, and the breech plug can be replaced with great rapidity. It appears this breech-loader can without difficulty be applied to all ready-made Enfield guns. The simplicity, value, and effectual operation of this breech-loader are so obvious that a minute description of it is quite unnecessary.

Sir William Armstrong writes as follows:—"Permit me to correct a paragraph which has appeared to the effect that I had resigned the superintendence of the Royal gun factories. I have neither tendered my resignation nor had the slightest communication with the War Office on the subject; but I may add that, although my engagement is with the Government for a term of years, yet that I have no intention of retaining either the office or the emolument longer than my services may be required for perfecting the system of artillery which I have been the means of introducing. I may also be allowed to remark, lest certain words in the paragraph should give rise to a contrary impression, that, although the duties of the office which I have the honour to hold do not demand my constant attendance at Woolwich, yet they are such as to absorb my whole time and attention."

Obituary.

DEATH OF COMMANDER CHARLES ESTCOURT DAY, R.N.—The above gallant officer, whose death occurred a few days since at Melverton, Somerset, at the advanced age of 75 years, entered the Navy 1st November, 1798. He was present at the capture of the 32-gun frigate La Créole, and the 16-gun corvette Mignonne, in 1803, and in action with the 40-gun frigate La Poursuivante, near St. Nicholas Mole, St. Domingo. He was at the capture of four frigates off Rochefort, in 1806, passed the Dardanelles in February, 1807, and served on shore at the attack on the Island of Prota. He next served off Lisbon and in the Mediterranean, and commanded a gun-boat at the defence of Cadiz, and in 1812-13 was employed between Lisbon, Cadiz, and Gibraltar, conveying dispatches and freights of Government money, and on other particular services.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

CHARTERIS—August 27, at Titness Park, Sunning Hill, Berkshire, Lady Margaret Charteris, of a daughter.

COMBER—August 22, at Whitehaven, the wife of Lieutenant George M. Comber, R.N., of a son.

COOPER—August 28, at Pembroke Dock, the wife of H. Cooper, Esq., R.N., of a daughter.

FULLER—July 4, at Lahore, Northern India, the wife of Captain A. R. Fuller, H.M.'s Bengal Artillery, and Director of Public Instruction for the Punjab, of a son.

GORDON—June 23, at Secunderabad, the wife of Sir William Gordon, Bart., 17th Lancers, of a daughter, who survived her birth only a short time.

GREVILLE—August 23, at Putney, the wife of Major Greville, of a son.

HALE—July 14, at Umballah, the wife of George H. Hale, 6th Irregular Cavalry, of a daughter.

HALL—August 25, at 16, Gunter's Grove, Fulham Road, the wife of Captain W. King Hall, C.B., of H.M.S. Royal Adelaide, of a daughter.

HUNTER—July 8, at Shejehanpore, Rohilkund, the wife of Patrick Hunter, Esq., Captain 82nd Regiment, of a son.

MCMAHON—August 24, at 3, Merrion Square East, Dublin, the wife of Major McMahon, 14th (King's) Light Dragoons, of a son.

ORD—July 26, at Aldershot, the wife of Alfred R. Ord, Esq., 68th Regiment, of a son.

SOMERSET—August 23, at Heath Lodge, the wife of Colonel Poulett Somerset, M.P., of a son.

WINGATE—August 27, at Crofton House, South Hants, the wife of Major Wingate, of a daughter.

MARRIAGES.

BAILLIE—MAGENIS—August 28, at St. Peter's, Pimlico, by the Rev. J. B. Magenis, uncle of the bride, James William Baillie, Esq., late Royal Horse Guards, to Elizabeth Florence, daughter of F. R. Magenis, Esq.

BARING—GRAHAM—August 25, at St. Peter's Church, Pimlico, by the Rev. W. Graham, Lieut.-Colonel Charles Baring, Coldstream Guards, to Helen, youngest daughter of the Right Hon. Sir James Graham, Bart., M.P.

CUST—ALBEMARLE—August 29, at Ashridge, by the Hon. and Rev. Edward Keppel, Lieut.-Colonel the Hon. Peregrine Cust, uncle of the Earl Brownlow, to Frances, widow of Augustus Frederick, late Earl of Albemarle.

GILLING—GILBERT—August 23, at St. Mary's, Bathwick, Bath, by the Rev. George Robert Gilling, brother of the bridegroom, T. Gilling Gilling, Esq., M.A., Wadham College, Oxford, and of H.M.'s 22nd Regiment, to Fanny Jane, second daughter of the late Thomas Gilbert, Esq., of Cotton Hall, Staffordshire.

GRANTHAM—MASON—August 23, at Burton Pedwardine, near Sleaford, in the county of Lincoln, by the Rev. B. Snow, M.A., vicar, and brother-in-law of the bride, Henry Valentine Grantham, Esq., of Scawby, in the same county, Captain Royal North Lincoln Militia, to Emily Ann, second daughter of Richard Mason, Esq., of Atherston Place, Lincoln, formerly, and during many years, town clerk of the city.

GRIMES—LUND—August 23, at Patrington, near Hull, by the Rev. F. Sheppard, John Ralph, second son of Lieut.-Colonel John Grimes, Retired List Madras Army, to Mary Ann, only child of George Lund, Esq., M.D., Madeira.

HARRISON—PAIN—August 1, at All Saints', Fulham, by the Rev. R. Parkinson, assisted by the Rev. C. Baker, vicar, Arthur A. L. Harrison, fourth, son of the late Major James Hull Harrison, R.M.A., to Mary, second daughter of Edward Pain, Esq., of "The Lodge," Frimley, Surrey.

MANSBRIDGE—FLOWER—August 28, at St. Pancras Church, by the Rev. C. H. Andrews, William Henry Mansbridge, of the Admiralty, Somerset House, to Margaret, second daughter of William Flower, Esq., of Argyle Square.

PEMBERTON—LAFONT—August 23, at Hinxworth, Herts, by the Rev. H. D. Heatley, George R. Pemberton, Esq., M.D., of H.M.'s Indian Army, eldest son of Major-General George R. Pemberton, of the same service, to Winifred, youngest daughter of the late Rev. John Lafont, rector of Hinxworth, and of St. Ann's, Sutton Bonnington, Notts.

PERKINS—HANSARD—August 16, at Stoke Church, by the Rev. H. Marriott, P. S. Perkins, Esq., son of the late Captain Thomas Steele Perkins, R.M., to Sarah Story, daughter of the late James Hansard, Esq., of Darent Villa, Westerham, Kent.

ROBERTS—CRAFTER—August 23, at the parish church, Wimbledon, by the Rev. Charles Ingram Roberts, brother of the bridegroom, assisted by the Rev. H. W. Haygarth, incumbent, Richard Willett Roberts, Esq., of Gray's Inn, and Surbiton, second son of the late Captain T. T. Roberts, H.E.I.C.S., of Llwynderw, Breconshire, to Annabella, only daughter of the late William Crafter, Esq., of Erith, Kent.

DEATHS.

BROWNING—August 22, at his residence, Newcastle-upon-Tyne, the Rev. David Cunningham Browning, M.A., Chaplain of the Borough Gaol, and Honorary Chaplain to the Newcastle Volunteer Rifle Corps, aged 57.

DAY—August 21, at Milverton, Somerset, Charles Estcourt Day, Esq., Commander R.N., aged 75.

EDWARDS—August 22, at 19, Wharton Street, Lloyd Square, Thomas Edwards, Esq., formerly Lieutenant H.M.'s 20th Regiment of Foot, late of the 66th.

EDWARDS—August 26, at 19, Wharton Street, Lloyd Square, Alicia Adelaide, forty-four years the wife and four days the widow of the late Lieutenant Thomas Edwards, aged 69.

ENTWISLE—August 27, at Southport, William, the eldest son of William Entwisle, of Rusholme House, Manchester, and Cornet in H.M.'s 2nd Regiment of Life Guards, aged 21.

CONTRACTS FOR SALT BEEF AND SALT PORK.

Department of the Comptroller for Victualling, Somerset House, 18th August, 1860.

THE COMMISSIONERS for executing the office of Lord High Admiral of the United Kingdom of Great Britain and Ireland, do hereby give Notice, that on THURSDAY, the 27th SEPTEMBER next, at half-past One o'clock, they will be ready to treat with such persons as may be willing to contract for supplying and delivering into her Majesty's Victualling Stores at the undermentioned Ports, the following quantities of SALT MEAT, all of the cure of the present season, viz.:—

	Navy Beef.		Navy Pork.	
	Tierces.	Barrels.	Tierces.	Barrels.
Deptford... ...	2,500	2,300	10,000	10,500
Gosport	1,000	1,000	2,500	2,500
Plymouth ...	1,000	1,000	2,500	2,500
Haulbowline...	1,500	1,500	3,000	3,000

When to be delivered.—The Beef and Pork to be delivered into the respective stores as follows—viz., one-third of each quantity for each place by the 31st day of January, 1861; another third thereof by the 20th day of March, 1861; and the remainder thereof by the 15th day of May, 1861; or any greater portion, or the whole, at any earlier period, if preferred by the party tendering, and to be paid for by bills at seven days after date, which will be sent to parties as usual.

Their Lordships reserve to themselves the power, when the Tenders are opened, of contracting either for the whole, or for such part thereof only as they may deem fit, or for a greater quantity, or of not contracting for any, and also an unlimited power of selection.

A separate Tender must be given for the Beef, and a separate Tender for Pork, and every Tender must specify where the meat is intended to be cured.

Tenders for Pork of the cure of the United States of America will not be admitted.

Persons tendering for more than one port must give a separate Tender for each port.

Parties tendering are desired to take special notice that the use of wooden hoops is abolished, and that iron hoops only will be required for the casks in accordance with the conditions of the contract.

A Form of the Tender may be obtained, and the conditions of the contracts, to which particular attention is called, may be seen at this office, at the Victualling Yards at Gosport and Plymouth, or by applying to the Agent Victualler at Haulbowline; or to the Collectors of her Majesty's Customs at Bristol, Limerick, Belfast, Waterford, and Newry; or to the Secretary to the Postmaster-General at Dublin; or to the Commander conducting the Packet Service at Liverpool; or to the resident Agent for Transports at Leith.

No Tender will be admitted for a less quantity than 50 tierces, or 100 barrels.

No Tender will be received after half-past one o'clock on the day of treaty; nor any noticed unless made on the printed form provided for the purpose; but it will not be necessary that the party tendering, or an agent appointed by him, should attend at this office, as the result of the offer received from each person will be communicated to him and his proposed sureties in writing.

Every Tender must be addressed to the Secretary of the Admiralty, and bear in the left-hand corner of the envelope the words, "Tender for Salt Meat," and "Comptroller for Victualling," and must also be delivered at Somerset House.

FLORAL HALL, COVENT GARDEN.—Last week of Alfred Mellon's Concerts.

It is respectfully announced that these Concerts will positively TERMINATE on SATURDAY NEXT, September 8, the Band and Chorus being engaged for the Worcester Triennial Musical Festival.

The portrait recently completed of Lord Clyde, from sittings afforded since his return from India, and other new portraits of Sir J. Outram, Sir John Inglis, the late Sir H. Havelock, Colonel Lawson, &c., will also be exhibited, with the picture. Admission free by private address card.—79, Cornhill.

ARMY AGENCY.—The undersigned receive and remit Full and Half-Pay, Pensions, Dividends, &c., purchase and sell Guard Supplies, effect Life and other Insurances, and act generally as Agents and Bankers for Officers. A detailed Prospectus sent on application.

R. LOOKER & Co., 12, Pall Mall East, London, S.W.

MESSRS. A. K. KING AND COMPANY, ARMY & GENERAL COMMISSION AGENTS, 7, OLD COURT HOUSE STREET, CALCUTTA.

MESSRS. ADDISON & CO., ARMY AGENTS, 11, WATERLOO PLACE, PALL MALL, S.W. Exchanges negociated.

Pecuniary accommodation afforded to officers on full pay, on their notes of hand only, at a few hours' notice. Applications by letter promptly attended to.

Every description of army business transacted.

MONEY.—MONEY ADVANCED at a few hours' notice, on the most advantageous terms, to Noblemen, Officers in the Army, Heirs to entailed Estates, and Gentlemen of property, on their personal security, also on security of reversions to landed Estates, at 5 per cent., payment of which may be deferred until possession, on application to Mr. DICKER, 3, Craig's Court, Charing Cross, S.W.

MONEY.—Noblemen, Officers in the Army, Clergymen, Persons holding Government Appointments, Solicitors, and other Gentlemen, can have ADVANCES on their notes from a private channel without life assurance or delay, and with secrecy.—Apply to HUDSON, 28, Regent Street, Piccadilly, W

INDIA OFFICE, Aug. 9, 1860.

By Order of the Secretary of State for India in Council.

NOTICE IS HEREBY GIVEN, that TWENTY JUNIOR APPOINTMENTS in the Engineer Establishment of the Department of Public Works in India will in the year 1861 be open to public COMPETITION.

Candidates must be not more than 23 years of age, and must have passed either not less than three years as articled pupils of a civil or mechanical engineer, or not less than two years as students in a school or college recognised by the Secretary of State in Council as possessing an efficient class for civil engineering, and, in addition, not less than one year in practice under a civil or mechanical engineer.

On these points they must be provided with satisfactory certificates, and they must also produce testimonials of good moral character and conduct from the Engineer or Professor under whom they have served or by whom they have been instructed, as well as certificates from the Examining Physician to the India Office of their being in a fit state of health for service in India. On applying with these documents at the Department of Public Works in this office, in the course of the month of May next (during which month only will applications be received) the names of the candidates will be registered, and they will be authorised to present themselves for examination, on an appointed day, at the Royal Indian Military College, at Addiscombe.

The Subjects of Examination, and the maximum number of marks to be awarded for proficiency in each, will be the following:—

Writing English correctly and legibly from dictation to be indispensable.	
Algebra — Elementary Principles, Simple and Quadratic Equations, Surds, Ratios and Proportion, Arithmetical and Geometrical Progression.	80
Euclid—1st, 2d, 3d, 6th, and 1st 21 Propositions of the 11th Book	80
Statics—Composition and Resolution of Forces, the Centre of Gravity, the Mechanical Powers, Roofs, Arches, and Bridges, Strength of Materials	260
Dynamics—Collision of Bodies, Uniformly Accelerated Motion, Circular Motion and Centrifugal Force	
Hydrostatics and Hydraulics — Pressure of Fluids, Specific Gravity, and Equilibrium of Floating Bodies, Elastic Fluids and Atmospheric Pressure, Hydrostatic Machines ...	
Making Working Drawings of Machinery and Plans, Elevations, and Sections of Buildings ...	120
Framing of Estimates and Specifications from given Plans and Data...	80
Projects for Bridges, Locks, Dams, Roads, and other Engineering Works	140
Trigonometrical Surveying, comprising Plane Trigonometry, and Traversing with the Theodolite.	120
Land Surveying with Compass and Chain, and Plotting from a Field Book	60
Levelling and Use of the Instruments employed ...	60
	1000

No candidate will be passed who shall not obtain 600 marks, of which at least 140 must be awarded for mathematics; but the candidates who may obtain the prescribed number of marks will be ranked by the Examiners in the order of the numbers they may severally obtain, and as many of them as may be required at the time for the public service will be appointed "Probationers in the Public Works Department," the appointments being given to those who stand highest in the Examiners' list.

Each probationer must, within a month of his nomination, sign a covenant, describing the terms and conditions of his appointment, and must embark for India when required to do so by the Secretary of State in Council, who will provide for the expenses of his passage. Any nominee not embarking when required will forfeit his appointment; otherwise he will be allowed pay at the rate of 170 rupees (which is about the equivalent of £17 in English money) a month, from the date of his appointment.

On arriving in India he will be placed in a Civil Engineering College, or in such other educational institution as the Local Government may appoint, in order to acquire a colloquial knowledge of the Native languages, and to receive further instruction in his profession. While thus studying he will be allowed free quarters, in addition to his monthly pay.

When pronounced sufficiently qualified by the President of the College or Institution, he will be transferred to the effective establishment of the Public Works Department, with the rank to which his attainments may entitle him, and with all the rights and privileges appertaining to that rank in respect of pay, promotion, furlough, retiring pension, &c., particulars of which will be furnished from this office, on application. (Signed) T. G. BARING.

N.B. All communications to be addressed to the "Under Secretary of State for India."

SEYMOUR CLARKE, General Manager.

London, King's Cross Station, August, 1860.

SCINDE RAILWAY COMPANY—SCINDE RAILWAY.—At an EXTRAORDINARY GENERAL MEETING of the PROPRIETORS of the SCINDE RAILWAY, held at the offices of the Company, on Wednesday, the 29th August, 1860, W. P. ANDREW, Esq., in the Chair, the following Resolutions were passed unanimously:—

1. That the Directors be authorised, under the sanction of the Secretary of State for India in Council, to raise the sum of £83,000, in addition to the sum of £250,000 already authorised to be raised, by the issue of Bonds or Debentures bearing £5 per cent. interest, payable at the expiration of five years, with the option to the holders of such Bonds or Debentures, at any time within that period, of converting the same into Scinde Railway Capital Stock.

2. That the thanks of this Meeting are due to W. P. Andrew, Esq., for his conduct in the Chair this day.

W. P. ANDREW, Chairman.
THOS. BURNELL, Secretary.

Gresham House, Old Broad Street, E.C., August 29, 1860.

SCINDE RAILWAY COMPANY.—The Directors are prepared to receive TENDERS of SUMS of not less than £100 for the sum of £83,000 Debentures, payable in five years, about to be issued under the guarantee of the Secretary of State for India in Council, bearing £5 per cent. interest, and convertible into Stock at par, at the option of the holder.

By order of the Board, THOS. BURNELL, Secretary.

Gresham House, Old Broad Street, E.C., August 29, 1860.

THE ROYAL INSURANCE COMPANY, 29, Lombard Street, London, E.C., and Royal Insurance Buildings, Liverpool.

Chairman in Liverpool.—CHARLES TURNER, ESQ.
Chairman of London Board.—SAMUEL BAKER, ESQ.

At the Annual Meeting of the 10th inst., the following highly satisfactory results were shown:—

FIRE DEPARTMENT.

Notwithstanding the large accessions of business made annually through a long series of years, which obviously increase the difficulty of further advances, yet the Fire Premiums of the year 1859 rise above those of the preceding year by a larger sum than has been obtained by the increase of any single year since the formation of the Company, excepting the year 1853—disclosing an advance of 50 per cent. in three years. To this circumstance must be attributed the gratifying announcement that the accounts for the year show a profit of 42,488*l.* 3*s.* 4*d.*

The following figures exhibit the progress of the whole fire branch running over the last ten years:—

	Total Premuim received.	Increase of the Year above each preceding one.
1850	£44,027 10 0	£9557 19 8
1851	52,673 5 11	8645 15 11
1852	76,925 4 2	24,251 18 3
1853	112,564 4 4	35,639 0 2
1854	128,459 11 4	15,895 7 0
1855	130,060 11 11	1601 0 7
1856	151,733 9 6	21,672 17 7
1857	175,049 4 8	23,315 15 2
1858	196,148 2 6	21,098 17 10
1859	228,314 7 3	32,166 4 9

Placing the Company among the very largest offices in the kingdom. Indeed, it is believed that there are now only three offices in existence which equal it in fire revenue.

LIFE BUSINESS.

The Directors desire to call the especial attention of the Proprietors to the statements of the Life Branch of the establishment.

The Actuary's Report on this subject is accompanied by an appendix containing the fullest particulars of the investigation made, and is illustrated by two coloured diagrams, which make plain to the unprofessional eye the mortality experienced by the Royal, as indicated by curved lines, which contrast most favourably with the former averages of mortality, also displayed on the diagrams.

It is expected that these elucidations will attract a deep and profitable attention to the subject of Life Assurance in the minds of tens of thousands who have hitherto given no heed to its principles and advantages, and it is evident that this Company, as well as others, will not fail to reap much of the favourable consequences to be anticipated.

The bonus apportioned to the assured, with participation, amounts to 2*l.* per cent. per annum, to be added to the original sum assured of every Participating Policy effected previously to the 1st of January, 1858, for each entire year that it had been in existence since the last appropriation of bonus thereon, and is one of the largest Bonuses ever declared.

PERCY M. DOVE, Manager and Actuary.
JOHN B. JOHNSTON, Secretary to London Board.

UNDER THE ESPECIAL PATRONAGE OF
HER MOST GRACIOUS MAJESTY THE QUEEN,
AND
FIELD-MARSHAL
HIS ROYAL HIGHNESS THE PRINCE CONSORT,

CLOTHING FOR YOUTH.—The KNICKERBOCKER, the Highland Dress, Ladies' Travelling Mantles, Riding Habits, and Pantalons de Dames à Cheval, with much novelty and general excellence, H. J. & D. NICOLL have for the remainder of this season at WARWICK HOUSE, 142 and 144, Regent Street, W. In the autumn this branch will be removed to the rear of the old Establishment.

VISITORS TO THE SEASIDE AND TOURISTS will find much ease and comfort in the NEUTRAL-COLOURED LOOSE COAT, fastened by one or more buttons, with Trousers and Vest, all of one material, as originally introduced by Messrs. NICOLL, of Regent Street, W., and Cornhill, E.C.; they recommend also a Black Velvet Coat, and for gentlemen seeking a kind of half-dress morning coat a fine black cloth is specially prepared; this garment is edged with braid and cut somewhat as a riding-coat, and is getting into general use.

MODERATE PRICES WITH GENERAL EXCELLENCE.

E. MOSES & SON can confidently assert, that they possess advantages and facilities which are quite beyond the reach of any other house in the trade, and are thereby enabled to offer a REALLY GOOD ARTICLE at a VERY LOW PRICE. The most skilful cutters are employed, and durability of material and workmanship may be relied on.

The BESPOKE TAILORING DEPARTMENT is almost daily replenished from the best home and foreign markets.

The READY-MADE CLOTHING DEPARTMENTS are furnished with an immense assortment of goods for all classes, and all occupations. Also a great variety of CLOTHING for JUVENILES of all ages.

The HOSIERY and DRAPERY, HAT and CAP, and BOOT and SHOE DEPARTMENTS, contain a carefully-selected stock of the best and newest Manufactures.

N.B. Should any article not be approved of, it will be exchanged, or the money returned.

Gratis on application, or post free, E. MOSES & SON'S Book for the Present Season, containing "The Growth of an important Branch of British Industry," with rules for Self-measurement, and List of Prices. Also, just published, an elaborate Plan of their City Premises.

CORNER OF MINORIES AND ALDGATE, AND NEW OXFORD ST., CORNER OF HART ST., ALSO BRADFORD & SHEFFIELD, YORKSHIRE.

TOURISTS AND EXCURSIONISTS are specially provided for at E. MOSES & SON'S, Merchant Tailors, Hatters, Hosiers, Bootmakers, &c.,

CORNER OF MINORIES AND ALDGATE, AND NEW OXFORD ST., CORNER OF HART ST., ALSO BRADFORD & SHEFFIELD, YORKSHIRE.

Uniforms and Outfits for the Army, Navy, and Volunteer Service.

N.B. Estimates on application.

E. MOSES & SON, Corner of Minories and Aldgate, E.C., and New Oxford Street, corner of Hart Street, W.C.

J. B. JOHNSTONE, MILITARY TAILOR & OUTFITTER,
34, SACKVILLE STREET, LONDON, W.
AND
50, DAWSON STREET, DUBLIN,

Respectfully informs his Patrons that he has transferred the management of the Dublin business to his Son, from whom the most careful attention to commands may be expected; and J. B. J. takes the present opportunity to return very earnest thanks for the favours he has hitherto received. Books, measures, and patterns having been carefully retained, orders (by letter or otherwise) can be executed in London or Dublin; and all accounts due to the house are payable to J. B. JOHNSTONE, at either address:

IMPORTANT TO OFFICERS.—Have all your BOTTLED ALES, WINES, &c., PACKED IN SEYMER'S REFRIGERANT STRAW ENVELOPES, which entirely prevent Heating, Fermentation, and Breakage, will use repeatedly as Wine Coolers, prevent all litter on board ship or in quarters, and save 20 per cent. in space and freight. Supplied by all Wine Merchants at 9*d.* per dozen, and wholesale by THOMAS WHITEHEAD, 37, Eastcheap, London, E.C.

THE HABANA CIGAR COMPANY (Limited).

DIRECTORS.

Rear-Admiral Sir WILLIAM DICKSON, Bart., Chairman.
The Right Hon. Lord Garvagh. | Col. T. C. Hammill.
Rear-Admiral Duntze. | Alfred Hanson, Esq.
LOUIS SILBERBERG, Manager and Honorary Director.

The above Company invite public attention to their stock of real imported Habana Cigars, being the largest and choicest in Europe; also to their celebrated cut Tobaccos, and their newly-patented Pipe Cigars.

Offices and Warehouse, 48, Pall Mall, St. James's, London, S.W.

SAUCES.—Connoisseurs have pronounced LEA & PERRINS' "WORCESTERSHIRE SAUCE" one of the best additions to Soup, Fish, Joints, and Game. The large and increasing demand has caused unprincipled traders to manufacture a spurious article; but the "GENUINE" all bear Lea & Perrins' name on Bottle, Label, and Stopper.

Sold by CROSSE & BLACKWELL, London, and all respectable Oilmen and Grocers.

Sole Manufacturers—LEA & PERRINS, Worcester.

CROSSE AND BLACKWELL, Purveyors in Ordinary to Her Majesty, invite attention to their PICKLES, SAUCES, TART FRUITS, and other Table Delicacies, the whole of which are prepared with the most scrupulous attention to wholesomeness and purity. C. & B. have for many years enjoyed the high honour of supplying Her Majesty's Table with their manufactures. A few of the articles most highly recommended are—Pickles and Tart Fruits of every description, Royal Table Sauce, Essence of Shrimps, Soho Sauce, Essence of Anchovies, Orange Marmalade, Anchovy and Bloater Pastes, Strasbourg, and other Potted Meats, Calf's-foot Jellies of various kinds for table use, M. Soyer's Sauces, Relish, and Aromatic Mustard, Carstairs' Sir Robert Peel's Sauce, and Payne's Royal Osborne Sauce. To be obtained of all respectable Oilmen, Grocers, &c., and wholesale of

CROSSE & BLACKWELL, 21, Soho Square, London, W.

GARDNERS' £2 2*s.* DINNER SERVICES complete, best quality. A large selection of patterns of the choicest description. Breakfast, Dessert, Tea, and Toilet Services, at the lowest possible prices. Cut Wines, 3*s.* 6*d.* per dozen; Cut Quart Decanters, 7*s.* 6*d.* per pair.—H. & J. GARDNER (by appointment to Her Majesty, the Board of Green Cloth, Lords of the Treasury, Admiralty, Office of Works, Customs, and the other Government Offices), 453 and 63, Strand, Charing Cross, S.W. Established 108 years. Engravings free by post.

GLASS AND CHINA.

PELLATT & CO. have for more than thirty years had the honour to supply Officers' Messes with the above articles, and continue to manufacture the quality which has during that period given great satisfaction. Patterns and Estimates forwarded to all parts of the Country.—Address, Falcon Glass Works, Blackfriars, London, S.E.

GLENFIELD PATENT STARCH, USED IN THE ROYAL LAUNDRY,
AND PRONOUNCED BY HER MAJESTY'S LAUNDRESS TO BE
THE FINEST STARCH SHE EVER USED.
Sold by all Chandlers, Grocers, &c., &c.
WOTHERSPOON & Co., Glasgow and London.

THE GUINEA COAL COMPANY'S (double screened) WALLSEND COAL, One Guinea per Ton (All the Year Round). HORATIO MORGAN, Sole Consignee for London, Office, 17, Wellington Street, Strand, W.C., where all orders are to be sent.

N.B. No Agents or Travellers employed.

TO EMPLOYERS.—THE ARMY & NAVY PENSIONERS EMPLOYMENT SOCIETY, No. 22, Parliament Street, S.W., has on its registry men of unexceptionable character, who have served as non-commissioned officers and privates in different branches of Her Majesty's Army and Navy. They are still in the prime of life, and besides the advantage of their military training and discipline, possess the material guarantee afforded by a pension, and are satisfied with moderate wages. Among them will be found men of every qualification, and fitted for situations of trust and responsibility. They are peculiarly fitted for places of the following description:—Hall and door-keepers to public and private establishments, messengers to ditto, grooms, helpers, and occasionally in-door servants and gardeners, porters, watchmen, gate, office, and time-keepers, constables, storekeepers, and park-keepers. No fees or expenses to employers or employed. N.B. The men belonging to the London Division of the Corps of Commissionaires have been obtained at this office.

EDWIN KESTERTON, COACHBUILDER, 93 and 94, LONG ACRE, LONDON, W.C.
Inventor and Builder of the AMEMPTON, and the AMEMPTON SOCIABLE, each forming a complete open and close carriage, well adapted for the colonies, being roomy, light, and airy. Sociable Driving Phaeton, forming the light driving Phaeton and the useful Waggonette. Patent two-wheeled Dog Cart, light, strong, and giving entire freedom from the action of the horse. E. K. invites inspection of the above, also to his light Sociable Landaus, Broughams in various sizes, Cabriolet and Park Phaetons, &c., &c.

THE NEW REGULATION BRIDLE.

A. DAVIS,
MILITARY SADDLER,
33, STRAND, W.C., AND AT ALDERSHOT CAMP.

OFFICERS about to join their Regiments or proceeding abroad can be supplied at short notice with the REGULATION SADDLERY OUTFIT of the best quality at the lowest prices.

MILITIA OFFICERS, CADETS, SURGEONS, &c., are requested to apply to A. DAVIS for an Estimate for Complete Regulation or Private Outfit in Saddlery.

A. DAVIS, 33, Strand, W.C.

H. PEAT,
SADDLER AND HARNESS MAKER,
14, OLD BOND STREET, LONDON, W.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and efficient, combining a wide field of observation with extraordinary defining power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. BURROW, Great Malvern, Worcestershire.

CABIN FILTERS.—The Last Improvement.—Dr. Ward says "I would strongly recommend every family going a distant voyage to take one of LIPSCOMBE'S SELF CLEANSING CHARCOAL CABIN FILTERS; it will be found invaluable." These Patent Filters can only be obtained of LIPSCOMBE & Co., Temble Bar, W.C.

CRICKET.—REGIMENTAL OUTFITTER, —JOHN LILLYWHITE'S CRICKET WAREHOUSE, 5, Seymour Street, Euston Square, London, N.W. Every article connected with British Sports may be had. Illustrated Lists of Prices post free. John Lillywhite has lately been specially appointed to supply several of H.M. Regiments at home and abroad.

CRICKET.—J. D. BARTLETT, Manufacturer of the Repercussive and Cane-handle Bats, which are acknowledged by our best Cricketers the best driving bats ever made. They have a beautiful spring in the handle, and are warranted not to break. Clubs, Schools, and Regiments supplied at reduced prices, wholesale and for exportation.—171, Waterloo Road, S.W.

THE GAME OF CROQUET, AUNT SALLY, LAWN BILLIARDS, SUMMER ICE, and all the fashionable games of the season, may be obtained at CREMER'S German Toy Warehouse, 27, New Bond Street, W.

SKAIFE'S PATENT PISTOLGRAPH (Price Ten Guineas), "The greatest photographic discovery of the age," with hundreds of its chromo-crystal productions, including Hyde Park equestrians, and jewellery guinea portraits of babies, "the most beautiful instantaneous pictures which photography has yet produced."—*Brighton Gazette*. Now on view at SKAIFE'S Pistolgraph Depôt, 47, Baker St., Portman Sq., London, W. Articled pupils received at a moderate premium.

THE NEW DISCOVERY.—LINDORFF'S ingenious and wonderful invention for TAKING PORTRAITS and LANDSCAPES, by day or night, WITHOUT APPARATUS. The secret, with instructions and specimens, forwarded for 2*s.*—W. LINDORFF, Drawing Academy, 2, Denmark Hill, Camberwell, S.

CHUBB'S PATENT DETECTOR LOCKS.
CHUBB'S FIRE & BURGLAR-PROOF SAFES.
CHUBB'S FIRE-PROOF STRONG ROOM DOORS.
CHUBB'S STREET-DOOR LATCHES.
CHUBB'S CASH AND DEED BOXES.
Illustrated Price List sent free.

CHUBB & SON, 57, St. Paul's Churchyard, London, E.C.; 28, Lord Street, Liverpool; 16, Market Street, Manchester; and Wolverhampton.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Gloves and Belts*),
172, NEW BOND STREET, LONDON, W.,
And Sold by all respectable Chemists throughout the Empire.

DR. BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE TABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates. Sold by Buchan & Co., Patentees, 22, Newman St., Oxford St., London, W., and all chemists in town and country. Prices:—Pills, per box, 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.*; Ointment, per pot, 1*s.* 1½*d.*, and 2*s.* 9*d.*; Essence, per bottle, 11*s.*, or family bottle containing four times that quantity, 33*s.* Agents:—Barclay, 75, Farringdon Street, E.C.; J. Sanger, 150, Oxford Street, W.; Hannay, 63, Oxford Street, W.; Butler, 4, Cheapside, E.C.; Hooper, 43, King William Street, London Bridge, E.C.; R. Howden, 78, Gracechurch Street, E.C.; Prout, 229, Strand, W.C.; &c. &c.

Just published, gratis, or post free for one stamp, to be had of all Agents, and at 22, Newman St., W., Extracts from Dr. Buchan's Work, entitled, BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

NERVO-ARTERIAL ESSENCE, prepared only by Dr. WM. BATCHELOUR, M.R.C.S.E., 1835, and M.L.A.C. 1834. It strengthens the vitality of the whole system without reaction, and speedily removes nervous complaints. In bottles, at 2*s.* 9*d.*, 4*s.* 6*d.*, 11*s.*, and 33*s.*, at Goodyer's, 31, Regent Street, W.; Butler & Crispe's, 4, Cheapside, E.C.; Sutton & Co., Bow Churchyard, E.C.; Barclay & Sons, Farringdon Street, E.C.: 12, Finsbury Place South, City, E.C., and all Chemists.

RUPTURES.—HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—*circumference two inches below the hips.* Price single, 12*s.*; double, 18*s.*; postage 10*d.* and 16*d.* Illustrated circulars on application to Mr. E. HUXLEY, 12, *Old Cavendish Street*, Oxford Street, W.

DAVIESON'S EVERLASTING TEETH.

THE LATEST DISCOVERY.

MR. EDWARD DAVIESON, SURGEON-DENTIST, has introduced a material for the construction of ARTIFICIAL TEETH so extraordinary that nature appears to have made good the ravages of TIME, DISEASE, or ACCIDENT, and when fitted detection is impossible, even though the wearer's mouth be closely examined. The price is so moderate that it is within the reach of all, and it is fitted without springs or other unsightly fastenings. The removal of stumps is unnecessary, and thus all pain is avoided. MR. EDWARD DAVIESON invites one visit of inspection to his establishment, which will convince the most sceptical of the truth and straightforwardness of this statement. The LIQUID ENAMEL, for Stopping Decayed Teeth, is ENAMEL WHITE, keeps its colour, and lasts for ever. It is invaluable for Front Teeth. Attendance daily from Ten till Six. Consultations free. MR. EDWARD DAVIESON, Electric Telegraph Office, 448, West Strand, London, W.C. The Descriptive Pamphlets free for two stamps.

NEW HUMOROUS SPORTING NOVEL.

Director, Major Corte, Major of the Staff of the Sardinian Army during the late War; Professors Oswald Hunter (Wrangler), Cantab., Dr. Hessen, and others. The number of Professors is arranged to afford to each Pupil the advantages of Private Tuition. Applications addressed to OSWALD HUNTER, Esq., The Cedars, Putney, S.W.

SELECT CLASSICAL AND MILITARY ESTABLISHMENT, HOLLAND HOUSE, BLACKHEATH, by T. KIMBER, M.A., Author of "Vauban's First System," &c. References:—The Rev. Dr. Jelf, King's College, London; the Rev. Canon Hey, York, &c. Prospectuses can be obtained from Rivington's, Waterloo Place, S.W.; Parker & Son, 445, West Strand, W.C.; Ponsonby, Dublin; The Library, Cheltenham; Stotheran, York.

*** Arthur E. Havelock, who gained the highest number of marks at the examination in June for admission to Sandhurst, passed from Holland House.

ROYAL MILITARY ACADEMY, WOOLWICH, S.E.

At the recent Competitive Examination for admission into the Royal Military Academy, Woolwich, commenced on the 30th ultimo, the following gentlemen passed directly and on first trial from Mr. R. B. DE BURGH'S MILITARY ESTABLISHMENT, Dublin:—

Mr. G. C. Bayley,	5th Place.	Mr. F. B. Knox.
Mr. T. Fraser,	9th ,,	Mr. C. W. E. Murphy.
Mr. H. M. Hayes,	13th ,,	Mr. C. F. B. Grey.
Mr. R. G. Scott,	17th ,,	Mr. W. H. Rathborne.

The number of successful candidates direct from Mr. De Burgh being greater than that from any other Establishment in the United Kingdom.

At the Examination held in January, 1860, the following gentlemen (the only candidates direct from Mr. De Burgh's) passed on first trial:—

Mr. W. J. Galway.	Mr. R. A. Livesay.
Mr. J. L. Morgan.	Mr. C. Greer.

Mr. Galway obtained 4432 Marks and the Tenth Place; and Mr. Morgan 4108 Marks and the Fourteenth Place. These high Marks were obtained without the aid of Classics, their Marks for Mathematics alone having been 2555 and 210 respectively.

ROYAL INDIAN MILITARY COLLEGE, ADDISCOMBE.—At the late Competitive Examinations for admission into the Royal Indian Military College, held in January, 1860, and May, 1860, the following gentlemen (the only candidates direct from Mr. De Burgh's) passed on first trial:—

Mr. H. Hardinge	2nd Place.
Mr. L. F. Boileau	12th ,,
Mr. T. R. Disney	25th ,,

At the above Examinations, the successful candidates direct from Trinity College, Dublin, had been under Mr. De Burgh's tuition.

Mr. De Burgh's references to the Parents of present and former pupils include the following:—The Right Hon. and Right Rev. the Lord Bishop of Meath, the Right Hon. Joseph Napier, Venerable the Archdeacon of Meath, Colonel Lake, C.B.; Colonel Knox, J.P.; Colonel Morgan, R.A., Swansea.

No. 6, Harcourt Street, Stephen's Green, Dublin.
July 30th, 1860.

ARMY EXAMINATIONS.—Candidates for the Artillery, Line, and Cavalry, are rapidly and efficiently prepared at an establishment, the pupils of which have, within the last two years, come out eight times first, five times second, and three times third on the list. Apply to Captain LENDY, Sunbury, S.W.

MILITARY EXAMINATIONS.—A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

THE ARMY, WOOLWICH, ADDISCOMBE, DIRECT APPOINTMENTS. — An OXFORD GRADUATE, very successful in the above examinations, has VACANCIES for TWO resident or non-resident PUPILS. Able tutors attend, and the pupils receive an amount of individual attention not obtainable in large establishments. Terms moderate and inclusive. References of a high order.—Address B. A., 28, Queen's Road, Haverstock Hill, N.W.

ARTILLERY EXAMINATIONS. — Candidates for the Competitive Examinations are individually prepared at an establishment which receives six pupils only for that branch of the Service. Four resident professors. Apply to X., care of Messrs. PARKER, 445, Strand, W.C.

SPECIAL MILITARY TUITION, including Geometrical and Military Drawing, Hindustani, Fortification, Military Surveying and Reconnoitering. By Lieut.-Colonel MORLAND, who also continues the preparation of candidates for Addiscombe and the Military Competitive Examinations.—At 20, Norland Square, Notting Hill.

EDUCATION IN FRANCE.—TWO GENTLEMEN, one an English and the other a French Protestant, with the assistance of five highly-qualified Masters, PREPARE 14 YOUNG GENTLEMEN for the Competitive Examinations for Woolwich, Sandhurst, Addiscombe, the Indian Civil Service, and direct appointments in the Army. Terms, 50 to 60 guineas. Address, B.A., Post-Office, St. Pierre, Lés Calais.

Avoid counterfeits and base imitations.

GENERAL JACOB'S RIFLES are unrivalled in accuracy, and effective at 3000 yards, with Sword Bayonet, regulation length and gauge (577), are the most perfect weapons for Volunteers or Sporting purposes. The improved ENFIELD-PATTERN RIFLE, Patent double-action Revolvers, Breech-loading Arms, Swords, &c., can be had Wholesale or Retail of

GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.

Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.

Gun Factory Established 1780.

THOMAS WILSON'S BREECH-LOADING RIFLE.

Mr. Thomas Wilson begs to call the attention of the public to his new BREECH-LOADING RIFLE, and to state that he has committed the working of the patent to Messrs. Rabone, Brothers, & Co., of 47, Broad Street, Birmingham, to whom all inquiries or other communications may be addressed.

This Rifle is well adapted for all branches of Her Majesty's Service, and is pronounced by the highest authorities to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—

1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.

2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.

3rd. It is easy to manufacture, and can be made entirely by machinery.

4th. It is so constructed that accident from careless loading, or otherwise, is impossible.

5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly, for firing, without the aid of tools. This facility would be occasionally valuable in rendering the Gun useless to an enemy, or to mutinous troops.

6th. The action is always in good order, requiring no adjustment in use.

7th. The action is equally applicable to single and double-barrel Guns, and may be used for sporting as well as military purposes.

8th. The principle can be applied to all ready-made Enfield guns, at an immense saving to the country.

Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.

A pattern may now be seen at Mr. Lancaster's, No. 151, New Bond Street, W.; and at Mr. Pritchett's, No. 86, St. James's Street, London, S.W.; as well as at Messrs. Rabone, Brothers, & Co.'s, 47, Broad Street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 568 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60*s.* per 1000; blank, 33*s.* per 1000.

[COPY.]

"Ordnance Select Committee, Royal Arsenal, Woolwich, April 17th, 1860.

"Sir,—Since I last addressed you on the subject of your Waterproof Cartridges, I have to inform you that 60 of them have been exposed in an atmosphere saturated with moisture, at a temperature of 90 degrees, for a fortnight. The result has been favourable, as far as this test is concerned, to their Waterproof qualities.

"I have, therefore, to request you will be good enough to state, for the information of the Committee, the nature of the lubrication you employ; whether it is in any way connected with the Waterproof properties of the Cartridge, and whether, in the event of their being adopted, the Service lubrication, which is wax, might not be employed.

"I have the honour to be, Sir,
"Your obedient Servant,
"J. H. LEFROY, Colonel, R.A.

"Mr. Thos. H. Anthony,
"37, Broad Street, Birmingham."

PHILLIPS BROTHERS, Goldsmiths, &c., 22, Cockspur Street, London, S.W.

CHRONOMETERS, WATCHES, CLOCKS, &c.

E. WHITE, for several years principal assistant at Messrs. Dent's, of Cockspur Street, having taken the above premises (formerly occupied by Messrs. Green & Ward), respectfully solicits an inspection of his Stock, comprising a choice selection of CHRONOMETERS, WATCHES, CLOCKS, &c., all of which have been recently manufactured on the most improved principles, by workmen of the first talent.

20, Cockspur Street, Pall Mall, London, S.W.

ELKINGTON & CO. desire respectfully to call the attention of Regimental Messes requiring PLATE to their Manufactures, which may be obtained in great variety from their establishments.

LONDON: 22, Regent St., W., and 45, Moorgate St., E.C.
DUBLIN: College Green.
LIVERPOOL: Church Street.

Manufactory and Show Rooms, Newhall Street, Birmingham.

Estimates, Drawings, and Prices sent free by post. Replating and Gilding as usual.

FREE TRADE IN CHRONOMETERS.—JOHN PENNINGTON, Chronometer, Watch, and Clock Maker, for many years Manufacturer for the Trade, purposes supplying the public at Manufacturers' prices. CHRONOMETERS, as supplied to the Royal Navy, 25*l.* Terms, cash.

"Mr. Pennington well deserves success, for science will profit also, and the public will thereby be the gainers."—See "Nautical Magazine," May, 1860.

WATCHES & CLOCKS OF EVERY DESCRIPTION.
12, Orchard Street, Portman Square, London, W.

City Agency—27, Lombard Street, E.C.

GOLD CHAINS.—PARIS FIRST CLASS MEDAL FOR JEWELLERY, AND LONDON PRIZE MEDAL FOR GOLD AND JEWELLED VASE.—WATHERSTON AND BROGDEN respectfully invite the public to an inspection of their GOLD CHAINS AND JEWELLERY, which have been honoured with a First Class Medal at the Paris Universal Exhibition, accompanied by the flattering testimonial of "*Excellente bijouterie courante; Modèles Spéciaux à sa Fabrique.*" "Excellent jewellery, comprising chains, bracelets, brooches, rings, necklaces, seals, &c., every article being remarkable for its high finish," all made on the premises.

WATHERSTON & BROGDEN, Goldsmiths.

Manufactory, 18, Henrietta Street, Covent Garden, London, W.C. Established A.D. 1798.

N.B.—Assays made of Chains and Jewellery for 1*s.* each.

BRAVINGTON, LATE YOUNG, 51, PRINCES STREET, LEICESTER SQUARE, W.C.
GOLD WATCHES, CHAINS, AND JEWELLERY,
Of the Best Quality, new and second-hand, at Moderate Prices.
Money advanced on Diamonds, Plate, Jewels, &c.

PRIZE MEDAL FOR RIFLE VOLUNTEERS. —T. R. PINCHES & CO. have always the above ready for delivery. Gold, 10*l.* 10*s.* Silver, 2*l.* 2*s.* Bronze, 1*l.* 1*s.*—27, Oxendon Street, London, S.W.

THE ARMY CHAIR is the most Comfortable, Economical, Portable, and Useful Chair yet invented, equally adapted for a Couch or Bed; simple in its action, and impossible to get out of order. For Officers in the Army or Navy, Travellers, or Invalids, it is invaluable, as it combines every comfort and convenience for rest by day and repose at night. Manufactured by the Patentees, HILL & MILLARD, Military Outfitters, 7, Duncannon Street, Trafalgar Square, W.C.

WOOLF & SON'S PORTABLE FURNITURE.—ALLEN'S PATENT NEW PORTABLE BEDSTEAD, the greatest improvement ever effected in strength and lightness, invaluable for either barracks or campaigning, and approved of by the highest military authorities. Particulars and price forwarded post free; also their Illustrated Priced Catalogue of Portable Furniture of the newest description, Desk, Dressing Cases, &c. Estimates for Uniform for any branch of Her Majesty's Service, post free from Messrs. WOOLF & SON, Army Contractors and Portable Furniture Manufacturers, 59, Piccadilly, W., opposite St. James's Street, and 45, Old Bond Street, W., one door from Piccadilly.

THE INCOMPARABLE BEDS, FOR AIR OR HOT OR COLD WATER (ARCHBOLD'S PATENT).—These Beds may be filled with air or hot or cold water, they require no tossing about (or making as it is termed), are easily washed, are light and portable, may be packed in a carpet bag, and therefore invaluable to EMIGRANTS, YACHTSMEN, NAVAL AND MILITARY OFFICERS AND TRAVELLERS. They form in an instant Six or more Swimming Beds, and will stand any climate. No Emigrant should leave this country without one or more of these Beds.

Beds, 6 feet long by 3 feet wide, price 3*l.*, and 7*s.* 6*d.* extra for every 6 inches additional width. Pillows, 8*s.* Inflating Apparatus, 2*s.* 6*d.* Will be forwarded on receipt of Money Order by BENJAMIN GEORGE, corner of Wharf Street, near the Canal Bridge, Kingsland Road, N.E.

Printed by JOSEPH SMITH, of No. 10, Malvern Cottages, Portland Place North, Clapham Road, in the county of Surrey, at the office of Messrs. BRADBURY & EVANS, in the precinct of Whitefriars, in the city of London, and published by him at the office, No. 16, Wellington Street, Strand, in the county of Middlesex.—SATURDAY, September 1, 1860.

THE great experiment which an imperial necessity has rendered inevitable is to be tried at some indefinite period, under most difficult circumstances. The change in the constitution of the Indian Army, which, be it amalgamation or fusion, absorption or annihilation, is of primary and imperious importance whenever it be made, will find itself tested by the immediate pressure of the very circumstances and the results which have led to its introduction. In the immense empire wherein the crucial experiment must be made, there is meanwhile a grand chaos of broken military systems and fragmentary forces. When it is to be reduced to order we know not. "All that we know is, nothing can be known." The Commission have sat, and have prepared a Report, and have made up a scheme for the solution of the difficulties, which are not insuperable simply because they must be overcome. But the Commissioners have not encountered all the difficulties; they have not considered all the points which must be met and smoothed down;—in a word, there remains much for them to do ere the Government can frame any plan for carrying into effect the resolves of the Legislature and of the country for the creation of one army out of the fragments of the Company's forces, consisting mostly of officers already employed in divers capacities in India, conjointly with the Army which has, hitherto, been known in India under the distinctive appellation of "The Queen's." All argument in reference to the propriety of the reconstruction of these two armies into one, or the composition of the amalgam, is needless or unwise, for the country, right or wrong, determined it should take place. The officers whose reputation or fortunes were made under the banners of the Company, have in vain struggled to avert the process of legislative amalgamation, to which the large body of the younger men who are not saturated by the prejudices and traditions of the old Sepoy army, look forward with unanimous satisfaction. In fact, it was evident to the latter that the Mutiny had effectually destroyed the fame and the prestige, as well as the exclusive privileges, of an army which could only be what it was as long as the Company itself retained its distinctive rights and existence. The Indian sages still shake their heads; they cannot or will not see that theories must bend to prejudice—necessities.

A popular impetus, a universal prejudice, is a great fact. If the change be accompanied or followed by any of the more serious evils which the old Indian officers have indicated, the result will be not merely the loss of the Indian Empire at some time or other, but the certain degradation of the Imperial Army at a more precise and definite period.

We are now about to stand face to face with the people of India undisguisedly and openly as armed masters may stand before unarmed dependents. It is true that the attitude will be assumed under conditions which may or may not modify its effects on the minds of those who are principally concerned, because the word of the Queen of England is plighted to the principle of equality in India between Europeans and natives,—whether practicable or not we are less than able to determine. But this we do know, that equality is impossible in conjunction with what is called Anglo-Saxonism, and what is better defined as "Conquering-race-dom."

The mutiny, which destroyed the rule of the Company and annihilated the native army, has forced us, whilst we proclaim the equality principle, to show India that she is ruled with a white hand in a coat of mail. Even as we cry out that we are not proselyting Christians and lawless conquerors, that we do not seek to extend our territories, and that we respect Hindoo rites and Mussulman rights, we are compelled to open the camera obscura of Government and to show that we have discarded all native machinery, and that the whole engine is worked by European flesh and blood. The natives, whilst they congratulate themselves on the recognition of the right of adoption, and of a long roll of promises, see a wall of bayonets advancing on them in front of a sea of tax-gatherers.

We are by no means confident that the wall, strong enough now, will remain intact or upright. The general notion that we are in India by right of conquest is unfounded. We crept into India as subsidising chapmen. We expanded, and grew by courtesy till we were strong enough to fight; but we never yet encountered the full force of India, for we had always a portion of India fighting for us against another portion which opposed us. On that principle the old Company acted, and throve, and grew like a true oriental power. The Empire of England grows out of the ruins of the Empire of Leadenhall Street. We have to see if the genius, energy, and stupendous efforts which achieved and consolidated the one, will be developed or used in the service of the other. Assuredly they will be all required if the prophecies of the old Indians,—if the theories and experiences of men of great note and knowledge of the country be in any small degree realised. Concurrently with the new order of things, there must be brought to bear on India a considerable amount of public solicitude and of public opinion. The vulgar exultation which bursts from a few brutal men at the thought that they are to revel in the wild licence of their unchecked passions must be promptly rebuked, and for our own part we are heartily glad that Egypt has been made the scene of outrages which would have been perpetrated, if they had not been punished, in India. What can we say when a newspaper in the English language publishes in India such sentiments as these? We print them, that our readers in England may know how it is that Englishmen may disgrace their Christianity, their race, their very souls, in India, when removed from the influences of their civilisation, and their faith.

The Azimgurh correspondent of a contemporary (says an Indian paper) in discussing the Income Tax, observes, "I am sick of being told that we have this and that mission in India. Our mission is a plain one. In the first place press tight possession of every inch of ground you already have in India, and by degrees annex the rest. In the second place, make the country pay every available pice you can squeeze out of it, and that is about the Saxon mission in India. We look upon the conquered race with the most profound contempt, and treat them very summarily; but all glorious cant must be propitiated, and we, accordingly, wear white neckties, turn up the whites of our eyes, and say, 'our mission is civilisation and evangelisation!' Whereas our mission is actually rupees."

This is in the face of the Queen's proclamation, of our Company's promises, of our own professions, of our missions of daily teachings, and of the very word of God. Probably the sordid scoundrel who wrote these words calls himself a Christian; it is certain he believes he is a good subject, and a very good Englishman. Well may Sir James Outram be filled with the saddest forebodings if such men as these are allowed in India at all. At this moment we have grave discontent in many parts of Hindostan — we have actual rebellion in some — let us at least guard against the advent of a spurious Garibaldistic insurrection, which might find us in a transition state, in which the falsehood, cruelty, debasing avarice, and sordid love of gain of men who outrage our name and our faith, would be the most tremendous allies of our enemy.

Several appeals have been made to us to render such aid as we could render to those who are interested in raising volunteers in England for Garibaldi's Italian army. Our views on the matter may be unpopular; but as we think they are justified in morality, as they are assuredly simple and sincere, we shall state them. We think, then, that every man who joins an armed force for the purpose of killing, or assisting in killing, the soldiers and servants of a state with which the country to which he belongs is not at war, whether he does so because he has nothing else to do, because he "wants to see service," or "desires excitement," is little, if at all, better than a principal or accessory in murder. We do not at all pretend to discuss the political or ethical merits of the case. It is to be tried "in foro conscientiæ," whether the cause justifies the homicide. The appeal must be to a tribunal beyond this world; but human laws are dead against the offender if the "corpus delicti" be found in the battle-field. Lafayette and Decateur were justified or not as their feelings might lead them to feel in fighting as Frenchmen for the independence of America; but assuredly "in foro juris" their case had been very difficult if they had been taken by the English in arms, whilst France was at peace with England. We hope and believe "che Italia faro da se." If she needs Volunteers such as she can get at the eleventh hour, her resurrection must be a spasmodic jump from an open tomb. The principle of unauthorised volunteering is bad—it is in fact filibustering, and we do not believe that Garibaldi is desirous of such aid; "and least of all such aid as ye will give."

The Duke of Somerset, Rear-Admiral the Hon. Frederick T. Pelham, C.B., Captain Charles Eden, C.B., and Mr. S. Whitbread, M.P., arrived at Holyhead on Thursday week, from the metropolis, to commence, as Lords Commissioners of the Admiralty, their customary autumn tour of inspection. Rear-Admiral Lord Clarence Paget, C.B., as First Secretary, joined their Lordships on Friday morning from his seat in the Principality. During several hours that day their Lordships were engaged in a thorough inspection of the public works in progress at that harbour. Their Lordships left Holyhead early on Saturday morning for Queenstown. They proceeded to Cork on Monday, where they arrived the same evening, and went on to Passage, passing the night on board the Admiralty yacht Osborne, which lay at anchor off that town. Shortly after ten o'clock on Tuesday morning she got under weigh and proceeded with them to Queenstown. Their Lordships, accompanied by Rear-Admiral Talbot, commander-in-chief on the Irish station, immediately proceeded to Haulbowline, where they remained for some hours inspecting the naval works there. At half-past one o'clock they returned in the admiral's barge to the Osborne. They arrived at Pembroke on Wednesday evening, where they were joined by the Comptroller of the Navy, Rear-Admiral Sir Baldwin Walker, Bart.; and having gone through their official duties at that port, they re-embarked in the Osborne on Friday morning, and started for the Scilly Islands and Devonport, which latter place they are expected to reach this day. They will, after completing their inspection of this important naval arsenal, proceed to the Channel Islands, andthence to Portsmouth.

The Channel Fleet is still in Milford Haven, the capacity of which to shelter large ships during heavy weather has of late been amply tested. There was nothing known of the future movements of the fleet up to the evening of Thursday last.

Admiral Sir Charles Napier has written to us to say that he never intended, in his speech on the Naval Discipline Bill, to state that drunkenness existed in Her Majesty's ship Edinburgh, as he has reason to believe that she is a very sober ship, there having been only six cases of inebriety in her during the last six months. Sir Charles mentions that his remarks applied to Modern Athens, as being the reverse of a sober city so far as the sailors who inhabited it were concerned.

POLITICAL AND LEGISLATIVE CONSIDERATIONS ON NATIONAL DEFENCE.*

Last winter Sir Robert Gardiner presented the people of England with a Christmas-box, in the shape of a pamphlet, entitled, "Political and Legislative Considerations on National Defence," which we noticed in these columns some months back.

This pamphlet provoked, it will be recollected, a good deal of discussion, in the course of which Sir Robert Gardiner considers that he was not always done justice to, and that his views were sometimes distorted and misconstrued; he, therefore, takes the opportunity of the appearance of a "third edition" of his little book to correct, in a lengthy Preface, some of the misapprehensions which have arisen, and of adverting to some events of European interest which have occurred since he first gave his considerations to the public. "A want of appreciation of the national importance and services of the Volunteer corps now in course of training in England" has, Sir Robert Gardiner tells us, been erroneously imputed to him. We certainly do not understand how such opinions could be charged to the gallant author by any one who has given his pamphlet an unbiassed perusal. All that was there insisted upon was the necessity for "a systematic training and permanently maintained discipline," which alone can qualify the Volunteers to occupy the post for which they are really intended, and where they will alone be valuable, viz., that of auxiliaries to the regular Army. The soundness of this doctrine we believe few will be inclined to dispute. On discipline must depend not only the efficiency, but the very existence of all large military bodies, whether those bodies be intended to fight in masses and battalions like regular troops, or in the more open and independent order which is proper for Volunteers.

The very term "loose fighting," which we so frequently hear used, is calculated to mislead people. The training which is required to make an efficient light infantry soldier is even stricter and more careful than that which suffices for the man who, to a certain extent, always has the support of comrades, and who is dependent, not so much upon his individual intelligence, as upon the movements of the mass of which he is an integrant part. We think that this line of argument, to the truth of which every military man will subscribe, might have answered Sir Robert Gardiner's purpose better than the one which he has thought fit in his defence—if we may so call it—to adopt, viz.: to adduce the examples of great victories to prove that it is not by "loose fighting" that battles have generally been won; for Sir Robert Gardiner cannot have failed to remark how the improvements of modern warfare all tend to give more work to the individual, less to the mass; and it should be borne in mind that it is not with battles past that we have to do, but with those yet to come, when we have no doubt that the improved range and precision of firearms will be found to have exerted a very remarkable influence upon the science and practice of war, and to have rendered a more open order of battle not only expedient, but absolutely necessary.

However, although Sir Robert Gardiner pursues a different method of proof, he arrives at the same conclusion as ourselves, and his explanation of his views cannot fail, we think, to be satisfactory to all, excepting perhaps those who determine wilfully to misunderstand him.

He reverts again to the subject of the Legislative Conscriptive Ballot; it is a pet hobby of Sir Robert's, but one in which we are inclined to differ from him. It should, however, be remembered, that Sir Robert proposes this plan only on the supposition that, in accordance with his advice, we increase our regular home Army very considerably, and keep up constantly an effective force for the immediate defence of these islands of something like 250,000 or 300,000 men.

"Do you seriously think," he asks, "that with the higher rate of salaries of our town and rural police, our railroad and domestic wages, not to mention the drain of emigration, that we can really find recruits under the present recruiting laws numerically adequate to the 'keeping up' of the vast Army required for our home and remote defences? It would be unreasonable to expect it. Yet every one admits our want of men, and that our recruiting laws are inoperative, and with strange inconsistency we sing, 'Cheer boys, cheer!' and seek by every means and inducement we can think of to encourage expatriation, while the Government of the country is absolutely without legislative power to raise and maintain an army adequate to its defence." (P. ix.)

For our own parts, we believe that the people of England would sooner see the Army Estimates doubled than submit to a conscriptive ballot, or have their personal liberty interfered with by any measure having for its object compulsory service.

We have thought it only fair to Sir Robert Gardiner that, having called the attention of our readers to his original pamphlet, we should also bring to their notice this explanatory Preface with which he has thought fit to supplement it; it will, we believe, answer its object, viz., that of placing the author and his views beyond the reach of misconception.

* *Political and Legislative Considerations on National Defence: addressed to the People of England.* By General Sir Robert Gardiner, G.C.B., Royal Artillery. Third Edition. (London.)

THE ARMY.

6th Dragoon Guards. The Indian papers say that this corps is to return home in the course of the autumn. The Bombay authorities had intimated that two regiments of British cavalry would be sufficient for the presidency, and had signified their intention of sending home either the 3rd Dragoon Guards or the Inniskilling Dragoons; but as the Carabiniers are the first for relief, one of the regiments now in Bombay will be sent to Meerut to take their place, and they will come back to England.

7th Hussars. We learn by the Indian mail an accident occurred to Cornet Kennard, of the 7th Hussars, on the 13th July, which was very nearly proving fatal. That officer was riding from Simla to Subathoo, accompanied by a friend, when suddenly his horse shied and went over the side of the road, which was very precipitous, and was dashed to pieces. Cornet Kennard, with great presence of mind, threw himself off his horse, and happily escaped unhurt.

9th Lancers. The officers, non-commissioned officers, and privates of the 9th Lancers have just erected a beautiful monument in the cathedral at Exeter, in memory of their comrades who fell in the service of their country during the Indian mutiny. The design, which is executed by Baron Marochetti in his best style, consists of a massive slab containing the names of the officers, non-commissioned officers, and privates who fell during the mutiny, and on each side there is a figure of a mounted lancer in bronze underneath a palm tree. The air of repose about these figures is very beautiful, and the effect of the sombre bronze standing out in relief against the marble is strikingly grand. The whole is surmounted by a stained glass window into which are introduced scrolls containing the names of the battles in which the regiment has been engaged during its services in India. The 9th Lancers are very popular among the townspeople of Exeter, and universal regret is expressed at the rumour that they are about to be removed to Aldershot.

13th Light Dragoons. The officers, non-commissioned officers, and privates of the 13th Light Dragoons have offered a reward of 100*l.* to any person giving such information as shall lead to the apprehension and conviction of the person or persons who murdered Elizabeth Slater on the 19th of last month in the Queen's Park. It will be recollected that some of the men of the regiment laboured under serious imputations, in consequence of the girl having been seen in the company of several of the 13th on the night of the murder.

Royal Artillery. By a General Regimental Order dated the 31st ult., issued by Colonel Charles Bingham, Deputy-Adjutant-General, the following information relative to the Royal Artillery has been promulgated:—The following exchanges have been sanctioned—viz., between Lieut.-Colonel J. Travers, of the 15th Brigade, and Lieut.-Colonel S. Cleaveland, of the 8th Brigade: between Captain and Brevet-Major Sinclair, of the 4th Brigade, and Captain and Brevet-Major Penn, of the 14th Brigade; between Captain and Brevet-Major A. Lennox, of the 10th Brigade, and Captain W. J. Wilson, of the 3rd Brigade; between Captain and Brevet-Major C. J. Oldershaw, of the 8th Brigade, and Captain W. Morris, of the 11th Brigade; between Second Captain C. E. Stirling, of the 9th Brigade, and Second Captain C. W. Wilson, of the 15th Brigade; and between Lieutenant Webber, of No. 3 Battery, and Lieutenant Maunsell, of No. 7 Battery, 15th Brigade. Second Captain Edward Courtenay Vaughan, to be Adjutant by augmentation; Second Captain Frederick George Bayley, to be Adjutant, vice Morris, promoted. Lieutenant Cobbold is transferred from No. 3 Battery, 7th Brigade, to No. 2 Battery, 2nd Brigade, and is to return to England to join the latter. His Royal Highness the General Commanding-in-Chief, has (with the concurrence of the Secretary of State for War) sanctioned the appointment of battery armourers for the field brigades of artillery, whose duty it will be to repair the Armstrong guns. The Secretary for War has approved of unserviceable guns being marked with a cross on the upper part of the face, and a second cross immediately below the broad arrow, in order to prevent unserviceable ordnance, when in use for drill purposes, being mistaken for service guns. Officers commanding Royal Artillery will, therefore, take the necessary steps to cause these marks to be cut accordingly.

Grenadier Guards. Colonel Hamilton becomes a general officer by the death of Major-General Lockyer. Colonel Lindsay obtains the command of the regiment, and Lieut.-Colonel Wynyard a battalion. Captain Alexander becomes Captain and Lieut.-Colonel, and Lieut. Bridges Lieutenant and Captain.

1st Royals. We learn that the 2nd battalion at Hong Kong has been very unexpectedly ordered home. It went on foreign service in 1853.

7th Fusiliers. It is reported that the 1st battalion will shortly move to Shajehanpore.

8th Regiment. The Clara arrived at Spithead on Monday evening from Calcutta, from which port she sailed on the 5th of May, with the head-quarters of the 1st battalion, 8th (King's Own) Regiment, comprising Brevet-Lieut.-Colonel A. C. Robertson, Captain A. T. Welsh, Lieutenants R. Y. Stokes, A. G. Westby, J. W. Hughes, and C. D. Baynes; Ensigns R. Chute, J. G. Brown, C. B. Crease, A. Cook, and J. P. Jones; Assistant-Surgeon W. H. Yates; Quartermaster J. Keating; 291 non-commissioned officers and privates, and 11 women and 19 children. The regiment is quartered at Gosport.

13th Light Infantry. The 1st battalion will probably be shortly moved to Allahabad.

17th Regiment. The 1st battalion furnished a guard of honour on the Prince of Wales's arrival at Quebec.

18th Royal Irish. On Friday week the head-quarters of the 2nd battalion of the 18th Royal Irish, under the command of Lieut.-Colonel Chapman, marched on the Camp *en route* from Aldershot; four companies, comprising the head-quarters, are stationed at Shorncliffe, whilst the remaining six companies are detached to Walmer and Deal, till alterations now in progress at the General Hospital are completed. The following officers marched with the division:—Brevet-Colonel Carey; Captains Anderson, Stacpoole, Taylor and Chapman; Lieutenants Adams, Thomas, Marsland, and Le Mottée, Ensign Herbert, Surgeon-Major G. W. Peake, M.D., Assistant-Surgeons Spencer and Coghlan; Paymaster J. Cornes, Quartermaster C. Godfrey, and 32 non-commissioned officers and about 400 rank and file.

19th Regiment. The 2nd battalion is ordered from Aldershot to Portsmouth to be stationed.

20th Regiment. The 1st battalion is likely to move this autumn to Lucknow.

23rd Fusiliers. The 1st battalion expect to be moved to Mean Meer.

27th Regiment. Likely to change quarters from Umballa to Ferozepore.

29th Regiment. The Regiment is ordered from the northern district to Aldershot.

34th Regiment expect to move to Bareilly.

38th Regiment. It is probable the corps will move to Banda.

42nd Highlanders, according to accounts from India, were about to move to Sealkote, relieving Her Majesty's 52nd Light Infantry.

48th Regiment. By the last Indian mail we learn the regiment was about to march to Gwalior.

51st Light Infantry were about to be quartered at Fyzabad.

52nd Light Infantry. Captain Adair, lately exchanged from the Coldstream Guards, has arrived in India to join the regiment at Sealkote. This regiment moves from Sealkote to Agra.

54th Regiment. It was expected that this regiment would march into the Punjab to be quartered this autumn.

55th Regiment. Captain Hobbs is on leave to Nov. 1.

57th Regiment is ordered from Poona to Belgaum. Lieutenant Russell has obtained a year's leave to enable him to study for the Staff College examination next June.

64th Regiment. The greater portion (about 750 men) of Her Majesty's 64th, proceed immediately from Kurrachee to Hyderabad by Government flotilla vessels, to be located there for the winter in the new European barracks, considered to be one of the finest-constructed buildings in the Bombay Presidency. This corps is expected to return to Kurrachee in February next, and from thence, it is rumoured will return direct to England. The 64th are suffering from ophthalmia; many men have been carried off by this fearful epidemic.

70th Regiment. Ordered to Calcutta and Barrackpore. Colonel Chute has been appointed a second-class brigadier on the Indian establishment.

71st Light Infantry. Ordered to Umballa.

75th Regiment. Ordered to garrison Calcutta and Barrackpore.

79th Highlanders. Ordered to Peshawur.

81st Regiment was about to leave Rawul Pindee either for Allahabad or Cawnpore.

82nd Regiment. Expected shortly to move to the Punjab.

83rd Regiment is ordered from Belgaum to Bombay.

86th Regiment. On arrival in Ireland the Regiment will be stationed at Newry in its native "County Down."

88th Regiment was about to move from *Delhi to Mean* Meer.

90th Light Infantry. The corps expected to be moved to the Punjab.

93rd Highlanders are reported as likely to change quarters from Rawul Pindee to Peshawur.

94th Regiment expect to change from Nowshera to Seetapore.

97th Regiment would relieve the 93rd Highlanders at Rawul Pindee.

98th Regiment. It was expected this regiment would move to Delhi.

Rifle Brigade. The 3rd battalion at Agra were expected to be moved up to the Punjab.

1st West India Regiment. Ensigns C. F. Barry and J. Sealy, 1st West India Regiment, left Chatham garrison on Saturday, and embarked on board the West India mail steamer for the Bahamas, to join head-quarters.

The following Circular has been issued from the War Office:—"War Office, Aug. 30, 1860.—Referring to the regulations which at present govern the supply of clothing to warders of military prisons, under which the warders who receive more than 2*s.* a day are called upon to pay for a portion of their clothing by stoppages from their pay, the clothing supplied being made up by contract, Mr. Secretary Herbert has decided that these regulations shall be abolished, and that the following system shall be adopted for the future:—At home stations the warders shall receive one great coat every three years, one forage cap every two years, one frock coat annually, three pairs of trowsers every two years. This clothing will be issued in material on requisition, at the public expense, the warders paying only for its being made up. At foreign stations the clothing will be supplied made up and free of expense to the warders. At Barbadoes, Bermuda, and Mauritius, the warders will receive one cloth suit every three years, three drab jean suits annually. At Gibraltar, Malta, and Ionian Islands, one cloth suit every two years, and two jean suits annually. In the North American colonies the same clothing will be issued to the warders as in this country.—B. Hawes."

The following Circular, numbered 620, has been issued from the War Office, for the guidance of officers connected with the Military Stores Department:—"Instances having occurred in which barrels of ball cartridges have been issued without percussion caps, Mr. Secretary Herbert has decided that in future, when ball cartridges are issued for practice, the proportion of 110 caps per 100 cartridges shall be retained in each barrel, instead of, as at present, taking the whole number of surplus caps from one or more barrels. The barrels are to be marked with the letter 'P' before issue, in order to show that the ammunition is for practice. Military store officers must be careful to adopt this course for the future.—J. Crawford Caffin."

The following Circular Memorandum, addressed to officers commanding cavalry regiments of the Line in the United Kingdom, has lately been issued:—"Horse Guards, S.W., August 20, 1860.—Officers commanding cavalry regiments of the Line serving in the United Kingdom will be pleased to send to the adjutant-general with as little delay as possible

Digitized by Google

a return showing the names of cornets who, on joining their respective corps, since the publication of the Circular Memorandum dated November 16, 1857, have been furnished with chargers from the remount horses or regimental troopers.—By command, James Yorke Scarlett, Adjutant-General."

The annexed Circular Memorandum has been addressed to the Army abroad and at home:—"Horse Guards, August 24, 1860. — It has been decided by the Secretary of State for War, with the concurrence of His Royal Highness the General Commanding-in-Chief, that captains having brevet rank as field-officers at present holding certain staff situations, as pointed out by the 8th Clause of the Royal Warrant of October 14, 1858, are permitted to count their services in those situations towards the rank of colonel, but no captain holding brevet rank of field-officer, who may in future be appointed to such situations, will be allowed to count his services in them towards the rank of colonel.—By command, James Yorke Scarlett, Adjutant-General."

The following General Order has been promulgated:—"Horse Guards, Aug. 25, 1860.—The proper position of the officer commanding the Royal Artillery, and the commanding Royal Engineer at reviews, state, or other ceremonials, or when inspected by a general officer, not being clearly defined, His Royal Highness the General Commanding-in-Chief directs that upon such occasions, as a general rule, these officers receive the reviewing or inspecting officer at the head of their respective commands, but that they immediately afterwards join the staff. Field officers in command will not, however, be required to take the head of single batteries or companies under their own captains, but will join the staff. All general officers must be aware that the maintenance of close and confidential relations between themselves and the heads of the Artillery and Engineers under their command is essential to the performance of their duties as regards those great branches of the service. With an army in the field this principle is always recognised to the fullest extent, and this recognition should prevail at all times and in all places. His Royal Highness having fixed the place of these commanding officers at the formal reception of general officers on parade, would impress on the latter that he considers this arrangement as an interruption of the usual relations existing between themselves and the heads of the Artillery and Engineers, and he therefore desires to make this interruption as brief as possible. In so doing he consults alike the benefit of the Service and that of the general officers. In the case of a captain of a single battery or company being also the commanding officer of Artillery or Engineers on the spot, the general officer commanding will use his discretion as to this officer's position during a review.—By command of His Royal Highness the General Commanding-in-Chief, James Yorke Scarlett, Adjutant-General." The annexed General Order has also been issued:—"Horse Guards, August 27, 1860. — The General Commanding-in-Chief having intimated to the Secretary of State for War his opinion that, in consideration of the men of regiments of cavalry armed with Sharpe's breech-loading carbines being required, in addition to their special duties as cavalry, to be instructed in the theory and practice of musketry, and of their having much more labour than other branches of the Service, they should receive the rewards allowed for good shooting in the same manner as infantry soldiers; and Mr. Sidney Herbert having been pleased, in concurrence with Sir Charles Wood and the Lords Commissioners of the Treasury, to signify his assent to the proposed arrangements, His Royal Highness accordingly desires that the 1st and 2nd pecuniary rewards, and the supplementary prize for the sergeants of the best shooting troop be granted to regiments armed with breech-loading carbines, sighted up to 600 yards, subject to the conditions contained in the existing regulations, modified as follows, namely:—1st. That the best shot of the regiment shall be that dragoon who, in the practice of the 2nd class firing between 400 and 600 yards, both distances inclusive, obtains the greatest number of points over 12. 2nd. That the first shot of the troop will be the dragoon who, in the practice of the 2nd class of his troop firing between 400 and 600 yards, both distances inclusive, obtains the greatest number of points over 12. Should cavalry regiments hereafter be armed with carbines sighted up to 900 yards, they will then be allowed to contend for prizes according to the regulations heretofore applicable to infantry only.—By command of His Royal Highness, General Commanding-in-Chief, James Yorke Scarlett, Adjutant-General." The following Circular Memorandum has also been addressed to the Army abroad and at home:—"Referring to pages 63 and 64 of the Queen's Regulations and Orders for the Army, His Royal Highness the General Commanding-in-Chief desires it to be notified for general information and guidance, that candidates for the appointments of assistant military secretary will have to undergo the same examination as is prescribed for that of deputy-assistant-adjutant-general. — By command, James Yorke Scarlett, Adjutant-General." The following Circular has also been issued:—"His Royal Highness the General Commanding-in-Chief desires that men who surrender themselves as deserters, and are retained in the corps in which they happen to be serving but are not brought to trial, shall be placed in the second class.—By command, James Yorke Scarlett, Adjutant-General."

The preparations for the destruction of the large cliff at Cuxton by the Sappers and Miners of the Royal Engineers having been completed, the attempt was made on Thursday afternoon to remove it by several immense charges of gunpowder. The operations for igniting the powder were at first totally unsuccessful, and continued so, in spite of all that could be done, for more than two hours. Not discouraged by repeated failures, the officers and men of the Royal Engineers continued their attempts to explode the charges, which after some time they succeeded in accomplishing, and a considerable portion of the cliff, estimated at several thousand tons, was blown down. The several galleries were fired by means of the voltaic battery, which, at the commencement of the operations, was fixed about a quarter of a mile from the mines. Subsequently, however, the battery was removed to within about 50 yards of the shafts, and at this distance the several charges were successfully ignited, the galleries in the large shaft being exploded first, and in about a quarter of an hour afterwards those in the second shaft, the effects of the explosions being very grand. The Earl of Darnley, General Eyre, General Sandham, and a number of other officers were present at the blowing up of the cliff, having remained until the explosions were effected.

A number of 40-pounder guns received from Sir W. Armstrong's factory at Elswick, were subjected to the usual description of proofs at the practice range at Woolwich, on Wednesday and Thursday, with the most complete success.

The usual brigading of garrison troops took place on Thursday on Southsea Common.

SHORNCLIFFE CAMP.

On Thursday last a grand review of all the troops in camp took place in honour of the visit of Viscount Sidney, Lord-Lieutenant of the county, visiting Sandgate for the purpose of inspecting the No. 11 (Sandgate) Company of Volunteer Artillery. His lordship arrived on the camp about 11 a.m., under a salute of eighteen guns from the Saluting Battery, stationed on the north-east point overlooking Sandgate; with General Mansel, commanding the South-Eastern District, and staff, consisting of Col. Taylor, Major Gamble, Major Forster, and Captain Carlton, brigade major. The Infantry Brigade, consisting of the 16th, 17th, and 18th regiments, were drawn up in line to receive his lordship; on the right were a squadron of the 5th Dragoon Guards and four batteries of the Royal Artillery; on the extreme left was drawn up the 4th battalion of the Military Train. Immediately on his lordship arriving on the ground, the whole line presented arms; after which he, accompanied by General Mansel and staff, proceeded slowly down the line, and minutely inspected them; the Lord-Lieutenant then stationed himself at the saluting point, and the whole of the troops marched past in quick time. The squadron of the 5th Dragoons then trotted past, returned at a canter, filed past by threes, and then galloped past in open order; the whole of the men performing the sword exercise, a manœuvre which was effectively performed. The Dragoons then left the ground, and the four batteries of the Royal Artillery were put through a series of interesting movements, during which they fired twenty-five rounds per gun, and concluded by filing past the Lord-Lieutenant. The infantry, under the command of G. W. Francklyn, Colonel of the 17th, were then put through a series of movements, commencing with the 18th Regiment, who were detached as skirmishers along the range of the camp; the 16th and 17th then advanced in columns, and on arriving at the brow of the hill, looking towards Folkestone, they deployed into line and commenced file-firing to check the advance of an enemy up the military road. The whole then retired and formed into squares, firing vollies whilst in square, which had a very picturesque effect; some further manœuvres were performed, when the whole formed into line, advanced and gave a general salute, which concluded the review. His lordship expressed himself highly pleased with the soldierlike appearance of the men, and the very creditable manner in which the troops acquitted themselves. His lordship then, after lunching with General Mansel, inspected the 11th company of Kent Volunteer Artillery, who for the first time fired solid shot at a target fixed at sea, some good practice being made; the company were under the command of Captain Taylor; Lieut.-Colonel Morris, C.B., unattached, being present during the inspection. On the same afternoon Lieut.-Colonel Morris, C.B., inspected No. 1 (Folkestone) Cinque Ports Volunteer Artillery, at the battery at Folkestone; the company were under the command of Captain Kennicott, who wore the medal for Trafalgar, Lieutenants Scholey and Clarke being also present. The gallant colonel at the conclusion of the inspection, had the company formed in a line, and expressed to the men the great satisfaction he felt in being able to compliment the captain, the other officers, the drill-sergeant of the company, and the non-commissioned officers, for the very efficient manner in which they had gone through their face and company drill, adding, he should be happy at all times to afford all the assistance in his power to forward the interests of the company, and concluded by wishing them all, officers and men, good day.

At 5 p.m., the No. 5 (Folkestone) Cinque Ports Rifle Volunteers under the command of Captain Percival, and the 4th (Hythe) Cinque Ports Rifle Volunteers, under the command of Ensign James Watts, were inspected at Park Farm by Brevet-Lieut.-Colonel R. A. Luard, unattached. The gallant colonel expressed some dissatisfaction with the Folkestone corps, attaching more blame however to the officers than the men; the Hythe company acquitted themselves very creditably, the colonel expressing his gratification at the manner in which they had acquitted themselves.

The Army Gazette.

WAR OFFICE, PALL MALL, SEPTEMBER 4.

Corps of Royal Engineers—Major-General Sir Harry David Jones, K.C.B., to be Colonel-Commandant, vice General Nicolls, deceased.

Royal Regiment of Horse Guards—Cornet John Alexander Burn Callander has been permitted to retire from the service by the sale of his commission.

6th Dragoon Guards—Major Edward Lennox Jervis, from the 13th Light Dragoons, to be Major, vice Dickson, who exchanges.

5th Light Dragoons—Captain Edward Boyd, from the 13th Foot, to be Captain, vice Salis, who exchanges.

13th Light Dragoons—Major Alexander George Dickson, from the 6th Dragoon Guards, to be Major, vice Jervis, who exchanges.

18th Light Dragoons—Thomas Fuller, Gent., to be Cornet, by purchase, vice O'Shea, promoted; Surgeon-Major Melville Neale, M.D., from the Staff, to be Surgeon, vice Docker, who exchanges.

Royal Artillery—For "Claudius Buchanan Piers, Esq., to be Paymaster," inserted in the *Gazette* of 25th of May, 1860, read Claudius Buchanan Piers, Esq., formerly a Captain in the Osmanli Horse Artillery, to be Paymaster.

Royal Engineers—Lieutenant Robert Grant to be Second Captain, vice Stopford, deceased; Second Captain William Butler Gosset to be Adjutant, vice Stopford, deceased.

Grenadier Guards—Sergeant-Major John Hockey to be Quartermaster, vice John Lilley, who retires on a military allowance.

2d Regiment of Foot—Surgeon John Hendley, from the Staff, to be Surgeon, vice Doherty, appointed to the Staff.

3d Foot—Arthur William Hill Gelston, Gent., to be Ensign, without purchase, vice Philip Walker, appointed to the 34th Foot.

4th Foot—The Christian names of Gentleman-Cadet Thrupp, appointed to an Ensigncy, without purchase, in the *Gazette* of the 3d of August, are Morton Frederic, and not "Moreton Frederick," as then stated.

6th Foot—Lieutenant John Augustus Staines to be Captain, by purchase, vice Parkinson, who retires; Ensign Jacob Biggs Hopkins to be Lieutenant, by purchase, vice Staines.

8th Foot—Lieutenant Edward Tanner to be Captain, by purchase, vice Gray, who retires; Ensign William James Watson to be Lieutenant, by purchase, vice Tanner.

12th Foot—Ensign Edward Fiddes to be Lieutenant, by purchase, vice Moorhead, who retires.

13th Foot—Captain Henry Norman Salis, from the 5th Light Dragoons, to be Captain, vice Boyd, who exchanges.

14th Foot—Captain James Bunbury Hamilton, from half-pay unattached, to be Captain, vice Captain and Brevet-Major William Temple Parratt, who exchanges.

17th Foot—Captain James Creagh, from the 86th Foot, to be Captain, vice Lees, who exchanges.

19th Foot—Frederick Knowles, Gent., to be Ensign, without purchase, vice Fryer, appointed to the 60th Foot; Lieutenant Edward William Evans to be Adjutant, vice Thomas Thompson, deceased.

27th Foot—Kennelon Digby Murray, Gent., to be Ensign, without purchase, vice Cobbe, cashiered by sentence of a general court-martial.

38th Foot—Major and Brevet-Lieutenant-Colonel Frederic Arthur Willis, C.B., from the 84th Foot, to be Major, vice Farrer, who exchanges.

40th Foot—Ensign John Thomas Whelan to be Lieutenant, without purchase, vice Tod, who resigns.

60th Foot—Ensign Robert Fitzwilliam de Barry Barry to be Lieutenant, without purchase; Ensign John East Hunter Peyton to be Lieutenant, without purchase, vice Hodges, deceased; Ensign Charles Gilbert Fryer, from the 19th Foot, to be Ensign, without purchase, vice Barry; Frederick Edward Lonsdale, Gent., to be Ensign, without purchase, vice Peyton.

73d Foot—Ensign Henry Robert Eyre, from the 99th Foot, to be Ensign, vice Gibsone, promoted.

74th Foot—Ensign Charles John Rolleston to be Lieutenant, by purchase, vice M'Crummen, promoted; John Francis Darvall, Gent., to be Ensign, by purchase, vice Rolleston.

75th Foot—Captain William Henry Urquhart, from half-pay unattached, to be Captain, vice Justice, appointed Adjutant of a Depôt Battalion; Assistant-Surgeon Hampden Healy Maclean, from the 6th Foot, to be Assistant-Surgeon, vice Semple, appointed to the Staff.

79th Foot—Ensign Alexander Peter Baillie Baillie to be Lieutenant, by purchase, vice M'Nair, promoted.

83d Foot—Herbert Grant Davies, Gent., to be Ensign, by purchase, vice Whitlock, promoted.

84th Foot—Major James Steadman Hawker Farrer, from the 38th Foot, to be Major, vice Major and Brevet-Lieutenant-Colonel Willis, C.B., who exchanges.

86th Foot—Captain Edward John Lees, from the 17th Foot, to be Captain, vice James Creagh, who exchanges.

89th Foot—Lieutenant William Drage to be Captain, by purchase, vice Beck, who retires; Ensign William Atthill to be Lieutenant, by purchase, vice Drage.

90th Foot—Lieutenant Francis Bernard Bleazby, from the 100th Foot, to be Lieutenant, vice Eyre, who retires upon half-pay.

Rifle Brigade—Lieutenant Alexander Angus Airlie Kinloch to be Instructor in Musketry, vice Moorson, who has joined the depôt.

2d West India Regiment—Edmund Ashton Ross, Gent., to be Ensign, without purchase, vice Gow, who resigns.

3d West India Regiment—Captain Aylmer Strangford Craig, from half pay Gold Coast Artillery Corps, to be Captain, vice Metge, who exchanges.

Royal Canadian Rifle Regiment—William Edmondes Harness, Gent., to be Ensign, by purchase, vice Dunn, promoted.

STAFF.

Brevet-Colonel Frederick Edward Chapman, C.B., Royal Engineers, to be Deputy-Adjutant-General of the Royal Engineers, vice Brevet-Colonel J. W. Gordon, C.B., who resigns that appointment.

RECRUITING DISTRICT.

Lieutenant Francis John Connell, from the 30th Foot, to be Adjutant, vice J. B. Hamilton, promoted to an Unattached Company, without purchase.

MEDICAL DEPARTMENT.

Surgeon Daniel John Doherty, from the 2d Foot, to be Surgeon, vice Hendley, appointed to the 2d Foot.

Surgeon Edward Scott Docker, from the 18th Light Dragoons, to be Surgeon, vice Surgeon-Major Neale, who exchanges.

Assistant-Surgeon Charles William Semple, from the 75th Foot, to be Assistant-Surgeon.

Surgeon-Major Edward W. Stone, M.D., has been permitted to retire on half-pay under the Royal Warrant of the 1st of October, 1858.

BREVET.

Lieutenant-Colonel and Brevet-Colonel Terence O'Brien, half-pay, Unattached, Assistant-Quartermaster-General at Headquarters, to have the local rank of Major-General in Ceylon while commanding the troops in that island.

Captain James Bunbury Hamilton, retired full pay, 14th Foot, to be Major in the Army, the rank being honorary only.

The following promotions which appeared in the *Gazette* of the 24th of July, 1860, to be ante-dated to the 19th of January, 1859:

To be Lieutenant-Colonels in the Army.

Major Henry Boyé, of the 22d Bombay Native Infantry.

Major Lincoln Stephen Hough, 31st Bombay Native Infantry.

To be Majors in the Army.

Captain William Francis Hunter, 2d Bombay Light Cavalry.

Captain John Augustus Wood, 20th Bombay Native Infantry.

The date of the Brevet-Majority of Brevet-Colonel W. W. Davidson, 32d Regiment Bengal Native Infantry, to be changed from the 16th of January, 1849, to the 7th of June, 1849.

BARRACK ACCOMMODATION.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Through the medium of your valuable paper I would wish to draw attention to the humiliating position in which the wives and families of many worthy old soldiers are placed at Woolwich, many having recently returned to this country after long and faithful service abroad, and are now reduced to a state little short of utter destitution, consequent upon the paucity of married soldiers' quarters at Woolwich, which have never been sufficient for the requirements of the garrison.

The Government allowance in lieu of barrack accommodation, barrack furniture, bedding, fuel, and light, is 1*s.* 2*d.* per week; and may I ask, what kind of a domicile can a soldier procure for his family for the sum of twopence per night?

A compulsory residence in lodgings necessitates expenses upon these poor families, which the pay of a soldier, added to the scanty and uncertain pittance earned by his wife, is totally inadequate to meet; and what are the consequences? Why, the wife and family are compelled to live in a miserable cellar or garret, located in a neighbourhood far from respectable; the rates charged in Woolwich for lodgings, fuel, &c., are so very exorbitant, as to preclude the possibility of their obtaining a sufficiency of nourishing food or suitable clothing, and as the soldier must necessarily keep up his kit and appearance, debts are unavoidably incurred, which are now becoming an hourly source of pain and pressure, and if unrelieved, must either cause the families of many honest and worthy old soldiers to be cast forth from their homes, or lead to other results which would be still more deplorable.

If circumstances render it necessary for married soldiers to reside in lodgings, it surely is not fair or reasonable to give him a paltry pittance which compels him to expose his wife and children to the contaminating influences of a low lodging-house.

I therefore earnestly hope the authorities will now take this matter into their serious consideration, and devise some plan for the immediate provision of suitable quarters for the whole of the married soldiers serving at Woolwich, and thus enable them to exist in moderate comfort, which, I regret to add, is not the case at present.—I am, &c.,

BLACKHEATH.

THE PURCHASE SYSTEM.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—I was much struck with the very able and interesting letter in favour of the Purchase System which appeared in your issue of the 18th ult., signed "M. G." The author had evidently studied his subject deeply, and adduced many sound arguments in support of his opinion. A study of his letter will, however, suggest some weak points, as, indeed, do all arguments in favour of the system. I have had upwards of twenty years' experience in the Service, and have purchased two of the not least expensive steps, so can have not much personal bias either way. "M. G." says, "the Purchase System assists the promotion of the non-purchasing officer." Very seldom, say I; merely the exception to prove the rule. There has been a great deal of non-purchasing promotion lately, incidental on the Crimean and Indian wars; but remember the vast number of non-purchasing officers in the subordinate grades. There were previous to 1854, captains of 30 or even 40 years' service, and subalterns of nearly 20 years, besides a host of unattached captains promoted from lieutenants for length of service, hopeless of employment. "M. G." gives some of his experience; I take leave to give mine. I had attained the senior lieutenancy of my regiment, and found it inconvenient to purchase; the consequence was that I was a subaltern of upwards of fifteen years' service before I succeeded to a company without purchase. I was purchased over by my juniors *fifteen times*, the last four having got their commissions in the regiment subsequent to my being senior lieutenant of it! How a system of this kind can be advantageous as a rule I cannot imagine. Had I purchased when the first opportunity offered I should have succeeded without purchase to a majority many years before I eventually did by purchase. Then the ignoble bargaining, higgling and juggling that it induces. A. will sell for 600*l.* over regulation. B. cannot afford to give more than 200*l.* C., the next on the list, gives B. 100*l.* to withdraw his name, and closes with A., &c. &c.

"M. G." adduces a case in his own history; he appears to have paid freely for his commissions up to major, but the lieut.-colonelcy he got for regulation. Are we to suppose that the lieut.-colonel sold for regulation out of regard for "M. G.?" Not exactly; after 30 or 40 years' service and probably great sacrifice of purchase-money, he, in all probability, threatened to exchange, and would have, if the money had not been made up to him. So the screw was applied sharply to the purchasing majors, captains, and lieutenants, even to the third and fourth on the list, and "M. G." got the command of his regiment at the expense of his subordinate brother officers. How can a system be right which is opposed to that of all the countries in the world? How can any system be upheld which holds up Her Majesty's commission to barter? No one can deny the soundness of "M. G.'s" argument in favour of men of birth and fortune being induced to enter the Army; all officers of experience are well satisfied of the danger to the public safety which an army of *bourgeois* officers would involve; but that desideratum will never be wanting as long as the nation endures.—I am, &c. F. C.

CAMP TEACHING.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Is the withdrawal of the cavalry and artillery from the Curragh Camp, and their being placed in barracks, to be interpreted as a tacit admission on the part of the authorities that British cavalry and artillery are incapable of facing the acknowledged severities of field service?

If so, have we not here a key to the collapse of the cavalry force in the Crimea, without straining at explanations inculpatory of the departments of the Army?

This lamentable helplessness and ignorance of field duties on the part of the soldier, instead of being checked, and, if possible, obviated by proper instruction, is, I regret to find, rather encouraged by his removal from the scene of his failure.

The Curragh is a noble expanse of nearly 5000 acres of open plain, undulating in parts, covered with a fine turf of perennial verdure, with a substratum of gravel and sand, and the best formation possible for rapid drainage; it is therefore absurd to say that good camping ground of ample extent cannot be found there for three regiments of cavalry and three batteries of artillery.

I take it that a very important end to be gained by camp life is, to instruct the soldier not merely how to exist under adverse circumstances, but how to live in comparative comfort under all the difficulties to which a soldier is liable when on active service; and therefore it ought not to be considered absolutely necessary to keep the cavalry brigade together in an exceptional state of the weather, but considerations of strategy or tactics should give place for the moment to the more momentous object of keeping the force effective by choosing the best picketing ground on any part of the Curragh.

The British officer, generally speaking, pays too litte attention to these details which go to make up the efficient soldier, and in losing sight of the means whereby his men may be rendered really effective, he shows that want of professional common sense which has earned for us among continental nations the character of an unmilitary people.

If we cannot train our troops to field service at home in the centre of civilisation, and during a period of profound peace, can we expect any but the most disastrous results when these troops are suddenly called to encounter the asperities of a stern campaign? Are we for ever to be branded with the ignoble character of buying experience at the costly price of the lives of our sons wasted in thousands, and treasure scattered broadcast by millions, without having profited by the outlay?

Having had more than a year's experience of the Curragh Camp, I would venture to offer as my opinion that it is indeed but playing at soldiers when we let slip the best opportunities of teaching our men the most useful practical lessons of their profession.—I am, &c. KOSLOV.

[ADVERTISEMENT.]—Every Soldier and Sailor should be in possession of the SOCIETY OF ARTS' 2s. PRIZE WRITING CASE. This Case was advertised for by the above Society, to meet the requirements of Soldiers, Sailors, and Emigrants. They selected that sent in by PARKINS & GOTTO, and awarded the Prize of 20 Guineas and their Silver Medal to them. The Case contains Writing Paper, Envelopes, Blotting Book with Black Lines, Metal Pen Case with Reserve of Pens and Pencil, and can be sent free by post for 28 stamps.

THE NAVY.

ADMIRALTY, SEPTEMBER 7.

APPOINTMENTS.

Captain—John L. Stokes to the Impregnable, additional, for surveying service.

Commander—Alfred Mitchell (1846) to Foxhound, at Sheerness.

Lieutenants—Frederick P. Doughty to the Foxhound; and James N. Croke to the Spiteful; C. G. M'Grigor to the Formidable; Henry R. L. B. Palliser to Landrail; Thomas M. Campbell to Castor.

Master—W. Barrett to the Sanspareil.

Surgeons—A. L. Archer, M.D., to the Ariel; J. Johnston, M.D., to the Foxhound; and J. Gray to the Spiteful.

Paymasters—John M. Sweatman to the Foxhound; Jas. Ray to the Ariel; and Thomas Bradbridge to the Colossus, additional.

Assistant-Surgeons—D. Portious to the Landrail; Fred. H. Rose to the Ajax; C. L. Cunningham (acting) to the Spiteful.

Master's-Assistant—R. F. Ellis to the Edgar.

Clerks—F. Sueter to the Tartar; Wm. Thorne to the Emerald; Harry Langworthy to the Curlew; and Adolphe Hunter to the Spiteful; F. J. P. Shapcote to Impregnable.

First-class Assistant-Engineers—H. Brown to the Spiteful, in lieu of a chief; W. D. Beaton to the Ariel; W. Dennison (acting) to the Foxhound.

Second-class Assistant-Engineers—S. Swan to the Landrail; J. Mather to the Pembroke for service in the Magnet; J. Snell to the Colossus; James Dobson and John Charles Wicks to Megæra; John Broad James to Trafalgar; Robert W. Watson to Royal Albert; J. V. Slade (acting) to the Cornwallis, for service in the Fly; William Binks (acting) to Buzzard.

Third-class Assistant-Engineers—E. E. Williams to the Spiteful; J. R. Agates to the Landrail; W. A. Houghton to the Foxhound; R. Dixon to the Ariel; A. H. Symes (acting) to the Spiteful; T. Wilmot (acting) to the Landrail; W. Allen (acting) to the Foxhound; J. T. Kelly (acting) to the Ariel; J. Jones (acting) to the Dasher; William Brenner (acting) to the Cumberland, for service in the Myrtle; William Scott (acting) to the Indus, for service in the Redwing; and Thomas Cape (acting) to the Algiers; Alexander Napier Miller (acting) to Fisgard, for service in Vivid.

Ajax, 60, screw coast-guard ship, Captain John M'Neill Boyd, at Kingstown. Captain Boyd was in attendance on Saturday last on the Lords of the Admiralty on their arrival from Holyhead. The Ajax saluted their Lordships in the customary manner as the steamer in which they were embarked rounded the East Pier.

Anson, 91, screw liner, Woolwich. Preparations are in a forward state for the launch of this noble ship. The first timbers were laid down on the 15th of February, 1858, under the superintendence of Mr. A. B. Sturdee, acting master-shipwright of the yard on the occasion. The launch will take place, as previously announced in this journal, on the 15th inst., when, according to the arrangements made for visitors, a very large number is anticipated, and tickets are already in great request. The dimensions of the ship are as follows:—Length between perpendiculars, 244 feet 9 in.; length of keel for tonnage, 210 *ft.*; breadth, extreme, 55 ft. 4 in.; breadth for tonnage, 54 ft. 6 in.; breadth, moulded, 53 ft. 8 in.; depth in hold, 24 ft. 6 in.; burden in tons, 3,317 78-94ths. Her armament will be 91 guns:—34 8-in., 65 cwt., 9 feet in length; 34 32-pounders, 56 cwt., 9 ft. 6 in. in length; 22 32-pounders, 45 cwt., 8 ft. 6 in. in length; 1 68-pounder, 95 cwt., 10 ft. in length.

Ardent, 3, paddle steam-sloop, Commander J. E. Parish, was at Rio de Janeiro, on the 8th of August.

Ariel, 9, screw steam sloop, Commander J. R. Alexander, has been towed down Portsmouth harbour and berthed alongside the dockyard, and has been masted.

Assurance, 4, screw steam-sloop, Commander C. Aynsley, arrived at Beyrout on the 22nd of August with a mail from Malta.

Avon, steam-tender, Second Master Day commanding, returned to Plymouth from Portsmouth, on Saturday last.

Ætna, 16, 200 horse-power, another of the steam floating-batteries now undergoing repair at Chatham dockyard, has been completed at that establishment, and was hauled out of the second dock on Saturday last. During the time this floating battery was in the hands of the shipwrights she underwent a thorough repair, and every defect was made good. The iron sheathing with which the hull is covered has been removed, and the bottom coated with composition.

Black Eagle, Master-Commander John E. Petley, has arrived in Portsmouth harbour, and will probably remain there to be in attendance on the Lords of the Admiralty during their forthcoming official inspection, as the Osborne will be required to accompany Her Majesty the Queen to Antwerp, about the 22nd inst.

Boscawen, 70, sailing line-of-battle ship, Captain Richard A. Powell, C.B., bearing the flag of Rear-Admiral the Hon. Sir Frederick Grey, K.C.B., arrived in Plymouth Sound on Tuesday night. She left the Cape of Good Hope July 7, St. Helena, July 22, and Ascension, July 30. She experienced fine weather all the voyage, and brought passengers Lady Grey and Mr. Bewicke and son. The Boscawen was put in commission on the 1st of April, 1857, and has been constantly engaged as flag-ship at the Cape. She spoke and signalised, July 7, off the Cape of Good Hope, the Clara, from Simon's Bay for England, with the 84th Regiment, and an English ship, 3rd distinguishing pendant 4786; on the 16th, a bark, 3rd distinguishing pendant 2160; on the 26th, the bark Philo; August 7, the ship Star of the North, from Foochow-foo, 91 days, for England; on the 8th, the ship Sir Robert Sale, from London, 24 days, for Madras, and an American ship, 3rd distinguishing pendant 3195; on the 10th, the bark Wentworth, from London for Calcutta; on the 11th, the bark Warrior; on the 13th, the bark Thebes, 105 days from Cochin for London; on the 20th, the bark Victoria, of London; on the 27th, a brig, 3rd distinguishing pendant 5379; on the 28th, the ship Castle Eden, from Moulmein; and Sept. 1, a ship, 3rd distinguishing pendant 720. The Boscawen is to be paid off on the 14th inst. at Devonport.

Boxer, 1, screw gun-boat, tender to Marlborough, Second Master-Commander Gulliver, was in Malta harbour on the 1st inst.

Buzzard, 6, paddle steam-sloop, Commander Francis Peel, was at Rio de Janeiro on the 8th of August.

Caradoc, 2, paddle steam-vessel, Lieut.-Commander John B. Scott, was in Malta harbour on the 1st. inst.

Carnation, gun-boat, Lieutenant Commander Godfrey Taylor, is now stationed off Shoeburyness, and will be at the service of the Royal Artillery when required for practice with rifled ordnance.

Chanticleer, 17, screw. This ship is now nearly ready for launching at Portsmouth, and, to all appearance, will be a remarkably handsome vessel.

Colossus, 80, screw, Captain Francis B. Scott, C.B., arrived at Spithead on Saturday last.

Coquette, 6, screw. The repairs required for this ship appear to be more extensive than even her decayed condition, bad as it was, at first seemed to indicate.

Cossack, 20, screw corvette, Captain Richard Moorman, was at Quebec on the 24th of August.

Cressy, 80, screw liner, Captain the Hon. C. G. J. B. Elliot, C.B., left Malta on a short cruise on the 23rd of August, returned to port on the 25th, and has since gone to Naples with provisions and stores for the squadron there.

Curaçoa, 31, screw frigate, Captain Augustus Phillimore, was at Buenos Ayres on the 28th of July.

Cygnet, 5, screw steam gun-vessel, has been removed from the steam-basin at Portsmouth, and has made a very satisfactory trial at the measured mile.

Dee, 4, steam-vessel, Master-Commander Pullen, which arrived at Woolwich this week from Portsmouth, is now receiving a cargo of machinery for vessels fitting out at the western yards.

Emerald, 51, screw, Captain Arthur Cumming, went into Portsmouth Harbour on Sunday last, and was placed in No. 7 dock on Monday, in order that she may be thoroughly examined after her late accident at Alderney. On examination of the ship's bottom the only damages observable were three feet of the false keel amidships crushed upwards to about a foot, and another portion of her false keel, about 1 foot by 9 inches, riven some 50 feet from the "keel." Not a sheet of copper has been strained, and her whole body is as fair as when launched. At the time of the ship's grounding she was drawing 23 feet aft; few vessels have hitherto gone into Alderney with a greater draught than 15 feet. She has been again undocked and placed in the steam basin to refit for further service.

Espoir, 5, screw, Commander Douglas, at Plymouth, went out on Saturday last to try her machinery, and subsequently returned to the anchorage in the Sound.

Exmouth, 90, screw liner, Captain James A. Paynter, was, according to the last accounts from the Levant, at the Island of Candia, the population of which had not quite subsided into a quiescent state.

Firefly, 5, paddle steam surveying-sloop, Commander Arthur L. Mansell, was at Acre on the 22nd of August.

Flying Fish, 6, screw steam-sloop, Commander Charles W. Hope, left Quebec for Montreal on the 23rd of August.

Frederick William, 86, screw, is progressing rapidly in ner steam department.

Geyser, 6, paddle, Commander Jackson, arrived at Plymouth on Saturday last with invalids and supernumeraries from the Channel fleet.

Glasgow, 51, screw. This splendid specimen of a frigate of this class, now building at Portsmouth, is nearly ready for launching.

Gorgon, 6, paddle-wheel steam-vessel, Commander Bedford C. T. Pim, has been undocked and placed in the steam-basin at Portsmouth to complete her refitting.

Greyhound, 17, screw steam-sloop, Commander F. W. Sullivan, was in Malta harbour on the 1st inst., but was to sail for the coast of Syria that evening with the mails for the fleet.

Hawke, 60, screw coast-guard ship, Captain Crispin, left Plymouth on Saturday last for Ireland, to resume her station.

Hero, 91, screw liner, Commodore George H. Seymour, C.B., was at Quebec on the 24th of August.

Hibernia, sailing three-decker, Commander the Hon. Augustus C. Hobart, flag-ship of Admiral-Superintendent Codrington, C.B., was in Malta harbour on the 1st instant.

Himalaya, iron screw troop-ship, Captain John Seccombe, was spoken on the 31st ult., off the Rock of Lisbon by H.M.S. Megæra, arrived at Portsmouth.

Hind, steam-tender to Russell, left Plymouth, on Saturday last, for Falmouth.

Hogue, 60, screw steam coast-guard ship, Captain R. J. J. G. Macdonald, having had defects made good, and having been supplied with a new bowsprit, was removed from Keyham basin on Saturday last, and placed at her sailing moorings in Hamoaze.

Hornet, 17, screw-sloop, Commander Elphinstone. The commander-in-chief at Portsmouth, Vice-Admiral Henry William Bruce, proceeded to Spithead on Saturday last to muster and inspect this sloop. She sailed on Monday for the Cape of Good Hope and East Indies. She has a capital ship's company. She arrived at Plymouth on Wednesday.

Immortalité, 51, screw frigate, made her official trial of speed on Wednesday. The frigate left the steam basin at 1·30 p.m., in charge of Captain George T. Gordon, commanding the steam-reserve at the port, and steamed out of harbour for the trial ground in Stokes Bay. Messrs. Murray and Murdock, the chiefs of the dockyard ashore and afloat in the engineering department, were on board to superintend the trial on behalf of the Government, while Mr. Warrener represented the contractors of the machinery, Messrs. Maudslay, Field, & Sons. The Immortalité has had her bow lengthened by 16 feet, with the purpose, as stated by Sir John Pakington, when First Lord, of ascertaining what additional speed ships of war would gain by a longer bow and finer lines forward. Unfortunately, old principles could not be set aside altogether even in this instance, and the ship has now the same immense overhanging weight of bow-sprit, &c., outside her cutwater, as before her alteration, and what appears more preposterous still, her catheads, with her anchors and foremast, have been carried as much further forward as the ship has been lengthened. The Immortalité is of 600 nominal horse-power, but the engines have been constructed since 1855. They worked beautifully, and

Digitized by Google

showed but very little variation in their revolutions. Under full steam, with little vibration, the ship raised but little sea under the bows; but she exhibited a great tendency to depress her bows in the water. Her steering qualities were very good indeed. Six runs were made at the mile, the ship drawing 21 feet forward, and 21 feet and 10 inches aft. The screw was Maudslay's adaptation of the common or Admiralty screw to their shifting blades, with the leading corners cut off. The average of the six runs gave a speed in knots of 12·533; revolutions of engines, 55; pressure of steam, 20; vacuum, 23. There was a total absence of hot bearings, and no machinery could have worked more evenly and satisfactorily.

Intrepid, 6, screw steam-sloop, Commander Joseph H. Marryatt, arrived at Malta from Naples and Palermo on the 26th of August, and returned again to Naples on the following day.

James Watt, 91, screw-liner, Captain E. Codd, was in Malta harbour on the 1st inst., having arrived the previous day from Candia, to repair damages to machinery. We understand she was relieved at Candia by the Exmouth, 90. the line.

Landrail, 5, screw gun-vessel, fitting at Woolwich. Commander Field has resigned the command of this vessel.

Lapwing, 4, screw steam-sloop, Commander Montagu F. O'Reilly, was at Tripoli on the 22nd of August.

Leopard, 18, paddle steam-frigate, Captain J. F. B. Wainwright, flag-ship of Rear-Admiral Sir Stephen Lushington, K.C.B., was at Rio de Janeiro on the 8th of August.

Liffey, 51, screw frigate, Captain George W. Preedy, C.B., left Beyrout on the 21st of August for Cyprus, but was only to be absent for a few days.

Madagascar, 8, store-ship, Captain Richard D. White, was in Rio Harbour on the 8th of August.

Marlborough, 131, screw, three-decker, Captain W. H. Stewart, C.B., flag-ship of Vice-Admiral W. F. Martin, was at Beyrout on the 22nd of August.

Medea, 6, paddle steam-sloop, has been hauled out of the steam-basin at Portsmouth, and berthed alongside the north wall, where she will coal prior to testing machinery, &c.

Megæra, screw transport, Commander Henderson, arrived at Portsmouth on Wednesday with military and naval invalids from Malta and Gibraltar.

Melpomene, 51, screw frigate, Captain C. J. Ewart, was in Malta harbour on the 1st inst., but was to leave the following day for Corfu.

Mohawk, 4, screw steam-sloop, Commander Edward H. Howard, left Alexandria for Jaffa on the 17th of August, and was at Beyrout on the 22nd of August.

Neptune, 90, screw liner, Captain Frederick A. Campbell, was at Sidon on the 22nd of August.

Nile, 90, screw liner, Captain Edward K. Barnard, flag-ship of Rear-Admiral Sir Alexander Milne, K.C.B., was at Quebec on the 24th of August.

Oberon, 3, paddle steamer, Lieutenant-Commander Frederic G. C. Paget, was at Buenos Ayres on the 28th of July.

Octavia, 51, is undergoing conversion in Portsmouth dockyard. She is rapidly progressing.

Orion, 91, screw liner, Captain J. B. E. Frere, arrived at Malta on the 25th of August from Plymouth; she left again on the 1st inst., on a cruise, but by the latest accounts she was still in sight of the island.

Pelican, 17, screw, is receiving her machinery in the steam basin, at Portsmouth.

Penguin, 5, screw steam gun-vessel, at Devonport, is to be fitted for the first-class steam-reserve.

Pigmy, 3, paddle, Master-Commander William Johnston, was employed last week in running from Portsmouth to the eastern ports with supernumeraries, and has since returned to her usual station at the former port.

Pioneer, paddle steamer, Master Commander May, sailed from Spithead on her voyage to join the Zambesi expedition on Sunday afternoon last.

Prince Regent, 90. Numerous gangs of shipwrights are busy upon this ship converting her into a screw.

Prince of Wales, 131, screw. This fine ship, now in the steam basin, Portsmouth, has all her heavy weights aboard, and her machinery is so far complete that we may daily expect to hear what she can do at the measured mile in Stokes Bay.

Princess Royal, 91. This ship, after undergoing most extensive repairs, having had her stern almost entirely rebuilt, is again all but ready for commission. All her machinery is quite complete, and she will soon be out of the hands of the riggers.

Quail, 2, screw gunboat, Lieut.-Com. Noel Osborn, was at Gibraltar on the 27th of August.

Queen, 86, screw-liner, Captain Charles F. Hillyar, left Malta on the 25th of August on a cruise.

Racoon, 22, screw corvette, Captain William C. Chamberlain, was at Latakia on the 22nd of August.

Rhadamanthus, 4, paddle steam-storeship, Master-Commander F. R. Sturdee, from Woolwich, with marine engine gear, &c., was hauled on Saturday last into Keyham basin, Plymouth, where her cargo was discharged, and she has been placed alongside the Royal William Victualling Yard to load provisions for that part of the Channel fleet which is at Milford.

Sanspareil, 70, screw liner, Captain Arthur P. E. Wilmot, C.B., flag-ship of Rear-Admiral of the Red Charles Talbot, arrived in Plymouth Sound on Sunday evening.

Satellite, 21, screw-corvette, Captain James C. Provost, had, according to the last accounts from British Columbia, left that station for England.

Scourge, 6, paddle steam-sloop, Commander William G. Jones, was at Gibraltar on the 27th August.

Scylla, 21, screw corvette, Captain Rowley Lambert, arrived at Malta from Messina on the 27th August, and returned to the same station on the 28th.

Sirius, target-ship, has been towed down Portsmouth Harbour, and berthed alongside the dockyard sheer jetty, where shipwrights are employed upon her, working extra hours, affixing to her side three iron plates for further shot experiments. An inspection of the interior of the Sirius affords abundant evidence of the terrific shaking the vessel's frame has received from the concussion caused by the shot striking the iron plates during the recent experiments in Porchester lake. Bolts are started along the greater portion of the ship's side, and one iron knee is broken clean through. At the back of the plates where they are fractured, but not penetrated by the shot, the broken plate has driven in timbers and all in a shattered mass before it. As this is the result of single shots on a frigate of the Sirius's scantling, it may reasonably be contended that concentrated firing from a frigate's 8-inch guns, at the same range, will be likely to produce equally disastrous effects even on a vessel of the solidity of the iron-cased frigates now constructing. Such damage to a vessel's side is irremediable at sea, and if near the water-line with any sea on there is nothing to prevent the iron-clad ship from filling and going down. There has been, up to this time, no official report published of the state of the Griper, after the trials of the plates constructed on the angulated principle, but we have gathered from private information that she is as intact as she was before the experiments took place.

Spiteful, 6, paddle steam-sloop, Commander Wilson, fitting at Woolwich, has received a portion of her shores for sea. The whole of the officers have been appointed. Lieut. Croke, Lieut. Lake, and Surgeon Gray have joined the commander at Woolwich, but she is very much in want of petty officers and seamen.

Spy, 3, brigantine, Lieut.-Com. John Hanmer, was at Rio de Janeiro on the 8th of August.

Stromboli, 6, paddle-steamer, is complete in her steam department, and ready for commission, at Portsmouth.

Styx, 6, paddle-steamer, Commander John H. Cave, left Quebec for Montreal on the 23rd of August.

St. George, 91, screw-liner, Captain the Hon. Francis Egerton, from Holyhead, arrived at Plymouth on Tuesday.

St. Jean d'Acre, 101, screw-liner, Captain Thomas P. Thompson, was in Malta harbour on the 1st. inst.

Sutlej, 51, screw, is expected to take her trial at the measured mile next spring.

Trusty, 14, 150 horse-power, another of the floating batteries, will be taken into the dock at Chatham, vacated by the Ætna to be overhauled and repaired. The Trusty is the battery against which the severe shot practice was made at Shoeburyness, and from the various accounts which we have received we should not be surprised if she required very expensive and lengthened repairs.

Valorous, 16, paddle steam-frigate, Captain William C. Aldham, C.B., was at Quebec on the 24th of August.

Victor Emmanuel, 91, screw-liner, Captain W. J. C. Clifford, C.B., was at Jaffa on the 22nd of August.

Vigilant, 6, screw, has been overhauled at Portsmouth, and is now re-shipping her machinery in the steam basin.

Vivid, Admiralty yacht, steamed down the river on Thursday to Sheerness, in order to try her machinery, and to subject to further tests the merits of Mr. Lee Stevens's patent regulating air-doors, which have been fitted with a view to remedy the smoke nuisance. The trial was pronounced to have been on the whole very satisfactory, but it is expected that further trials will have yet to take place.

Warrior, 36, iron-cased steam-frigate, building at Blackwall, had a very narrow escape from being utterly destroyed by fire last week, as a conflagration of a very serious character occurred in her immediate vicinity, and, as it is, the accident will, we are informed, cause considerable delay in the progress of the works connected with her building. This vessel should have been launched, according to the contract entered into by her builders with the Admiralty, last May, but by some causes which yet require explanation she is still in a very backward state, and it is extremely doubtful if she will be in a position to take the water for another six months. It is to be hoped that Mr. Napier will be better prepared with the Black Prince, the construction of which has been confided to his able management.

Several vessels taken up by the War Department are now shipping munitions of war at the Royal Arsenal, Woolwich, for various foreign stations.

Industry and Supply, steam-vessels, are now receiving stores at Deptford—the former for Rio Janeiro and Ascension, and the latter for the Mediterranean stations.

Commanders Field and Jenner have been appointed Admiralty agents on the Southampton station.

A number of able seamen arrived at Woolwich Dockyard on Tuesday from Sheerness, having entered for service on board the Landrail and Spiteful steam-vessels, now placed in commission. The destination of these vessels will, it is expected, be the west coast of Africa, it being determined by the Government to make another strenuous effort to suppress the slave trade, which, notwithstanding the vast expense to which this country has been put of late years in maintaining a large squadron of men-of-war on the coast, is still very flourishing.

Greenwich Hospital.—A vacancy has occurred in the military department at the Royal Hospital at Greenwich for a Commander R.N., salary 300*l*., with apartments, stores, &c.; in consequence of the demise of that gallant and distinguished Trafalgar veteran, Commander Edward William Garrett. This vacancy will, however, remain in abeyance, like those caused by the deaths of Lieutenant Wylde and Mr. Elliot, until some decision has been arrived at in reference to the suggestions made by the Commissioners appointed to inquire into the management of the Hospital.

A melancholy accident occurred on Friday afternoon, the 31st ult., at Portsmouth, owing to the upsetting of the cutter of the Sealark, naval apprentices' instruction brig, in which was a crew of eight. Six of the crew were saved, but two poor youths, named Chelvers and Dowling, met an untimely end.

Launch of a Russian Corvette. — On Tuesday afternoon the screw steam-corvette Hydamack, built by Mr. Henry S. Pitcher for the Russian government, was successfully launched at Northfleet dockyard, in the presence of the Admiral Count Poutiatine, Admirals Melline and Popoff, Captains Pestchouroff and Schwartz, of the Imperial Russian navy. The customary baptismal ceremony was performed by Mdlle. Poutiatine. The principal dimensions of the Hydamack are as follows:—Length between perpendiculars, 213 feet 5 in.; extreme breadth, 13 feet 4 in.; depth in hold, 14 feet 9 in.; burden in tons, 1000. Her armament will consist of three pivot 8-inch guns, 95 cwt. each, and four 32-pounders, 25 cwt. each. The engines of the Hydamack are direct acting, of 250 nominal horse-power, and constructed by Messrs. Maudslay, Sons, & Field. After the launch Mr. Henry S. Pitcher entertained nearly 100 of the visitors in the capacious mould loft of the establishment, and in alluding to the event they had met to celebrate, observed that more than 70 years had passed since the first vessel, the Royal Charlotte, was built and launched from Northfleet dockyard—the reputation of which Mr. H. S. Pitcher would feel the greatest pride in sustaining. It was subsequently remarked by Mr. Joshua Field, of the firm of Maudslay, Sons, & Field, that having constructed a great number of the engines and boilers placed in the vessels built at Northfleet dockyard, it afforded him much pleasure to state that in no instance had any one of these vessels failed to sustain the builders' reputation, or to satisfy the fullest hopes of the owners. The launch of the Hydamack will soon be followed by that of the Amelia frigate, now building for the Greek government.

We have borne testimony to the efficient working of the Himalaya, and other of Her Majesty's steam troop-ships, but we regret to find that the very speed with which these vessels are worked have entailed upon their commanders and other officers considerable expense in the shape of postage, as letters follow them about from port to port. If a run-away husband or a fugitive lover have entered, either as a marine or sailor, a correspondence is immediately opened with the delinquent's captain. Again, if rumour announces the movement of a regiment from one station to another, it is supposed by the friends of the officer in command down to those of the drummer-boys, that the captain of the troop-ship has ample time at his disposal, and any quantity of stationery and postage stamps, wherewith to answer all queries addressed to him. We have abundant proofs that great courtesy has been exhibited by naval officers connected with the transport of troops, but we do think it presses hard upon them that no allowance exists for defraying the charges to which the nature of their employment exposes them. A properly represented case to the Admiralty would, we imagine, produce good effect.

Mr. Clark has been appointed inspector of caulkers, vice Banister, sen., superannuated; and Mr. W. Banister has been appointed leading man of caulkers, vice Penny, discharged from the service for losing time during working hours.

In general there are few matters in which masters of merchant vessels are more particular than in that which refers to the correct reporting of ships which they have met at sea; but a curious exception has lately taken place in the case of the list of ships furnished by the Royal Mail Company's steamship Tyne, Jellicoe, master, on her voyage from the Brazils to England. It is stated that on the 1st instant the Tyne spoke Her Majesty's ship Agamemnon, fifty miles south of the Start, steering north-west. This piece of information looked so genuine that it must have passed current among persons not intimately acquainted with the Service, and with the probable movements of Her Majesty's ships. The statement, however, is entirely erroneous, as at the time when the captain of the Tyne says he was speaking the Agamemnon she was some two or three thousand miles from the spot, at her station in the Mediterranean. The ship spoken by him was evidently the Boscawen, Captain Powell, C.B., flag-ship of Sir F. Grey, late Commander-in-Chief at the Cape of Good Hope, and which has since arrived at Plymouth.

Rear-Admiral Sir Thomas Pasley, Bart., second in command at Plymouth port, has struck his flag on board the Royal Adelaide, guard-ship of ordinary, and has proceeded on a month's leave.

Confession of a Murder.—An able seaman, named George Davies, serving in the Madagascar, store-ship, at Rio, has confessed to participation in the murder of a woman near Caermarthen, in June, 1855. According to the man's statement he witnessed the murder, which was committed by a man named Evan Thomas, at a place called Fountain Hall. Thomas, he adds, knocked the woman down, then kicked her, causing death in ten or twelve minntes. Davies looked on all the time, but did not interfere, because Evans was a much stronger man, and he afterwards assisted in burying the body in an adjoining field. The man Davies has been placed under arrest.

The Navy Gazette.

ADMIRALTY, September 4.

The *Gazette* announces that the distribution of the proceeds received and tonnage bounty awarded for the brig, Name Unknown, captured on the 12th January, 1859, by Her Majesty's ship Archer, will commence on Monday the 17th September, inst., at Somerset House.

The following are the shares due to an individual in the several classes:—

	£	s.	d.		£	s.	d.
Flag share	72	8	6	Sixth class	9	18	8
Captain	172	0	4	Seventh class ...	6	12	5
Second class ...	38	12	6	Eighth class ...	3	6	3
Third class... ...	30	17	11	Ninth class... ...	2	4	2
Fourth class ...	19	17	4	Tenth class ...	1	2	0
Fifth class	11	0	9				

Notice is also given that the distribution of the proceeds received, and tonnage bounty awarded for the brigantine, Name Unknown, captured on the 16th January, 1859, by Her Majesty's ship Sharpshooter, will commence on Monday, the 17th September inst., at Somerset House.

The following are the shares due to an individual in the several classes:

	£	s.	d.		£	s.	d.
Flag share ...	24	3	1	Sixth class ...	7	10	7
Lieutenant Commanding ...	57	7	6	Seventh class ...	5	0	6
				Eighth class ...	2	10	3
Fourth class ...	15	1	2	Ninth class ...	1	13	5
Fifth class ...	8	7	4	Tenth class ...	0	16	8

Also that the distribution of proceeds received and tonnage bounty awarded for the slave barque, Name Unknown, captured on the 9th April, 1859, by Her Majesty's ship Heron, will commence on Monday, the 17th September, inst., at Somerset House.

The following are the shares due to an individual in the several classes:—

	£	s.	d.		£	s.	d.
Flag Share... ...	77	8	11	Sixth class ...	15	14	1
Commander ...	183	18	9	Seventh class ...	10	9	4
Third class ...	48	17	0	Eighth class ...	5	4	8
Fourth class ...	31	8	0	Ninth class ...	3	9	10
Fifth class	17	8	11	Tenth class ...	1	14	10

Notice is given in this *Gazette* that preparations are being made for the distribution of prize-money awarded for the brigantine, name unknown, captured on the 4th of February, 1859, by Her Majesty's ship Triton. Also for prize-money awarded for the schooner, name unknown, captured on the 4th of May, 1859, by Her Majesty's ship Triton. Also for prize-money awarded for the bark, name unknown, captured on the 15th of June, 1859, by Her Majesty's ship Antelope. Also for the distribution of proceeds arising from coals captured on board a Russian vessel, name unknown, by Her Majesty's ship Viper on the 26th of May, 1855, in the Sea of Azov.

Digitized by Google

THE ROYAL MARINES.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—In your impression of the 30th June, a correspondent, calling himself "Poor Joe," gives "an extract from a letter just received from an officer of Royal Marines on board one of Her Majesty's ships in Malta Harbour," &c.

"Poor Joe" has violated, without leave or licence, the confidence implied in the perusal of private correspondence, addressed to a third person; he has also quoted inaccurately, and by the addition of his absurd remarks might make it appear that a few curt sentences, written in haste, and only intended to notify a certain occurrence, were designed for publication, in order to arrogate particular merit, to be a means of calling the attention of the powers that be towards the state of the corps, and of making odious comparisons with another Service. From all complicity in such things I am entirely free. "Poor Joe's" effort is spontaneous, and I should be sorry to deprive him of the full merit of the championship he has assumed. I would only recommend him if he belongs to the corps (though I should rather say "an enemy hath done this"), and is as desirous of its welfare and improvement as he ought to be, the next time he exerts himself, to use a little more common sense, and not emit a whine which will have at Whitehall about the same success as the "groans of the Britons" had whilom at Rome.

Convinced that the part of every individual in such cases as that alluded to is accurately reported and known to the highest authorities, and that the Service derives no benefit from long discussion of such matters in the public papers, I allowed to pass a paragraph which was copied into several papers, stating that the officers of Marines were absent from the ship when the disturbance took place, whereas they were all present; but this last matter is too personal to be passed over in silence without injury to myself, wherefore at this late period I am most unwillingly compelled to revive the subject, and to request you to favour me by the insertion of this in your next publication, which I should have done much earlier but that my ship has been detained in the Island of Crete, and I have been for some weeks without letters or newspapers.—I am, &c.,

PHILIP HARRIS, Captain Royal Marines.

Malta, 31st August.

THE MILITIA.

FLINTSHIRE.—The Royal Flintshire Rifle Militia wil assemble for 27 days' training at Mold, on Monday October 15.

The Militia Gazette.

WAR OFFICE, PALL MALL, SEPTEMBER 4.

Royal Brecknock Rifle Regiment of Militia—Lieutenant-Colonel Lloyd Vaughan Watkins, M.P., to be Honorary Colonel; Major Douglas John Dickinson to be Lieutenant-Colonel-Commandant, vice Watkins, appointed Honorary Colonel; Captain William Bridgwater to be Major, vice Dickinson, promoted; Arthur Chilver Tupper, Esq., to be Captain, vice Bridgwater, promoted.

West York Rifle Regiment of Militia—Collins Curtis, Gent., to be Assistant-Surgeon, vice Bowman, resigned.

4th Regiment of West York Militia—Lieutenant Henry Irwin to be Captain.

1st or Western Regiment of Norfolk Militia—Memorandum—Her Majesty has been pleased to command that Lieutenant Reginald Octavius Day, who absented himself from the recent training of the Regiment, without leave, be removed from the strength of the Corps.

WAR OFFICE, PALL MALL, SEPTEMBER 7.

Memorandum—Lieutenant William Orme, having obtained a First Class Certificate at the School of Musketry at Hythe, has been appointed by His Royal Highness the General Commanding-in-Chief, with the concurrence of the Secretary of State for War, to act as Instructor of Musketry to the Royal Sussex Light Infantry Militia, vice Captain Matthews, resigned.

Hertfordshire Militia—The Queen has been graciously pleased to accept the resignation of the Commission held by Assistant-Surgeon Henry Francis Coley.

3rd Regiment of King's Own Staffordshire Militia—The Hon. William Monck Jervis, to be Lieutenant.

Her Majesty has been graciously pleased to accept the resignation of the Commission held by Lieutenant Howard Thomas Spence Campion, in the 1st Regiment of the Duke of Lancaster's Own Militia.

Her Majesty has been graciously pleased to accept the resignation of the Commission held by Ensign Frederick Augustus White, in the 3rd Regiment of the Duke of Lancaster's Own Militia.

Her Majesty has been graciously pleased to accept the resignation of the Commission held by Ensign Patrick John Tiernan, in the 7th Regiment of Lancashire Militia.

Berwickshire, Haddingtonshire, Linlithgowshire, and Peebleshire Regiment of Militia—Norman Mitchell Innes, Esq., to be Captain, vice Thomas Alexander Hog, resigned.

Kent Artillery Regiment of Militia—Second Lieutenant John Curtois Adolphus Bones to be First Lieutenant, vice Cox, resigned; Second Lieutenant Henry Barham Scoones to be First Lieutenant, vice Denne, promoted; Second Lieutenant the Honourable Robert Marsham (Supernumerary) to be First Lieutenant.

West Kent Light Infantry Regiment of Militia—Ensign Henry John Goodwin Robinson, to be Lieutenant, vice Webb, removed from the strength of the Regiment.

THE LATE GENERAL HAVELOCK.—Some time since a movement was set on foot for the purpose of raising subscriptions to place a statue of the gallant general Havelock in Trafalgar Square, and Lord Llanover, the Hon. A. Kinnaird, M.P., Major Adair, Mr. Deputy Holt, and other gentlemen, have exerted themselves in carrying out this object. Subscriptions for the purpose having been obtained to a large amount, Mr. Behnes, the eminent sculptor, was engaged to execute a statue of the late general; and on Friday last the casting took place at Messrs. Robinson and Cottam's, bronze founders, of Pimlico, in presence of several of the nobility and other gentlemen interested in the execution of the work. The casting was in every degree successful, and the likeness to the deceased general has been much approved by Lady Havelock. The figure is twelve feet high, and we are informed the largest casting that has ever been taken in one piece. The deceased general is represented in a standing position, the right hand resting upon a sword, with a cloak loosely thrown over the shoulders. We understand that it will be shortly placed on a pedestal in Trafalgar Square, to the left of the Nelson Column, to correspond with the statue of Napier. The ceremony of inauguration is, we are told, postponed until November next. The cost of the work is 2000*l*.

VOLUNTEERS.

METROPOLITAN.

1ST (VICTORIA) MIDDLESEX RIFLES.—On Saturday last, the members of this corps commenced a series of drills of a very useful and practical nature, viz., judging distances. Although the hour of parade (3 o'clock) was rather early, and at this time of year a very great proportion of both officers and men absent on leave, still one strong company (in undress uniform and forage cap, by special order) answered to their names at the appointed hour. The officers who attended were Captain Collins, in command, with Lieutenants Haworth and Sanders. The adjutant of the regiment, Captain Trew, and Sergeant-Major Abbott, accompanied the detachment, the instruction in judging distances, &c., being specially under their supervision, both of these officers having studied at Hythe. On Monday last, the finance committee presented to the general regimental committee a statement of the receipts and disbursements of the regiment during the past year, which is ordered to be printed and circulated among the members. The committee were enabled to congratulate the corps on the steady accession of members, and the satisfactory state of the finances, considering that this regiment is entirely self-supporting (the only one in the metropolis except the Honourable Artillery Company), and that the committee have had to incur many heavy and extraordinary expenses in draining the grounds at Kilburn, and building armoury, orderly, and dressing rooms, &c.

28TH (LONDON IRISH) MIDDLESEX RIFLES.—On Saturday afternoon the members of the London Irish Volunteers practised firing for the first time, and, considering all circumstances, the occasion passed off with the greatest *éclat*. The corps mustered at head-quarters, Burlington House, Piccadilly, at 5 o'clock, and the weather, which had been glorious throughout the day, bid fair to continue the same during the evening. The men were formed into five companies, and numbered, rank and file, nearly 300 strong, which would have been larger but for the number absent on their holidays. After some slight manœuvres they emerged from the gates of Burlington House under the command of Major Verner and Captain Daubeney (the adjutant), and headed by their excellent band proceeded along Piccadilly, accompanied by a vast number of people. Apsley House, however, was scarcely reached before the sun disappeared and the rain began to pour. Nothing daunted, the march was continued to the Knightsbridge Barracks, when the order was given to turn back. At first the men seemed much disappointed, believing that they were going to be taken back to head-quarters, but on reaching Albert Gate satisfaction beamed on every countenance on finding that they were marched into Hyde Park. Here the rain came down most pitilessly, but, instead of damping the ardour of the "London Irish," it only served as a fund of amusement. Arriving at the site of the great exhibition, the first four companies were formed into the two sides of a square, and at a three-pace distance executed some very excellent blank cartridge practice in file-firing. It is gratifying to state that the corps now numbers about 650, and in a few days they will be in possession of a first-rate practising ground with a range of 2000 yards. In future, the Tuesday and Thursday drills will be at Westminster Hall, at 7, and Burlington House will be the rendezvous for Saturday's parade. The following is a programme of the arrangements for the fortnight ending Sept. 22nd:—Company and position drill, snapping caps, aiming and blank firing — Mondays and Fridays at Messrs. Collard's establishment, Oval Road; Tuesdays and Thursdays at the Cattle Market, from 6 p.m., under an officer and musketry instructor—undress. Squad drills—Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays, from 7 to 9, p.m., at the Armoury, Euston Station, under Sergeant-Major Box, late of the 57th; Mondays, Wednesdays, and Fridays, from 6 to 8, p.m., at Sir William Cubitt's establishment, Gray's Inn Road—undress. General parade with band—Saturdays, to Hampstead Heath for battalion drill, leaving Euston Station at 3·30, p.m.—full dress, with shako.

7TH (SOUTHWARK) SURREY RIFLES.—This corps assembled in great force on Saturday afternoon on the parade ground, Sessions House, Newington Causeway, for the usual march out. The route taken was along the Walworth Road, Camberwell Park, Denmark Hill, and thence to the Greyhound, Dulwich, where they piled arms. After a halt of about two hours they returned to head-quarters. They were accompanied on this occasion by the band of the 3rd Surrey Militia, and the newly formed bugle band, composed entirely of members of the corps. Major Parratt, the adjutant, was unfortunately thrown from his horse just before leaving the Sessions House, but was not seriously injured, and was able to remount and proceed with his duty.

THE LONDON VOLUNTEER FUSILIERS.—A public meeting for the purpose of inaugurating the formation of "The London Volunteer Fusilier Corps" was held on Saturday afternoon, at the Hanover Square Rooms. Mr. W. Bolleart presided. In opening the proceedings he said he had in his younger days fought for freedom, and he was gratified that he could still promote the same object. Captain Shearman said the application for membership in the proposed corps had exceeded his most sanguine expectations. The corps was to be known as the "London Volunteer Fusiliers." The minimum height was to be five feet six inches, the uniform was to be scarlet, and was to cost about five guineas, and the annual subscription was to be one guinea. He wished to study economy in all the arrangements, so that there might be no exclusiveness about the corps. He was afraid that the expenses which some corps had incurred at the beginning would injure them in the future. He should like every able-bodied man in the kingdom to enrol, and then there would be no danger of molestation. A resolution, pledging the meeting to form a corps under the conditions described in Captain Shearman's speech, was then moved by Dr. Palmer, and seconded by Mr. Loveridge. Mr. Locke suggested that as the meeting was so thin, it would be better to adjourn it for a month, in order that a large meeting might be convened, at which the corps would be inaugurated with *éclat*. He warmly eulogised the early closing and rifle movements, and said the former had been greatly promoted by the latter. The Chairman thanked Mr. Locke for his suggestions, and after some conversation, in which the propriety of proceeding with the enrolment immediately was pretty generally mentioned, the motion was put and carried. Captain Shearman then announced that another meeting would shortly be held. After the meeting had been closed by a vote of thanks to the Chairman several enrolments were made.

CHESHIRE.

The Cheshire Rifle Prize Meeting, which takes place at Birkenhead on the 19th and 20th of this month, excites considerable interest in the vicinity. There are a number of prizes open to all England, and we doubt not that some excellent practice will be made. Some 300*l*. altogether is to be contended for, and from the list of patrons and the committee the meeting will be no doubt most creditable to to the county.

DORSETSHIRE.

10TH (VALE OF BLACKMOOR) DORSETSHIRE RIFLES.—On Saturday evening last the members of this corps appeared for the first time in full uniform. The dress, which is exceedingly neat, is somewhat different to the style adopted by other corps in the county, being faced with French grey instead of red.

ESSEX.

6TH (COLCHESTER) ESSEX RIFLES.—The members of this corps assembled on Thursday on the invitation of Lady Georgina Rebow, the wife of the member for the borough, in Wivenhoe Park, and went through a series of manœuvres in presence of their fair hostess and a large assembly of the gentry of the county of Essex. The review over, the members of the corps proceeded to show their skill as marksmen, Lady Georgina having liberally offered a silver cup as a prize to him who should prove himself the Robin Hood or Clym of the Clough of the day.

HAMPSHIRE.

3RD HANTS; OR, PORTSMOUTH CIVIL SERVICE (DOCKYARD) ARTILLERY VOLUNTEERS.—The following promotions and appointments have taken place in the above corps, viz., Captain-Commandant Sturdee, to be Major, date of commission, 29th of August, 1860; Mr J. Souter, Brigade Sergeant-Major; Mr. William Brooks, Quartermaster Sergeant. The following appointments have taken place, subject to the approval of the Lord-Lieutenant, William Smith, Esq., to be 1st Lieutenant; William Short, Esq., 1st Lieutenant; J. S. Watson, Esq., 2nd Lieutenant; A. Moth, Esq., 2nd Lieutenant; and —— Chapman, Esq., 2nd Lieutenant.

5TH HANTS VOLUNTEER RIFLES.—This corps has received ammunition, and commences practice on Monday next. The clerks and others employed in the Dockyard, Gun-wharf, Customs, and Excise establishments belonging to the borough of Portsmouth, are about to form a company of Rifles to be attached to the 5th Hants.

PORTSMOUTH ARTILLERY VOLUNTEERS.—This corps commenced firing blank cartridge on the Spur redoubt on Wednesday evening last.

WINCHESTER RIFLES.—On Monday, the 17th inst., a grand match of this corps will take place. Sir J. Easthope, Mr. Bonham Carter, M.P.; Sir J. East, M.P., and many others, have offered prizes.

KENT.

12TH (CHATHAM) KENT ARTILLERY.—*The first inspection* of this company was held on Saturday last by Viscount Sydney, the Lord-Lieutenant, who was accompanied by Lieut.-Colonel Morris, Deputy Inspector-General of Volunteers. The company, numbering about 50 men, assembled at Fort Amherst, under the command of Captain J. E. Beveridge, and having been put through various evolutions, all of which were creditably performed, the Volunteers were marched down to the Cornwallis battery, for the purpose of being put through the great-gun drill. After several rounds had been fired from the 68-pounder siege-guns, the firing ceased, and the company having been re-formed, Viscount Sydney addressed the officers and men, complimenting them on the highly effective manner in which they had acquitted themselves, and the satisfactory appearance of the company.

4TH AND 13TH (SHEERNESS) KENT ARTILLERY.—On Saturday Viscount Sydney arrived at Sheerness for the purpose of inspecting the 4th (Sheerness) and the 13th (Sheerness Dockyard) companies of Artillery. The Lord-Lieutenant was accompanied by Lieut.-Colonel Morris, R.A., the Deputy-Inspector-General of Volunteers and suite. The 4th company of Artillery under the command of Captain L. S. Magnus, and the 13th company under the command of Major W. B. Robinson, together numbering 220 men, were drawn up on the parade-ground, where they were inspected by Viscount Sydney and Colonel Morris, both companies marching past in slow and quick time. Since the companies have been formed, officers and men have been unremitting in their drill, the result of which has been that the companies have arrived at a point of efficiency not attained by scarcely any other Volunteer Artillery Corps in the kingdom. This has been in a great measure owing to the facilities afforded by the authorities at Sheerness, who not only allow the Volunteers to be drilled at the batteries, but also place at their disposal any amount of shot and shell for target practice that may be required. At the close of the target practice, which lasted some time, the companies were formed into three sides of a square, when Lord Sydney, in a highly complimentary address, expressed his unqualified satisfaction at the result of the day's inspection. A banquet afterwards took place at the Fountain Hotel, where covers were laid for 40 guests. The chair was taken by Major Robinson, and the vice-chair by Captain Magnus.

LANCASHIRE.

65TH (ROSSALL) LANCASHIRE RIFLES.—In the review at Knowsley this corps was represented by a company in the third battalion of the third brigade. We noticed in the spring the formation of this corps, the first which has been regularly enrolled from a public school. Their appearance on Saturday showed that they had been seriously at work since the period of their enrolment; and that they may fairly hope to take a creditable position among the Volunteers.

NORFOLK.

NORFOLK VOLUNTEER ARTILLERY AND RIFLES.—The Artillery Corps formed at Great Yarmouth is now 180 strong, and as soon as 200 are enrolled a battalion will be formed. Four ordinary companies of Volunteers have also been formed in the town. The members for the borough, Sir E.

Digitized by Google

Lacon and Sir H. Stracey, have offered a purse of 10*l.*, to be contested for at 300, 400, and 500 yards; a cup, valued at 5*l.*, has been presented by the officers of the corps, to be shot for at 200 and 300 yards; Major Orde, the commandant of the battalion, has offered for competition a Turner patent rifle to be competed for at 500 to 600 yards; and the ladies of the neighbourhood have offered a splendid challenge cup, valued at 30*l.*, and a silver medal, to be contested for at ranges of 650, 700, 800, and 900 yards. The winner of the challenge cup is to hold it against all comers for three years, and, in the event of his still maintaining his position, the prize will become his absolute property. Should he lose the cup he will retain the medal.

NORTHUMBERLAND.

NEWCASTLE (ELSWICK) RIFLES.—One hundred and four of the workmen belonging to the Elswall Ordnance Engine Works have joined this corps, and will form a detachment to be called the Elswick Volunteer Engineers.

SHROPSHIRE.

2ND (MARKET DRAYTON) SHROPSHIRE RIFLES.—On Friday week a silver bugle was presented by Mrs. Silver, of Norton, on behalf of the ladies of that parish, to this corps. A copper bugle and trumpet, and a drum which had been in the battle of the Alma, were at the same time presented to the corps by Mr. Spencer Silver. The presentations took place on the parade-ground of the corps. The company formed three sides of a square, the presents being placed on a pile of drums in the centre. A suitable address was read by the Rev. Frederick Silver, rector of Norton, on behalf of the ladies, which was acknowledged by the commanding-officer, Captain Alfred Hill.

4TH (BRIDGENORTH) SHROPSHIRE RIFLES.—On Wednesday, the 5th instant, Colonel the Hon. Wm. Noel Hill, recently appointed Colonel of the South Division of the county of Salop, made his first inspection of the 4th Shropshire Rifle Volunteers, under the command of Captain John Charles Lloyd, of Dudmaston Hall. The corps assembled and marched to the inspection ground at half-past one o'clock, headed by their band. The colonel expressed himself much pleased with their state of efficiency, when he considered the period they had been formed. The company immediately afterwards formed, with the band in the centre, and Mrs. Henry Whitmore, accompanied by Henry Whitmore, Esq., M.P., then presented, on behalf of the ladies of Bridgenorth and its neighbourhood, the band uniform, instruments, and colours, which had been provided entirely at their expense. The Volunteers and their visitors assembled afterwards at the Crown Hotel, and sat down to dinner to the number of about 120, and in the course of the evening Lieutenant Smith, who presided in the absence of the commanding officer, presented a handsome silver cup to Mr. Bowen, of Dunval, from the officers and members of the corps, for his great exertions in obtaining subscriptions, which enabled them to form the very efficient band of this company of Volunteers.

SOMERSETSHIRE.

BRISTOL VOLUNTEER ARTILLERY AND RIFLE CORPS.—Saturday afternoon this corps were inspected on Durdham Downs, by the Inspector-General of Volunteers. After the inspection Colonel M'Murdo, addressing the men, said—"Volunteers of the Bristol Rifle Corps, I have witnessed your manœuvres to-day with a great deal of satisfaction, and, I will add, admiration, for I have a right to say so. Your manual and platoon exercise was admirably done, and I would not desire to see it better done. You don't require to do it better for the Volunteer service, but, in so saying, do not let me put it in your heads to give up the drill. Though you have reached such a state of efficiency, I hope you will not yet lodge your arms. I do not know anything more glorious than to see the Artillery and Rifle Corps of Bristol turn out as they have this day, and to do what they have done, and I hope you will carry it on. Forgive me if I am wrong, but I think I detected once or twice amongst your ranks some whom I thought had not been attending drill so frequently as others, which threw you out a little in the deployments. I hope that those few who have not been attending so steadily to drill will, for the honour of the corps, attend more regularly, for I am sure Colonel Bush will not press too hard on you to attend battalion drill, perhaps once a week in the long autumn that I hope is before us. I trust that this day is a guarantee of fine weather. You hold, in the estimation of the country, a high and honourable position; there cannot be a higher position than you, the citizens of England, turning out in her defence. I shall report favourably to the Secretary for War of the efficiency of the corps I have seen to-day, both artillery and rifles; and in conclusion I congratulate Colonel Bush in having so admirable a corps, and I congratulate the corps on being so well commanded."

SUFFOLK.

6TH (STOURMARKET) SUFFOLK RIFLES.—The first-class shots in this corps competed on Friday at Landguard Fort, Harwich, for a silver cup presented by the officers. The firing was at 800 and 900 yards, and the cup was won by Sergeant-Armourer Colson, who made 11 points. Sergeant Betts scored 10 points, the next best number.

SUSSEX.

RYE.—The following members of the Rye corps have finished the first four series of rounds at 150, 200, 250, and 300 yards' range. The number of points to be obtained in order to remove a Volunteer from the third to the second class is 15, consequently those in the following list who have attained that number are now second-class men. The number of shots fired at each distance was five:—Sergeant Grace, 23; Corporal Dawes, 23; Mr. Parsons, 20; Hon. Surgeon Davies, 17; Mr. Chapman, 16; Mr. Lindridge, 16; Colour-Sergeant Vidler, 15; Mr. J. T. Smith, 14; Mr. W. Neame, 14; Mr. Collyer, 13; Mr. W. Huggett, 13.

WILTS.

RIFLE ASSOCIATION.—An influential meeting has been held in the city of Salisbury, at the orderly-room of the 1st Wiltshire Rifle Volunteers, at which the desirability of establishing a County Rifle Association for Wiltshire upon the principles of the National Association, recently inaugurated by Her Majesty at Wimbledon, was discussed. The meeting resulted in a unanimous resolution to organise an association of this character, and a committee of gentlemen was appointed to carry out the movement. The general object sought to be attained will be—1, to promote the efficient and skilful use of the rifle among the members of the various Volunteer corps of the county, by offering prizes to be publicly competed for on stated occasions; and 2, to cultivate in a similar manner a taste for rifle shooting among residents in Wiltshire who may not be enrolled members of a Volunteer force.

The Volunteer Gazette.

WAR OFFICE, PALL MALL, SEPTEMBER 4.

1st Battalion of Somerset Volunteer Rifle Corps—Lieutenant-Colonel Inigo William Jones, late of the 3d West India Regiment, to be Lieutenant-Colonel.

3d Battalion of Somerset Volunteer Rifle Corps—Henry Acland Fownes Luttrell, Esq., late of the Rifle Brigade, to be lieutenant-Colonel.

2d Battalion Rifle Volunteers—Hugh Adams Silver, Esq., late Captain 9th Corps, to be Major.

3d North Riding of Yorkshire Rifle Volunteer Corps—Joseph Teale Sigston, Esq., to be Honorary Assistant-Surgeon.

10th North Riding of Yorkshire Rifle Volunteer Corps—The Hon. Cecil Duncombe to be Captain.

1st Administrative Battalion of Brecknockshire Rifle Volunteers—Captain Henry Gore Lindsay to be Major.

3d Brecknockshire Rifle Volunteer Corps—Lieutenant Frederick Ximenes Gwynne to be Captain; Ensign John Hotchkis to be Lieutenant, vice Gwynne, promoted; Sir Joseph Bailey, Bart., to be Ensign, vice Hotchkis, promoted.

1st Renfrewshire Rifle Volunteer Corps—Sir Michael Robert Shaw Stewart, Bart., to be Lieutenant-Colonel; William M'Ilwraith, Gent., to be Ensign, vice Crawford, resigned.

[This notice of Mr. M'Ilwraith's appointment supersedes the one which appeared in the *Gazette* of the 13th of July last.]

5th Cambridgeshire Rifle Volunteers—Lieutenant Robert Charles Catling to be Captain; Ensign Robert Dawbarn to be Lieutenant; William Owen Pratt, Esq., to be Ensign.

Kent Artillery Volunteers—10th Corps—Henry William Barber, Gent., to be First Lieutenant, vice Tapp, promoted.

Memorandum—The Queen has been pleased to accept the resignation of the following commissions:—

Kent Rifle Volunteers—1st Corps—3d Battalion—Captain Lewis Davis Wigan; Ensign Joseph Scratton.

1st Hampshire Mounted Rifle Volunteer Corps—The Rev. James Adair Griffiths Colpoys, M.A., to be Honorary Chaplain.

2d Hampshire Artillery Volunteer Corps—The Rev. John Vanderstegen Stewart to be Honorary Chaplain.

3d Hampshire Artillery Volunteer Corps—Captain Alfred Barnes Sturdee to be Major.

17th Hampshire Rifle Volunteer Corps—Major George Wingate to be Lieutenant.

18th Hampshire Rifle Volunteer Corps—Chaloner William Chute, Esq., to be Lieutenant.

Memorandum—Her Majesty has accepted the resignation of the following commissions:—Hampshire Rifle Volunteers—6th Corps—Captain Wildman Yates Peel. 7th Corps—Captain Henry Peter Delmé. 14th Corps—Captain Francis Lovell.

10th Norfolk Rifle Volunteers—Lieutenant Sir Willoughby Jones, Bart., to be Captain; Ensign Robert Nicholas Hamond to be Lieutenant, vice Jones, promoted.

11th Norfolk Rifle Volunteers—Lieutenant James Holloway to be Captain.

City of Edinburgh Rifle Volunteer Corps—John Browne Innes to be Ensign, vice Mackenzie, promoted.

The Queen has been graciously pleased to accept the resignation of the commission held by Ensign T. H. Douglas in the City of Edinburgh Rifle Volunteer Corps.

Bedfordshire Rifle Volunteers—4th Company—Frederick Farr to be Honorary Assistant-Surgeon.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of the commission held by Arthur Macnamara, as Captain of the 4th Company.

11th Cumberland Rifle Volunteers—Robert Tiffen, Gent., to be Honorary Assistant-Surgeon; the Rev. William Lyde to be Honorary Chaplain.

Westmoreland and Cumberland Regiment of Yeomanry Cavalry—John Bridson Smith, Gent., to be Cornet, vice Musgrave, promoted.

Memorandum—The 10th Cumberland Rifle Volunteer Corps (Egremont) has been united to the 1st Administrative Battalion of Cumberland Rifle Volunteers. The Staff of the battalion will now consist of one Lieutenant-Colonel, one Major, and one Adjutant; the corps will retain its present number and designation in the county force.

6th Campany of Cheshire Rifle Volunteers—Lieutenant John Ireland Blackburne to be Captain; John Harvey Broadbent, Gent., to be Lieutenant; Bryan Johnson, Gent., to be Ensign.

30th Company of Cheshire Rifle Volunteers—John Mosford, Gent., to be Ensign.

28th Middlesex Rifle Volunteer Corps—The Hon. and Rev. Gilbert Chetwynd Talbot to be Honorary Roman Catholic Chaplain.

35th Middlesex Rifle Volunteer Corps—The Queen has been graciously pleased to accept the resignation of the commission held in this Corps by Captain Alfred Plantagenet Frederick Charles Somerset.

17th Hampshire Rifle Volunteer Corps—Frank Bradshaw to be Ensign; Charles Benson Brearey, M.D., to be Honorary Assistant-Surgeon.

1st Battalion of the Isle of Wight Rifle Volunteers, 2d Company—Lieutenant Arthur Harbottle Estcourt to be Captain, vice Sir John Simeon, Bart., resigned, and appointed Major; Ensign John Tooke to be Lieutenant, vice Estcourt, promoted; Francis Pittis, Gent., to be Ensign, vice Tooke, promoted. 8th Company—Hector Helsham, M.D. and F.R.C.S., to be Honorary Assistant-Surgeon.

The following appointment is substituted for that which appeared in the *Gazette* of Tuesday, the 21st inst.:—

1st Battalion of the Isle of Wight Rifle Volunteers—William Carter Hoffmeister, M.D. and F.R.C.S., to be Surgeon.

Memorandum—Her Majesty has been graciously pleased to accept the resignation of the commission held by Captain Commandant Henry Atkins Bowyer, in the 2d Oxfordshire Rifle Volunteer Corps.

The following commissions are substituted for those which appeared in the *Gazettes* of the 17th and 24th of August last:—

East York Artillery Volunteers, 1st Corps, Bridlington—Christopher Wharton Mann, Esq., to be Honorary Assistant-Surgeon.

Hull Brigade—Edward Philip Maxsted, Esq., to be Captain.

WAR OFFICE, PALL MALL, SEPTEMBER, 7.

1st Brigade of Sussex Artillery Volunteers—Robert Paisley, Gent. to be Adjutant from the 26th June, 1860.

11th Lancashire Artillery Volunteer Corps—John Dixon, Gent., to be Adjutant, from the 16th April, 1860.

Worcestershire Rifle Volunteers—The Rev. George Pardoe to be Honorary Chaplain in the 1st Administrative Battalion; 4th Company—Samuel Stretton, Esq., to be Honorary Assistant Surgeon.

9th Hertfordshire Rifle Volunteers—Matthew Algernon Adams, Gent., to be Honorary Assistant-Surgeon.

1st Battalion of Staffordshire Rifle Volunteers, 37th Company—John William Philips, Esq., to be Captain.

4th Battalion of Staffordshire Rifle Volunteers, 5th Company—Charles Frederick Clarke, Gent., to be Ensign.

Roxburghshire Rifle Volunteer Corps, 4th Company—George William Thomson, Esq., to be Hon. Assistant-Surgeon.

5th Lancashire Artillery Volunteer Corps—John Bell, Gent., to be Supernumerary Lieutenant.

2nd Battalion of Lancashire Rifle Volunteers—Ellis Jones, Esq., to be Surgeon.

8th Lancashire Rifle Volunteer Corps—Captain John Hutchinson to be Major; Lieutenant Oliver Ormerod Walker the younger to be Captain, vice Hutchinson, promoted; Robert Kershaw, Esq. (late Captain in the 4th Royal Lancashire Militia), to be Captain; John James Mellor, Esq., to be Captain; Ensign Charles Walker to be Lieutenant, vice Oliver Ormerod Walker, promoted; Richard Kay the younger, Gent., to be Lieutenant; Samuel Kershaw, Gent., to be Lieutenant; William Harper, Gent., to be Ensign, vice Charles Walker, promoted; Walter Whitehead, Gent., to be Ensign; Albert Fenton, Gent., to be Ensign; William Hartley, Gent., to be Ensign; William Townsend, Esq., to be Surgeon.

2nd Gloucestershire Artillery Volunteer Corps—John Francis Napier Hewitt, Esq., to be Captain.

4th Gloucestershire Artillery Volunteer Corps—Frederick William Goold, Gent., to be Lieutenant.

Kent Artillery Volunteers—1st Brigade—Edward Young, M.D., to be Surgeon.

Kent Rifle Volunteers—4th Battalion—Charles Holttum, Gent., to be Surgeon.

Memorandum—Her Majesty the Queen has been pleased to accept the resignation of the following Commissions:

Kent Artillery Volunteers—1st Corps—Honorary Assistant-Surgeon Edward Young.

Kent Rifle Volunteers—5th and 6th Corps—Honorary Assistant-Surgeon Charles Holttum.

28th Middlesex Rifle Volunteer Corps—Major James Edward Verner, of the Bengal Army, to be Major.

Memorandum.—County of Middlesex Rifle Volunteer Corps.—The following Corps have been united in Administrative battalions, viz.: The 4th and 7th forming the 1st battalion; the 3rd, 13th, and 14th forming the 2nd battalion; the 39th and 40th forming the 3rd battalion; the 20th, 29th, and 37th forming the 4th battalion; the 26th and 42nd forming the 5th battalion; and the 12th, 33rd, 35th, and 41st forming the 6th battalion.

Each of the abovementioned corps will retain its distinctive number in the County Force.

1st Administrative Battalion of Monmouthshire Rifle Volunteers—Captain the Hon. Frederick Courtenay Morgan to be Major.

Memorandum—That the 1st, 3rd, and 4th Monmouthshire Rifle Volunteer Corps have been united in a battalion for drill and administrative purposes, with a Staff consisting of one Major and one Adjutant.

4th Essex Rifle Volunteers—John Thomas Gilson, Esq., to be Hon. Assistant-Surgeon.

1st Brecknockshire Rifle Volunteer Corps—Lieutenant Robert Raikes, to be Captain, Vice Lindsay, promoted; Ensign Penry Lloyd, to be Lieutenant, vice Rakes, promoted.

2nd Selkirkshire Rifle Volunteers—William Brown, Esq., to be Ensign.

5th Buckinghamshire Rifle Volunteers—The Right Honourable Lord Seymour, to be Captain, as a Special case.

13th Lanarkshire Artillery Volunteer Corps—Joshua Paterson, Esq., M.D., to be Hon. Assistant-Surgeon.

3rd Lanarkshire Rifle Volunteer Corps—(In which the 10th, 14th, 22nd, 54th, 82nd, and 87th Lanarkshire Rifle Volunteer Corps are now incorporated)—Captain David Dreghorn to be Lieut.-Colonel; James Dunlop, Esq., M.D., to be Assistant-Surgeon.

84th Lanarkshire Rifle Volunteer Corps—Andrew Ballantyne, Gent., to be Lieutenant, vice Alexander Findlay, resigned.

85th Lanarkshire Rifle Volunteer Corps—John Alexander Sinclair Mac Lagan, to be Lieutenant.

93rd Lanarkshire Rifle Volunteer Corps—John Dewer, Esq., to be Captain; Malcolm Coll McGregor, Gent., to be Lieutenant.

1st Lanarkshire Rifle Volunteer Corps—The full name of Dr. Macleod, gazetted as Surgeon on the 14th ultimo, is George Husband Baird Macleod.

Memorandum—5th Cumberland Rifle Volunteer Corps—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Captain William Brougham.

VOLUNTEER EFFICIENCY.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—As the permanent efficiency of good Volunteer battalions very much depends on the various companies being occasionally brought together for the purpose of being drilled together as a battalion, I venture to call your attention to some passages of a speech delivered by the Earl of Malmesbury, in the House of Lords, on the 18th ult., with a view of showing how the difficulties alluded to by him have been overcome in this county (Dorset). The noble lord seems to be of opinion, that it is at present unadvisable to bring companies together for inspection, and among other reasons for forming this opinion, brings forward the following argument: "If it were meant that the corps should meet together several days before the inspection, so as to practise together in battalions, it would be impossible that that plan could be carried out without great expense and inconvenience to the men."

The plan that has been adopted in this county is a very simple one, and one that has been attended with but very little expense to the men of the corps.

On the 15th ult. the 1st battalion of the Dorset Volunteers assembled at Sherborne for battalion drill. They went through a number of ordinary parade movements in a highly creditable manner, and without mistakes, and, I believe, to the satisfaction of all military men present.

The means adopted to bring about this result were these. The lieutenant-colonel commanding the battalion assembled together at Dorchester, on various occasions previous to the general muster at Sherborne, the officers and some of the non-commissioned officers of the various companies, and instructed them in a variety of battalion movements, by means of skeleton drill. He also instructed the covering sergeants in their duties. These gentlemen, on returning to their companies, drilled them in the same manner, so that on the day of the review each company was prepared to take any position in the battalion that might be allotted to it.—I am, &c. SOLDAT.

WOOLWICH.—The following excellent shooting was made by a party of officers of the 2nd Battalion Royal Arsenal Rifles, on the afternoon of Friday, the 31st August, at the practice ranges, Royal Arsenal:

Range	Names	Points obtained	How made
5 shots 500 yards	Captain Elliott	6	2 centres 2 outers
	,, Monk	7	2 ,, 3 ,,
	,, Sanson	4	1 ,, 2 ,,
	,, Martin	3	0 ,, 3 ,,
5 shots 400 yards	Captain Elliott	6	2 ,, 2 ,,
	,, Monk	7	3 ,, 1 ,,
	,, Sanson	6	1 ,, 4 ,,
	,, Martin	3	0 ,, 3 ,,
	Ensign Sutherland	6	1 ,, 4 ,,

MALDON.—Mr. Alfred May, the mayor, in consequence of a requisition numerously signed, called a meeting for yesterday evening, for the purpose of considering the propriety of forming a Volunteer corps for Maldon and its neighbourhood.

INTENDED REVIEW AT YORK.—The Volunteer corps of the West Riding of Yorkshire are to be reviewed at York on Saturday, the 22nd instant. The Lord-Lieutenant of the West Riding (Earl Fitzwilliam) will be present, and the reviewing officer will probably be Lieut.-General Sir G. Weatherall. The corps belonging to Leeds, Bradford, Halifax, Huddersfield, and Wakefield, are to assemble on the 15th instant at Kirklees Park, near Huddersfield, to practise certain field movements under the command of Major Harman, Inspector of Volunteer Corps.

THE ARMY AND NAVY GAZETTE
AND
JOURNAL OF THE MILITIA AND VOLUNTEER FORCES.
EDITED BY W. H. RUSSELL, ESQ., LL.D.,
(Late Special Correspondent of *The Times*.)

The subscription is 7*s.* 7*d.* per quarter, or 30*s.* 4*d.* per annum, payable in advance, postage included (excepting abroad, which varies according to the route and destination). All Editorial Communications should be addressed to W. H. Russell, Esq., and business letters and advertisements to Mr. Archibald Graham, to whom post-office orders, &c., are payable. Advertisements received up to Thursday evening. The Paper is published every Saturday in time for the Morning Mails.

Office, 16, Wellington Street, Strand, London, W.C.

WILLIAM O. MITCHELL,
MILITARY BOOKSELLER AND PUBLISHER,
39, CHARING CROSS, LONDON, S.W.
Catalogues sent on application.

BENSON'S WATCHES.
"Perfection of mechanism."—*Morning Post.*
Gold Watches, 5 to 100 guineas; Silver, 2 to 50 guineas. Send two stamps for Benson's Illustrated Pamphlet, descriptive of every construction of watch now made. Watches sent to all parts of the world.—33 and 34, Ludgate Hill, E.C.
Established 1749.

ELSTOB'S RIDING BELTS,
Hunting Drawers, Breeches, Knickerbockers, Elastic-seated Riding Trousers, 32*s.*; Bedford Cords, best quality, 42*s.*; Belts and Drawers, 21*s.* each.—
12, AVERY ROW, BROOK STREET, NEW BOND STREET, W.,
(Exactly opposite Ford's Hotel in Brook Street).

DAY'S PATENT CHAIR-BED, a perfect combination of Easy Chair, Couch, and Bedstead, adaptable to either purpose by one simple motion, without screw, nut, rack, or complication of any description. An illustrated and descriptive circular for one stamp. W. Day & Son, Portmanteau Manufacturers and Military Outfitters, 353 and 378, Strand, London, W.C.

THE LONDON RIFLE BRIGADE BAND of 21 performers, is provided entirely by H. DISTIN with his newly-invented VENTIL-HORNS. Distin's new RIFLE BUGLE, adopted and sealed as the Government pattern for the Army, can now be had, complete, price 2*l.* 2*s.*, from the Contractor, at his Manufactory, 9, Great Newport Street, St. Martin's Lane, W.C. Estimates for Bands post free. Retail Depot, 21, Tichborne Street, Regent Street, W.

RIFLE & ARTILLERY DUTY-BUGLES, TRUMPETS, &c.—Volunteer Corps are respectfully informed that the patterns approved by Her Majesty's War Department can now be had of the Makers, Messrs. RUDALL, ROSE, CARTE, & CO. Price, with Lines and Tassels complete, Two Guineas.
SILVER BUGLES, for Presentation, from Twenty Guineas.
ELECTRO-PLATED BUGLES, in Case, Four Guineas.
BUGLE and TRUMPET-MAJOR DUTY-BOOKS, 3*s.* each, giving instructions, and all the regulation sounds.
DRUM MAJOR DUTY-BOOK, 4*s.* FIFE-MAJOR DUTY-BOOK, 3*s.*
PERCIVAL HUNTING-HORNS in Copper and Sterling Silver.
RUDALL & CO.'S PRICE LIST, with Guide for the Formation of Bands, and Corps of Flutes and Drums, and Estimates of Cost, sent free per post.
Military Musical Instrument Manufactory, 20, Charing Cross, London, S.W.

NOTICES TO CORRESPONDENTS.

It should be remembered that brevity in correspondence can always be made consistent with lucidity of statement, by a little trouble on the part of the writer. Our space is exceedingly limited, and has many demands upon it.

As a *general rule* the Editor cannot undertake to answer questions or to return rejected contributions.

No communications can be published which are not accompanied by the name of the writer, given in confidence to the Editor.

It is particularly requested that applications for copies of the Army and Navy Gazette, &c., and advertisements be sent to the Publisher, Mr. Archibald Graham, and not to the Editor.

Army & Navy Gazette.

LONDON, SATURDAY, SEPTEMBER 8, 1860.

In the last number of The Army and Navy Gazette we printed a communication from an intelligent and valued correspondent, who has promised to give us from time to time some information respecting foreign camps and armies of manœuvre, as well as his ideas on various strong places which he has visited and inspected with no unpractised eye in the course of the present year. The writer in the paper to which we allude detailed his experiences of the small difficulties which may beset one who intends to repair to the French camp at Chalons-sur-Marne for amusement or professional instruction. We have now the pleasure of placing before our readers the continuation of the paper, which will be found not less interesting or instructive than that which has already appeared in our columns:—

Having given you the dark side of Chalons, and told you what a visitor to the camp must be prepared to put up with, I will now proceed to give some account of what I saw during my visit there, in order that your readers may judge for themselves whether they think a trip thither likely to repay them whether, in short, *le jeu vaut la chandelle.*

We found our friends next morning, thanks to the good offices of our *cocher* and the potent influence of a five-franc piece, and proceeded to the parade-ground in front of the huts, to see the troops of the Syrian expeditionary force pass in review before the Emperor. One regiment and a battery of artillery had already gone, so that upon this occasion there were only two regiments (four battalions) of infantry and one squadron of cavalry to be inspected. The Emperor (who, by the way, looked worn and ill), attended by a staff neither numerous nor brilliant, rode down the line, the troops crying out "*Vive l'Empereur!*" as he passed; they then formed three sides of a hollow square, a movement which they executed in what to English eyes appeared a slovenly irregular manner, but with a celerity which was perfectly astonishing. Indeed, the same may be said of the movements of French troops generally; they are almost invariably performed in apparently a slack and unsoldierlike manner, but the result is achieved in half the time that would be occupied with us. So long as the end is gained, they care little for the means; and it is curious to see a regiment break up into a disorganised mob, from which it resolves itself a minute afterwards into a regular well "dressed" line. What we call "square" movements are with them almost entirely discarded.

The troops formed up, the Emperor addressed to them that remarkable and eloquent speech with which your readers must all be acquainted; he spoke in a low tone, but clearly and gracefully, and after he had concluded, he gave a sort of significant relish to the scene by distributing one or two medals and crosses to some soldiers and officers, whom he beckoned from the ranks; this done, he took up a position hard by to witness the troops march past; they were not long breaking into a column of two companies abreast, and they then marched by in quick time, each division as it passed receiving a signal from its commanding officer, and giving a "*Vive l'Empereur!*" or two; anything more automaton and unreal than these cheers could not be imagined. The French papers call them enthusiastic; but so devoid were they of heartiness that it was almost difficult to keep one's countenance as division after division went past, looking steadily to their fronts, and observing, in rather a loud tone, but unconcernedly, "*Vive l'Empereur!*"

The French have much improved their marching past since the old Crimean days; they keep time and step now, though scarcely with the precision or regularity of an English regiment; but it is evident that more attention is paid to this now than formerly. It is a pity that the saluting of the officers is not improved also; it is as stiff and inelegant as ever. After the infantry had gone by, the cavalry—hussars—galloped past, and it was a pretty sight to see them sweep by at a tremendous pace on their little wiry African horses: perhaps, at a gallop, the French cavalry look better than at any other time, not on account of their riding, which is generally indifferent, but because the defects and roughness of their equipment are not so remarkable then as when one has an opportunity of inspecting them more leisurely.

The review is over; the Emperor returns to his pavilion, and we proceed to make a tour of inspection about the camp. It is composed, like our Aldershot, partly of tents and partly of huts; but here the resemblance ceases: the huts are of stone, and are built, arranged, and decorated with true French neatness and taste, bearing about the same proportion in these respects to an English hut that a Swiss châlet does to an Irish cabin; while, doubtless, in the long run, they will be found to cost not more than a quarter of what has been expended upon those worthless wooden edifices of ours, which, after subjecting their occupants to every variation of temperature, and affording him an opportunity of becoming personally acquainted with every nature of disease, from solar apoplexy to rheumatism, end by tumbling to pieces themselves, leaving nothing but a veritable—not very picturesque—"blackened ruin" to show for the sums of money which have from time to time been spent on them.

These stone huts are the only sort of barracks which the French have at Chalons; they do not, like ourselves, run into the opposite extremes of parsimony and extravagance, and build the most elaborate and everlasting barracks alongside the most unsuitable and perishable of huts; striking a happy mean between the two, they provide the soldier with a habitation which answers every purpose, while, as long as cleanliness is insisted upon, it secures to him the advantages of a barrack in a simpler form.

The tents, of which during the summer season there are a great many, are mostly the two-poled ones which they used in the Crimea; but a large proportion of "bell-tents" have been introduced recently, and are now in use; whether experimentally or permanently, I was unable exactly to discover. They are as nearly as possible the same as our own.

The huts occupy the centre of the camp, and from each extremity of this row runs out a line of tents, forming an angle with it of about 120 or 130 degrees, the right flank inclining to the front, the left flank towards the rear, thus giving the whole camp a rude, zigzag form. This arrangement is obviously a good one, affording as it does the means of enlarging or contracting the camp at discretion without interfering with its symmetry; swelling it by additional tents to the size which it attains during the summer, when a large number of troops are under canvas here, or reducing it to the row of stone huts which, in the winter, are alone occupied. At some little distance from the row of huts, and facing it, are the Emperor's Pavilion and the "Quartier Général," a broad, fine belt of parade-ground, lying between. The camp itself is kept scrupulously clean; I am sorry I cannot say as much for its immediate neighbourhood; possessors of the little blue and yellow riband will scarcely require me to explain myself more minutely, than when I state that an old and very unpleasant Crimean nuisance is observable even here, under, literally, the Emperor's very nose. There is little to learn in the camp, in its arrangements or interior economy; the cook-houses, &c., are not superior to our own; that *Deus ex machinâ* faculty of French soldiers which enables them to produce the most delicious soup and little delicate *entrées* apparently out of nothing, without stock, cookhouses, or anything else, is as remarkable here as it was of old, in the days when they licked their chops over their little *ragoûts* alongside the poor starving fellows, who were vainly trying to blow into a blaze the damp wood which was to cook the raw pork and the green coffee. It is curious to observe the almost entire absence of sentries about this immense camp, where some 30,000 men of all arms and ranks are quartered: perhaps few things strike an Englishman more than this. It seems as though the Emperor were endeavouring to do among his troops what he is doing to a very remarkable extent throughout his empire, viz., reducing to the minimum the number of officials and gendarmes. Any one who travelled in France a few years back, will not fail, on paying a visit to the country now, to be struck with this. Whether there is more freedom is another question altogether, and one which I scarcely feel is within my province to discuss; but I am inclined to think, looking at it merely from a military point of view, that Private Smith, with his guard every four or five days, and with a sentry at every corner of his hut, does very much more what he likes really, and is considerably better off than our friend Jacques Bonhomme there, who is singing "*toujours gai*" over his broth, careless of, because habituated to, the rod of iron with which he is ruled.

Private Smith doesn't sing "*toujours gai*," I know, but growls and grumbles *like a thoroughbred* Englishman, and sometimes, in a hasty moment, says that he'll "be darned" (or something stronger) if he'll do what he has been ordered to do; and I have known Private Smith so far forget himself as to strike a corporal, or a sergeant — let us say; and when in consequence he is brought early some fine morning to the halberds to suffer the punishment which he deserves—and he knows it—people raise an outcry and talk about the "instincts of humanity, and the nineteenth century," and that sort of thing. Why, my dear Private Smith, and my dear, kind, ill-judging public, do you know what the punishment for an offence of this kind is in France? Not a year or two's imprisonment and a whipping, perhaps, as with us, but in peace time as in war—*toujours La Mort!* They shot two men at Vincennes only the other day, the morning before I was there. But you need not even go to the trouble of striking your superior in France; if you wish to commit suicide with little personal exertion, tell him you will "punch his head" for him. It is quite enough—you may begin to set your house in order, and notch off your days upon a stick, for you have not much longer to live. And go, my good Private Smith and make friends with Jacques Bonhomme there, you will find him a jolly companion enough. Go and get drunk with him, you will find him ready enough to do that (never believe what is said to the contrary), and when you have had your fun you may as well sell your kit to pay for your debauch; it will not be the first time you have done it, Private Smith—I am sorry to say—and come back to-morrow morning and be tried; you will get perhaps eighty-four days' imprisonment, or less; but you must bid good-bye to your friend Bonhomme—it will be the last spree you will have with him for five years—he is going to prison for that time. Or, perhaps, in a moment of idleness, you have thought to hand your name down to posterity by carving it on a bench in the barrack-room. What will you get for doing this? At any rate not three years' imprisonment, as Bonhomme does, or a similar term on the public works (*travaux forcés*). And yet, with all this, it is not you but Bonhomme that keeps on singing "*toujours gai.*" Oh! my good red-coated Smith, it was surely for you that this air was composed, not for your French friend. You are the best

Digitized by Google

fellow in the world I know, the finest, bravest soldier of all the millions now bearing arms; but you have your faults, and, among others, not the least, of grumbling and thinking yourself hardly used, and drawing comparisons which don't exist; try a year or six months in the Vingt-Quatrième de Ligne, for example, and then let me hear what you think of the two services.

I have wandered away from Chalons, I fear; but, as one strolls about its rows of tents, such reflections as these are apt to occur to one: if Private Smith and his comrades will only follow them out to the conclusion to which they lead, but to which my space will not permit me to extend them, I shall never have cause to repent my digression, and what I learned in my Chalons trip will not have been thrown away.

Probably no finer exercising ground than the one attached to the camp exists in Europe; it is about five miles square, and although so level as to offer no impediments to manœuvering, is sufficiently diversified to give an opportunity of displaying a little generalship in the judicious posting of troops behind the ridges, and in the shallow valleys and gullies which traverse it. It is remarkable, too—how an Aldershot man will prick up his ears at this—for an almost entire absence of dust! Mr. Truefit and his hair-wash would have but little custom here.

Few finer military sights can be imagined than a review on this great plain; nothing is wanting to give it in every respect the appearance of a real battle: the official programmes issued to generals of brigades beforehand are strictly adhered to; everything is done to give these movements a practical value beyond that of burning powder and playing at soldiers: a particular plan is laid down, a particular line of tactics decided upon, a particular result anticipated, and with these data the battle is fought out, and at its conclusion those who have taken part in it or watched it, instead of having a number of disconnected movements to study, have before them the plan of what, with the substitution of ball cartridge for blank, would have been a very scientific and interesting battle. There are the artillery blazing away from their judiciously chosen position: there behind that ridge are massed some 3000 or 4000 men in support; there is the crackling line of musketry fire; the riflemen dodging behind trees, and stones, and mounds, to avoid bullets, which to them are scarcely imaginary, so thoroughly do they enter into it; the enemy are keeping up a heavy fire from yonder village, it forms their centre; our attack is not upon their centre, no good wasting more powder upon it than is necessary to keep a portion of their forces employed, and make a diversion; shatter their right—true to the old Napoleonic plan of massing the artillery power—in such a *feu d'enfer* as few troops will be able to stand against; and now that they are getting unsteady, bring up that butterfly body of cavalry away down in the long green valley to our left, and send them at them. Away they go, a swinging charge of squadrons, wheeling "outwards and about," as they meet the enemy, and returning to charge again, always advancing little by little, always moving, always pressing forward, a very treadmill of glistening polished sabres and twinkling lance points, with the quick thunder of horses' hoofs upon the turf to mark the time. The left of the infantry is pushed forward now, and the crackle of the musketry has grown into a harsh streaming rattle; the smoke hangs heavy upon the air; troops are doubling to and fro, and taking up fresh positions; generals and their staffs are dimly seen stationed on little knolls, watching the movements through their telescopes; there is a general advance, a pressure of men to the front, the whole plain heaves with the breath of battle; the infantry complete the work which cavalry and artillery have begun; though the struggle has paled away there on the right and centre, it rages and blazes here furiously; not for much longer, though;—the enemy are in full flight already—their right is turned—the day is won—*Vive la Gloire!* And now to call the roll, and open the instrument cases, and dig out the dark holes, and fill them up, and cover them with the long low ugly roofs of damp earth. Happily no need of this to-day, it has been a bloodless victory, though it has flushed the cheeks of actors and lookers-on; and when the "bugles sing truce," and the dead calm follows, we find it hard to realise that upon this fair plain, there is not one shrieking, bleeding wretch—not one poor shot-riddled corpse—nor broken bayonets, nor torn standards to mark the scene of action.

Such is a field-day at Mourmelon—a battle, and nothing else; and yet in all this seeming chaos there is the most complete order. All those wild charges and those mad rushes—you can see them all on a map as in a photograph; and years hence the official camp journal will show you large and accurate plans, designed by the staff officers of to-day's, as of every other day's performances. This journal, which is kept most carefully, and which is one of the special duties of the staff, serves both for reference and instruction.

Not unfrequently some celebrated battle of old is fought out here. They were going to have had the battle of Rossbach two days afterwards, but I was unable to stay for it. On this occasion the plan of the fight had been designed by Marshal M'Mahon, who commands the camp. The Emperor, the Duke of Baden, and their respective staffs, were on the ground during the whole of the manœuvres. Throughout this engagement one thing was very remarkable, namely, the extremely prominent position occupied by the artillery. Both morally (if I may be allowed the expression) and physically, the artillery, so to speak, directed the battle, the infantry conforming in every instance to their movements, and coming up in support wherever the artillery decided upon placing themselves, which they did merely with reference to the general details of the plan, and the advantages of each particular position, and without attending to or regarding in any way the infantry formations. This principle is the one which the Emperor adopted with such singular success throughout the late Italian campaign; I need hardly remind your readers that in doing so he but followed the example of his uncle. The improvements in gunnery which are daily taking place tend undoubtedly to increase the value of this principle, and to give to the general who best understands the management of his artillery, and can develop its superiority to the fullest extent, an advantage over his opponent which it will be almost vain to contend against. I now, I believe, have given your readers such an outline of what they may expect to find at the French camp, on both the black and white sides of the paper, that they will not, I hope, have much difficulty in weighing the advantages, and disadvantages together and deciding accordingly.

I have but one more word of advice to offer to any of your readers who may contemplate a trip thither; it is this, if you are entitled to a uniform, wear it during your visit; by doing so you will secure respect, civility, and attention; by neglecting to do so you will have yourself to blame if your life becomes a burden to you, and if during the whole time you are there you are dodged about by a gendarme, who may not unlikely ultimately march you out of the camp altogether.

The Correspondent of the *Moniteur de la Flotte*, writing from Toulon on the 3rd instant, is loud in his praise of the performances of the iron-clad frigate La Gloire. He says that further trials have proved the great speed and the general superiority of the vessel. La Gloire was perfectly ready to form part of the Imperial escort.

We have some reason to anticipate that Colonel E. H. F. Pocklington, who was employed in superintending the passage of the troops through Egypt during the Indian Mutiny, will be appointed Assistant-Quartermaster-General at Head-Quarters in succession to Major-General O'Brien, whose appointment to the Ceylon command we announced some weeks since.

By the deaths of Lieut.-General Broke and Major-General Lockyer, the following Army promotions will take place:—Major-General White, C.B., Colonel of the 7th Dragoon Guards, to be Lieut.-General: Colonels C. W. M. Balders, C.B., Commandant of the Cavalry Depôt at Maidstone, and F. W. Hamilton, C.B., Grenadier Guards, to be Major-Generals; Lieut.-Colonels C. Sillery, on the Staff in New Zealand, and B. E. M. Gordon, 91st Regiment, to be Colonels and Majors; Porter, 67th Regiment, and Griffith, 45th Regiment, to be Lieut.-Colonels in the Army.

The Colonelcy of the 88th Regiment (the Connaught Rangers) is rendered vacant by the death of Lieut.-General Horatio Broke. The officer most likely to be recommended to Her Majesty for the appointment is Major-General Sir George Buller, K.C.B., now commanding in the Ionian Islands, of whose Brigade, the 88th formed part during the Crimean war.

As it has been found impossible to work a double staff of officers—one for what is still called the Indian Army, the other for Her Majesty's European regiments—in the Chinese expeditionary force, those officers who held appointments on the former establishment, such as Colonel Hubert Bruce, &c., have returned to India.

The Command of the Cavalry Depôt at Maidstone will become vacant on the 1st of October by the promotion of Colonel Balders.

The Committee appointed to superintend the Memorial now being erected in Waterloo Place to the memory of the Guards who fell in the Crimea, have been several times taken to task respecting the numerous inscriptions with which the monument appears likely to be defaced. It appears the Committee are blameless in the matter, and so far from approving, they join public opinion in condemning the taste of these inscriptions. General Stanhope writes—"Mr. Bell, who has designed and is executing the monument, offered the mottoes for the consideration of the Committee of Management in March last, who unanimously objected to them, and to the one in question (*Tria juncta in uno*) especially. Mr. Bell, however, had them painted on the pedestal, and was requested at once to remove them, as it was not the intention of the Committee to adopt any motto whatever, but simply the words 'Crimea, Alma, Inkermann, and Sebastopol,' with a short inscription, stating that it was raised to the memory of the officers, non-commissioned officers, and privates of the brigade of Guards who died in the late war with Russia in 1854, 1855, 1856. After the many remarks made against them, I hope Mr. Bell will speedily remove all that is painted on the pedestal, and attend strictly to the wishes of the subscribers on the matter in question." We venture to join in the hope expressed by the gallant general. Mr. Bell's three figures are to our mind very noble, and most creditable to his genius as a sculptor, but the inscriptions would be sufficient to dim the beauties of any work of art.

The office of Assistant-Quartermaster-General at Cork remains vacant by the death of Colonel Pack. Among those likely to succeed to it, Lieut.-Colonel J. H. C. Robertson, of the 100th Regiment, is named with, we believe, good reason.

We feel certain that every captain or officer in command of a man-of-war must always depend, in a great measure, for the discipline and order of his ship upon his warrant officers; in fact, we recollect the present Vice-Admiral Sir Houston Stewart, in proposing a toast to the health of his warrant-officers, saying that, taking them as a body, their value could not be too much appreciated, and that he would be too glad to promote their interests. This is high testimony, and it should not now be thrown aside. We have reason to believe that the warrant-officers are dissatisfied with the terms of the Circular recently issued in reference to their retirement. They complain of being compelled to serve until they are sixty years of age, and then being forced to retire. They appear to think that they should be entitled to retire after 5, 10, 15, or 20 years' service, on a scale in proportion to the sea-time they can show, and also to wear while serving a more fitting uniform than that now allowed them. As a warrant should always be held out as a high reward to deserving men, we would be glad if means could be taken so that it should be considered in that light on the lower deck.

A correspondent writes to our leading contemporary, bringing forward the claims of General Beckwith to the regiment vacant by the death of General Broke. The correspondent in question cannot be aware that the claims of General Beckwith have been already recognised, that officer having been appointed to the colonelcy of the 6th Dragoons.

We understand that the Commission appointed to settle the distribution of the Indian prize-money have recommended that each portion should be allotted to the particular force which was fortunate enough to acquire it. Thus the Delhi prize-money will be divided among those engaged in the siege and capture of that city, the Lucknow among those at the relief of Lucknow, &c. No official communication has yet been received respecting the largest prize of all, that belonging to the Kirwee and Banda force, under General Whitelock; but we believe it is probable that Sir Hugh Rose's army, who so materially, and with such tried gallantry and devotion, shared largely in those operations, will also justly share the gains. If we are not misinformed, the Commission has expressed an opinion that the subalterns' share should be increased, while that of the Commander-in-Chief should be diminished beyond the proportions hitherto prescribed. We may add that Lord Clyde and his Staff will not participate in the Delhi prize-money, and that the proposition for clubbing the different prizes for general distribution has been repudiated by the Commission.

We are informed by the *Phare de la Manche* that the name of Prince Napoleon's yacht has been changed from Le Cassard to Le Jerôme-Napoleon. His Imperial Highness intends to take a lengthened cruise this autumn; and yesterday it was announced that a French man-of-war, with a distinguished individual on board, had passed Woolwich with the intention of proceeding up the river as far as Deptford. It is understood that the personage referred to is Prince Napoleon, who, however, is visiting this country *incognito*, and solely with a view of gratifying his private curiosity.

THE VOLUNTEER REVIEW.*

We imagine that most persons who can read a spirited and amusing account of the Grand Volunteer Review in Hyde Park, will have found out Mr. Sala's narrative ere this; but for the benefit of those who may be still unacquainted with it, we may mention they can purchase for sixpence a little pamphlet with this gentleman's account of the Review and the Wimbledon Rifle Shooting, which will serve to bring these two very interesting events most vividly to the recollection of those who were present; and to those who were not so lucky, it will convey a more truthful and complete notion of what transpired upon these occasions than any account which we have as yet had the good fortune to meet with.

Every one who is acquainted with Mr. Sala's style, and his remarkable facility for imparting information in an entertaining and agreeable form, will admit that an account of the Volunteer Review was an admirable opportunity for the exercise of his powers of descriptive narrative That he has not neglected this opportunity the pamphlet in question abundantly proves; and, as a faithful record of two of the most significant and important events of our time, it is deserving of a place upon the bookshelf of every English home; while the moral which its pages silently convey will, we trust, be ever present before, and continue to influence the conduct of, Englishmen, long after the perishable pamphlet shall have ceased to exist.

"Jomini's Strategy," extracted from the "Précis de l'Art de la Guerre, ou nouveau tableau analytique," and translated by Ensign Fred. Adam, of the 22nd Regiment Bombay Native Infantry, price 4*s.* 6*d.*, has just been published by Messrs. Saunders, Otley, and Co.

INTELLIGENCE FROM THE SEAT OF WAR IN ITALY.

[From our own Correspondent.]

Naples, 1st September.—The topics of interest during the last week have been unusually numerous and exciting; the letter of S.A.R. the Count of Syracuse comes first upon the list, and has, now that it is published, surprised even the most knowing of the prophets. The Bourbon family has of late attracted considerable attention and obtained no little notoriety. The astonishment caused by the discovery of an abortive reactionary plot set on foot by the Count Aquilla, and his subsequent departure, although the latter was unsuccessfully covered by the official announcement of his being sent on a political mission to England, had scarcely ceased to be the topic of conversation here, when the letter of his brother, who is also uncle to the reigning sovereign, rushes into print as publicly advising his royal nephew to resign. He begins by regretting that his former warnings were not attended to, and then hoping for a more fortunate result from his present epistle, proceeds to inform the king that the changed condition of Italy, and the great strides of the public wish for Italian unity, have removed from his majesty the power whereby states are ruled, as well as made a bond with Piedmont impossible; that the population of Upper Italy, shocked at the slaughter that took place at Palermo, have repulsed the Neapolitan ambassadors, so that they (royalists) are now abandoned to the chances of combat without alliances, alone, and a prey to the resentments of the multitudes who, from all parts of Italy, raise themselves at the cry of extermination launched against their (Bourbons') house. Then, alluding to the civil war already begun in the provinces, and the useless shedding of blood that was likely to inundate all parts of the land, he informs the king that he who was once the hope and love of the people, would be regarded with horror, as the sole cause of a fratricide war; under which circumstances he urges upon him to save their house, while there is yet time, from the maledictions of all Italy; to follow the noble example of their royal relative of Parma, who, he states, at the first outbreak of civil war, realeased all her subjects from their obedience, and made them the abrbiters of their own destinies. Europe, he adds, and his own people will highly value so sublime an act, and he will be able to lift his face confidently to God, who will reward such magnanimity, and he himself will bless the day that he generously sacrificed himself to the greatness of Italy. This, with a suitable conclusion, constitutes the precious document in question, to which the king has not as yet, so far as I can learn, returned any answer, and but that the Count of Syracuse is well known and little trusted here, it might be attended with greater and more immediate results than those likely to follow it. The fact is, his royal highness has not always been a liberal, his conversion is late; and like many new converts his zeal exceeds that of the old and tried of the co-opinionists, amongst whom he presents himself, and with whom he wishes to be identified. It may, in his opinion, be a very deep game to attend the anniversary funeral ceremony of a patriot general, to be seen driving about the Chiaja with the Sardinian minister, Villa Marina, and, lastly, to write the above letter to the king; doubtless he thinks that such conduct will, in any case, ingratiate him with the King of Sardinia, who has already given orders to the Sardinian admiral here to put a ship at his disposal for the conveyance of his family in case it should be necessary, seeing that his wife is a princess of the House of Savoy. And in addition to this alternative, certain in case of minor success, and as his *rôle* is evidently that of Orleans in the French Revolution, he may draw a prize and be appointed regent. The Casa Borbonica is verily divided against itself, and the hapless "descendant of Carlo Terzo" will, in all probability, be the principal sufferer. Latest reports say that the king has resolved to withdraw all the troops from Calabria—as it may become necessary—and concentrating his forces in the capital, and dispute the question here till the last; meanwhile the Cardinal Archbishop of Naples has waited on the king to beseech him not to cause any damage to the city, urging in particular as the reason of his interference, that there are 180 monastic establishments here, all of which would be exposed "to grave risks and fears." *La Bandiera Italiana*, a daily paper, alluding to this visit, remarks that the reason urged by his Eminence is assuredly not the only one; but that reasons being often valued by their effect, should the one in question prevent a bombardment, they are satisfied to receive it as the best. The daily rumour of the king having left for Gaeta prevails every evening, and is regularly contradicted on the morning following, from all of which it may fairly be presumed that such is his ultimate intention, when matters will have reached the final struggle. Amongst the events since I last wrote must be noted the arrival of a Garibaldian steamer during the night of the 26th, with a flag of truce. It was found on examination that the steamer in question was the Franklin, and carried wounded officers and men, &c., and demanded in return for this kind office to be allowed to supply herself with water and coals, a request which was acceded to in the spirit of her coming, and she left on the night of the 27th, after performing her part in what appeared like a chapter in the days of old romance. Intelligence arrived here in the early part of the week from Calabria, from which we learn, through a despatch of Garibaldi to General Sirtori, as follows:—"The two brigades of Melendez and Briganti have surrendered at discretion. We are masters of their artillery, arms, horses, and material, as well as of the fort of Pozzo." The forts of the Straits are now fully in power of Garibaldi; the remainder of the royal troops, to a greater or less degree, follow the example of the other two brigades. From the provinces come the most exciting reports of revolt daily. Avellino is stated to be surrounded by numerous insurrectionary bands, who hold the troops in a state of perpetual anxiety. Citra, in Calabria, has declared itself in a state of insurrection, with the cry of Italy and Victor Emmanuel. In the city of Cosenz, the state of affairs is that of a festa. At Nuova Rotonda the Italian flag has been hoisted. Altamura has been abandoned. In the districts of Castrovillari the gendarmerie have fraternised with the people; at Rossana they have been disarmed; at Cosenz the troops make no opposition to the popular movement. There have been many desertions. General Caldarelli's brigade has surrendered, and are to be allowed to march from Castrovillari to Salerno by a prescribed route, conditions, &c. A landing of Garibaldians has been effected at Ostuni. Lecce has revolted and is in full revolution. Such are the particulars of the latest bulletins from Calabria; and the state of affairs in Southern Italy cannot be better described than by rendering the following despatch of the Dictator, written from Palmi, 25th August. "Our march is a triumph; the populations are wild with ehthusiasm; the royal troops are disbanding themselves. G. Garibaldi." The Central Committee of Order—as the recent Revolutionary Committee here is called—publish two or three bulletins containing the latest intelligence every evening; these are distributed by hand, and are stamped with the Societies' stamp, a precaution rendered necessary by the fact that the reactionary (old Absolutist) party have counterfeited these bulletins, or circulated spurious notices with the name of the committee affixed. The usual time for the distribution of these handbills is 8 p.m., and the place the Caffe di Europa, where their arrival is always followed by a general rush upon the possessor of the bundle, who is hustled and pushed about in the most friendly manner by a host of eager politicians, all of whom are anxious to hear the latest intelligence by telegraph or private letter, the hundred handed Briareus would not suffice to distribute for all. The committee of order has issued an address to the National Guard reminding them that they form a body specially constituted for the preservation of order—that there may be circumstances such that a soldier finds himself at a loss to decide between duty and inclination, but that when Italians meet Italians, not to fight is their only duty. The popular force has been augmented from nine to twelve thousand, and continues to merit and obtain the esteem of the citizens. It is to be regretted, however, that there has been one fracas between two individuals of the same battalion; as usual, words led to blows, when one of the contending parties drew a pistol from his belt and fired it at his opponent, but missing his aim, the ball struck the wall, glanced off, and struck a third man for whom it was not intended. I need scarcely say the matter is now undergoing investigation. Government has announced the gift of 20,000 francs indemnity to the two survivors of the three Bersaglieri Piemontesi, who were lately maltreated by the Neapolitan soldiery. Another reactionary plot has been discovered in the city; its scope was similar to that of Prince Luigi's (Count Aquilla). Several arrests have been made; and a cabinet council was held yesterday for the purpose of investigating this conspiracy, and has resulted, amongst other things, in the dismissal of General Cutroflano, commandant of the Piazza, who is to be succeeded by General Viglia, and of Prince Ischitella, from the command-in-chief of the National Guard; Desanget succeeds him. The cause of these changes, the first of which was very disagreeable to the king, and opposed by him until a resignation of the ministry was threatened, was their undoubted guilt in being concerned in a plot to attack the National Guard, and thus causing a conflict between them and the troops to have an excuse for disarming the National Guards, and so bring about a reaction; the pope's legate to the court of Naples is said to be implicated in the conspiracy in question, as is also Cardinal Antonelli, from whom it is said letters promising some millions of francs have been found, as well as other important documents, in the house of one of the conspirators. Many of the Neapolitan aristocracy have left the capital during the last few days, and doubtless others will follow their example. A letter was published last night from General Nunciante to the Neapolitan army, in which he declares that, having studied the state of all Italy and Europe, he is convinced that there is no hope of safety for the beautiful country but by belonging to the Italian family under Victor Emmanuel, whom Garibaldi proclaimed in Sicily, and who is, without doubt (he declares), the man elect of God for the execution of his inscrutable designs. General Melendez, with Torrenteros, the head of his staff, are in prison at St. Elmo. The Count of Trapani (prince of the blood royal) is about to quit Naples. Garibaldi's movements have again begun to envelop themselves in that peculiar mystery from which he always—as the sun from a cloud—bursts upon the public gaze in all the startling brilliancy of some new and daring success. The national army now amounts to 26,000 men, many of whom are trained and disciplined troops, formerly in the Sardinian and other services. All this force has been conveyed from Sicily to Calabria by transports, almost without convoy, and at a time when there are several Neapolitan steamers supposed to be cruising on the coast, and several others idle in harbour. If Prince Luigi, instead of plotting against his royal nephew—for plotting he was, whatever he may say or write to the contrary—had, as Admiral Commander-in-Chief, sent a strong steam squadron to Calabrian water, he must surely have succeeded in interrupting the transport of so large a force. The aspect of Naples changes daily, or rather nightly; on one evening there will be, as is usual, a gunboat imposition at St. Lucia, and heavy patrols of cavalry and infantry traversing the crowded streets, and perhaps the next scarcely more than a vestige of these defensive precautions apparent, and the streets almost deserted. So a stranger would require to see it under both phases of its existence.

* *A Narrative of the Grand Volunteer Review in Hyde Park, Saturday, June 23rd*, 1860. By George Augustus Sala. Second edition, revised and enlarged. To which is added an account of the Target Shooting at Wimbledon, and awarding of the prizes at the Crystal Palace, July 10, 1860. (London.)

THE HILL STATES, INDIA.

[From a Correspondent.]

The worst news I have to give you is that there is every prospect of a famine in the Punjab and north-west provinces. No rain has as yet fallen, and there are no signs of rain visible even in the Hills, where it always falls in greatest abundance. If rain were seen now to fall, Indian corn, might be saved, but there is no hope for the rice or sugar-cane crops. I am afraid this will seriously interfere with Wilson's financial schemes, and I should not be surprised to see Government compelled to open a loan to supply the deficiency in the revenue, which will be the inevitable consequence of a famine. The misfortune is that the granaries of the north-west are empty, in consequence of the havoc of 1857.

I have good grounds for stating that Government is not at all satisfied with its native troops. There is no question whatever but that it is in possession of information, clearly proving that intrigues are everywhere on foot to breed disaffection amongst our troops as well as amongst the people of the country. This last you may consider, as we say in India, *pucka*. I, myself, do not in the least apprehend any general rising either of the country or troops; but there is no doubt we are becoming more and more unpopular throughout the country, and that the income-tax is an extremely unpopular measure. It is all very well to say we have power to enforce any tax however unpalateable, and that we must have money. But we run a serious risk when we sow the seeds of aversion amongst the only—I verily believe the only—classes that view our rule with any degree of favour, I allude, of course to the trading classes. They are destitute of physical courage, and will nowhere openly oppose our financial measures, except perhaps at a place like Peshawur; but we shall constitute them our secret enemies, and then we shall indeed have the whole country against us.

I don't at all approve of Lord Canning's measures, which have for their object the creation of what is styled a middle class or aristocracy. In theory it sounds very well; but you may feel sure John Lawrence is a better guide in such a question than Montgomery. A little learning is said to be a dangerous thing. Whether it is or not, a little power certainly is; and, so far from making those entrusted with it content, will serve only to make them wish for more.

It is pretty generally believed that Lord Canning will visit Holkar in the autumn, and that Sir Hugh Rose will spend the remainder of the year at Simla. The officers are still at Simla, thereby causing much inconvenience and extra labour. If Lord Dalhousie was wrong in everything else, he was right when he urged the importance of the head-quarters of the Army being permanently fixed at Calcutta.

The Hills will lose us India, if we don't care. Everyone now goes to the Hills. We had the Governor-General there till he was compelled by Sir C. Trevelyan's indiscreet conduct, to leave. We had the Commander-in-Chief there. The new one is coming up as fast as he can. The Lieutenant-Governor of the north-west province is at Nynee Tall. The Lieutenant-Governor of Punjab is at Murree; the Chief Commissioner of Oude, at Simla. Hosts of military officers of all ranks are in the Hills. Civilians, including those in the highest appointments, swarm in the Hills. True, they can do the work as well, if not better, in the Hills, but the practice makes subordinates discontented, whether those subordinates be civilians, military men, or common soldiers.

From China I hear that our Indian troops are in first-rate order, but that the condition of the transports which brought them to China was scandalous. No sort of effort had been made at Calcutta to provide these ships with what may be considered absolute necessaries in a tropical climate, such, for instance, as main-deck awnings.

The French have no horses, and were not nearly ready to move. They viewed our superb cavalry and artillery horses with much jealousy. The Sikhs they admire extremely, and consider them far more soldierly-looking fellows than their Turcos.

English Riflemen at Cologne.—Two members of the 4th (Woolwich) Kent Rifles—Mr. Herbert Whomes, who won Mr. Gye's 100*l.* prize at Wimbledon, and Mr. Muller—were present at the grand rifle match at Cologne, and were both successful in competition for prizes. In the English match Mr. Muller won the first prize, a silver cup, having made twenty-one points in two shots; and Mr. Whomes the second prize, having made eighteen points. Mr. Muller also won the first prize in another match, having shot the wing off a wooden bird placed on a pole.

The famous castle and estate on the Rhine near Coblentz, which was to have been the prize of successful rifle marksmen, on the 3rd September, could not be alloted to the winner, the treasurer of the fund or purchase money having —levanted.

THE VOLUNTEER REVIEW AT KNOWSLEY.

The Review of the Lancashire Volunteers at Knowsley took place on Saturday, and, owing to good management, passed off admirably. Over ten thousand Volunteers were present. It is a curious fact that on the first Saturday in September, 1859, the first public muster of Volunteers in this part of the country took place at Bidston, near Birkenhead, when the entire force consisted of three companies, one of Lancashire, and two of Cheshire. The most elaborate movements then gone through appear to have been "proving companies," with an attempt at skirmishing drill. A bare twelve months and Lancashire alone sends to a review 11,000 effective men, the majority of them ready to take their places by the side of, and without suffering materially in comparison with, regular troops.

The Volunteers began to arrive upon the ground soon after two o'clock, and continued to pour in in an almost unbroken line through the gates and along the various avenues for a considerable period, to the infinite delight of the crowds who thronged and lined each side of the paths. The troops fell in with the heads of the columns facing the ladies and the staff, with the commissariat department in the rear, as a support in case of necessity. On the left of the line of contiguous columns were the six guns of the 4th and 8th Lancashire Artillery (two of them Armstrongs) and 60 men, under Captain H. H. Hornby and Captain Clay. On the extreme right were formed the Lancashire Hussars (Yeomanry), under Sir R. T. Gerard, Bart., in number 200. The Lancashire Mounted Rifles, who should have fallen in with the cavalry division were, with some of the Liverpool Scottish, detached to keep the ground.

The line of contiguous columns was in length not far from half a mile, and presented a highly imposing appearance, for the uniforms, although generally sombre, and only in rare cases relieved by brilliant badges, when massed looked not very different from those of the Line. But although the troops afforded the spectators no insufficient or unpicturesque focus for their countless eyes, they themselves had decidedly the best of the day, so far as sight-seeing went. From their commanding position on the hill they overlooked the entire number of the spectators, who in a belt some 80 yards in width, and two to three miles in circumference, enclosed the Volunteers in a living wall, which gleamed resplendent with ribbons and other gay and lively articles of attire, and which was itself surrounded by another cincture formed of the vehicles which occupied the higher ground at the back of the pedestrians. Some idea may be formed of the number of conveyances from the fact that out of Liverpool alone 8000 carriages of various descriptions were, on good authority, reported to have passed. The other districts would afford about an equal number, making 16,000 vehicles in all. Each of these averaged at the least six passengers, which would give 100,000 as the number who entered the park, irrespective of pedestrians.

The review was announced for three o'clock, but for some time after that hour the troops had not all arrived, and the commencement was accordingly deferred until their appearance. A few minutes before five a flag, run up on the staff on the top of the hall, gave the signal for the salute of eleven guns from the artillery on the left of the line, which announced the departure of the staff from the mansion. Among those around Sir George Wetherall, the general commanding the district, were Lord Derby, who appeared in plain clothes, and wearing the ribbon of the Garter; Lord Sefton, in uniform, as lord-lieutenant of the county, &c. Of those forming the staff, and those who occupied seats upon the grand stands, were the following visitors to the hall, as well as many other ladies and gentlemen from the neighbourhood:—Lord Stanley, the Rev. Mr. and Lady Eleanor Hopwood, two Misses Hopwood, three Masters Hopwood, Sir T. and Lady A. Hesketh, Mr. and Mrs. Legh, Sir Robert Gerard, Colonel Patten, two Misses Patten, Colonel Shadwell, Colonel Wilbraham and lady, Colonel Crofton, Colonel Bourne, Sir George Wetherall, and aide-de-camp Captain Eteson, Sir James Scarlett, Colonel Lightfoot, Hon. F. Stanley, Lord Ranelagh, and Lord and Lady Skelmersdale. Lady Derby, Lady Emma Stanley, and several other noble ladies followed the staff in three carriages, the first drawn by four splendid horses. On their arrival at the reviewing point, amid the thunders of the guns and the equally sonorous cheers of the assembled thousands, the flags were run up, and the three stags' heads of the Stanleys floated in true baronial style upon the gentle evening breeze. Exactly at five o'clock the staff, followed by the carriages, departed to drive down the line. General Sir G. Wetherall inspected with evident interest the uniforms and the physique of the men. This inspection having been completed the general returned to the flagstaffs, Lord Derby and others of the staff remaining for a few moments to examine the Armstrong guns. As soon as the staff rejoined the general the march past commenced, the bands being massed in front of the grand stand, to which the fair and noble occupants of the carriages descended, and the vehicles were driven off to await the conclusion of the review.

The "marching past" was commenced by the Lancashire Hussars, a magnificent body of cavalry, splendidly mounted, and numbering nearly 200 troopers. The public were loud in their encomiums on this splendid body of men and horses, whom it would be, as regards physique, difficult to surpass by the finest regiment in the Service. Next came the artillery, four battalions, and numbering upwards of 2000, and of which, if it were possible to make a distinction, the palm must be given to Colonel M'Iver's 3rd Liverpool battalion, composed entirely of the artisans engaged in the great factories of the Cunard Company. The appearance of these men, the style of their marching, and the completeness of their equipments, left nothing to be desired. Conspicuous amongst the commanders of the artillery brigade was the venerable Colonel Brown, one of the prince merchants of the world, and who, it is said, contributes 3000*l.* a year to the maintenance of the efficiency of his battalion. After the artillery, came the "first brigade," four battalions, commanded respectively by Lieut.-Colonel Bousfield, Major Bourne, Captain Greenall, and Lieut.-Colonel Gladstone. Colonel Bousfield, the youthful commandant of the 1st Lancashire, was loudly cheered as he rode along at the head of his perfect corps. We were informed that for this officer may be claimed the honour of having practically originated the Volunteer movement in England. So far back as 1857 he tendered to the Government of the day the services of 120 young fellows, drilled by himself, for garrison duty. The offer was declined, but, nothing daunted, the young civilian soldier worked steadily at his organisation, and now has his reward in being colonel-commandant of one of the finest Volunteer corps in the world. His regiment it was that "camped out" at Crosby, and faced all the discomforts of the bivouac. On Saturday last they appeared to be the perfection of light infantry. This brigade mustered 2211 men.

The second brigade, which was commanded by Lieut.-Colonel Crofton, was stronger in numbers, amounting to 2267 men, all told. This brigade included a perfect battalion from Manchester, commanded by Lord Grey de Wilton, and numbering nearly 700 men. The marching of this battalion was excellent, and was loudly cheered. The third brigade was commanded by Lieutenant-Colonel Lightfoot, C.B., assisted by Lieutenant Wheatley, 84th Regiment, major of brigade. It included the youths from Rossall School, a very smart cadet corps, and the 11th Preston, accompanied by Major Pedder, who came, we trust, frankly to bury the tomahawk, and to reconcile the long-standing feud between the "proud" town and the Stanley family. The fourth brigade was commanded by Lieut.-Colonel the Hon. P. W. M. Talbot, who, it is understood, is about to assume the most intimate relations with Knowsley Hall, and included contingents from all the great towns of the county. The marching of all was excellent. When the marching past, which occupied about an hour, had terminated, the Volunteer army, between 10,000 and 12,000, resumed its original position, and advanced in columns, the space not allowing of an advance in line. The united bands then struck up the national anthem, which was responded to by the vast multitude with enthusiastic cheering. The officers were now called to the front, and General Wetherall, accompanied by Lord Derby, who was most loudly cheered, proceeded to address to them a few farewell observations.

General Wetherall said: "Commanding officers and gentlemen,—I wish to express to you the entire satisfaction I have received—a satisfaction which I am sure everybody else who has witnessed it has experienced from this beautiful display. It must serve, I feel assured, to impress everybody with the conviction of the extraordinary progress which the regiments before me have made in those field movements which are necessary in actual war. I have had many opportunities of witnessing the great advance made by Rifle Volunteers, and nothing can, in my opinion, well exceed the rapidity of that advance. It keeps pace with the hopes of every Englishman, and I cannot express to you what happiness it gives me to be associated with these your patriotic gatherings. I do not think I can more appropriately bring to a close the few remarks which I have deemed it to be my duty on this occasion to make, than by suggesting that we should express our thanks after the good old English fashion for the princely hospitality of our noble host, to whose kindness we are indebted for this splendid spectacle."

In response to this appeal loud cheers, again and again renewed, broke forth. Lord Derby acknowledged them by bowing and taking off his hat. The line was then ordered to retire, which was done in good order, and, the arms being piled, the men were drawn up to receive the refreshments, to which they were now perfectly ready to do every justice. The baskets, each containing 60 pies and some rolls, with other eatables, for the use of single companies, were found to be in a very satisfactory condition. The pies were not only eatable, they were delicious. There was plenty for everybody, and everybody was consequently pleased. The men were not allowed to straggle; throwing themselves down between the lines of piled arms, they devoted themselves to a discussion of the provisions, the scene, and the hospitality of Lord Derby. The ale—of the good old Knowsley brew—which a Liverpool contemporary avers possesses the quality of making a man "talk in his sleep, and remember all his relations and friends," was brought from the tents in three-gallon cans, and, although the programme averred that the quantity for each Volunteer was limited to one pint, this portion of the regulations was by no means strictly attended to.

While the marching was going on a little episode occurred. The son of Garibaldi, who is at school in the vicinity of Liverpool, happened to be discovered in the middle of the dense crowd outside the barrier, and his name having been made known, the youth, much to his consternation, was cheered vehemently by the people, who cried out, "Garibaldi for ever!" and at last he was brought up to the principal booth, where he speedily became an object of great attraction. He, however, overcome by modesty, beat a hasty retreat with his companion, and it was only by coaxing, and almost force, that he could be induced to present himself to the Countess of Derby and the other ladies in the booth.

Every Volunteer was provided by the noble host with a large meat pie, a loaf of bread, and a pint of the renowned Knowsley ale, to which fame for years has attributed qualities which eclipse even the powers of the most skilful table-rapper. The pies weighed between five and six tons altogether, and had to be conveyed from Liverpool in ten carts, and the ale was contained in 25 hogsheads. Nor was the general public overlooked; water-carts, with drinking cups for the supply of that fluid gratuitously, being stationed in different places; and enterprising caterers from Liverpool were allowed to erect booths in the park for the sale at moderate prices of both food and drink.

On the north or elevated side of the enclosure, which was formed of posts at intervals, supporting a strong wire, stood ten refreshment tents for the Volunteers. On the opposite or audience side, and at each end, a long line of seats, in the shape of simple forms, had been put up outside the wire and signposts signified that they were "for ladies only." We were anxious to see whether, in such a mixed multitude, which no body of police could have controlled, where every one was anxious to see well, and where force of muscle could easily have prevailed, this modest notification would have any effect. To the great gratification of Captain Hornby, and of every person of proper feeling who was there, it had the desired effect, for from one end to the other of this interminable form not a man could be seen sitting. Do the "Lancashire witches" still exercise the potent spell over the rougher sex which made them so dreaded in past ages?—or was it their charms which captivated them into submission? Some will say that this abnegation by the males arose from good sense and consideration for the ladies; on the other hand, a cynic might attribute it to that fear of publicity which would certainly be given to his want of gallantry if a man trenched on the coveted precincts. The broad fact, however, remains for our admiration; and it would be well for the metropolitan authorities, when they come again to deal with multitudes, to take a leaf out of Captain Hornby's book, and turn to good account, as he has done, the amiable though sometimes latent characteristics of our nature.

The following is the official list of the force on the ground:—

REVIEWING OFFICER—GENERAL SIR GEORGE WETHERALL, K.C.B., K.H.

YEOMANRY CAVALRY AND MOUNTED RIFLE VOLUNTEERS.

Sir R. T. Gerard, Bart., commanding—the Lancashire Hussars and the 1st Lancashire Mounted Rifle Volunteers. Approximate strength, 200.

ARTILLERY BRIGADE.

Lieut.-Colonel James Bourne, 4th L.A.V., commanding; Major Chambres, Major of Brigade.

Captain Henry H. Hornby, 4th Lancashire, Liverpool. Approximate strength, 42.

Captain Clay, 8th Lancashire, Liverpool. Approximate strength, 21.

First battalion, Lieut.-Colonel Brown—1st Lancashire, Liverpool; 2nd, Crosby, 6th, 7th, 8th, 13th, 14th, 20th Liverpool. Approximate strength, 583.

Second battalion, Major Jackson—5th Lancashire, Blackburn; 9th, Liverpool; 10th, Kirkham; 12th and 17th Liverpool. Approximate strength, 450.

Third battalion, Lieut.-Colonel M'Iver—11th Lancashire, Liverpool; 15th, Garston. Approximate strength, 450.

Fourth battalion, Major Walter—4th Lancashire, Liverpool. Approximate strength, 585.

Total approximate strength, 2068.

RIFLE VOLUNTEERS.

FIRST BRIGADE—Colonel Wilbraham, C.B., commanding; Captain Eteson, Major of Brigade.

First battalion, Lieut.-Colonel Bousfield—1st, 22nd, 66th, and 69th Lancashire; 1st battalion, Liverpool; 38th, Fairfield. Approximate strength, 580.

Second battalion, Major Bourne—15th, 25th, 51st, and 63rd Lancashire, Liverpool. Approximate strength, 496.

Third battalion, Captain Greenhall—9th Lancashire, Warrington; 13th, Southport; 32nd, 41st, 64th, and 74th, Liverpool; 54th, Ormskirk; 72nd, Old Swan. Approximate strength, 535.

Fourth battalion, Lieut.-Colonel Gladstone—5th, 19th, 39th, 42nd, 68th, 71st, and 14th Lancashire, 2nd battalion, Liverpool. Approximate strength, 600.

Total approximate strength, 2211.

SECOND BRIGADE—Colonel Crofton, commanding.

First battalion, Lieut.-Colonel Viscount Grey de Wilton—6th Lancashire, Manchester. Approximate strength, 670.

Second battalion, Major Cunliffe—33rd Lancashire, Ardwick; 56th, Salford. Approximate strength, 556.

Third battalion, Lieut.-Colonel Hon. Algernon Egerton—40th Lancashire, Manchester. Approximate strength 460.

Fourth battalion, Lieut.-Colonel Deakin—28th Lancashire Manchester. Approximate strength, 581.

Total approximate strength, 2267.

THIRD BRIGADE — Lieut.-Colonel Lightfoot, C.B., commanding; Lieutenant Wheatley, 84th Regiment, major of brigade.

First battalion, Lieut.-Colonel Gamble—47th Lancashire, St. Helens; 48th, Prescot. Approximate strength, 448.

Second battalion, Major the Marquis of Hartington—10th Lancashire, Lancaster; 37th, Ulverston. Approximate strength, 420.

Third battalion, Major Pedder—4th Lancashire, Rossendale; 11th, Preston; 29th, Lytham; 65th, Rossall. Approximate strength, 428.

Fourth battalion, Captain Eckersley—21st Lancashire, Wigan; 26th, Haigh; 44th, Longton; 61st, Chorley; 59th, Leyland. Approximate strength, 444.

Total approximate strength, 1700.

FOURTH BRIGADE—Lieut.-Colonel the Hon. P. W. M. Talbot, commanding; Captain the Hon. W. H. Herbert, 84th Regiment, major of brigade.

First battalion, Major Gray—27th Lancashire, Bolton; 49th, Newton; 55th, Leigh; 60th, Atherton. Approximate strength, 403.

Second battalion, Major Graham—2nd Lancashire, Blackburn; 7th, Accrington; 17th Burnley; 36th Accrington; 62nd, Clithero. Approximate strength, 478.

Third battalion, Captain Slingsby—8th Lancashire, Bury; 24th, Rochdale; 43rd Fallowfield; 70th, Droylesden; 73rd, Newton: 31st Oldham. Approximate strength, 454.

Fourth battalion, Captain Lees—23rd Lancashire, Ashton-under-Lyne; 46th, Swinton; 67th, Worsley; 76th, Farnworth. Approximate strength, 473.

Total approximate strength, 1808.

THE VICTORIA CROSS.

(From Tuesday's Gazette.)

WAR OFFICE, SEPT. 4.—The Queen has been graciously pleased to signify her intention to confer the decoration of the Victoria Cross on the under-mentioned officer of Her Majesty's Army, whose claim to the same has been submitted for Her Majesty's approval, on account of acts of bravery performed by him in India, as recorded against his name, viz.:—

17th Lancers—Lieutenant Henry Evelyn Wood—For having, on the 19th of October, 1857, during action at Sindwaho, when in command of a troop of the 3rd Light Cavalry, attacked with much gallantry, almost single-handed, a body of rebels who had made a stand, whom he routed; also, for having subsequently, near Sindhora, gallantly advanced with a Duffadar and Sowar of Beatson's horse, and rescued from a band of robbers, a Potail, Chemmum Singh, whom they had captured and carried off to the Jungles, where they intended to hang him.

CALCUTTA.

[From our own Correspondent.]

July 20th.

This day the gallant Outram leaves the shores of India, to seek in England a renovation of that health and energy which he has so freely expended through a long and brilliant career in the East. But one feeling pervaded all classes of the community, upon hearing that illness necessitated him to leave; and a requisition, numerously signed and promptly responded to by the sheriff, convened a public meeting, which was held on Saturday last, the 14th inst., to frame an address, and to devise some means of testifying the esteem, respect, and honour in which he is so universally held. Never did Calcutta behold so numerous and so unanimous an assemblage. Men of every creed and every shade of colour crowded to do honour to the brave soldier who was about to leave us. I inclose a copy of the address, which will bear the signatures of thousands. Sir James's reply (which I also inclose) speaks for itself, and teaches the same spirit of self-abnegation which has marked every act of his life. In one day 1000*l.* was subscribed towards the testimonial fund, and it is certain to reach a very large amount. Lord Canning, with his accustomed liberality, headed the list with 100*l.*

Considerable excitement has prevailed amongst the European population of India, on account of an "Arms and Ammunition Bill," which was passed by the Legislative Council on Saturday last, and which makes no distinction, even in its penal provisions, between the undoubtedly loyal European and the sulky and disaffected native, should either have in his possession arms or ammunition without a licence, in any district or place to which the Act extends, after the 1st of October next—soldiers, sailors, police, and revenue officers, and Volunteers exempted. The Chief Justice and Sir Mordaunt Wells (the puisne judge) fought manfully for the exemption of *all* Europeans, as being not only loyal to a man, but ready to come forward (as they did in 1857) and take up arms in defence of British supremacy; they were however in a minority of two, and the bill becomes the law of the land after the 1st of October next.

It is rumoured that Mr. Wilson's "Income Tax" and the "Licensing of Arts and Professions" Bills, are likely not to be passed in their present shapes, and that Sir Hugh Rose has stated that more troops will be required to keep down dissatisfaction if they do. I do not vouch for the latter part of this, although it is generally believed. Certain, however, it is that, although in Calcutta, the gallant general abstains from attending Council, and so being placed in the embarrassing position of voting against the Government of which he is a member, or against his own convictions. Mr. Wilson has been suffering from ill-health lately, and is much altered in appearance; the difficulties which he has to grapple with, devoid of Indian experience, are enormous, and his mental anxiety must be very great.

The Indigo Commission is now sitting at Kishnaghur, and the planters are giving their evidence in opposition to that of the Ryots. I much fear, however, that the evident leaning of the Lieutenant-Governor of Bengal towards the latter has doomed a fearful loss of British capital in this particular branch of enterprise, whilst a tax upon river fisheries imposed by him without reference to the Council, has made the whole body of the fishermen, to say the least of it, discontented to the last degree.

Prince Jolam Mahomed has returned to Calcutta from amongst you; he will scarcely mix in such good society out here as he did in England. No special army news to relate. Brigadier Fordyce takes command of the station and artillery at Meerut, vice Brigadier Horsford, removed, it is said, for forwarding an impertinent communication from a junior officer to the Commander-in-Chief.

Captain C. D. Grant, late Deputy-Commissioner of Rangoon, has been permanently removed from civil employ by the Governor-General, and ordered to proceed to Madras to await further orders without delay. This is said to be in consequence of gross immoralities, committed at a period long antecedent.

The final orders as to the amalgamation of the late Indian Army with the Queen's are most anxiously looked for.

CHINA.

[From our own Correspondent.]

The greater part of the expedition has arrived at Talien-Whan Bay. This harbour is about 200 miles east of the Peiho. The Earl of Elgin, Admiral Hope, and Sir H. Grant, have not yet come up. It is said that the whole of the fleet will remain here about eighteen days. The transports, especially the ships with horses on board, are taking in water in Odin's Cove, which is nearly six miles from the remainder of the shipping. There is a party on shore digging wells.

The French are at Chefu Bay, about 120 miles from this. Admiral Jones of the Imperieuse left in his ship on the 21st (yesterday) to see the French Admiral.

Report says that the Russians are assisting the Chinese. I went ashore yesterday about one and a-half miles inland. We came across some villages full of men, apparently of Tartar origin, better looking, and a stronger race than the Chinese in the south. These villagers sent their wives and stock away as soon as our ships made their appearance. All we could purchase was a few eggs. The people were civil. One man told us the Russians were helping his countrymen. These people have acres of land planted with Indian corn, wheat, barley, beans, &c.; the country full of pigeons; the appearance of the land is not prepossessing—looks very dry; but I imagine their rainy season has hardly commenced. The weather is delightful; the thermometer for the last five or six days has ranged from 65° to 71°. The troops are healthy. The force consists of eight Queen's regiments, or Europeans, viz., the 1st Royals, 2nd Queen's, 3rd Buffs, 31st Regiment, 44th Regiment, 60th Rifles, 67th and 99th Regiments, also four regiments of Native Infantry. I do not think, after deducting men left behind at the depôt battalion, Hong Kong, and those transferred to the commissariat and doing duty in the Coolie corps, that we can have actually engaged 7500 men. All the delicate men were left in hospital at Hong Kong. However, with Marines and Artillery, we may have in all about 9000 men; and, with the French force, possibly 15,000. This I think will be found to be as many as we shall have at first starting; and I have not a doubt, after we have taken the forts, what with killed, wounded, and the force left behind to hold these places, our numbers will be very much less; and, if we have to fight Russians as well, may be inadequate to carry out the object in view as it ought to be; or possibly it may cause the campaign to last until November, 1861, instead of being over this season. No one knows where we are to land, or anything about what is to be done.

The French, I am told, have lost a good many men. I know before they got to the Cape a number had died, and they left a good many on shore at the above place, being unfit for service. I do not think they are so well looked after as our men, who are well fed, and every pains bestowed in preserving their health. The consequence is, I do not think we have lost any men to speak of. A few deaths have occurred, but I know two of the men died from disease of the heart; in fact, no expedition could be better provided for, and this accounts for the continued good health of the troops. The Coolies are Chinese from the south. They cannot understand the language spoken up here. There is no danger of their running away to the enemy; as, if caught, their heads will be taken off. They are very willing fellows. A mail will be despatched regularly from the north to England.

RIFLE SHOOTING IN THE CURRAGH.

This interesting military display, which had been repeatedly put off owing to the unfavourable state of the weather, took place on the 24th and 25th of August. Friday morning opened so unfavourably that fears were entertained lest the Lord-Lieutenant would be again obliged to defer his visit. Such, however, was His Excellency's eager desire to witness the proceedings, that he braved the weather and appeared on the Curragh at the appointed time, with the commander of the forces, being met by Lieut.-General Gascoigne, commanding the Dublin Division, in which the Curragh Camp is incorporated, and a brilliant staff, and from the moment of his arrival till after that of his departure the next day, not a drop of rain fell. After remaining for a short time at the head-quarters, where he was to be the guest of Lieut.-General Gascoigne, His Excellency proceeded to the ground selected for the rifle practice, at the end of the Curragh on the Kildare side. The prizes were open to officers and men of every branch of the Service, but the number of non-commissioned officers and soldiers was limited as follows: viz., for every regiment of infantry, or company of Royal Engineers, in the proportion of two non-commissioned officers a man per company; for every regiment of cavalry, or battalion of Military Train, in the proportion of one man per troop; every battery of Artillery, in the proportion of four men per battery. The non-commissioned officers and men were selected by commissioned officers from among the best shots of the regiments. The competitors shot with the long Enfield rifle, pattern 1853, with government ammunition gauge, 1855. The firing began at 11 a.m., and was discontinued at half-past 4 p.m. The following is a list of the winners of the prizes:—

First competition—Distance 300 yards, 5 rounds, standing. First prize 4*l.*, Private M'Vea, Fermanagh Militia, 8 points; second prize, 3*l.*, Captain Cookworthy, 60th Rifles, 7 points; third prize, 2*l.*, Ensign M'Murry, 15th Regiment, 7 points; fourth prize, 1*l.*, Sergeant Thompson, 20th Regiment, 7 points.

Second competiton—Distance 400 yards, 5 rounds, standing or kneeling. First prize, 4*l.*, Ensign Harris, 20th Regiment, 8 points; second prize, 3*l.*, Corporal Muller, 15th Regiment, 8 points; third prize, 2*l.*, Private Hill, 26th Regiment, 8 points; fourth prize, 1*l.*, Private Cooke, 16th Regiment, 7 points.

Third competition—Distance 500 yards, 5 rounds, standing or kneeling. First prize, 4*l.*, Private Hodgkinson, 20th Regiment, 7 points; second prize, 3*l.*, Lieutenant Story, 26th Regiment, 7 points; third prize, 2*l.*, Private Hewitt, 76th Regiment, 7 points; fourth prize, 1*l.*, Private Laird, 96th Regiment, 7 points.

Fourth competition—Distance 600 yards, standing or kneeling. First prize, 4*l.*, Private Head, Grenadier Guards, 8 points; second prize, 3*l.*, Private Laird, 96th Regiment, 7 points; third prize, 2*l.*, Private Burke, 26th Regiment, 6 points; fourth prize, 1*l.*, Private King, Grenadier Guards, 6 points.

The Lord-Lieutenant remained on the ground nearly the whole time of the practice, taking the keenest interest in the proceedings. At the close of them he returned to the head-quarters, where a select party had been invited to meet His Excellency at dinner.

On Saturday, the weather still continuing favourable, His Excellency's prizes were competed for. They consisted of 25*l.*, 15*l.*, and 10*l.* The competitors were to be the thirty best shots; that is, men who had obtained the greatest aggregate number of points at four distances in the prizes of the previous day. The distance was 700 and 800 yards, and the parties were to stand or kneel at pleasure.

First prize, 25*l.*, Private Saxley, Grenadier Guards, 14 points; second prize, 15*l.*, Private Hutchkinson, 26th Regiment, 11 points; third prize, 10*l.*, Private Washington, 14th Regiment, 10 points.

Besides the above there were two other competitions for file-firing and volley-firing, the prizes in each case being 15*l.*

The file firing took place at 400 yards' distance. The parties consisted of fifteen file, or thirty men, non-commissioned officers and privates only, each man being furnished with six rounds. The prize in this case was won by the 16th Regiment, who averaged 61·10 points.

The prize for the volley firing was competed for by the same class. The distance was 600 yards, the parties kneeling, and each man being furnished with six rounds. The Grenadier Guards won this prize, having averaged 5·06 points. There was also a pool target on both days, open to officers and men, at sixpence a shot—distance, 200 yards, the bull's-eye only to count. In this case Colonel Campbell of the 20th Regiment was most successful, he having hit the bull's-eye.

His Excellency having delivered the prizes, returned to the head-quarters to luncheon, after which, the successful competitors being drawn up in front of the hut, he proceeded to address them, and in a few eloquent and impressive words congratulated them on their skill and success, and expressed the great pleasure it had afforded himself to witness the proceedings of the last two days. Shortly afterwards His Excellency took leave of his hosts, and returned by special train to Dublin.

THE PRUSSIAN ARMY IN ITS PRESENT ORGANISATION.

Under the above heading the *Militär Zeitung*, publishes the following data:—

As the Prussian army has undergone great reform it may not be uninteresting to consider those reforms, and the new means of defence placed at the service of the state.

The army still consists as heretofore of the standing army and militia (Landwehr), which latter will never be given up, but will not be called out to take the field in first line, which will be a blessing for thousands of families. Universal service, without substitutes, is the fundamental principle of the defensive power of Prussia, regulated by the law of 3rd September, 1814, and which can only be altered by a new enactment. The time of service in the standing army, therefore, is still five years, of which three are under the colours, two in reserve; then comes the transferment to the militia of the first levy, after seven years to the second levy. The date of service commences with the twentieth year, and lasts to the fortieth. Some slight alterations have been proposed, but they will not be brought forward till next session.

The effective strength of the army was calculated, according to the census taken 45 years ago, and has not risen with it; consequently, the number of serviceable young men is much greater than actually enrolled, numbers of young men escaping all military duty, even the militia service, so that the principle of every man serving only existed in idea. To remedy this, the number of troops in the regular army has been increased, and when all the arrangements are carried out it will be possible, when the first mobilisation of the army takes place, to allow the militiamen to remain undisturbed, until the defence of the country should render their services indispensable. The yeomanry (Landwehr-Cavalrie) will be done away with. The State is, it is true, well provided with horses; but horses broken in for cavalry use are not forthcoming in sufficient numbers, whilst the new conditions of warfare render it necessary to make the cavalry most efficient, an efficiency which the militia cavalry could not supply. It is therefore agreed to increase the cavalry of the line, and in this measure, that for every two yeomanry regiments abolished, one regular cavalry regiment will be formed. Of these, there will be eighteen, ten have only as yet been formed. The artillery has not received any increase, as the number of its batteries suffices for an army in the field. It is only in case the militia should be called out that such a step would be adopted, the regulations for which are laid down.

On the other hand the new conditions of warfare render an increase of the pioneers imperative, and this has been done. The military train for the conveyance and preservation of costly war *matériel*, the hospital and sanitary corps, have received a more complete organisation, and now forms its own distinct body of men, instead of drafting from the cavalry and artillery as before.

The newly-formed infantry regiments are taken from the frames of the militia regiments. The latter, whose officers and men in time of peace are on leave to a very small number, were, after the reduction of the army in the summer of 1859, brought up to a certain strength by drafts from regiments of the line and recruits, and for a time figured under the name of *Landwehrstamm battalions*. These battalions are now joined by threes into one combined regiment of the line. The new cavalry regiments have from drafts from the old ones, which at the time of the mobilisation formed a fifth or extra squadron, been regularly organised; they are called combined dragoon or Uhlan regiments; the Cuirassiers and Hussars will not receive any increase.

After these changes the strength of the army stands as follows:—

I.—Standing Army.

A. *Infantry.*

Garde.	2 regiments guards 2 combined ditto 2 regiments grenadiers 2 combined ditto 1 regiment fusilier guards. 1 battalion jägers guards. 1 ditto rifles guards.	of 3 battalions.
Line.	40 regiments infantry 32 combined ditto 10 battalions jägers.	of 3 battalions.
	255 battalions.	

B. *Cavalry.*

Garde.	6 regiments [gardes du corps, curassier guards, dragoon guards, hussar guards, and 2 regiments Uhlan guards.]	
	2 combined regiments [dragoons and Uhlans].	
Line.	32 regiments.	
	8 combined ditto, each of 4 squadrons.	
	192 squadrons.	

C. *Artillery.*

Garde.	1 regiment.	
Line.	8 regiments, each with 12 field-batteries, and a fortress division.	
	108 Field-batteries of 8 guns.	

D. *Engineers.*

Garde.	1 battalion, pioneers.	
Line.	8 battalions; as yet of 3 companies.	
	2 reserve companies.	
	29 Companies, Pioneers.	

E. *Train.*

Garde.	1 battalion.	
Line.	8 battalions. In time of peace only frames.	
	9 Train battalions.	

Special formations, such as combined fortress-divisions, the educational battalions, which only exist in peace-time, are not here taken into account; we refer solely to field-troops.

II.—The Militia, in the Infantry as hitherto:

First Levy.	4 Garde regiments 32 provincial do. 8 reserve battalions	of 3 battalions
	116 battalions	
Second Levy.	116 battalions also	
	232 battalions.	

The frames of the Militia Cavalry (Yeomanry) with the exception of the garde and reserve still partially remain, but, as already observed, will be done away with.

Obituary.

We have to record the death of Lieutenant Edward Garrow Smith, R.N., who had been employed in the Coast-guard service at Kimmeridge, Corfe Castle, Dorset, since June, 1833. The deceased passed his examination in 1817, became lieutenant in 1827, and on occasion of the wreck of the Skylark, brig, off the Isle of Wight, in April, 1845, he rendered, at great personal risk, all the assistance that gallantry and humanity could suggest.

We have to announce the death, on the 30th ult., while on his way home from Alexandria, of Major-General Henry Frederick Lockyer, C.B., late Commanding the forces in Ceylon. The gallant deceased, who had held his command since December, 1855, was compelled to quit Ceylon by impaired health, and had remained at that dependency until too late for the restoration of his health. He sank under his disorder on his voyage home. The late General commenced his military career in March, 1813, as ensign in the 71st Regiment, and served with that gallant regiment from August that year in the Peninsula to the end of the war, and was present at the battles of Nivelle, Nive, Orthes, Aire (where he was severely wounded), and at Toulouse, besides other minor engagements with the enemy. He afterwards removed to the 97th Regiment. In May, 1854, he accompanied his regiment as Colonel on the staff in command of the British contingent destined to act in conjunction with the French force for the occupation of Greece. In November, the same year, he joined the army in the Crimea, and was placed in the command of the 2nd Brigade of the 2nd Division, and remained with the Army the whole of the winter and spring of 1854-55. On leaving the Crimea he proceeded to Ceylon, to take the command of the forces in that Island. For his services in the Peninsula he received the silver war medal and three clasps. He had also the Crimean medal and clasp for Sebastopol, and was made in 1837 a Knight of the Hanoverian Guelphic Order, and in 1856 was made a Companion of the Order of the Bath. The late general had been made an Officer of the Legion of Honour of France, and had received the order of the Medjidie of the 3rd class from the Sultan of Turkey. In 1855, he was placed among the officers receiving reward for distinguished and meritorious service. The deceased officer's commissions bore date as follows:—Ensign, March 25, 1813; Lieutenant, January 19, 1814; Captain, June 20, 1822; Major, June 12, 1835; Lieut.-Colonel, October 26, 1841; Colonel, November 11, 1851; and Major-General, October 26, 1858.

We have to record the demise of another of Nelson's gallant companions at the glorious battle of Trafalgar. Commander Edward Garrett (seniority 1809), who expired suddenly on Sunday morning, at Greenwich Hospital, to the inexpressible regret of his many friends and brother officers, by whom he was sincerely esteemed. This gallant officer was one of the four commanders on the establishment of Greenwich Hospital, appointed under the recommendation of the late illustrious Duke of Wellington, president of the royal commission of inquiry into naval affairs of 1838. The late Commander Garrett was an officer who had seen much service; his commission as lieutenant bears date 1801. He served as lieutenant of the Mars, 74, Captain Duff, at Trafalgar, in which battle he was wounded, and his gallant captain killed. While in the Mars he was at the capture of the French frigate Rhin, and four others. He served at Copenhagen in 1807, and was senior lieutenant of the Onyx in her gallant action with and capture of the Dutch brig-of-war Manly, in 1809, for which he received his promotion to the rank of commander, and afterwards commanded a sloop-of-war on the Channel station. Commander Garrett's death was awfully sudden, it having taken place instantaneously from an affection of the heart, while he was reading in the hospital library.

Commander Robert H. B. Rowley (1842), one of the members of the Mixed Commission to settle the claims of the English and French subjects with the Monte Video Government, died at Monte Video on the 2nd of July. Commander Rowley was son of the late Admiral Sir Josias Rowley, and was brother to the present Countess of Kinnoul.

We have to record the death of Lieutenant-General Horatio Broke, C.B., Colonel of the 4th Regiment, which occurred on the 30th ult. The deceased officer entered the Army in 1796, and accompanied the 52nd Light Infantry the following year on the expedition to Copenhagen. In 1808 he went to Portugal, and was present at Vimiera, the advance into Spain and retreat under Sir John Moore. After serving in the ill-fated Walcheren expedition he returned to Spain, and, in 1811, joined the Light Division, on the retreat of Massena from the lines of Lisbon, and served till the end of the Peninsular war. At the siege of Burgos he was aide-de-camp to Sir H. Clinton, and was shot through the lungs at Orthes. General Broke had received the war medal with four clasps. He was appointed Colonel of the Connaught Rangers in December, 1858, and the appointment is now vacant by his death.

BIRTHS, MARRIAGES, AND DEATHS.

BIRTHS.

BLAKE—August 29, at Southend, Essex, the wife of Dr. Ethelbert H. Blake, Royal Artillery, of a daughter.
BOON—August 30, at No. 4, Atkinson Place, Brixton, the wife of Captain Sydney Gerald Boon, of H.M.'s steamer Australia, Calcutta, of a son.
DRAKE—July 26, at Murée, Punjaub, India, the wife of J. A. Drake, Esq., of H.M.'s 7th Dragoon Guards, prematurely, of a son, still-born.
GANDY—August 28, at Eden Grove, Westmoreland, the wife of Captain Henry Gandy, of a son.
GRANT—July 11, at Seetabuldee, the wife of Captain John Hayes Grant, H.M's Bengal Artillery, of a son.
HAWTAYNE—August 3, at St. George's, Bermuda, the wife of Captain Hawtayne, 39th Regiment, Fort Adjutant, of a son.
HORE—September 2, at 2, Rue Jean Goujon, Paris, the wife of Captain Hore, R.N., Attaché to the Embassy, of a son.
PIDCOCK—August 13, at Malta, the wife of Benjamin Wilson Pidcock, Esq., Naval Storekeeper, H.M.'s Dockyard, Malta, of a daughter.
WHITTALL—August 27, at Sheerness, the wife of J. Whittall, Esq., R.N., of a son.

MARRIAGES.

CARTHEW—SARGENT—At St. John's Episcopal Church, Edinburgh, John Arthur Carthew, Esq., 13th Light Dragoons, to Annie Leigh, daughter of John Sargent, Esq., Liskeard, Cornwall.
D'HUART—GRANVILLE-ELIOT—August 25, at the British Embassy, Paris, by the Rev. A. Gurney, assisted by the Rev. W. Hill, and afterwards at the Church Notre Dame des Victoires, the Baron Victor d'Huart, of Longwy, Moselle, to Isabella Frederica, daughter of the late Colonel William Granville-Eliot, R.H. Artillery, of Valebrook, Sussex.
JOHNSTONE—ALEXANDER—September 1, at the parish church, Staines, by the Rev. Edward Stokes, vicar, Frederick Charles, second son of the late Richard J. Johnstone, Esq., to Helen Kathleen, youngest daughter of Lieut.-Colonel Henry Alexander.
KIMBER—DIXON—September 4, at Trinity Church, Clapham Common, by the Rev. Alfred Peache, assisted by the Rev. Stewart D. Stubbs, Henry Kimber, Esq., of Wandsworth, Surrey, to Mary Adelaide M. Dixon, only daughter of Major-General Charles Dixon, R.B.E.
MACDONALD—LINDSAY—August 30, at St. George's Church, Hanover Square, by the Rev. George Cole, of Rainham, Kent, Major W. D. Macdonald, H.M.'s 93rd Highlanders, eldest son of Captain and the Hon. Mrs. Macdonald, of Sandside, Caithness-shire, to Emma, youngest daughter of Colin Lindsay, Esq., and grand-daughter of the late Hon. Robert Lindsay, of Balcarres, Fifeshire.
RAMSAY—KERR—September 4, at the church of St. John, Notting Hill, by the Rev. Edwd. K. Kendall, Dr. Ramsay, R.N., to Robina, fifth daughter of the late David Kerr, Esq., Liverpool, and grand-daughter of the late Rev. David Ross, Burntisland, Fifeshire.
STEWART—McDOUALL—August 28, at St. James's Church, Piccadilly, by the Rev. J. Oakley, Major Patrick Stewart, of the Royal Bengal Engineers, to Miss McDouall, only daughter of Colonel McDouall, of Logan, Wigtownshire, N.B., and formerly of 2nd Life Guards.

DEATHS.

BROCK—August 31, at 14, Brompton Square, London, of consumption, Caroline Mary, the youngest and beloved daughter of Dr. Henry Gordon Brock, R.N., aged 16.
CARFRAE—August 29, at Bower House, Dunbar, General Carfrae, of Bower House, H.E.I.C.S.
GARRETT—September 2, suddenly, at Greenwich Hospital, Commander Edward Garrett, R.N., Lieutenant of the Mars, 74, at the battle of Trafalgar.
GOODLAKE—September 1, at Wrottesley, the Hon. Mrs. Edward Goodlake, only surviving daughter of Lord Wrottesley, aged 28.
GREEN—July 4, at Zout Kloof, Cape of Good Hope, on the journey to Colesberg, Louisa Margaret Quilham, the beloved wife of Henry Green, Esq., Civil Commissioner of the district of Colesberg, and second daughter of Lieutenant Aitchison, R.N.
HAY—August 30, at 13, Rutland Street, Edinburgh, Lieut.-Colonel Humphrey Hay, late of the Bengal Cavalry, third and sole surviving son of the late Robert Hay, Esq., of Spott, East Lothian.
KECK—September 4, at Bank Hall, Chorley, Lancashire, George Anthony Legh Keck, Esq., fifty-seven years Lieut.-Colonel Commandant of Prince Albert's Own Leicestershire Yeomanry Cavalry, and M.P. for the county of Leicester for thirty-five years, aged 86.
LOCKYER—August 30, on board the steam-ship Ripon, from effects of climate, Major-General Henry Frederick Lockyer, C.B., K.H., &c., late Commander-in-Chief of the Forces in Ceylon, and Acting Lieutenant-Governor, aged 63.
SMITH—August 30, Lieutenant E. G. Smith, R.N., for twenty-five years Chief Officer of the Coast-guard Station, Kimmeridge.

BERKS COUNTY RIFLE MEETING IN WINDSOR GREAT PARK.—The Queen and the Prince Consort take a most lively interest in the affairs of this important meeting, allowing the services of the labourers of the Great Park in the preparation. Her Majesty has also subscribed 50*l.*, and the Prince Consort 25*l.*, towards the expenses, and altogether the liberal sum of nearly 700*l.* has been contributed. A large arena has been determined upon in a convenient portion of the park near "the Hernery," about five miles drive from Windsor, where every accommodation will be afforded for those in carriages or on foot. A sumptuous dinner will be given by Lord Overstone, under a spacious tent, to the Volunteers, to which Her Majesty the Queen and the Prince Consort will supply two fat bucks. The band of the Scots Fusilier Guards, will be in attendance. The ground will be kept partly by the county police and the Royal Horse Guards. The spot selected is the most picturesque part of the park; and to add to the interest of the scene the whole of the royal tents, including those of Tippoo Saib, will be erected on the ground. It is now determined that, in the first instance, every company of sixty will select ten of their best shots to compete for the prizes, and the subdivision of Wokingham and Windsor Forest will select six. After a competition of these, on Tuesday next five of each of the best ten will have their choice of shooting for the silver cup given by the ladies of Berkshire, or the Hon. Mrs. Lloyd Lindsay's prize of a beautiful breech-loading rifle; after which the two winners and the ten next best shots will compete for the County Challenge Cup.

Advertisements.

ARMY CONTRACTS.—TENDERS will be received at this Office until Noon on the 20th of October, from persons who may be willing to enter into Contracts for the supply of FORAGE, in such quantities as may be required for 12 months from November 1, 1860, for the use of Her Majesty's Land Forces stationed at Aldershot Camp, and within the Command. Forms of Tender, and Conditions of Contract, may be obtained on application at this office, by letter or in person, between the hours of 10 and 4 o'clock. Tenders on the printed forms must be properly filled up and signed, and delivered at the undermentioned Office, under closed envelope (marked on the outside "Tender for Commissariat Supplies,") before Noon on the 20th October next.
J. S. DAVENPORT, Deputy Commissary-General.
Deputy Commissary-General's Office, South Camp, Aldershot, 1st September, 1860.

CHESHIRE RIFLE PRIZE MEETING, to be held at Leasowe Common, Birkenhead, on 19th and 20th September, 1860. Value of Prizes about 300*l.*

PATRONS:
The Marquis of Westminster, K.G., Lord-Lieutenant of the County.

Field-Marshal Viscount Combermere.	John Laird, Esq.
Earl Spencer.	Earl Shrewsbury and Talbot.
Lord De Tabley.	Lord Stanley of Alderley.
Earl Grosvenor, M.P.	Lord Egerton of Tatton.
Major-General Hay.	Lord Elcho, M.P.
Col. Wilbraham, C.B.	Colonel Clarke Kennedy, C.B.
John Tollemache, Esq., M.P.	Sir Philip Egerton, Bart., M.P.
Hon. Sir Edward Cust.	Cornwall Legh, Esq., M.P.
W. E. C. Egerton, Esq., M.P.	Sir Richard Brooke, Bart.
P. S. Humberston, Esq., M.P.	J. C. Ewart, Esq., M.P.
Hon. Captain Egerton, R.N.	J. R. Shaw, Esq.
Robert Vyner, Esq.	Sir Charles Shackerly, Bart.
	Lieut.-Colonel Fielden.

COMMITTEE.
John Laird, Esq., Chairman.

Hon. Sir Edward Cust	Capt. J. Cadell, 1st, C.R.V.
Capt. W. Chambres, 3rd C. R. V.	Capt. Edwards, 11th C.R.V.
Capt. H. A. Grey, 4th C. R. V.	Capt. G. Harrison, 1st C.A.V.
Capt. F. P. Jones, 4th C.R.V.	Capt. W. Hope-Jones, 14th C.R.V.
Capt. V. A. King, 2nd C.R.V.	Harold Littledale, Esq.
H. H. Laird, Esq.	Capt. W. Laird, C.A.V.
S. Ledward, Esq.	Captain Reynolds, 3rd C.A.V.
John Ravenscroft, Esq.	

UMPIRE: Colonel Clarke Kennedy, C.B.

THE ROYAL INSURANCE COMPANY,
29, Lombard Street, London, E.C., and Royal Insurance Buildings, Liverpool.

Chairman in Liverpool.—CHARLES TURNER, ESQ.
Chairman of London Board —SAMUEL BAKER, ESQ.

At the Annual Meeting of the 10th inst., the following highly satisfactory results were shown:—

FIRE DEPARTMENT.

Notwithstanding the large accessions of business made annually through a long series of years, which obviously increase the difficulty of further advances, yet the Fire Premiums of the year 1859 rise above those of the preceding year by a larger sum than has been obtained by the increase of any single year since the formation of the Company, excepting the year 1853—disclosing an advance of 50 per cent. in three years. To this circumstance must be attributed the gratifying announcement that the accounts for the year show a profit of 42,483*l.* 3*s.* 4*d.*

The following figures exhibit the progress of the whole fire branch running over the last ten years:—

	Total Premuim received.	Increase of the Year above each preceding one.
1850	£44,027 10 0	£9557 19 8
1851	52,673 5 11	8645 15 11
1852	76,925 4 2	24,251 18 3
1853	112,564 4 4	35,639 0 2
1854	128,459 11 4	15,895 7 0
1855	130,060 11 11	1601 0 7
1856	151,733 9 6	21,672 17 7
1857	175,049 4 8	23,315 15 2
1858	196,148 2 6	21,098 17 10
1859	228,314 7 3	32,166 4 9

Placing the Company among the very largest offices in the kingdom. Indeed, it is believed that there are now only three offices in existence which equal it in fire revenue.

LIFE BUSINESS.

The Directors desire to call the especial attention of the Proprietors to the statements of the Life Branch of the establishment.

The Actuary's Report on this subject is accompanied by an appendix containing the fullest particulars of the investigation made, and is illustrated by two coloured diagrams, which make plain to the unprofessional eye the mortality experienced by the Royal, as indicated by curved lines, which contrast most favourably with the former averages of mortality, also displayed on the diagrams.

It is expected that these elucidations will attract a deep and profitable attention to the subject of Life Assurance in the minds of tens of thousands who have hitherto given no heed to its principles and advantages, and it is evident that this Company, as well as others, will not fail to reap much of the favourable consequences to be anticipated.

The bonus apportioned to the asssured, with participation, amounts to 2*l.* per cent. per annum, to be added to the original sum assured of every Participating Policy effected previously to the 1st of January, 1858, for each entire year that it had been in existence since the last appropriation of bonus thereon, and is one of the largest Bonuses ever declared.

PERCY M. DOVE, Manager and Actuary.
JOHN B. JOHNSTON, Secretary to London Board.

UNDER THE ESPECIAL PATRONAGE OF
HER MOST GRACIOUS MAJESTY THE QUEEN,
AND
FIELD-MARSHAL
HIS ROYAL HIGHNESS THE PRINCE CONSORT,
K.G., K.T., K.P., G.C.B., & G.C.M.G.

This Company, without union with any other, has paid for compensation £65,000.

W. J. VIAN, Secretary.

Railway Passengers Assurance Company,
Office, 64, Cornhill, E.C., August 25, 1860.

MEMORIAL TO THE LATE GENERAL SIR WILLIAM NAPIER, K.C.B.

At a Meeting held at the United Service Institution on the 8th May, 1860,

His Royal Highness the Duke of Cambridge, K.G., G.C.B., in the chair,

It was proposed by His Grace the Duke of Richmond, K.G., and seconded by the Earl of Ellenborough, G.C.B.,

That the late General Sir William Napier, as a soldier and a military historian, merited the admiration and gratitude of his country.

Proposed by General Sir John Burgoyne, Bart., G.C.B., and seconded by General Sir Thomas Brotherton, K.C.B.,

That he immortalised the glorious deeds of our Army in Spain, Portugal, and France, by his history of the war in those countries—a history that no true soldier can read without instruction and advantage, and without being inspired by the heroic sentiments and spirit-stirring language of the author.

Proposed by General Sir Robert Gardiner, G.C.B., and seconded by Lieutenant-General Sir Harry Smith, Bart., G.C.B.,

That a subscription be immediately opened for the erection of a statue to the memory of the chivalrous soldier and unsurpassed military historian.

A. LAWRIE, Hon. Sec.

CAPTAIN COOK'S MONUMENTAL TESTIMONIAL.

Among the many claims of distinguished men for a national recognition of their services, there are few which surpass those of the great circumnavigator, Captain James Cook. A few of his relatives have taken the initiative in an attempt to raise a PUBLIC MONUMENT to his memory, with the fullest assurance that nothing more is required than the organisation of a legitimate channel through which the contributions of those who are ever ready to pay tribute to genius and moral worth may flow. A Committee is in course of formation, and a list of contributions will shortly be published. In the meantime subscriptions will be received, and specially acknowledged, by ISAAC BRESSEY SMITH, Esq., Hon. Sec., 5, Grove Road, Bow Road, London, E., and 26, Great St. Helen's Chambers, City, E.C.

The following sums have been placed at the disposal of the Honorary Secretary towards defraying preliminary expenses:—

Mrs. Ann Smith, widow of Captain John Smith (*b*), R.N.	(relatives)	£5	5 0
Charles Cook Smith, Esq.	,,	2	2 0
James Summers, Esq.		2	2 0
A Friend		1	1 0

A. DAVIS, 33, Strand, W.C.

H. PEAT,
SADDLER AND HARNESS MAKER,
14, OLD BOND STREET, LONDON, W.

SPORTSMEN AND GENTLEMEN OF THE ARMY AND NAVY.—S. & B. SOLOMONS, Opticians, 39, Albemarle Street, Piccadilly, W., opposite the York Hotel. Portability combined with great power in FIELD, RACECOURSE, OPERA, and general out-door day and night powerful waistcoat-pocket PERSPECTIVE GLASSES, weighing only 4 ounces each, containing 12 and 18 lenses, constructed of German glass, will show distinctly persons to know them at two-and-a-half and three miles. They serve every purpose on the Racecourse and at the Opera House. Country scenery and ships are clearly seen at eight to ten miles. They are also invaluable for Shooting, Deerstalking, and Yachting. Her Majesty's Coast Guards are making use of them as day and night glasses. The terms for them are powerful and brilliant Telescopes for both eyes. The most powerful Telescopes, possessing such extraordinary power that some, three-and-a-half inches, with an extra astronomical eyepiece, will show distinctly Jupiter's moons, Saturn's ring, and the double stars; with the same telescope a person can be seen and known three-and-a-half miles distant, and an object from fourteen to sixteen miles. They are in endless variety, of larger and all sizes, with increasing powers, and are secured by Her Majesty's Royal Letters Patent.

FIELD GLASS.—The BEST is BURROW'S MALVERN LANDSCAPE GLASS, invaluable to Sportsmen, Military and Naval Officers, Travellers, &c. Compact, portable, and officient, combining a wide field of observation with extraordinary defining power. In sling case, 3½ guineas. Sent free on receipt of post office order to W. & J. BURROW, Great Malvorn, Worcestershire.

FOR FOREIGN OFFICE PASSPORTS, VISAS, AND MOUNTING, apply to TURNER & ADAMS, 65, King Street, Downing Street, S.W. Town and Country orders completed per post, and first-class couriers provided.

DINNEFORD'S PURE FLUID MAGNESIA

Has been for many years sanctioned by the most eminent of the Medical Profession, as an excellent remedy for

ACIDITIES, HEARTBURN, HEADACHE, GOUT, AND INDIGESTION.

As a MILD APERIENT, it is admirably adapted for DELICATE FEMALES, *particularly during Pregnancy*; and it prevents the Food of Infants from turning sour during digestion. Combined with the

ACIDULATED LEMON SYRUP,

it forms an *Effervescing Aperient Draught*, which is highly agreeable and efficacious.

PREPARED BY DINNEFORD & CO., DISPENSING CHEMISTS, (and General Agents for the *Improved Horse Hair Girer and Belts*),
172, NEW BOND STREET, LONDON, W.,
And Sold by all respectable Chemists throughout the Empire.

DR. BUCHAN'S PATENT SUGAR-COATED VEGETABLE PILLS, VEGETABLE SKIN OINTMENT, and CONCENTRATED VEGETABLE ESSENCE, for Purifying the Blood, Regulating the Bowels, and Removing Vitiated Humours, Bilious and Liver Complaints, Rheumatism, Gout, Scorbutic Affections, Costiveness, Skin Eruptions, deep-seated Ulcers, and all Diseases of the Nervous System, from whatever cause, &c., affording at once a new lease of life to the sickly and aged of both sexes, whilst in addition imparting a beautiful and clear complexion, so anxiously sought for by all. Proved by the sworn testimonies made before the Lord Mayor of London and sitting Magistrates. Sold by Buchan & Co., Patentees, 22, Newman St., Oxford St., London, W., and all chemists in town and country. Prices:—Pills, per box, 1*s.* 1½*d.*, 2*s.* 9*d.*, and 11*s.*; Ointment, per pot, 1*s.* 1½*d.*, and 2*s.* 9*d.*; Essence, per bottle, 11*s.*, or family bottle containing four times that quantity, 33*s.* Agents:—Barclay, 75, Farringdon Street, E.C.; J. Sanger, 150, Oxford Street, W.; Hannay, 63, Oxford Street, W.; Butler, 4, Cheapside, E.C.; Hooper, 43, King William Street, London Bridge, E.C.; R. Howden, 78, Gracechurch Street, E.C.; Prout, 229, Strand, W.C.; &c. &c.

Just published, gratis, or post free for one stamp, to be had of all Agents, and at 22, Newman St., W., Extracts from Dr. Buchan's Work, entitled, BUCHAN'S DOMESTIC MEDICINES, being a Book of Reference, containing instructions for the cure of every ailment incidental to man, woman, or child.

NERVO-ARTERIAL ESSENCE, prepared only by Dr. WM. BATCHELOUR, M.R.C.S.E., 1835, and M.L.A.C. 1834. It strengthens the vitality of the whole system without reaction, and speedily removes nervous complaints. In bottles, at 2*s.* 9*d.*, 4*s.* 6*d.*, 11*s.*, and 33*s.*, at Goodyer's, 31, Regent Street, W.; Butler & Crispe's, 4, Cheapside, E.C.; Sutton & Co., Bow Churchyard, E.C.; Barclay & Sons, Farringdon Street, E.C.: 12, Finsbury Place South, City, E.C., and all Chemists.

RUPTURES.—HUXLEY'S IMPROVED PATENT MOC-MAIN TRUSS dispenses entirely with the lever spring. A flexible band, perfectly imperceptible, encircles the body (in lieu of the old steel spring), and an elastic pad secures the hernia. Measure required—*circumference* two inches below the hips. Price single, 12*s.*; double, 19*s.*; postage 10*d.* and 16*d.* Illustrated circulars on application to Mr. E. HUXLEY, *12, Old Cavendish Street*, Oxford Street, W.

PHARMACIE FRANÇAISE, 57, PRINCES STREET, LEICESTER SQUARE, W.C.—LE MAOUT, Chemist, from Paris.—Medicamens Spéciaux—Remèdes Raspail—Capsules Le Maout—Elcoq's Medicines, Plants, and all French Medical Articles.—Prescriptions accurately prepared. Chloroform Capsules for Sea-sickness.

SAVARESSE'S PATENT FLEXIBLE CAPSULES, by which Castor Oil and nauseous Balsamic Medicines may be taken without inconvenience. These Capsules are made of animal membrane of slow solubility, thus obviating the usual nausea and unpleasant eructations which follow the use of those made with Gelatine. These Capsules may be obtained of BELL, 338, Oxford Street, W.; SANGER, 150, Oxford Street, W.; HOOPER, Pall-Mall East, S.W.; KEATING, St. Paul's Church Yard, E.C.; and medicine vendors throughout the kingdom.

EVANS & LESCHER, London, Patentees.

A BOON TO NERVOUS SUFFERERS.

HENRY SMITH, Doctor of Medicine of the Royal University of Jena, &c., will send, post free, on receipt of a stamped directed envelope, THE WARNING VOICE, a new medical work on the most effectual cure of Nervous Debility, Loss of Memory, Indigestion, &c., which, if neglected, result in consumption and premature decay; with plain directions for perfect restoration to health and vigour. The true guide to those who desire a speedy cure. Every young man should peruse this excellent little work, if he values his health, happiness, and peace of mind. Sent direct from the Author's residence, 8, Burton Crescent, Tavistock Square, London, W.C.

Post free for two stamps.

EXTRAORDINARY DISCOVERY OF AN entirely NEW THEORY of CURING DISEASE, being the recorded experience of 30 years' special practice in Great Britain, France, and America—with evidence of the actual effects of the latest Scientific Discoveries, denominated NEW LOCAL REMEDIES, with the adjuncts of Constitutional Treatment not yet generally known, even by the medical faculty of the British Empire, but which have been recently introduced into England. Sent free on receipt of two stamps to defray postage, &c., by W. HILL, Esq., M.A., &c., 27, Alfred Place, Bedford Square, London, W.C.—Daily consultations from 11 till 2, and 6 till 8 Evening.

KEATING'S PERSIAN INSECT DESTROYING POWDER.—FLEAS IN DOGS, POULTRY, &c., are instantly destroyed, as also Bugs, Beetles, and every other insect, by this Powder, which is perfectly harmless to animal life; sportsmen particularly will, therefore, find it invaluable. Sold in Packets, 1*s.*, 2*s.* 6*d.*, and 4*s.* 6*d.* each, or post free for 14, or treble size for 36 postage stamps, by THOMAS KEATING, Chemist, 79, St. Paul's Churchyard, London, E.C. Take notice, each genuine packet bears the above name and address. Sold by all druggists.

BLIGHTS, MILDEW, BED-BUGS.—GISHURST COMPOUND, patented for preventing and destroying these and other pests. See *Gardeners' Chronicle*, *Cottage Gardener*, and *Field*. In boxes, 1*s.*, 3*s.*, 10*s.* 6*d.*, retail of all Nursery and Seedsmen. Wholesale of PRICE'S Patent Candle Company, Limited.

H. J. & D. NICOLL'S Establishments for Gentlemanly and Moderate-priced Clothing, REGENT STREET, CORNHILL, & MANCHESTER.

THE CAPE PALETOT, INVERNESS CAPE, or SLEEVED CAPE, used in private life, as well as for Volunteer Corps.
H. J. & D. NICOLL, 114, 116, 118, 120, Regent Street, W.; 22, Cornhill, London, E.C.; and 10, St. Ann's Square, Manchester.

CLOTHING FOR YOUTH.—The KNICKERBOCKER, the Highland Dress, Ladies' Travelling Mantles, Riding Habits, and Pantalons de Dames à Cheval, with much novelty and general excellence, H. J. & D. NICOLL have for the remainder of this season at WARWICK HOUSE, 142 and 144, Regent Street, W. In the autumn this branch will be removed to the rear of the old Establishment.

VISITORS TO THE SEASIDE AND TOURISTS will find much ease and comfort in the NEUTRAL-COLOURED LOOSE COAT, fastened by one or more buttons, with Trousers and Vest, all of the material, as originally introduced by Messrs. NICOLL, of Regent Street, W., and Cornhill, E.C.; they recommend also a Black Velvet Coat, and for gentlemen seeking a kind of half-dress morning coat a fine black cloth is specially prepared; this garment is edged with braid and cut somewhat as a riding-coat, and is getting into general use.

MODERATE PRICES WITH GENERAL EXCELLENCE.

E. MOSES & SON can confidently assert, that they possess advantages and facilities which are quite beyond the reach of any other house in the trade, and are thereby enabled to offer a REALLY GOOD ARTICLE at a VERY LOW PRICE. The most skilful cutters are employed, and durability of material and workmanship may be relied on.

The BESPOKE TAILORING DEPARTMENT is most daily replenished from the best home and foreign markets.

The READY-MADE CLOTHING DEPARTMENTS are furnished with an immense assortment of goods for all classes, and all occupations. Also a great variety of CLOTHING for JUVENILES of all ages.

The HOSIERY and DRAPERY, HAT and CAP, and BOOT and SHOE DEPARTMENTS, contain a carefully-selected stock of the best and newest manufactures.

N.B. Should any article not be approved of, it will be exchanged, or the money returned.

Gratis on application, or post free, E. MOSES & SON'S Book for the Present Season, containing "The Growth of an important Branch of British Industry," with rules for Self-measurement, and List of Prices. Also, lately published, an elaborate Plan of their City Premises.

1860.—Just published, post free, three stamps.
"GABRIEL ON THE LOSS AND ONLY EFFECTUAL MODE OF RESTORING THE TEETH." Explains their Patented System of supplying Artificial Teeth, which are warranted to answer perfectly for mastication and articulation, without springs, wires, or any metal, and without any operation; and shows how the best materials, with first-class workmanship, may be obtained at less than half the ordinary cost.
Messrs. GABRIEL, the Old Established Dentists (see Diploma, 1815), 33 & 34, Ludgate Hill, City, E.C., and 110, Regent Street, W. Particularly observe the name, and that the entrance to the City Establishment is up the private passage next the State Fire Insurance Office.
"Gabriel's Treatise should be read before consulting a dentist; it will save much money and more annoyance; and emanating from such a source, may be relied on."—*Herald.*
Liverpool, 134, Duke Street.

DAVIESON'S EVERLASTING TEETH.
THE LATEST DISCOVERY.
MR. EDWARD DAVIESON, SURGEON-DENTIST, has introduced a material for the construction of ARTIFICIAL TEETH so extraordinary that nature appears to have made good the ravages of TIME, DISEASE, or ACCIDENT, and when fitted detection is impossible, even though the wearer's mouth be closely examined. The price is so moderate that it is within the reach of all, and it is fitted without springs or other unsightly fastenings. The removal of stumps is unnecessary, and thus all pain is avoided. MR. EDWARD DAVIESON invites one visit of inspection to his establishment, which will convince the most sceptical of the truth and straightforwardness of this statement. The LIQUID ENAMEL, for Stopping Decayed Teeth, is ENAMEL WHITE, keeps its colour, and lasts for ever. It is invaluable for Front Teeth. Attendance daily from Ten till Six. Consultations free. MR. EDWARD DAVIESON, Electric Telegraph Office, 448, West Strand, London, W.C. The Descriptive Pamphlets free for two stamps.

TEA.—The Newspapers and Price Currents daily report that COMMON Teas are dearer, and FINE are cheaper. What is the reason of this? Because common (and not fine) is sold to the Public. STRACHAN & Co. guarantee that their Black Teas, from 3s. 8d. to 4s. 2d., consist only of the FINEST descriptions.
26, Cornhill, E.C.

RIFLE CONTEST.—A MEETING OF THE VOLUNTEERS OF THE COUNTY OF LANCASTER, and OTHER VOLUNTEERS, as well as ALL-COMERS, will be held on the Rifle Range at Hightown, nine miles from Liverpool on the Southport Railway, on MONDAY, 29th OCTOBER; TUESDAY, 30th; and WEDNESDAY, 31st, when Prizes will be shot for, subject to Regulations hereafter to be published, the shooting being conducted strictly according to Hythe Rules. The Volunteers' Prizes will be competed for with the short and long Enfields, government pattern. The All-comers may use any description of Rifle, weighing not more than 9½ lbs., and the pull of the trigger not less than 3 lbs. No hair triggers or telescope sights permitted.

ADAM S. GLADSTONE, Lieut.-Colonel Commanding 2d Batt. L. R. V.
R. J. TINLEY, Major 2d Batt. L. R. V.

Liverpool, 21st August, 1860.

NAVAL AND MARINE CADETS.

ROYAL NAVAL ESTABLISHMENT,
EASTERN PARADE, SOUTHSEA.

MRS. EASTMAN continues this Establishment, with the able assistance of the Head Master, Mr. SPICKERNELL, and the other Masters, so many years with the late Mr. Thomas Eastman, R.N.

In addition to special instruction for Naval Examinations, Pupils receive a Classical and sound General Education, in preparation for the Army and other Professions.

354 Gentlemen have passed from this Establishment as Naval Cadets, and more than 200 as Marine Cadets.

Applications to be addressed to Mr. SPICKERNELL, the Head Master. Prospectuses, and other information, may be obtained at Messrs. Booth's Library, 307, Regent Street, W.

NAVAL CADETS.

OF THE 43 SUCCESSFUL CANDIDATES at R. N. College, 12th June, TEN were prepared at NORTH GROVE HOUSE, SOUTHSEA, viz., Messrs. Stewart, Gabbett, V. Orlebar, Henderson, Master, Fellowes, Sidney Smith, Blackett, Millett, Knollys. Mr. Mounsteven, who passed first at the Competitive Examination for Marine Cadetships, was also prepared at North Grove House.

W. BELL, Chaplain, R.N.;
A. BURROW, Chaplain and Naval Instructor;
W. JOHNSON, Naval Instructor.

ROYAL NAVAL ACADEMY.—Of the many pupils prepared at the Academy conducted by MR. C. F. COOPER, R.N., not one has failed to pass, and eight have taken 1st, 2nd, and 3rd places at the Royal Naval College.—Address, Beresford Place Southsea.

NAVAL AND MARINE CADETS ETC.

THE REV. THOS. KNIGHT, B.A. Hon. St. John's, Cam., receives PUPILS for the Royal Navy, Army, Woolwich, and Addiscombe. NINE out of ELEVEN of Mr. Knight's Pupils PASSED at the Royal Naval College, 12th June, 1860, taking 1st, 2nd, 3rd, 6th, 7th, 11th, 11th, 17th, 19th places in the respective divisions of 99 candidates, of whom 62 passed and 37 failed.—St. Mary's Hall, Southsea, Hants.

STAFF EXAMINATIONS. — Twenty-four Officers have already joined the Military College of Sunbury this year, to read either for the Staff College, or for direct appointment on the Staff. Apply to Captain LENDY, Sunbury, S.W.

ROYAL MILITARY ACADEMY, WOOLWICH, S.E.

At the recent Competitive Examination for admission into the Royal Military Academy, Woolwich, commenced on the 30th ultimo, the following gentlemen passed directly and on first trial from Mr. R. B. DE BURGH'S MILITARY ESTABLISHMENT, Dublin:—

Mr. G. C. Bayley,	5th Place.	Mr. F. B. Knox.	
Mr. T. Fraser,	9th ,,	Mr. C. W. E. Murphy.	
Mr. H. M. Hayes,	13th ,,	Mr. C. F. B. Grey.	
Mr. R. G. Scott,	17th ,,	Mr. W. H. Rathborne.	

The number of successful candidates direct from Mr. De Burgh being greater than that from any other Establishment in the United Kingdom.

At the Examination held in January, 1860, the following gentlemen (the only candidates direct from Mr. De Burgh's) passed on first trial:—

Mr. W. J. Galway.	Mr. R. A. Livesay.
Mr. J. L. Morgan.	Mr. C. Greer.

Mr. Galway obtained 4432 Marks and the Tenth Place; and Mr. Morgan 4108 Marks and the Fourteenth Place. These high Marks were obtained without the aid of Classics, their Marks for Mathematics alone having been 2555 and 210 respectively.

ROYAL INDIAN MILITARY COLLEGE, ADDISCOMBE.—At the late Competitive Examinations for admission into the Royal Indian Military College, held in January, 1860, and May, 1860, the following gentlemen (the only candidates direct from Mr. De Burgh's) passed on first trial:—

Mr. H. Hardinge	... ...	2nd Place.
Mr. L. F. Boileau	... ...	12th ,,
Mr. T. R. Disney	... ...	25th ,,

At the above Examinations, the successful candidates direct from Trinity College, Dublin, had been under Mr. De Burgh's tuition.

Mr. De Burgh's references to the Parents of present and former pupils include the following:—The Right Hon. and Right Rev. the Lord Bishop of Meath, the Right Hon. Joseph Napier, Venerable the Archdeacon of Meath, Colonel Lake, C.B.; Colonel Knox, J.P.; Colonel Morgan, R.A., Swansea.

No. 6, Harcourt Street, Stephen's Green, Dublin.
July 30th, 1860.

ARMY EXAMINATIONS.—Candidates for the Artillery, Line, and Cavalry, are rapidly and efficiently prepared at an establishment, the pupils of which have, within the last two years, come out eight times first, five times second, and three times third on the list. Apply to Captain LENDY, Sunbury, S.W.

MILITARY EXAMINATIONS.—A Gentleman in Her Majesty's Service, who has had great experience in the preparation of Officers for the Military and Naval Professions, is willing to superintend personally the studies of a few gentlemen (not more than four) who may be desirous of qualifying themselves for Commissions in the Army, or Corps of Royal Marines.—Address to A. B., Caine's Library, Wish Street, Southsea, Hants.

ARTILLERY EXAMINATIONS.—Candidates for the Competitive Examinations are individually prepared at an establishment which receives six pupils only for that branch of the Service. Four resident professors. Apply to X., care of Messrs. PARKER, 445, Strand, W.C.

SPECIAL MILITARY TUITION, including Geometrical and Military Drawing, Hindustani, Fortification, Military Surveying and Reconnoitering. By Lieut.-Colonel MORLAND, who also continues the preparation of candidates for Addiscombe and the Military Competitive Examinations.—At 20, Norland Square, Notting Hill.

HANWELL COLLEGE, Middlesex, W., is still retaining its high character; it has long been known as one of the most successful Institutions in the kingdom. A Prospectus will be forwarded on application to the Rev. Dr. EMERTON, Principal.

EDUCATION IN FRANCE.—TWO GENTLEMEN, one an English and the other a French Protestant, with the assistance of five highly-qualified Masters, PREPARE 14 YOUNG GENTLEMEN for the Competitive Examinations for Woolwich, Sandhurst, Addiscombe, the Indian Civil Service, and direct appointments in the Army. Terms, 50 to 60 guineas. Address, B.A., Post-Office, St. Pierre, Lés Calais.

FELSTED GRAMMAR SCHOOL,
Near Chelmsford, Essex.
(Founded by Lord Rich, in 1564).

VISITOR—The Lord Bishop of Rochester.

TRUSTEES.

The Venerable Archdeacon Burney, D.D.	T. B. Western, Esq.
T. W. Bramston, Esq., M.P.	Onley Savill Onley, Esq.
J. J. Tufnell, Jun., Esq.	Rev. W. B. Ady.
Rev. John Bramston, M.A.	And other Gentlemen of the County.

HEAD MASTER—Rev. W. S. Grignon, M.A.
SECOND MASTER—Rev. J. H. Backhouse, M.A.
ASSISTANT MASTERS.
Rev. C. P. Marriott, M.A.; Mr. E. T. Constable, B.A.; Rev. C. P. Wardale, B.A.

The regular course of instruction includes English, Greek, Latin, French, and German, Ancient and Modern History and Geography, Arithmetic, and Mathematics.

Drawing, Music, and Drilling are taught by occasional Masters.

Terms:—Board (including washing), £28 per ann.; Tuition (including stationery), £8 per ann.

Under the scheme by which the School was reconstituted in 1851, the whole amount received on account of board is expended for that purpose, and no augmentation of the trust funds, or of the income of the masters, is allowed to accrue from this source.

The number of boarders has been limited hitherto to 74; by the erection of new buildings accommodation is now provided for an increased number.

For further information application may be made to the Head Master, at Felsted; or to Mr. ANDREW MEGGY, Solicitor, Chelmsford, the Clerk to the Trustees.

GEORGE H. DAW, Gun-maker and Contractor,
57, Threadneedle Street, London, E.C.
Every Gun made of first-rate material, carefully tested, warranted, and moderate in price.
Gun Factory Established 1780.

THOMAS WILSON'S BREECH-LOADING RIFLE.

Mr. Thomas Wilson begs to call the attention of the public to his new BREECH-LOADING RIFLE, and to state that he has committed the working of the patent to Messrs. Rabone, Brothers, & Co., of 47, Broad Street, Birmingham, to whom all inquiries or other communications may be addressed.

This Rifle is well adapted for all branches of Her Majesty's Service, and is pronounced by the highest authorities to be the most simple, safe, and soldier-like form of breech-loader ever introduced. Among others it possesses the following important advantages:—

1st. The action is so simple and direct that it can be loaded and fired eight or ten times per minute.

2nd. It is free from screws, levers, and all complications, and is not liable to get out of order.

3rd. It is easy to manufacture, and can be made entirely by machinery.

4th. It is so constructed that accident from careless loading, or otherwise, is impossible.

5th. The breech-plug can be detached for cleaning the barrel, &c., in a moment, and can be replaced again as quickly, for firing, without the aid of tools. This facility would be occasionally valuable in rendering the Gun useless to an enemy, or to mutinous troops.

6th. The action is always in good order, requiring no adjustment in use.

7th. The action is equally applicable to single and double-barrel Guns, and may be used for sporting as well as military purposes.

8th. The principle can be applied to all ready-made Enfield guns, at an immense saving to the country.

Volunteers are recommended not to purchase their arms till they have inspected the above Rifle.

A pattern may now be seen at Mr. Lancaster's, No. 151, New Bond Street, W.; and at Mr. Pritchett's, No. 86, St. James's Street, London, S.W.; as well as at Messrs. Rabone, Brothers, & Co.'s, 47, Broad Street, Birmingham. Every information as to cost and other details can be obtained at either of the places named.

WATERPROOF ENFIELD CARTRIDGES, impervious to wet or damp; COMPRESSED BULLETS, 568 or 577.—100 rounds of these Cartridges may be fired from an ordinary Enfield Rifle without fouling the barrel. Volunteer Corps ordering 10,000 and upwards, 60*s.* per 1000; blank, 33*s.* per 1000.

[COPY.]
"Ordnance Select Committee, Royal Arsenal, Woolwich, April 17th, 1860.

"Sir,—Since I last addressed you on the subject of your Waterproof Cartridges, I have to inform you that 60 of them have been exposed in an atmosphere saturated with moisture, at a temperature of 90 degrees, for a fortnight. The result has been favourable, as far as this test is concerned, to their Waterproof qualities.

"I have, therefore, to request you will be good enough to state, for the information of the Committee, the nature of the lubrication you employ; whether it is in any way connected with the Waterproof properties of the Cartridge, and whether, in the event of their being adopted, the Service lubrication, which is wax, might not be employed.

"I have the honour to be, Sir,
"Your obedient Servant,
"J. H. LEFROY, Colonel, R.A.

"Mr. Thos. H. Anthony,
"37, Broad Street, Birmingham."

Waterproof Cartridges for Westley Richards', Wilson's, Calisher & Terry's, Leetch's, and other breech-loading Rifles, for foreign service.

ARCHIBALD GRAHAM, *to whom remittances are payable. The subscription to the paper is 7s. 7d. per quarter, or 30s. 4d. per annum, payable in advance, postage included.*

WE have already on several occasions called attention to the great importance of an efficient Transport Service. The amalgamation of the Indian Army with Her Majesty's other troops gives the subject a new importance; and the busy way in which our French ally is remedying his former deficiencies in that respect, affords us the necessary example which we may imitate. In his evidence before the late Select Committee of the House of Commons on Transport Service, Sir Richard Airey tells us, "We had to lend the French sea-transports for the Crimea;" and it may be remembered, that in the Baltic campaign, we made up for our small contingent of land forces by undertaking the sea conveyance of the troops of the French. This arrangement suited both parties very well then; but, as regards the French, they will never be again beholden to England for transport by sea. They did much in the Italian war, but not enough for Louis Napoleon. He is building a fleet of transports.

No doubt our mercantile marine furnishes us with enormous advantages, compared with France, for obtaining the services of transports on hire; and no probable deficiency in that respect compels us of necessity to do as the French are doing. Nay, it will be in the recollection of our professional readers, that in the lecture of Mr. Alexander Wood before the Royal United Service Institution, noticed in the GAZETTE of the 5th of May last, his valuable suggestions as to more frequent colonial reliefs, and especially for the troops employed in India, were based upon the assumption that the Transport Service would be performed by chartered vessels; and he appears to have been under the impression that this would be cheaper than by Government troop-ships. Since then, however, we have had the evidence taken by the Select Committee on Transport Service, which proves that even on the score of economy to have Queen's ships is better.

Mr. Wood was one of the Commissioners of Emigration before that Board was reduced, and he had previously been private secretary to Lord Hardinge while he was Secretary for War. He seems thus to have imbibed a notion, not unnaturally biased, in favour of the two departments in which he had served, and therefore to have come to the conclusion that the best organisation for an efficient Transport Service would be a Royal Commission like that of the Emigration Commissioners, but under the War Department. He had evidently imbued his late colleague, Mr. Murdoch, the chairman of the Emigration Board, with the same idea which we find exhibited in his evidence before the Transport Committee. If these views are correct, of course we should not only build or buy no more Himalayas, but all the troop-ships we now possess should be got rid of; for these gentlemen were actually of opinion that the Admiralty and naval officers ought to have nothing whatever to do with the management of the Transport Service.

Both Mr. Wood and Mr. Murdoch, however, are most clear in stating the grounds of their opinions, and their views can therefore be brought to the test of evidence and argument. Mr. Wood admits that it may seem hazardous to remove the superintendence of the Service from the Admiralty; but for what he calls a proof that the sea-transport of troops may safely be intrusted to a Board presided over by the Quartermaster-General, and subordinate to the War Minister, with a marine department composed exclusively of civilians, he "confidently refers to the operations of the East India Company and the Emigration Commissioners." He also complains of the present divided authority between the Quartermaster-General's office and the Admiralty, hinting at its many inconveniences; speaks of orders and counter-orders as frequently occurring, and says that the shipping not being under military control, troops are kept waiting for their ships and embark discontented. Mr. Wood will doubtless be glad to find, from the evidence of the Quartermaster-General himself, that these are only imaginary inconveniences, and not in the least realities. Sir Richard Airey points out a clear distinction between what the military department has to look to in transports, and what the Admiralty is concerned with:

"My department only treats them as floating barracks, and sees that the accommodation, the ventilation, the supplies, &c., and the military fittings, are all right;" and "that is quite distinct from the *conveyance* of the soldier." He adds, "At present I cannot make any complaint, or instance any failure in the existing order of things;" and thinks, "the Admiralty being professional men, acquainted with everything nautical, are just as capable of carrying out details as a newly-created Board would be. Instead of there being delays," he says, "I write letters addressed to 'the Secretary of the Admiralty,' but being marked 'for the Transport Service,' they go direct to that Department, and in many instances I have got a reply the very same day on which the letter has been written. A letter has been written in the morning, and before I have left the office I have got a reply."

Mr. Murdoch's views are most strong in favour of a Board of civilians with only one commissioner out of three attached to the Quartermaster-General's department; but he seems merely to have adopted these views at second hand, and he scarcely attempts to support them, when over-hauled with considerable skill by Lord Clarence Paget:

"There need not be a naval officer on the proposed Board, and there would be no communication with the Admiralty."

But when Lord Clarence points out how this would be likely to work in time of war at places abroad, Mr. Murdoch is obliged to confess:

"I have not considered that part of the question, and I do not feel competent to answer it off hand. It had not occurred to me as being so great a difficulty as you put it."

Then as to the authority in unloading and repairing transports by men-of-war's men, as in Balaclava Harbour during the Crimean war, he is asked,

"Do you think it is altogether divested of any naval considerations?"

The answer is strangely contradictory:

"It seems to me to be entirely a military question. The way in which the work should be done is a naval question, but the order in which it should be done is a military question."

In contrast with such speculative and confused ideas, we have the very clear evidence of the present Assistant-Quartermaster-General at Aldershot, who has seen a great deal of service both in the Crimea and China. He says:

"When application is made to the Admiralty, I have never found any difficulty whatever in having the transport supplied. . . I think it is a very great advantage in war time to have the transport department under the authority of the Admiralty. There were many instances in the Crimea where there was a very great advantage from the Admiralty having control over the shipowners and captains of ships, which I think would not have been the case if military men or civilians had had the superintendence. . . The Quartermaster-General's department in China was in direct communication with the Admiralty for the shipment of troops, through the Admiralty agents; I was the Assistant-Quartermaster-General of the force there, and I never found any difficulty myself in getting what transports were required for the troops. No obstacles whatever were at any time thrown in my way on account of being obliged to apply to the Admiral."

Sir Richard Airey confirms all this, and lets us know still further how necessary an Admiral's control is:

"We could not have got on without naval assistance. The transports were virtually under the Quartermaster-General; but there was a naval officer over the whole squadron of transports, who was in direct communication with the Quartermaster-General. Those captains of merchantmen are sometimes the most insubordinate set you can conceive. I remember a case where a man would not do what he was ordered, till Lord Lyons said, 'You may tell him if he does not do it, I will send a man-of-war and fire a broadside into him!' It is impossible to carry on the operations without the dominion of the flag."

This part of the question may be considered as more than exhausted.

Sir Richard Airey gives also a very decided opinion in favour of building more Government transports. "I have always thought that it would be very advantageous if the Admiralty had a certain number of what might be called military troop-ships, and under pennants, such as the Himalaya. The Himalaya is the finest transport we have." So much for the military opinion; and the Admiralty authorities prove that what the military desire as most conducive to the comfort of the soldier, is also by far the cheapest mode of conveying troops. Of course this is the main point. The "final cause" of a Transport Department is not to exhibit merely the relative administrative abilities of civilian and naval men. Why Mr. Murdock imagines that nautical knowledge need interfere with the other talents of a naval officer, we do not pretend to understand; but, whatever the constitution of the Board, or whether the transport Service is to be managed by a civilian or naval Comptroller, it is certainly proved that it ought to be under the Admiralty.

Captain Eden, the Lord of the Admiralty who now superintends the Transport Department, is clearly of opinion that we want eight or ten Himalayas to manage the Indian and colonial reliefs in future. The saving would be enormous. The Himalaya conveyed 850 men from England to Malta at a cost of 12,202*l.*, while the conveyance of 350 men by the Indiana liner-transport cost 16,880*l.* for the same voyage. From the questions Lord Clarence Paget asked a Committee, he evidently agrees with Captain Eden; and indeed how can there be two opinions to those who have considered the subject. Their views are supported by the evidence of the present Comptroller of Transports under the Admiralty, Mr. Richards, and by the valuable evidence and returns produced by Mr. Giffard, the Secretary to the late Transport Board, and Mr. Willis, the chief clerk. But there are many other considerations bearing on this question, which we must notice more fully on a future occasion.

The recent experiments at Portsmouth upon iron-plates for ship-armour, have furnished some important results. It appears that the slabs of scrap and puddled iron have been penetrated but in one place, and that as a general rule they withstood the impact of a 68-pounder solid shot at short range very well. So much so, that an ordinary observer might be led to imagine that a ship cased with them would be protected against the fire of our heaviest sea ordnance. However, an inspection aboard the Sirius, the largest ship upon whose side they are fixed, soon dispels the illusion. For where the shot has penetrated and passed through the iron plate as well as the vessel's side, less damage has been done to the hull of the Sirius than where the penetration has been less complete. In other words, where the plates resisted the shot, the timbers of the ship immediately behind them are riven to lathwood, bolts are drawn, and the massive iron knees of the vessel snapped asunder by the shock. The destruction is so extensive as not to admit of being repaired anywhere except in a dock, and until this was done, a ship so struck would leak like a sieve, and would be likely to founder, for from the nature of her outward covering it would be impossible to repair her outside, and to patch up her shattered timbers seems equally difficult. And when it is known that the plates we allude to are very good ones, indeed some of the best yet tried at Portsmouth, it is difficult to suppose that the casing of a ship upon the vertical principle can ever protect her from heavy shot at short range. We have alluded to this fact, because the framework behind Jones's angulated target, although weaker than any ordinary frigate's side, and subjected to a much more severe hammering than any plate placed vertically ever sustained, exhibited none of the alarming symptoms of weakness to be seen on board the target-ship Sirius.

THE ARMY.

4th Dragoon Guards. A medical board is ordered to assemble at Aldershot to report upon the health of Surgeon Cooper.

6th Dragoons. Captain the Hon. C. W. Thesiger is in China, on the staff of Brigadier Pattle, commanding the cavalry.

10th Hussars. The regiment will move from Aldershot during the ensuing week, and will be quartered as follows: head-quarters and five troops at Ipswich, a squadron at Northampton, and a troop at Norwich.

16th Lancers. The regiment is ordered to move from Aldershot about the end of the month to Hounslow, detaching to Hampton Court and Kensington Gate.

18th Hussars. The death of Lieutenant Dane is reported, which leaves the regiment short of its complement of officers by two lieutenants and four cornets.

Royal Artillery. Captain Phelips has embarked for St. Helena; Major Boothby, Lieutenant Bicker, and Lieutenant Waddington, returned to their duties at Malta on the 5th of September, from a visit to the camp of General Garibaldi in Sicily and Calabria; Lieutenant M'Naughten was engaged in the operations against the rebels in New Zealand.

Royal Engineers. Lieutenant Cautley and a detachment of Royal Engineers are ordered to proceed from head-quarters, Chatham, to the School of Musketry at Hythe, on the 21st instant, to go through a course of rifle instruction at that establishment. Lieutenant Mould was engaged in the operations against the New Zealand rebels, which are reported in another part of our paper. A regimental court-martial, which had been sitting for some days at the Ordnance Survey Office, Southampton, to inquire into certain charges against four non-commissioned officers, terminated on Monday. It appears that a party of the corps of Royal Engineers—sergeants, corporals, and privates, together with Colour-Sergeant Spalding—were out on leave on Saturday afternoon, the 1st instant, in a boat. Sergeant Jenkins, with a short loaded stick, struck Sergeant Macdonald so severely upon the hand as to disable him. Sergeant Macdonald turned round, and in mistake struck Corporal Hopper. There then arose a *mêlée* between the non-commissioned officers; Sergeant Macdonald's head was cut open, his face was disfigured, and he was otherwise seriously injured. The privates, not wishing to be mixed up in the *fracas*, got out of the boat into another. Sergeant Spalding and others cried out "Murder!" Two boats put off from Hythe with men, who separated the belligerents, and placed them in different boats. Colour-Sergeant Spalding's duty was to have put them at once under arrest, but this he omitted to do. Colonel Sir Henry James, the Superintendent of the Ordnance Survey, was the president at the court-martial, the result of which was, that Colour-Sergeant Spalding was reduced to the rank of an ordinary sergeant, Sergeant Macdonald acquitted, Sergeant Jenkins reduced to the ranks, and Corporal Hopper also reduced to the ranks.

Military Train. On Wednesday the 3rd and 7th Battalion of the Military Train, in Camp at Aldershot, under the command of Major Mc Court and Major Hill (the whole under command of the first-named officer) were paraded in rear of the Club House, for the inspection of Lieut.-Genera Sir John Pennefather, K.C.B., who having minutely inspec ted them, expressed himself pleased with the state of efficiency of both battalions, and especially with the condition of the horses.

Grenadier Guards. 1st battalion to move on Oct. 2, from St. George's, Kensington, and Magazine barracks to Dublin; 2nd battalion from Portman Street and St. John's barracks to Wellington barracks; 3rd battalion, from Dublin to the Tower.

Coldstream Guards. 1st battalion to move on Oct. 2nd from Wellington barracks to Portman Street and St. John's Wood barracks; 2nd battalion, from Windsor to St. George's, Kensington, and Magazine barracks.

Scots Fusilier Guards. 1st battalion to remain at Wellington barracks; 2nd battalion to move from the Tower of London to Windsor on the 2nd proximo.

2nd Regiment—2nd battalion. As we have already stated, this battalion will remain at Corfu, the move to Gibraltar being countermanded.

8th Regiment.—Major Bayly, commanding the depôt at Chatham, has received orders from the Horse Guards for the removal of the depôt from Chatham in the following order:—4 sergeants, 4 drummers, and 350 rank and file, with Captain Frederic W. J. Dugmore, Lieutenant C. N. Fry, Ensign Robert Handcock, and Ensign William A. Bridge, in command of Major Bayly, to proceed to Portsmouth to join the service companies of the regiment, which has recently returned from India; and 2 sergeants, 1 drummer, and 100 rank and file, under command of Captain Astell T. Welsh, proceed to Templemore to join the 16th Depôt Battalion, then to form two companies, the 11th and 12th. The 8th was inspected on Tuesday by Major-General Eyre.

11th Regiment. One wing of the 1st battalion 11th Regiment has proceeded from head-quarters at Portsmouth on detached duty to Portland and Weymouth, relieving there a wing of the 1st Stafford Militia.

14th Regiment. The Robert Lowe, steam transport, having on board the first (head-quarter) division of the service companies of the 2nd battalion 14th Foot, consisting of five companies, sailed from Queenstown on the 7th instant for New Zealand. The following officers have embarked with this division:—Colonel Sir James E. Alexander; Major W. Douglas; Captains Edward W. Saunders, Alexander Strange, W. A. Dobie, A. Gresson, and Iver M'Iver; Lieutenants Kenrick Hill, G. H. Cope, James Anderson (instructor of musketry), John B. Frizell, and James S. Johnson; Ensigns John Lawrence, Charles Curtis, Cecil M'Mahon, and Aubrey Lisle Patton; Surgeon John E. Carte, M.B.; Assistant-Surgeon A. T. Carbery; Lieutenant and Adjutant J. Glancy, and Quartermaster James Spry. The Boanerges, sailing vessel, received on board at Queenstown on the 10th instant the second division, five companies, of the above regiment, the depôt of which has joined the 18th Depôt Battalion at Fermoy, from the Curragh camp.

19th Regiment. The 2nd battalion arrived at Portsmouth on Thursday from Aldershot. Captain Currie, Brigade-Major at Aldershot, is on sick leave to November 10th.

23rd Fusiliers. Captain W. M. Lees has been ordered from Chatham to join the 1st battalion in India.

25th Regiment. The 1st battalion will not return home from Gibraltar as previously notified.

29th Regiment has arrived at Aldershot from the northern district, and is attached to the 3rd brigade.

38th Regiment. Lieutenant Stokes has been appointed Regimental Instructor of Musketry.

40th Regiment. By detailed accounts in another part of our paper, it will be seen that the head-quarters under Lieut.-Colonel Leslie, have been dispatched to reinforce their comrades in New Zealand. The following officers have been engaged with the rebels:—Major Nelson, Captains Bowdler, Messenger, and Richards; Lieutenants Brooke (killed), Dowman, Jackson, and Rees; and Ensign and Adjutant Whelan. Lieutenant Brooke had been in the service since 1853. By his death, Ensign Whelan obtains a lieutenancy without purchase.

44th Regiment. Ensign Sunderland having qualified at Hythe, has been appointed Regimental Instructor of Musketry.

46th Regiment. Captain Waldy has arrived from India in command of detachments.

Royal Marine Light Infantry. The corps, which was recently ordered to be augmented by 1000 men, in order to raise its full strength to 18,000 men of all ranks, is still nearly 800 men short of its full complement, most of the divisions being considerably below their required strength. Additional recruiting parties are being sent out. The bounty is double that given to those in the regiments of the Line, the former receiving 4*l.* and a free kit, and the latter 2*l.* and a free outfit. The following changes have taken place, announced in the Woolwich division of Royal Marines:—Captain Frazer, appointed to proceed on board Her Majesty's ship Mars for service, vice Webb, ordered to Ascension; Captain Seymour, to Her Majesty's ship St. Jean d'Acre, vice Davies, returned to England, on recommendation, for two months' leave of absence; Captain Kennedy to Deptford, vice Seymour, to the St. Jean d'Acre; Lieut.-Colonel Parke, to recruiting at Bath, to relieve Lieut.-Colonel Lambrick, appointed to Plymouth division.

51st Regiment. The order for the depôt of the 51st to proceed from Chichester to Chatham to relieve the depôt of the 8th (the King's) Regiment at that garrison, has been countermanded. Lieutenant Lewes has arrived from India in charge of detachments.

64th Regiment. Lieutenant Sayers has arrived home from India in charge of detachments.

73rd Regiment. Captain F. Reeve has joined at Chatham garrison, and taken the command of the depôt-companies of that corps.

75th Regiment. Lieutenant Dawson has left Chatham for Eastbourne with a party for musketry practice.

81st Regiment. Corporal Chichester has left Chatham with detachments for rifle practice at Eastbourne. A detachment rejoined at Chatham from Eastbourne, under command of Ensign R. J. MacDonnell, having completed their annual course of instruction. Although the party fired in very wet and stormy weather, they made the large average of 46·21. A section of 11 men of No. 11 company, 81st, made 51·06. Orders have been received at Chatham, directing Captain A. Wright, 81st Regiment, Inspector of Musketry to the 3rd battalion, to embark for India to join the regiment.

88th Regiment. Lieutenant Dew, with a party, is ordered from the depôt for musketry instruction at Hythe.

St. Helena Regiment. A reinforcement for the St. Helena regiment of 175 non-commissioned officers and men, under the command of Captain J. H. Prenderville and Captain E. C. Barnes, have left Chatham for St. Helena.

Lieut.-Colonel Gibbon, R.A., has been appointed to the command of the Royal Artillery in the eastern district, and has joined the staff at the camp at Colchester.

The customary half-yearly muster of the Brigade of Guards is appointed on the 5th of November next.

The Army Gazette.

WAR OFFICE, PALL MALL, SEPTEMBER 11.

12th Regiment of Light Dragoons—Cornet Thomas Edmund Houghton, from the 17th Light Dragoons, to be Cornet, vice Jackson, who exchanges.

15th Light Dragoons—Lieutenant Stewart Davies D. Cartwright to be Captain, by purchase, vice Carnegy, who retires.

Cornet John Robert Heron Maxwell to be Lieutenant, by purchase, vice Cartwright.

17th Light Dragoons—Cornet Joseph Devonsher Jackson, from the 12th Light Dragoons, to be Cornet, vice Houghton, who exchanges.

Military Train—Roger Forrest, Gent., to be Ensign, without purchase, vice Percival, deceased.

3d Regiment of Foot—The surname of the Gentleman Cadet appointed to an Ensigncy, without purchase, on the 4th of July, 1860, is "Girdlestone," and not "Girdleston," as then stated.

5th Foot—Ensign John Leslie to be Lieutenant, by purchase, vice Shoolbred, who retires.

8th Foot—Surgeon John Irvine, from the Staff, to be Surgeon, vice Annesley, appointed to the Staff.

11th Foot—Assistant-Surgeon Joseph Francis Ashby, from the Staff, to be Assistant-Surgeon, vice Divorty, placed on half-pay.

13th Foot—Lieutenant Henry Lewis Fitz Gerald to be Captain, without purchase, vice Segrave, deceased; Ensign Lloyd Picton Jenkins to be Lieutenant, without purchase, vice Fitz Gerald; Sergeant-Major Patrick O'Callaghan to be Ensign, without purchase, vice Jenkins.

21st Foot—Lieutenant Arthur Grey Hazlerigg to be Captain, by purchase, vice Coffin, who retires; Ensign William R. Macpherson to be Lieutenant, by purchase, vice Hazlerigg.

26th Foot—The second Christian name of Ensign Burton is "Blakeway," and not "Blakenay," as previously stated.

29th Foot—Ensign Robert Berkeley to be Lieutenant, by purchase, vice Cochrane, who retires.

37th Foot—Lieutenant Douglas Alleyne, from the 79th Foot, to be Lieutenant, vice Jones, who exchanges.

60th Foot.

To be Lieutenants, by purchase.

Ensign Julius Tottenham, vice Sainsbury, who retires; Ensign Reginald H. Beadon, vice Traherne, who has retired; Ensign John William Marshall, vice Fortescue, who retires; Ensign Richard Meade, vice Northey, promoted; Ensign Harcourt James Lees, vice Lovell, who retires; Ensign Pennyman White Worsley, vice Curtis, promoted; Ensign Astley Fellowes Terry, vice Knox-Gore, promoted.

To be Ensigns, by purchase.

Edward Burr, Gent., vice Terry; Arthur Richard Lees, Gent., vice Tottenham.

61st Foot—Lieutenant Leonard Knipe, from the 95th Foot, to be Lieutenant, vice Andros, who exchanges.

75th Foot—Ensign Wilmsdorf George Mansergh to be Lieutenant, without purchase, vice Row, deceased; Ensign Charles Henaman Heycock, from the 94th Foot, to be Ensign, vice Mansergh.

79th Foot—Lieutenant Thomas Sheridan Gore Jones, from the 37th Foot, to be Lieutenant, vice Alleyne, who exchanges.

95th Foot—Lieutenant John Budgen to be Captain, without purchase, vice Wield, deceased; Ensign Leonard Knipe to be Lieutenant, without purchase, vice Budgen; Lieutenant Edwyn Brenton Andros, from the 61st Foot, to be Lieutenant, vice Knipe, who exchanges.

1st West India Regiment—Assistant-Surgeon George Abraham Davidge, from the Staff, to be Assistant-Surgeon, vice Skues, appointed to the Staff.

UNATTACHED.

Captain and Brevet-Lieutenant-Colonel Owen Lloyd Ormsby, half-pay, unattached, Staff Officer of Pensioners, to be Major, without purchase.

MEDICAL DEPARTMENT.

Surgeon-Major Francis Charles Annesley, from the 8th Foot, to be Staff Surgeon-Major, vice Irvine, appointed to the 8th Foot.

Staff Assistant-Surgeon John Smith Chartres to be Staff Surgeon.

Staff Assistant-Surgeon Benjamin Lane to be Staff-Surgeon.

Staff Assistant-Surgeon Edward Walker Skues, M.D., o be Staff-Surgeon.

Assistant-Surgeon Frederick McKenzie Skues, rom the 1st West India Regiment, to be Staff Assistant-Surgeon, vice Davidge, appointed to the 1st West India Regiment.

VETERINARY DEPARTMENT.

Walter Burt, Gent., to be Acting Veterinary-Surgeon.

BREVET.

Captain and Brevet-Major William Donald Macdonald, 93d Foot, to be Lieutenant-Colonel in the army.

Captain Charles Mordaunt Fitzgerald, 31st Bengal Native Infantry, to be Major in the army.

The following promotions take place in Her Majesty's Indian Military Forces, consequent on the deaths of

General Sir Hopetoun Stratford Scott, K.C.B., Madras Infantry, on the 25th of June, 1860; and of

Major-General Frederick Blundell, C.B., Madras Artillery, on the 5th of July, 1860:—

To be General.

Lieutenant-General Edward Frederick, C.B., Bombay Infantry.

To be Lieutenant-General.

Major-General Archibald Brown Dyce, Madras Infantry.

To be Major-Generals.

Colonel Henry Goodwyn, Bengal Engineers.

Colonel William George White, Madras Infantry.

The undermentioned officers of Her Majesty's Indian Military Forces retired on full-pay to have a step of honorary rank as follows:—

To be Major-General.

Colonel Coghill Glendour Ottley, Madras Infantry.

To be Colonels.

Lieutenant-Colonel Henry Green, Madras Infantry.

Lieutenant-Colonel Henry Downes Shippard, Madras Infantry.

Lieutenant-Colonel Henry Boyé, Bombay Infantry.

To be Lieutenant-Colonels.

Major Thomas Prendergast Walsh, Madras Infantry.

Major George Marryatt Gumm, Madras Artillery.

Major Bernard Cary, Bengal Infantry.

To be Majors.

Captain William Alexander Shaw, Bengal Cavalry.

Captain Francis John Mills Mason, Madras Infantry.

MILITARY DRESS REGULATIONS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—Most of your readers have heard, and in these travelling days many of them know, that Malta is a hot place—a very hot place, but I fancy few people in England who have not passed a summer there have any idea how hot a place it is. A few days ago the thermometer in the sun rose to 140°, and that in by no means the hottest part of the island; and yet in this heat, by the wise *ordination* of the military authorities, our soldiers are dressed in every respect as if they were in England;—*guards are mounted in* tunic, shako, pack, and stock; orderlies hurry through the streets in full dress; officers and men, obliged to be in the sun during the hottest part of the day, are dressed "strictly in accordance with the Dress Regulations of the Army," and forbidden even to protect their brains from the scorching heat by any more effectual means than the forage-cap itself affords. The consequences are just what any man of common sense might predict they would be. Officers are on the sick list, and the hospitals are full.

Did the British officers and British soldiers fight one whit the worse in the Crimea because their throats were unencumbered with stocks, and their brains protected by white cap-covers? I trow not. I am not one of those who would wish to destroy the distinctive character of the British Army, and make it a mass of irregular troops; on the contrary, I am all for drill, dress, and discipline, at proper times and in proper places; but I cannot see any advantage to be gained by torturing your officers and men, filling your sick lists and hospitals, and getting your work badly done, for I defy men to work "with a will" when under a constant apprehension of a

COUP DE SOLEIL.

CAMPS AND FIELD-DAYS.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The massing of troops in England, unattained until the formation of Aldershot and other camps, is a good not dearly purchased, even at the price of the large sums that have been expended in the formation of camps of instruction. The position of a brigadier suddenly called upon to handle half-a-dozen regiments in the complication of the battle field and a campaign, must have been formerly anything but enviable. After a few years' training at Aldershot, a general would feel comparatively at home when before the enemy. That the soldier also individually and collectively derives much benefit from a taste of camp life will not be denied. But to assert that both commanders and the commanded receive the greatest possible amount of instruction would be untrue. It is the old tale at camps as elsewhere. What has been done once must be done again, and repetition is the order of the day.

The field-days at Aldershot, whoever may be the presiding genius, are so alike one another, that the anxious correspondent must be sorely puzzled to give the necessary variety to the stereotyped performance. Once, twice, or thrice a week do the troops in camp march by the same road to the same ground, fight the same battle, and return by the same road again to camp. The unfortunate Long Valley is trodden into a desert more bare and arid than that of Sahara, and the renowned Aldershot dust is caused solely by the continual marching over the same ground. The Government ground at Ash Common and Fleetpond both offer a capital field for occasional manœuvres, but strange to say no general has yet been bold enough to try the unaccustomed ground. I cannot but think that now and then the division of the force would be exceedingly instructive.

The movements of a supposed enemy are usually as inscrutable as those of the general who, in imagination, opposes

Digitized by Google

him. But with an attacking brigade whose only known movements were that it should attack a certain point at a certain time, more talent would of necessity have to be employed; at all events, the brains of two generals instead of one would be called into play. Brigadiers should be pitted against each other, the general commanding the division bestowing the palm on the victor. During the summer, the brigades returning from route marching should always fight their way into camp.

Though soldiers, as a rule, care but little what has been going on even when they themselves have been the performers, yet there are doubtless many who would be glad to study the plan of operations after every field-day. The division orders are printed daily, and with little additional expense the plan of proposed or past manœuvres might be struck off and issued to the regiments in camp.

A few words of explanation would alone be necessary to point out the number of the troops engaged, the object to be attained, and the means employed to attain it. A map of the country for a few miles round, with the columns in red ink, would also be required. The drill season is now well-nigh over, but nevertheless these few hints may possibly not be altogether unavailing or forgotten, and may induce some slight deviation from the too-much-trodden tract of routine.
—I am, &c., A CAPTAIN AT ALDERSHOT.

THE NEW SHAKO.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—It is rumoured that an alteration is about to take place in the shako of the infantry. A pattern worn by the Rifle Brigade, and another by the 55th Regiment, have each their merits, but they have both the same defect, viz., the unsightly tuft or ball. Let any one wear a shako for half an hour with the ball, and again for the same period without the ball, and he will require no further proof that it destroys the balance and comfort of the shako. What I propose is a smaller ornament, and of a more elegant shape.

I think the sword-knot (rather larger than regulation), or a tapering decanter stopper, suggests the idea. In Belgium I saw a gold sort of shaving-brush; but, whatever it be, let weight and the present round shape be avoided.—Yours, &c.,
COMFORT AND ELEGANCE.

ARMY CIRCULARS.

The following General Order, dated the 6th inst., has been issued from the Horse Guards by order of the Duke of Cambridge:—"Many regiments and depôts having omitted to furnish the annual nominal return ordered by the Circular of the 7th of June, 1856, to be rendered to the military secretary, of casualties among officers, non-commissioned officers, and men appointed to the French Order of the Legion of Honour, the General Commanding-in-Chief calls the attention of commanding officers to the omission in question, and desires that it may be rectified by every corps in which it may have occurred. These returns are now and for the future to be transmitted by regiments and depôts direct to the Under-Secretary of State for War, instead of the military secretary. By command, James Yorke Scarlett, Adjutant-General."

The following Circular has been issued:—"War Office, August 30.—1. The arrangements under which the contribution for the messing of military officers and other public passengers on board ship, and also their families (when not in contract vessels), is brought to the credit of the public, having been under the consideration of Mr. Secretary Herbert, he has been pleased to direct that from and after the 1st of October next the settlement for such contribution shall be exclusively effected at the termination of the voyage; no deduction as heretofore being made from the pay advanced on embarkation. 2. At the termination of the voyage the paymaster or agent of the regiment to which the officer belongs, or paymaster, or acting paymaster of the depôt or detachment which he may first join, or other public accountant into whose payment the officer or other public passenger may be reported, will be held responsible for deducting from such person, and crediting in the public accounts, the amount of mess contribution which shall be shown to be due by the mess certificate to be produced by him. 3. Officers and others about to embark on board ship are to take care to provide themselves with the prescribed form of mess certificate, and to complete or cause to be completed the same in every particular, including the signature of the master or purser of the vessel, and of the officer commanding the troops on board, before going on shore, or of the officer himself when there is no commanding officer. 4. Military officers and other public passengers authorised to proceed in contract steam-vessels, or proceeding on service without troops from one foreign station to another, or from port to port within the same command, under special contracts made by the Commissariat, will be required, as at present, to pay to the owners for their families permitted to embark with them the sums for passage and messing prescribed in the contracts, of which notice should be taken in the certificate. 5. A copy of the form of mess certificate is annexed hereto, and all military accountants should forthwith obtain an ample supply of the form by application to this department.—B. Hawes."

The following General Order has been issued relative to the examination for the Staff College:—"Horse Guards, September, 4.—With reference to paragraph 5 of the Staff College Regulations published with the General Order, dated 23rd of January, 1860, officers of the army are hereby informed that the examinations in July, 1861, of candidates for admission to the Staff College, will comprise the following portions of military history, viz., Campaign of Marlborough, 1704; Campaign of Frederick the Great (concluding with the battle of Leuthen), 1757; Campaign of Napoleon (to capitulation of Mantua), 1796-7; Campaign of Wellington, 1812; Campaign of Napier—Scinde. In studying the above campaigns, candidates are recommended to avail themselves of every information that can be obtained both in the objects and detail of the operations from published orders, letters, and despatches, as well as from ordinary histories. A careful study of the topography and resources of the countries in which the campaigns took place is also on every account recommended, as questions will be particularly directed to these points. By command of His Royal Highness the General Commanding-in-Chief, James Yorke Scarlett, Adjutant-General."

THE MEDICAL OFFICERS IN INDIA.

The following petition has been sent through Dr. Linton, signed by the body of Army Surgeons in Bengal:—

Unto His Excellency the Right Honourable, the Earl Canning, Viceroy, and Governor General of India in Council, this the Memorial of the Medical Officers of the British Army serving in the Bengal Presidency,

Respectfully sheweth,—That—On the 1st of October, 1858, it pleased Her Most Gracious Majesty Queen Victoria to order the issue of a Royal Warrant greatly improving the position, pay, and general prospects of your memorialists.

2nd. That—Except in India, Her Majesty's warrant has been recognised and acted upon in every other country acknowledging British supremacy; and that, your memorialists serving in this country during the time that has elapsed since the publication of the warrant, have enjoyed none of the benefits of its provisions, not the least of which provide for a much improved status and scale of remuneration.

3rd. That on account of the exception just mentioned, the position and pay of your memorialists are anomalous and unsatisfactory. Illustrative of this your memorialists would adduce the following example: A medical officer serving in England, or in any of the British possessions, except India, takes precedence, chooses quarters, draws pay and allowances, and sits as president on a board or committee, according to its relative rank which is substantive. As soon, however, as he lands in this country he forfeits his position with the Indian scale of remuneration and other advantages attaching thereto, and so becomes virtually degraded.

4th. That this deprivation injuriously affecting all the members of the home medical departments serving in India, presses especially hard upon the assistant-surgeon, who, leaving home with the substantive rank of captain, and, therefore, drawing in full the pay and allowances of such rank, on landing in this country is recognised and paid only as a subaltern.

5th. That more than a year ago, the announcement of the issue of our warrant, gladdening as it did the hearts of your memorialists of all ranks, then serving in this country, was hailed by them as an acknowledgment, in some measure of the importance of their department, and of the value of those services which had been, and are yet to be rendered by it to the State; and led them to expect that this gracious expression of Her Majesty's esteem would speedily find its way into the general orders of this country, as it was certain to do everywhere else.

6th. That the health and physical efficiency of the British Army serving in Bengal being entrusted to your memorialists, their responsibilities are as grave as their duties are trying, both these implying an amount of labour and anxiety which are in the same ratio as the sickness in this country is, or from three to eight times as great as at home, or at most other stations.

7th. That—If therefore, besides it being deemed as absolutely necessary for ensuring the general wellbeing and efficiency of the Army, the warrant was considered but the due of men entrusted with the life and health of the British soldier in our other possessions, it cannot, surely, we humbly submit, be considered as less the due of those, whose grave responsibilities, withering anxieties, and ceaseless exertion of mind and body are the constant and inseparable accompaniments of a trust so important as that of the life, health, and efficiency of the same soldier in India.

8th. That—In its remuneration of all commissioned ranks, except those of the Army Medical Department, especially its more junior ones, your Government in adopting a principle bearing upon locality, climate and duty, acknowledged as a just one by the highest authorities, grants to these ranks an aggregate of pay and allowances from more than twice to five times that allowed at home; and that, in withholding the practical application of this principle from your memorialists, such is their remuneration, that, assistant-surgeons of five and ten years' standing, lose respectively by serving in India, from four to seven pounds sterling, per mensem, more or less—this loss, not including many allowances received at home but not in this country, being attributable to their inadequate Indian pay and allowances, and to the considerable extra expense to which they are put by a residence in India.

Wherefore in earnestly requesting the gracious consideration by your excellence of their grievances, your excellency's memorialists respectfully pray—

1st. That the expression of Her Majesty's will and measure, as contained in the Royal Warrant of October, 1858, may, at an early date, be caused to take full effect throughout her Indian empire.

2nd. That a new scale of Indian medical pay and allowances be made out, in which the amount of these shall be regulated according to the relative rank of your memorialists, which paragraph 8 of the warrant says, "Shall carry with it all precedence and advantages attaching to the rank with which it corresponds;" and not less in consideration of the serious responsibilities belonging to their trust, the vital importance of their office, and the trying nature of their duties, than in compliance with, what with great submission would humbly appear to be, the unmistakeable language and evident intention of the warrant.

3rd. That the provisions of the warrant regarding pay and allowances may be permitted to have a retrospective effect from the date of its publication at home, to meet the cases of such of your memorialists as may have served in India since that date.

And your excellency's memorialists, as in duty bound, will ever pray.

One of the most interesting events at Melbourne has been the marriage of His Excellency the Governor, Sir Henry Barkly, K.C.B., with Miss Pratt, the only daughter of Major-General Pratt, Commander of the Forces in Australasia. The ceremony was performed in the most private manner at Christ Church, South Yarra.

The States of Jersey have presented to the widow of the late Lieut.-Governor of the island, Major-General Mundy, a letter of condolence upon the loss she has sustained in the death of her gallant husband.

THE NAVY.

ADMIRALTY, SEPTEMBER 14.

APPOINTMENTS.

Commander—William Mould to the Edinburgh (additional), for Coast-Guard Service.

Lieutenants—C. D. Broughton to the Megæra; Charles F. Ryder to the Agamemnon; H. Hathorn (additional) to Marlborough.

Paymasters—J. Ray (additional) to the Colossus; J. Bradbridge (additional) to the Dauntless; C. W. Tuke (additional) to the Edinburgh; T. W. Wells to the Ariel; E. W. Jordan to the Spiteful; J. W. Green (additional) to the Colossus.

Assistant Surgeons—Dr. John T. B. Torrance to the Impregnable, for Plymouth Hospital; John S. Dobbin (acting) to the Victory, for Haslar Hospital: Dr. Thomas Warde (acting) to the Exmouth.

Second Masters—J. H. Tully to the Edgar; S. S. Sugden to the Landrail; R. J. Barrett to the Rhadamanthus.

Master's-Assistant—Francis J. Palmer to the Landrail.

Assistant-Paymasters—M. Maxwell to the Ariel; John Chambers to the Spiteful.

Clerk—Adolp Hunter to the Trafalgar.

Second-Class Assistant-Engineers—W. Ross to the Foxhound; G. L. D. P. Keeling to the Asia, for service in the Harrier; M. Lilt (acting) to the Tartar; John King to the Spiteful.

Third-Class Assistant-Engineers—T. J. Walters to the Cumberland, for temporary charge of the Hasty; P. Blanch (acting) to the Edgar; E. S. Young to the Fisgard, for temporary charge of the Lee; G. Kaye to the Fisgard, for temporary charge of the Mullet; Charles B. Hargrave (acting) to the Firebrand; John Franklin (acting) to the Cumberland, for service in the Wildfire.

Acorn, 12, sailing sloop, Commander R. D. Pearse, was at Swatow on the 22nd of July.

Actæon, 26, sailing surveying-frigate, Commander John Ward (b), was in Ta-lien-whan Bay on the 22nd of July.

Adventure, 2, screw troop-ship, Commander E. Lacy, was in Ta-lien-whan Bay on the 22nd of July.

Agamemnon, 91, screw, Captain T. Hope, has been ordered to Malta.

Alacrity, 4, screw sloop, Commander J. K. C. Baird, was at Corfu on the 8th inst.

Algerine, 1, screw gun-vessel, Lieut.-Commander W. Arthur, was in Ta-lien-whan bay on the 22nd of July.

Amphion, 36, screw frigate, Captain Thomas Cochran, was on the coast of Sicily on the 8th inst.

Argus, 6, paddle steam sloop, Commander H. F. W. Ingram, was on the coast of Sicily on the 8th inst.

Assurance, 4, screw, sloop, Commander C. M. Aynsley, was off the coast of Syria on the 1st inst.

Banshee, 2, paddle steam-vessel, Commander C. A. Campbell, was in the Black Sea by the latest accounts.

Banterer, 1, screw gun-boat, Lieut.-Commander H. P. Knevitt, was in Ta-lien-whan Bay on the 22nd of July.

Beagle, 4, screw gun-sloop, Commander E. Hay, was in Ta-lien-whan Bay on the 22nd of July.

Black Eagle, Admiralty yacht, Master-Commander John E. Petley, has left Portsmouth for the westward, and will, it is stated, embark His Royal Highness the Commander-in-Chief for the Channel Islands.

Bouncer, 2, screw gun-boat, Lieut.-Commander A. R. Owen, was in Ta-lien-whan Bay on the 22nd of July.

Boxer, 1, screw gunboat tender, Second Master Commander C. F. Gulliver, was in Malta harbour on the 8th inst.

Bustard, 2, screw gun-boat, Lieut.-Commander, F. W. Hallowes, was in Ta-lien-whan Bay on the 22nd of July.

Cæsar, 90, screw, Captain Thomas H. Mason, arrived in Malta harbour on the 7th inst. from Naples. Our correspondent furnishes us with the following account of the doings of a steamer once well known on the Thames. The termination of the affair will we imagine be of a more serious character than the owners contemplated when they dispatched their property upon a buccaneering expedition:—"H.M.S. Cæsar has arrived in port from Naples bringing a steamer, called the Orwell, formerly running between London and Ipswich as a passenger-boat. We understand that her owners, hoping to make a good bargain of her, sent her to Genoa, where the Garibaldian agents at first made arrangements to convey a body of volunteers to Calabria; but it was afterwards proposed to capture a new screw-frigate, mounting 51 guns. However, owing to the vigilance of the Neapolitan cruisers, she failed in the attempt, and was obliged to fly to the protection of the English vessels, rather than be captured herself by the Bourbon instruments of tyranny. Being pursued by five Neapolitan steam-frigates, she made for the British ships of war, and the gallant commander hoisted the jack. She was immediately boarded by the guard-boat of the fleet, and the admiral caused her to be taken possession of and conveyed to Malta."

Cambrian, 40, sailing-frigate, Captain J. J. M'Cleverty, C.B., was in Ta-lien-whan Bay on the 22nd of July.

Camilla, 16, sailing-sloop, Commander G. T. Colville, was by the last accounts at Shanghai.

Caradoc, 2, paddle steam-vessel, Lieut.-Commander J. B. Scott, was in Malta harbour on the 8th inst.

Centaur, 6, paddle steam-sloop, Commander E. D. D. Aplin, was in Ta-lien-whan Bay on the 22nd of July.

Chesapeake, 51, screw-frigate, Captain G. O. Willes, bearing the flag of Vice-Admiral James Hope, C.B., was in Ta-lien-whan bay on the 22nd of July.

Clown, 1, screw gun-boat, Lieut.-Commander W. F. Lee, was in Ta-lien-whan Bay on the 22nd of July.

Cockchafer, 1, screw gun-boat, Lieut.-Commander H. L. Holder, was at Swatow on the 22nd of July.

Cruizer, 17, screw sloop, Commander J. Bythesea, V.C., was in Ta-lien-whan Bay on the 22nd of July.

Dee, steam-vessel, Master-Commander Pullen, has left Woolwich with a cargo of machinery for vessels fitting out at the western yards.

Doris, 32, screw-frigate, Captain E. Heathcote, was at Corfu on the 5th inst.

Drake, 1, screw gun-boat, Lieut.-Commander A. R. Blane, was in Ta-lien-whan Bay on the 22nd of July.

Digitized by Google

Encounter, 14, screw corvetee, Captain Roderick Dew, was in Ta-lien-whan Bay on 22nd of July.

Esk, 20, screw corvette, Captain Sir R. J. M. M'Clure, was at Hong Kong on the 26th of July.

Fairy, Royal yacht, has been placed in No. 6 dock at Portsmouth, to clean bottom, &c., in readiness to attend upon Her Majesty. Preparations have also been made to receive the Victoria and Albert in No, 7, for the same purpose.

Firefly, 4, paddle steam surveying-vessel, Commander A. L. Mansell, was on the coast of Syria on the 1st inst.

Fire Queen, paddle steam-vessel, Master-Commander Paul, arrived in Portsmouth harbour on Wednesday morning from Ryde, having on board their Royal Highnesses the Duc de Chartres and the Count de Paris, accompanied by General Count Dumas. The barge of Vice-Admiral Bruce, commanded by Commander Loftus Robinson, acting flag-lieutenant, proceeded alongside the Fire Queen, and disembarked the two Princes at the dockyard, when they waited upon Vice-Admiral Bruce at the Admiralty House; whence, after partaking of luncheon, they were escorted through the dockyard and over the shipping in the harbour by Commander Robinson. Their Royal Highnesses afterwards re-embarked on board the Fire Queen and returned to Ryde, wh re they are staying for a short time, with the ex-Queen of the French, at the beautiful villa of Sir Augustus Clifford.

Firm, 1, screw gun-boat, Lieut.-Commander W. R. Boulton, was in Ta-lien-whan Bay on the 22nd of July.

Flamer, 2, screw gun-boat, Lieut.-Commander H. M. Bingham, was in Ta-lien-whan Bay on the 22nd of July.

Flying Fish, 6, screw sloop, Commander Charles W. Hope. A frightful accident occurred on board this vessel while saluting on the 25th of August, on occasion of the disembarkation of His Royal Highness the Prince of Wales at Montreal. Three men were blown away from the muzzle of a gun, and several others badly wounded.

Forester, 2, screw gun-boat, Lieut.-Commander A. J. Innes, was in Ta-lien-whan Bay on the 22nd of July.

Furious, 16, paddle steam-ship, Captain Oliver J. Jones, was in Ta-lien-whan Bay on the 22nd of July.

Fury, 6, paddle steam-sloop, Commander J. C. Wilson (acting), was in Ta-lien-whan Bay on the 22nd of July.

Gannet, 11, screw steam sloop, Commander E. H. L. Lambert, was at Constantinople according to our last advices.

Grasshopper, 2, screw gun-boat, Lieut.-Commander J. C. Tucker, was at Hong Kong on the 26th of July.

Greyhound, 17, screw-sloop, Commander F. W. Sullivan, left Malta on the 2nd instant for Beyrout.

Growler, 1, screw gun-boat, Lieut.-Commander H. E. Orozier, was at the Piræus by the latest accounts.

Hannibal, 91, screw-liner, Captain Arthur Farquhar, carrying the flag of Rear-Admiral Mundy, C.B., was in the Bay of Naples on the 8th inst.

Haughty, 2, screw gun-boat, Lieut.-Commander E. D. Broad, was at Hong Kong on the 26th of July.

Havock, 2, screw gun-boat, Lieut.-Commander C. Fairholme, was in Ta-lien-whan Bay on the 22nd of July.

Hesper, 2, screw store-ship, Master-Commander H. W. Harris, was in Ta-lien-whan Bay on the 22nd of July.

Hibernia, three-decker, Commander Hon. A. C. Hobart, flag-ship of Admiral Superintendent Codrington, C.B., was in Malta harbour on the 8th inst.

Highflyer, 21, screw corvette, Captain W. A. J. Heath (acting), was in the Canton River on the 26th of July.

Himalaya, 6, iron screw troop ship, Captain John Seccombe, five days from Portsmouth, with detachments of different regiments for Gibraltar, Malta, and Corfu, arrived at Gibraltar on the 1st inst., and sailed again for the East. She arrived at Malta on the 5th inst., and after landing drafts for various regiments she proceeded to Corfu on the 8th.

Hogue, 60, screw coast-guard ship, Captain Macdonald, sailed from Plymouth on Saturday last, to resume her station at Greenock.

Hornet, 17, screw sloop, Commander W. B. Elphinstone, left Plymouth on Sunday last for the Cape of Good Hope and Bombay. The Hornet was put into a commission nearly a month after the Torch, and although a vessel of double her tonnage, and of three times her complement of men and boys, yet gets away to her station within 24 hours of the former vessel.

Impérieuse, 51, screw frigate, Captain Rochefort Maguire, bearing the flag of Rear-Admiral L. T. Jones, C.B., was in Ta-lien-whan bay on the 22nd of July.

Inflexible, 6, paddle steam-sloop, Commander E. A. C. Brooker, was in Ta-lien-whan Bay on the 22nd of July.

Intrepid, 6, screw steam-sloop, Commander Joseph H. Marryat, was in the Bay of Naples on the 4th inst., but was expected to proceed to Malta with invalids from the squadron.

James Watt, 91, screw liner, Captain Edward Codd, was in Malta harbour on the 8th inst. This ship has been ordered home.

Janus, 1, screw gun-boat, Lieut.-Commander D. G. Davidson, was in Ta-lien-whan Bay on the 22nd of July.

Kestrel, 1, screw gun-boat, Lieutenant C. D. Robinson, was in Ta-lien-whan bay on the 22nd of July.

Lapwing, 4, screw sloop, Commander M. F. O'Reilly, was at Constantinople by the latest accounts.

Leven, 1, screw gun-vessel, Lieut.-Commander J. S. Hudson, was in Ta-lien-whan bay on the 22nd of July.

Liffey, 51, screw frigate, Captain G. W. Preedy, C.B., was off the coast of Syria on the 1st instant.

London, 90, screw liner, Captain Henry Chads, was in the Bay of Naples on the 4th inst.

Lucifer, 2, paddle steam-vessel, has left Portsmouth for the westward.

Magicienne, 16, paddle steam-ship, Captain J. E. Commerell, V.C., was in Ta-lien-whan Bay on the 22nd of July.

Marlborough, 131, screw three-decker (flag-ship of Vice-Admiral W. F. Martin), Captain of the Fleet, Rear-Admiral S. C. Dacres, C.B., Captain W. H. Stewart, C.B., was off the coast of Syria on the 1st instant.

Medina, 4, paddle steam-surveying vessel, Captain Thomas A. B. Spratt, C.B, was at Rhodes by the last accounts. The following is an extract of a letter dated from Smyrna on the 1st inst., which bears testimony to the decision of Captain Spratt:—"The inhabitants of Rhodes have recently had a narrow escape. On the morning of the 9th ult. an Ottoman steamer, the Malakoff, arrived there from Alexandria, having on board 500 irregular soldiers, scoundrels of the deepest dye, deserters from various parts of Syria, and most of them bandits and assassins that the Viceroy of Egypt had ejected *vi et armis* from his territory. These villains were all armed to the teeth, and on their arrival at Rhodes they declared their intention of proceeding no further on their compulsory voyage, and accordingly before any steps could be taken to prevent them, about 400 disembarked, to the utter dismay of the inhabitants. The rascals undisguisedly threatened the Christians with vengeance, and ascribed their expulsion from Egypt to the recent events in Syria. They openly declared their intention of attacking the inhabitants, on the arrival of a reinforcement of 500 more of their companions, whom they expected in a few days. The general alarm may be readily conceived; the Greeks to a man bolted into the interior and abandoned the town and environs. Thanks to the presence of Her Majesty's ship Medina, Captain Spratt, and the energy displayed by Mr. Campbell, Her Majesty's consul, seconded by the consuls of other powers, the anticipated mischief was prevented. The Pasha showed more energy and good-will than was expected of him. He called to his aid the colonel of a regiment of artillery, and they compelled the scoundrels to re-embark by absolute force with the bayonet, the Medina's armed boats superintending the re-embarkation. Had any riot been commenced, it is probable that the Turkish troops and inhabitants would have readily seized the opportunity to set upon the Christians. The expected arrival of more of these atrocious rascals from Egypt did not, happily, take place, the viceroy having sent them back to Palestine overland, where the major part of them will probably perish on the way."

Megæra, screw troopship, Commander S. H. Henderson, embarked on Wednesday at Portsmouth, for conveyance to Devonport, the City of Dublin Militia Artillery, comprising 2 field officers, 4 captains, 7 subalterns, and 4 staff; 25 sergeants, 7 drummers, 353 rank and file, 29 women, 52 children, and 5 horses.

Melpomene, 51, screw-frigate, Captain Charles J. F. Ewart, left Malta for Corfu, on the 2nd instant.

Mohawk, 4, screw gun-sloop, Commander Edward H. Howard, arrived at Malta on the 6th instant from Beyrout, and by her we learn that up to the 1st instant all was quiet there. The French army was still encamped outside the town, but was preparing to move on to Damascus. The English fleet under Vice-Admiral Martin was cruising along the Coast of Syria.

Neptune, 90, screw liner, Captain Frederick A. Campbell, was off the coast of Syria on the 1st inst.

Nimble, 5, screw steam gun-vessel, building at Pembroke. This vessel will be ready shortly for launching. The Diligence naval transport has removed from Devonport with the jury gear necessary to navigate her round to this last-named port.

Nimrod, 6, screw sloop, Commander R. J. Wyniatt, was in Ta-lien-whan Bay on the 22nd of July. This vessel is under orders to return home.

Odin, 16, paddle steam-frigate, Captain Lord John Hay, C.B., was in Ta-lien-whan Bay on the 22nd of July.

Opossum, 2, screw gun-boat, Lieut.-Commander G. D. Bevan, was in Ta-lien-whan Bay on the 22nd of July.

Orion, 91, screw liner, Captain J. B. E. Frere, was still cruising in the vicinity of Malta on the 8th inst.

Osborne, 1, Admiralty paddle steam-yacht, Master-Commander G. H. R. Bower, arrived in Portsmonth harbour on Thursday with the Lords of the Admiralty and Rear-Admiral Sir Baldwin Walker, Bart., the Comptroller of the Navy, last from Devonport and Portland.

Pearl, 21, screw corvette, Captain J. Borlase, C.B., was in Ta-lien-whan Bay on the 22nd of July.

Pelorous, 21, screw steam-sloop, Commodore F. B. P. Seymour, was on the coast of New Zealand on the 30th of June. Commodore Seymour had been wounded by a gunshot in the leg, in an engagement with the natives on the 27th of June, on which occasion Her Majesty's forces were compelled to retire. The other officers of the Pelorous who were engaged were First-Lieutenant Battiscombe, Midshipman Wadlow, Midshipman Garnett, and Lieutenant Morris, Royal Marine Artillery.

Pioneer, 6, screw sloop, Commander H. A. Reilly, was in Ta-lien-whan Bay, on the 22nd of July.

Queen, 86, screw liner, Captain Charles F. Hillyar. Our Malta Correspondent informs us that this ship was dispatched on the 3rd inst. to Tunis, in consequence of the representations of the British consul, who expected from the state of excitement under which the population was labouring that disturbances would break out. The presence, however, of this powerful ship would, it was supposed, have a beneficial influence.

Racoon, 22, screw corvette, Captain W. C. Chamberlain, was at Tripoli on the 1st inst.

Recruit, 6, screw gun-vessel, Commander David Spain, was, by the last accounts, at Galatz.

Renard, 4, screw sloop, Commander J. G. Goodenough, was in Ta-lien-whan Bay on the 22nd of July.

Renown, 91, screw liner, Captain Arthur Forbes, was in the Bay of Naples on the 4th inst.

Ringdove, 4, screw sloop, Commander R. G. Craigie, was in Ta lien whan Bay on the 22nd of July.

Roebuck, 6, screw sloop, Commander Francis Martin, was in Ta-lien-whan Bay on the 22nd of July.

Sampson, 6, paddle steam-ship, Captain G. S. Hand, was in Ta-lien-whan Bay on the 22nd July.

Scout, 21, screw covette, Captain J. Corbett, was in Ta-lien-whan Bay on 22nd of July.

Scylla, 21, screw corvette, Captain Rowley Lambert, was in the Bay of Naples on the 4th instant.

Simoom, 8, screw troop-ship, Commander J. M. Cooke, was in Ta-lien-whan Bay on the 22nd of July.

Sirius, target-ship, lying in Porchester lake, was visited by the Lords of the Admiralty during their late inspection at Portsmouth, in order that they might examine various targets affixed to her side, and which have lately been experimented upon from the Stork's guns. Three new plates have been tried within the last few days, consisting of the "ridge and furrow" surface plate, and two plain iron plates, upwards of 11 feet each in length by 3 feet 3 inches in breadth, and 4½ inches thick. Of these the "ridge and furrow" stood the least knocking about, being broken, in fact, by the first shot fired against it. The two other plates are also broken, as all other vertical plates have been. The only results of importance that have been obtained have been the success of the Jones's angulated principle. In that instance the portion of the target representing the section of a vessel's side at the back of the plates, has been left perfectly undisturbed by the severe firing to which it was subjected, whereas in all other instances the broken plates have broken through planking and timbers, and in this way the broken plate has proved more injurious to the ship's side than the shot would have been had it carried a piece of the plate with it clear through.

Slaney, 1, screw gun-vessel, was in Ta-lien-whan bay on the 22nd of July.

Snap, 2, screw gun-boat, Lieut.-Commander W. O. Butler was in Ta-lien-whan Bay on the 22nd of July.

Sparrowhawk, 4, screw sloop, Commander J. C. Byng was in Ta-lien-whan Bay on the 22nd of July.

Sphinx, 6, paddle steam-sloop, Com. E. F. Day, V.C., was in Ta-lien-whan Bay on the 22nd of July.

St. Jean d'Acre, 101, screw liner, Captain Thomas P. Thompson, left Malta on the 2nd inst. for a cruize outside the island.

Starling, 2, screw gun-boat, Lieut.-Commander J. H. Whitshed, was in Ta-lien-whan Bay on the 22nd of July.

Staunch, 2, screw gun-boat, Lieut.-Commander E. J. Pollard, was in Ta-lien-whan Bay on the 22nd of July.

Sutlej, 51, screw steamer, fitting in the steam-basin at Portsmouth, got up steam on Tuesday to test machinery at 20lb. pressure. The trial was very satisfactory. The Sutlej will be ready to make her official trial of speed at the measured mile during the next spring tides, and, although of 100 horse-power less than the Immortalité, recently tried in Stokes Bay, she is expected to realise a rate of speed quite equal to that vessel. The Sutlej was originally designed by the late Sir W. Symonds, during his period of office as Surveyor of the Navy, and her keel was laid down in 1848. On the accession to power of the present Board, under Sir B. W. Walker, the floors of the Sutlej, beyond laying which her building had not proceeded, were taken up, and her form throughout was considerably altered. After her launch she was towed round to Portsmouth, where she lay at harbour moorings until ordered to be cut in two, lengthened amidships and by the bow, with alterations to her stern, to convert her into a screw instead of a sailing frigate. The following will show the dimensions of this now handsome frigate before and since her conversion to a screw:—Dimensions when launched at Pembroke—length between perpendiculars, 180 feet; breadth extreme, 51 feet 8¼ inches; depth in hold, 16 feet 3 inches; burden in tons, 2067. Dimensions since conversion—length between perpendiculars, 254 feet 7 inches; breadth, same as previously; depth in hold, 17 feet 2 inches; burden in tons, 3066. The Immortalité is 251 feet between perpendiculars, 3 feet 7 inches less than the Sutlej. The machinery of both vessels is by Messrs. Maudslay, Sons, & Field.

Terrible, 21, paddle steam-frigate, Captain F. H. H. Glasse, C.B., was at Smyrna on the 1st inst. The subjoined is an extract of a letter, dated the 1st, from Smyrna:—"On Monday last, a fearful fire broke out, which lasted some twelve hours, and destroyed nearly 3000 houses. It was purely accidental. The Pasha and his satellites did absolutely nothing in assisting to extinguish the conflagration, but remained passive, and I suppose exclaimed—'Mashallah! Kismet, let it burn, it is only the property of the Giaour.' Great credit, is, however, due to the exertions of the officers and crew of Her Majesty's ship Terrible."

Torch, 5, screw gun-vessel, Commander Frederick H. Smith, managed to get away from Plymouth Sound on Saturday last the 8th inst. for her destination, the west coast of Africa. The Torch was put into commission at Chatham on the 18th of June. Eighty-two days have therefore elapsed from the time proceedings were actively commenced to get her ready for sea till the period of her being actually dispatched on the service for which she was brought forward. If a vessel of the size of the Torch be reported ready for the pendant by the authorities at Chatham, and take nearly three months before she can proceed to sea, we should be curious to learn how long it would require to fit out the Thunder, a floating battery of three times the tonnage of the Torch, and which has been reported to the Admiralty as complete in every department. A similar account was rendered of the condition of the Torch, yet every port in the Channel has furnished a "small bill" for repairs, alterations, &c., against this vessel.

Urgent, 6, screw troop-ship, Commander H. W. Hire, was in Ta-lien-whan Bay on the 22nd of July.

Valorous, 16, steam-frigate, Captain William C. Aldham, C.B. A lamentable accident took place on the 25th of August on board this frigate at Montreal. During the firing of the royal salute in honour of the landing of the Prince of Wales a man was blown to pieces from the muzzle of a gun.

Victor Emmanuel, 91, screw liner, Captain W. J. Clifford, C.B., was off the coast of Syria on the 1st inst.

Vulcan, 6, screw troop-ship, Commander A. C. Strode, was in Ta-lien-whan Bay on the 22nd of July.

Watchful, 1, screw gun-boat, Lieut.-Commander F. W. Inglefield, was in Ta-lien-whan Bay on the 22nd of July.

Weazel, 1, screw gun-boat, Lieut.-Commander W. Howorth, was at Hong Kong on the 26th of July.

Woodcock, 1, screw gun-boat, Lieut.-Commander G. S. Bosanquet, was in Ta-lien-whan Bay on the 22nd of July.

COURT-MARTIAL ON A BOATSWAIN.—A court-martial was holden on Saturday last at Portsmouth, on board her Majesty's flag-ship Victory, to try Mr. George Kennedy, boatswain, for the loss of a five-inch hawser belonging to Her Majesty's ship Duncan, 101, screw, at Portsmouth, Mr. Kennedy at that time being in charge of the said ship. The inquiry resulted in the acquittal of the prisoner.

The timbers have been prepared at Woolwich dockyard for the keel of a new 91-gun screw steam-vessel, to be named the Caledonia. It will be laid on the slip from which the Anson is to be launched this day.

PORTSMOUTH DOCKYARD.—Sir Richard Mayne and Mr. Superintendent Malladieu paid an official visit to the Portsmouth dockyard during last week, with the object of ascertaining the fitness, and to inquire which of the inspectors, sergeants, and others will volunteer into the metro-

Digitized by Google

politan force, as in consequence of the bill passed through Parliament during the last session the local police will be superseded in its duties by members of the latter service. A correspondent pays a high compliment to Lieutenant Hall who, for many years, has been at the head of the Portsmouth dockyard police, and expresses a doubt as to the necessity of the contemplated change. We believe that no officer could have performed his duties in a more satisfactory manner than Lieutenant Hall, and it is to be hoped that he will not in any way suffer by the alteration which must now take place in his position. We are glad, from personal observation, to bear testimony to the good conduct, civility, and general attention to their duties of the men who have so long served under Lieutenant Hall.

The Shannon, freight vessel, taken up by the War Department, having shipped a cargo of machinery and materials, consisting of iron pipes, &c., required for improvements to be carried out at the Government establishments at Malta, left Woolwich dockyard on Saturday last for her destination.

A curious return was made to the Captain Superintendent of Chatham dockyard yesterday week of the number of workmen and others who were absent from the establishment on the afternoon of that day, from which it appeared that no less than 2000 of the *employés* of the dockyard absented themselves on the afternoon in question to attend the races on Chatham lines, a number stated to be unprecedently large.

Great progress is being made at Chatham dockyard in the construction of the large line-of-battle screw steamer Royal Oak, 91, building on No. 7 slip, which has been put in frame, and is to be pushed forward with all dispatch. Her dimensions will be 245 feet in extreme length, 55 feet 4 inches in breadth, and of 3320 tons burden. A 4-gun screw steamer, not named, has also just been commenced on one of the adjoining slips, and is being put in frame.

A general survey of stores and timber in Her Majesty's dockyard at Sheerness has just commenced, Mr. Archibald M'Dougal and Mr. W. Dickson having been appointed surveyors on the part of the Storekeeper-General's Department of the Admiralty; and Mr. C. Stewart and Mr. G. B. F. Jefferys on the part of the storekeeper of the Sheerness dockyard.

Greenwich Hospital.—The remains of the late much respected and lamented commander, Edward Garratt, whose demise we recorded in our last week's impression, were interred on Saturday last in the Royal Hospital Cemetery, in the Woolwich Road, with the usual military honours due to the rank of the deceased veteran. The governor, Admiral Sir James A. Gordon; the lieut.-governor, Rear-Admiral Sir William Carroll; and all the officers of the institution that health and duty permitted, together with many private friends, were in attendance. It was observed that the Trafalgar pensioners mustered unusually strong; and although 55 years have passed away since that ever-memorable and glorious battle, yet there were upwards of 30 men capable of following the remains of the departed commander; and some of these pensioners, we were informed, were his shipmates in the Mars; and last in the procession came Lord Nelson's servant in the Victory, the now venerable Mr. Drummond. Four Trafalgar officers, we believe, yet remain in the Royal Hospital—Captain Sweney, acting-lieutenant of the Colossus; Commander Thomas Colby, lieutenant of the Thunderer; Commander Henry Parker, midshipman of the Belleisle; and Lieutenant John Pollard, midshipman of Lord Nelson's flag ship the Victory.

The Channel Fleet.—Pursuant to orders received on Sunday last, the Channel Fleet, consisting of the Royal Albert, 121, Capt. H. J. Lacon, flagship of Vice-Admiral Sir Charles Fremantle, K.C.B., commanding the fleet; the Conqueror, 101, Captain Edward S. Sotheby, C.B.; the Donegal, 101, Captain Henry Broadhead; the Edgar, 91, Captain James E. Katon, flagship of Rear-Admiral John E. Erskine; the Mars, 80, Captain James N. Strange; the Trafalgar, 91, Captain Edward G. Fanshawe; the Algiers, 90, Captain George W. D. O'Callaghan; the Centurion, 80, Captain Henry D. Rogers, C.B.; the Aboukir, 90, Captain Douglas Curry; the Mersey, 40, Captain Henry Caldwell, C.B.; and the Diadem. 32, Captain James A. Cockburn, got steam up by daybreak on Tuesday last, and sailed from Milford Haven at about 10 o'clock a.m. They are bound for a cruise of about three weeks or a month, and it is supposed will go round the Western Islands, after which they are to rendezvous at Torbay, previous to taking up their stations for the winter. Mr. Ward is on board the Admiral's ship with his new system of ocean telegraphs, which are to be thoroughly tried during the cruise. The fleet has been in Milford Haven for more than three weeks, and the conduct of the men has been most exemplary. The civil authorities have not had to interfere, except in one or two exceptional cases of drunkenness, together with a few cases of the not very heinous crime of overstaying leave. Rumour has it that three or four vessels of the fleet are to winter at Milford. A more secure berth could not be found in any case.

Captain Washington, the hydrographer of the Navy, is at present on the coast of Syria. The gallant officer, before returning to his official duties at Whitehall, will give his attention to the arrangements in progress for constructing, at the expense of the Pasha of Egypt, three new light-houses in the Red Sea. Commander Arthur L. Mansell, of Her Majesty's surveying-vessel Firefly, is the naval officer deputed by the Admiralty to superintend the erection of the buildings, and Captain Baker, of the Peninsular and Oriental Steam Company's service, will be on the spot in command of one of the Company's steamers to render a helping-hand. Captain Baker is the officer who so much distinguished himself at the wreck of the Alma.

Royal Naval Reserve.—We are authorised to state that the proposal to admit officers of the mercantile marine to honorary rank in the Royal Naval Reserve has been very favourably entertained by the Admiralty, and that on the return of Her Majesty from Scotland an Order in Council will be obtained, and a proclamation issued setting forth the terms on which this loyal tender of service will be accepted.

The following laudatory account of La Gloire and her performances appears in the *Moniteur de la Flotte*; we must of course make every allowance for the *esprit de pays* of the writer, but we must not conceal from ourselves that La Gloire would be a very dangerous kind of vessel for any wooden vessel, however large, to fall in with. We have no fear of the lesson now taught us being lost on the Lords of the Admiralty. The first steel-plated steamship, La Gloire, has just taken possession of the sea; she is a magnificent vessel, 77 metres long and 16 metres large (250 by 51 feet English). Her aspect is imposing by the severity of her lines and by the mass of her iron cuirass. At the height of 1·82 metres (barely 6 feet) above the water, she presents a battery of 34 guns of the most powerful effect; on the forecastle two long-range pieces; on the quarter-deck an iron redoubt to protect her commander at his post during the action. The reduced masts and the wide funnel indicate that the vessel is not intended to go to a distance from our ports, but that she is made for operations in the seas where henceforward the great differences of European policy will be settled. The frigate has been thrice to sea, and it may now be said that she has gloriously terminated her trials. In calm weather she parts the water without shock, and it may almost be said without foam, showing thereby how perfectly her proportions have been conceived. Her speed, measured on a fixed basis of nearly eight kilometres, reached 13 1-10 knots, which is the finest result ever ascertained in a ship of war. In a ten-hours' trip, her average rate was 12 31-100 knots, with all her fires lighted, and 11 knots with half her fires. In a rough sea she behaved perfectly. She pitches very gently, and rolls with a regularity that leaves nothing to be desired. The engineer's programme is therefore in all respects carried out—carried out fully, but not exceeded; the whole does the greatest honour to his skill, and gives the measure of the precision of his intelligence, of the certainty of his foresight, and consequently of the confidence the country may place in him. One understands now how he dared to take the responsibility of laying down several vessels of an entirely new type without having waited the trial of the first; and the reproaches of temerity which were not spared to him now recoil on those who ventured them. In 1850, the Napoleon engaged the navy in a new phasis; it extended its destinies by assuring henceforward its assistance to the army, to escort its convoys of troops, to protect their landing, to reach in good time a hostile fleet, and all that at a given moment, so as to be able to figure in strategical combinations without risk of delay. Thus it was that in the last Italian campaign, while the army marked its march across Lombardy by the glorious stages of Magenta and Solferino, the steam fleet of Admiral Romain Desfosses cruised in the waters of Venice, to insure the disembarkation at the first signal of another *corps d'armée* which was to take the Austrians in the rear; and already previously, during the events in the Black Sea, the Napoleon had passed the Dardanelles, while the English fleet, detained by contrary winds, remained at the entrance of the Straits, an impotent witness of our success. England was moved at this, and soon her dockyards were seen full of steam line-of-battle ships, pretending to the utmost speed But hardly had she followed us upon this path of progress when, behold arise a new maritime element much more formidable than the Napoleon, a terrible ship, which could of itself alone confront a whole steam fleet, the steel-plated steamship, who glorious trials we have just exposed. Again, then, a new era opens for the navy; it is no longer only wooden citadels that the fleet may attack; henceforward it may brave with impunity, the most powerfully defended coasts. No granite fort exists that can resist the destructive effects of the new artillery, and our steel-plated ships will carry this formidable artillery under the enemy's fire. It is a complete revolution in the destinies of maritime powers. Thus, twice in ten years our proud ally, England, has been vanquished in these pacific struggles, in which the efforts of genius alone contend, but in which the blood of victims is spared, and in which the resources of nations, far from exhausting themselves, do but increase—increase to the point of rendering war impossible between them by the threat of the terrible disasters it must entail; increase to the strengthening of the ties of the great nations which seem called to combat together for the cause of civilisation. Let us do homage to the Sovereign who has raised up these glorious victories of peace, and to the engineer whose sure and elevated views have thus borne the *matériel* of the French navy higher than did even the genius of Sané! Let us hail these admirable floating citadels, more terrible than the fortifications of Vauban!

The Retired Admirals List.—By the death of Vice-Admiral George Hewson, on the retired list, Rear-Admiral William Luckraft, on the 18*s.* per diem list, becomes entitled to the 20*s.* list, after upwards of 64 years' service in Her Majesty's Navy. He, having entered in June, 1796, became Lieutenant, Dec., 1807; Commander, July, 1825; Captain, 4th Nov., 1840; and Rear-Admiral (retired), 18th Dec., 1858. Admiral Luckraft was Senior Lieutenant of the Sheldrake in 1811, and was officially mentioned for his valuable services at the defence of Anholdt, when attacked by a powerful Danish flotilla; and was Commander of the Bellerophon, 80, at the bombardment of St. Jean d'Acre in 1840.

The late Captain Joseph Francis Stirling, R.N.—The above officer whose death occurred at Bath, on Tuesday last, was youngest son of the late Vice-Admiral Stirling. He entered the Navy in June 1811, and obtained his first commission in July, 1824. He served in the Prince Regent, 120, flag-ship at the Nore. Was Flag-Lieutenant of the St. Vincent, 120, and Alfred, 50, in the Mediterranean; and was advanced to the rank of Commander, Jan. 2, 1843.

Admiral Superintendent Sir Thomas S. Pasley, Bart., struck his flag on Wednesday evening on board the Royal Adelaide, at Plymouth, and proceeded on leave of absence. The Master-Attendant, Commander James Brown, does duty during the absence of Sir Thomas.

The experiments to test the relative efficiency of the Armstrong and Whitworth guns, which have been delayed for various reasons, will, it is stated, take place during the present month at Shoeburyness, in the presence of the Ordnance Select Committee. Two experimental guns have been turned out at Sir W. Armstrong's factory, on the muzzle-loading principle, which is considered by many experienced artillery officers to be preferable to the new system of breech-loading, especially during a period of active warfare.

The Navy Gazette.

ADMIRALTY, September 13.

Corps of Royal Marines—Captain and Brevet Major George Lambrick to be Lieutenant Colonel, vice Shewen, retired on full pay; First Lieutenant George Oliver Evans to be Captain, vice Lambrick, promoted; Second Lieutenant Francis Harwood Poore to be First Lieutenant, vice Evans, promoted.

THE NAVAL DISCIPLINE BILL.

TO THE EDITOR OF THE ARMY AND NVAY GAZETTE.

Sir,—In your paper of the 25th ult., alluding to the speech of Lord Clarence Paget on the Naval Discipline Bill, you remark on the anomaly in the former one that, though a court-martial had power to sentence a prisoner to death, it had no power to mitigate it to penal servitude; but the present bill was to remedy this.

Having read Lord Clarence Paget's speech on that occasion, in the *Standard* of the 22nd instant, it appears to me that there is an anomaly in the present bill which ought to be remarked on, not only by you, but by the public at large.

Lord C. Paget states:—"The next class of crime with which they dealt was that of 'mutiny,' with respect to the definition of which the highest legal authorities differed. By this bill 'mutiny' was at first attempted to be defined as a combination contrary to naval discipline by two or more persons; but the measure had been very carefully considered not only in the House of Lords itself, but by a select committee of Lords, which had been attended by the highest legal authorities in the realm, and before which men of high naval position had been examined; and the result was, that their lordships recommended that no precise definition of the word 'mutiny' should be given. The definition had therefore been expunged, and crimes of that class were dealt with in the bill under the head of 'mutiny' and 'insubordination.'"

Either the framers of the bill, or Lord Clarence Paget, must have been great friends, if not related to the celebrated Sir Boyle Roche, to judge by his lordship's speech. He says the crime of "mutiny" could not be defined by the above-named committee, therefore it was expunged from the bill; and he then adds, crimes of that class were dealt with under the head of "mutiny" (the very thing they could not define) and "insubordination." How their lordships could legislate in one clause of a bill for the crime of mutiny, which it went beyond their powers to understand or define in the bill, is not easily understood; and how it could be expunged when crimes of that class were provided for in Clause 10, under the head of "mutiny," is certainly past understanding. John Bull appears to have made a bull in making the bill.

But that is not much; a bull is of no consequence, but the bill is of great, for Clause 10 deals with mutiny; and the punishment is death and corporal punishment. Still we have Lord C. Paget's words to show that the united wisdom, learning, knowledge, and experience not only of the House of Lords itself, but of a select committee, aided by the highest legal authorities in the realm, and assisted by naval officers of high position, have failed to define the crime of mutiny. Still they make laws to punish it in the same bill, though it is stated they expunged the definitions from it.

The question then is—what is mutiny? Who is to define it? Is the captain who forms the charge, or the admiral who orders a court to try it? Or are the court (officers certainly not as well up to legal definitions as the highest legal authorities of the realm) to define it? If the trial took place in England, how is the judge-advocate to explain to Her Majesty that it was mutiny, and that she should confirm the proceedings? How is all this to be done in the face of the above—nay, how is the poor sailor to know what constitutes mutiny? Do you, Mr. Editor, can you, define it from the above? and it is under that bill the man must be tried and punished for a crime not laid down in it.

Sir Charles Napier objected to Clause 10, and said, "Mutiny ought to be more clearly defined. He doubted whether the evidence of one witness was sufficient to convict a man of mutiny who had struck his officer." The Navy ought to feel grateful to Sir Charles, and thank their stars that—

> "One little cherub sat smiling above,
> To watch o'er the life of poor Jack."

And well might Sir Charles object to the clause that, by the evidence of one witness (no matter how ignorant or how prejudiced), would sentence a man to death on that man's simple word or idea of what constituted a crime—what the House of Lords and the highest legal authorities in the realm were unable to explain or define!

Is this a sample of the law of England? Lord Clarence Paget shows that Admiral Byng was tried for cowardice, negligence, and disaffection, but only found guilty of an error of judgment; but the court had no power to mitigate his sentence, under the 12th Article of War, and he was shot. In this bill, meant to improve on the old one, we have mutiny (the crime which cannot be defined) coupled with insubordination. Now, how can insubordination be defined when mutiny cannot be, when both are in the same clause? The Lords apparently don't know what's what, how then can members of a court-martial? So there may be a second case of Byng, a second error of judgment, and all this because the legislature of England cannot define a crime in a bill, though they provide death as a punishment for it. When the mutineers of the Bounty were tried at Portsmouth, there being no evidence against one man, another prisoner claimed a right to examine him on his behalf; but the court refused to permit it, by the advice of the judge-advocate, and the prisoner was sentenced to death. The king, however, stayed the execution, and referred the case to the judges, who all were of opinion that the sentence was illegal on the ground of improper rejection of evidence, and the prisoner was discharged. This shows the nicety of the case;—the prisoner was the person who defined the law, the court knew nothing of it; the case was referred to the highest legal authority in the realm, and now the highest legal authority in the realm leaves the definition of mutiny to the court.

Lord C. Paget also says, "When a man commits a crime which subjects him to corporal punishment, the case must be inquired into and reported on, but the captain is not bound to abide by the decision, but may punish the man if

Digitized by Google

he likes." What, then, is the use of the inquiry? Lord Clarence also says, "There would be a salutary check imposed on the captain, who, though he might be otherwise disposed to inflict corporal punishment, would now find that the guilt or innocence of the accused must be satisfactorily proved before anything further could be done to him." This is contradicted by the foregoing, which shows the captain could overrule the decision if he liked. What does Lord C. Paget mean by "This system might not be considered to be in strict accordance with the usage of courts of justice, but it was quite consistent with the practice of the Service"?

The highest authorities in the realm are from courts of justice, and if they legislate for mutiny, surely, they do so for other crimes; and how can the usages of the Service supersede what is laid down by the law of the land? But it seems that they do. It is odd Lord Clarence Paget and Sir Charles should so completely disagree as to the improvement in the conduct of the Navy, particularly in drunkenness. Who is right?

It is plain there is something very wrong in the details and wording of the bill. My attention was drawn to it by the remarks on it in your paper of the 18th ult., which pointed out clearly that the bill was far from explicit or satisfactory, and Lord Clarence Paget's remarks have certainly proved that such is the case.—I am, &c.

LANDSMAN.

NAVAL MEDICAL SUPPLEMENTAL FUND.

TO THE EDITOR OF THE ARMY AND NAVY GAZETTE.

SIR,—The fate of the Naval Medical Supplemental Fund is a subject of deep interest to every medical officer in the Service; and, therefore, although your space is much occupied, I trust that you will grant admission to a few observations regarding it.

The capital of the Fund amounts to 65,000*l.*, and the interest to above 2000*l.* per annum.

"A Director," in his published letter to the Secretary of the Admiralty (a copy of which you have no doubt received), finds fault with the committee for proposing to "sink and sacrifice" the whole of this capital and interest for the benefit of 300 living individuals, viz., the present widows and the prospective widows of the insured members; and he submits that a stop should be put without delay to a scheme so violent and uncalled for, and ventures to suggest a more moderate course of procedure, by which the capital may be saved for the benefit of the widows of the medical officers of the Navy in all time coming, without any other claim on their part than the fact that they are the widows of medical officers who have served Her Majesty in the Navy—no matter in what rank.

The annuities derivable at present from the Fund are made up to 26*l.* 13*s.* 4*d.* by the premiums of insured members and Government securities, together with small compulsory contributions from the medical officers generally. The great grievance is this small amount of compulsion, to do away with which so great a sacrifice as that of the whole capital of the Fund has been recommended.

Now, let us see what benefit the capital alone would confer upon the widows were it preserved, as "a Director" proposes, and then we shall be better able to see the extent and amount of the sacrifice recommended by the committee. The interest is 2000*l.* per annum. "He who runs may read," and see that this alone would give to 100 widows, each an annuity of 20*l.* per annum; and it is probable that the really necessitous widows would never exceed that number.

I will not further refer to the painful and humiliating reason assigned for the attempt to waste so much valuable property, but ask, with all submission, if some plan should not be devised and energetically carried out for the purpose of preserving such a nucleus of benevolent help to the needy in all time coming. The gradual termination of the fund with the view of preserving the capital, is surely deserving of the deepest consideration by the medical officers themselves, as well as by the First Lord of the Admiralty and the Secretary of the Admiralty—the patron and president *ex officio*.

Let us hope that the wiser class of medical officers will secede from the rash and inconsiderate, and assist the well-meant proposal of "A Director."—I am, &c., A READER.

THE MILITIA.

Suffolk Artillery. A detachment proceeds from Fort-Gomer to Marchwood, to relieve the Durham Militia Artillery stationed here.

1st Stafford Militia proceed from Portsmouth to Newcastle-on-Tyne.

The Durham Artillery has left Portsmouth for Plymouth.

The City of Dublin Artillery has moved from Portsmouth to Devonport. Its strength is 2 field-officers, 4 captains, 7 subalterns, 4 staff, 25 sargents, 7 drummers, and 353 rank and file.

The Militia Gazette.

WAR OFFICE, PALL MALL, SEPTEMBER 11.

Royal Sherwood Foresters, or Nottinghamshire, Regiment of Militia—Captain Donald Sinclair to be Quartermaster, from the 9th of June last.

Denbighshire Wing of the Royal Denbighshire and Flintshire Militia—Hallam Moore Dixon, Esq., L.R.C.P., to be Surgeon, vice Churchill, resigned.

5th Regiment of West York Militia—Lieutenant Edward Conyers Dawson to be Captain, vice Littlejohn, resigned.

WAR OFFICE, PALL MALL, SEPTEMBER 14.

Northumberland Regiment of Militia Artillery—Resignation.—Her Majesty has accepted the resignation of Captain Weston.

Memoranda—3rd Regiment (Light Infantry of West York Militia)—Her Majesty has been graciously pleased to accept the resignation of the Commission held by Lieutenant Gordon James Douglas.

4th Regiment of West York Militia—Lieutenant Henry Barrow, and Ensign Edward Litton Holmes, who were absent without leave from the recent training of this Regiment, have been removed from the strength of the Corps.

Memorandum—The following is substituted for the Notice which appeared in the *Gazette* of the 7th instant:—The Queen has been graciously pleased to accept the resignation of the Commission held by Surgeon Henry Francis Coley in the Hertfordshire Militia.

VOLUNTEERS.

METROPOLITAN.

1ST CITY OF LONDON RIFLES.—This corps, to the number of some 400 or 500, marched out on Saturday from head-quarters to the Regent's Park, for battalion and light infantry drill, and field exercise, under the command of Colonel Hicks, and acquitted themselves with their usual excellence.

1ST (VICTORIA) MIDDLESEX RIFLES.—On Saturday a detachment of this regiment again assembled at Kilburn at three o'clock, and marched out to Wormwood Scrubbs, under the command of Captain Greenhill (who has qualified at Hythe as a marksman), to repeat the practice in judging distance, &c. The instruction was conducted by Sergeant-Major Abbott. Some of the volley firing was very good, and would not have disgraced the "regulars." The regiment dispensed with the attendance of their band, being preceded by some half-dozen buglers only, who played them to and from the ground; and they have also dispensed with their own full-dress uniforms and shakos generally worn on all marchings out, substituting for them the undress and forage cap, which to our taste has a smarter and more serviceable look about it, and must certainly conduce to the comfore of the men themselves.

7TH MIDDLESEX (ISLINGTON) RIFLES. — On Tuesday afternoon the interesting ceremony of the presentation of a silver bugle to this corps by the ladies of Islington came off in the grounds of Thomas Hale, Esq., Lawn House, Holloway Road, in the presence of a large number of persons, amongst whom were a brilliant assemblage of ladies. About half-past five, p.m., the corps, accompanied by their company of cadets, and headed by their band, under the command of Captain Ebsworth, marched into the ground to the part where the presentation was arranged to take place, and having formed three sides of a square, Mrs. Hale, attended by Mr. H. W. Elder, of Topsfield Hall, Hornsey, entered the square, followed by a select number of ladies, and gracefully presented the bugle, with the appropriate remarks.

20TH (EUSTON SQUARE) MIDDLESEX RIFLES.—Five companies of this corps, accompanied by their band, marched out to Hampstead Heath on Saturday last, where they were put through battalion and light infantry drill by their Commandant, Lieut.-Colonel Bigge. The following is the programme of the arrangements for the ensuing week:—Company and position drill, snapping caps, aiming and blank firing—Monday and Friday at Messrs. Collard's establishment, Oval Road; Tuesday and Thursday at the Cattle Market, from 6 p.m., under an officer and musketry instructor—undress. Squad drills—Monday, Tuesday, Wednesday, Thursday, and Friday, from 7 to 9 p.m., at the Armoury, Euston Station, under Sergeant-Major Box, late of the 57th; Monday, Wednesday, and Friday, from 6 to 8 p.m., at Sir William Cubitt's establishment, Gray's Inn Road—undress. General parade with band—Saturday to Hampstead Heath for battalion drill, leaving Euston Station at 3·30, p.m.—full dress, with shako.

22ND (QUEEN'S WESTMINSTERS) MIDDLESEX RIFLES.—This corps, which seems for the last week or two to have devoted itself rather to the enjoyment of field sports than to active drill on Saturdays, mustered strongly on Saturday last at the Crystal Palace, to witness races and sports of various descriptions for prizes amongst the cadets.

28TH (LONDON IRISH) MIDDLESEX RIFLES.—The men of this fine corps marched out on Saturday afternoon for the purpose of practising blank cartridge firing in Hyde Park.

29TH (NORTH) MIDDLESEX RIFLES.—On Saturday this corps marched out from its new head-quarters in the Mornington Road, Camden Town, to the Regent's Park, for battalion drill, and there was a very good muster. The cadet corps is progressing very favourably, and the youths are attentive to the drill.

1ST SURREY (JUVENILE) RIFLES.—This successful little corps, now numbering upwards of 80 in its ranks, passed Friday at Greenwich, being honoured with the special permission of the Governor of the Hospital, Admiral Sir G. Gordon, to march with its colours and band playing through the hospital, greatly to the gratification of the boys, and also of the veterans, who congregated to witness the spectacle, after which the band played in front of the Governor's house by his own wish. After receiving the commendations of the Governor on their performance and general appearance, these juvenile riflemen marched to Blackheath, where they spent the remainder of the day at cricket, &c.

7TH (SOUTHWARK) SURREY RIFLES.—This corps assembled on the parade ground in front of the Sessions-house, Newington, on Saturday afternoon, at 5 o'clock, as usual. Major Parratt, the adjutant, was present, and appeared to have entirely got over the effect of his recent fall.

19TH (ROUPELL'S) SURREY RIFLES.—The members of this corps, about 400, commanded by Major Roupell, accompanied by their own band and the drum and fife band of the Scots Fusilier Guards, marched to Streatham Common on Saturday afternoon, where they went through various evolutions and fired several volleys.

CHESHIRE.

The great Cheshire rifle prize meeting is advertised to be held on the 19th and 20th of September at Leasowe Common, on the practice-ground of the 1st and 2nd Cheshire Rifle Companies. It is patronised by the Lord-Lieutenant of the county (the Marquis of Westminster), Lord Combermere, Earl of Shrewsbury and Talbot, the Members for the county, and other influential noblemen and gentlemen connected with the county. There is a local committee, consisting of the officers of the different Volunteer companies in the neighbourhood, and other persons interested in the movement. The value of the prizes that will be offered is nearly 300*l.*, presented by various persons in and about Birkenhead.

DURHAM.

2ND (SEAHAM) DURHAM ARTILLERY.—This corps is now making steady and satisfactory progress in drill. A permanent adjutant (Mr. M'Cafferty), late of the Royal Artillery, has been appointed, and he appears to be taking a most active and efficient part in instructing the officers and men in their duties.

3RD (GATESHEAD) DURHAM RIFLES.—On Saturday evening the presentation to this corps—by the sisters of the officers—of a silver bugle took place. Having formed a hollow square, the bass drum being turned up in the centre, Lieutenant Banning (in the absence of Captain Wailes, from indisposition) stepped forward, when Mrs. Kirwood presented the bugle with a very appropriate address.

GLASGOW.

CITIZEN RIFLES.—At a meeting of the committee promoting the cheap uniform movement, for the purpose of making the Volunteer institution a permanent one, open to all classes, which was held at Glasgow on Thursday, a uniform was produced, worn by a well-known captain of Volunteers, the expense of which was only 14*s.* 6*d.* The uniform consisted of a green tunic, trousers, and cap, faced and trimmed with red. It has a smart and soldierly appearance, and will wear well. The whole equipment, which was exhibited on the occasion, including a serviceable waist-belt, with bayonet frog, ammunition service pouch, and cap pouch, can be had at the cost of 21*s.* 6*d.* A corps under the name of the "Citizen Rifles," will be immediately enrolled, and commence drill forthwith. This corps will be composed of all classes, and be, as it well may, entirely self-supporting.

GLOUCESTERSHIRE.

CHELTENHAM.—A rifle shooting competition is to take place here on the 26th of this month, and the rules and conditions appear well calculated to ensure a successful issue. The prizes are numerous, and the arrangements generally have evidently been made with tact and care. Captain J. G. D. Marshall, Adjutant of the 2nd battalion of Gloucestershire Rifle Volunteers, is the honorary secretary.

HAMPSHIRE.
